CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

Before 3000 BCE man had learnt to write and along the “fertile crescent”, the valleys of the Tigris, Euphrates and Nile rivers, agricultural surpluses led to the development of the first civilisations. This historical period became known as “The Bronze Age” with the widespread development of bronze, an alloy of copper and tin/arsenic, which results in stronger and sharper weapons.

The Sumerian civilisation arose between the lower Tigris and Euphrates and dominated until the conquests of Sargon of Akkad in the 24th century BCE. The Akkadians were a Semitic tribe from Mesopotamia. Sargon seized power in the Sumerian city-state of Kish and then won the primacy of Sumer from Lugalzagesi of Uruk. He subsequently led expeditions against the Mari, and into Syria, Lebanon and Turkey. His grandson, Naram-Sin, added Susa, a capital of the Elamites to an empire that stretched from the Mediterranean to the Persian Gulf. During the period the Sumerians are trading with the Indus Valley Civilisation, known to the Sumerians as the Meluhha.

Shortly after 2200 BCE, the Gutti, barbarians from the Zagros mountains, overran Akkad and put an end to the Akkadian Empire. In the south, Sumerian kings were able to restore order. A king of the Sumerian city of Uruk expelled the Gutti. The Third Dynasty of Ur then created an empire almost as extensive as that of the Akkadians. This was ended by an Elamite army that sacked Ur. Nomadic Amorites seized power and for the next two-and-a half centuries, a pattern of competing city-states was established. Two new cities emerged during this period who were to become significant in later history. The first was Babylon, the second was Assur. Towards the end of the 18th century BCE Hammurabi of Babylon brought all Mesopotamia under his influence. A Sumerian dynasty, the dynasty of Sealand, resisted. It was based in the marshland to the south of Sumer. Forty years after the death of Hammurabi, Assur regained its independence and the Old Kingdom of Assyria was established. The Kassites, another mountain tribe of the Zagros, moved into central Mesopotamia.

Around 1595 BCE, Mursilis I, king of the newly created Hittite monarchy, marched from central Anatolia over the Taurus mountains, took Aleppo, marched down the Euphrates and captured Babylon. It was the high point of the Hittite Old Kingdom. At this point Mesopotamia was split four-ways, Hurrians in the north-west, Assyrians in the north-east, Kassites ruling Babylonia and the Dynasty of Sealand in the south.

In the Nile Valley, the Egyptian civilisation had developed at the same time. Threatened in the south by Nubia and in the west by the Libyan tribes, Egypt developed a strong centralised monarchy under the Pharaohs. The Old Kingdom (2686 to 2181 BCE) was when the pyramids were created. This was followed by a chaotic period known as the First Intermediate Period (2181 to 2055 BCE). During this time rival states emerged in the North and South of Egypt. These two kingdoms would eventually come into conflict, with the Theban kings conquering the north, resulting in reunification of Egypt under a single ruler during the second part of the eleventh dynasty. Then followed the Middle Kingdom (2055 to 1650 BCE) until Egypt fell to the Hyksos. The Hyksos were Amorites who invaded Egypt from Syria and Canaan. This period is known as the Second Intermediate Period.

A NOTE ON CHRONOLOGY

The first completely reliable date in history is 763 BCE. In the tenth year of Ashur Dan III a solar eclipse was observed and recorded. Modern astronomers can calculate the date of this eclipse to 763 BCE. For events after this date the evidence from Assyria and Babylon can be cross-referenced with Greek historians to provide precise dating. Before this event, it is not possible to date events precisely.

These lists and history notes generally follow traditional chronology. An alternative chronology of the ancient Near East was developed by English Egyptologist David Rohl and other researchers. It is best known from the book “A Test of Time” published in 1995. Problems with the chronology in the Egyptian Third Intermediate Period led to the proposal to bring forward conventional dating of earlier periods by up to 350 years.

The new chronology is not widely accepted in academic circles. It introduces as many problems as it solves. It does highlight that the traditional chronology contains issues, particularly during the Third Intermediate Period. It is also likely that the “Dark Ages” period between 1100 and 800 BCE may be shorter than the traditional chronology might suggest.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

EARLY SUMERIAN

3000 TO 2801 BCE

HISTORICAL NOTES

The first records originate from Sumer where we know that the land was divided into a couple of dozen city-states whose priest-kings contended for an overall supremacy.

TROOP NOTES

Archaic proto-cuneiform texts of the late 4th millennium seem to list large bodies of archers under military officers, possibly the first regular army.

HISTORICAL ENEMIES

Early Sumerian 1101; Early Nomad 1103; Highland Raiders 1104.

SUMERIAN CITY STATES

The leading city states included Adab, Kish, Lagash, Umma, Ur, and Uruk. Other cities included Bad-tibira, Eridu, Girsu, Kutha, Larsa, Shuruppak, and Sippar.

OLD OR MIDDLE KINGDOM EGYPTIAN

3000 TO 1550 BCE

HISTORICAL NOTES

This list covers the armies of Egypt from the pre-dynastic period through to the 17th Dynasty but excluding the 15th and 16th dynasties which are covered by the Hyksos list. The Old Kingdom is usually taken as the period from 2686 to 2181 BCE covering the 3rd to 6th dynasties. Towards the end of this period the regional governors increased their power, and the kingdom was afflicted with droughts. This led to the First Intermediate Period of relative anarchy and cultural decline. In around 2050 BCE Mentuhotep ushered in the Middle Kingdom. During this period Egypt advanced southwards into Nubia and eastwards into Palestine and Lebanon. At the end of the 12th Dynasty, around 1802 BCE, the country once again became divided. In around 1650 BCE the Hyksos seized Lower Egypt which they held until 1535 BCE. A native dynasty retained control of Upper Egypt in the south. Ahmose I completed the reconquest of Lower Egypt which ushered in the New Kingdom.

TROOP NOTES

With the rich Nile valley, Egypt could draw on a large manpower for her armies. Hereditary archers and menfat "shock troops" were supported by conscripts. The centre of the battle line would consist of massed close fighters in columns supported by separate massed archer formations. Lighter troops such as javelinmen or tribal auxiliaries would form up on the flanks of the array.

At the time of the Sixth Dynasty there was no permanent standing army, but Nubian mercenaries are recorded.

HISTORICAL ENEMIES

Old or Middle Kingdom Egyptian 1102; Early Nomad 1103; Early Libyan 1105; Early Syrian 1108; Nubian 1110; Later Amorite 1115; Hyksos 1202.

RULERS

The title of pharaoh was not used until the New Kingdom. It originally meant "great house", a royal palace.

The Early Dynastic Period starts c. 3150 and continues to 2686 BCE.

The First Dynasty ruled from around 3100 to 2890 BCE. Kings included Narmer, Hor-Aha, Djer, Djed, Merneith, Den, Adjib, Semerkhet and Qa'a.

The Second Dynasty ruled from 2890 to 2686 BCE. Kings included Hotepsehkemwy, Nebra, Nynetjer, Senedj, Seth-Peribsen, Sekhemib, Neferkara I and Khasekhemwy.

The Old Kingdom was a long period of stability from 2686 to 2181 BCE.

The Third Dynasty ruled from 2686 to 2613 BCE. Kings included Nebka, Djoser and Huni.

The Fourth Dynasty ruled from 2612 to 2496 BCE. Kings included Sneferu, Khufu, Djedefre, Khafre, Menkaure, and Shepseskaf.

The Fifth Dynasty ruled from 2496 to 2345 BCE. Kings included Immaat, Sahure, Neferirkare, Neferefre, Shepseskare, Nyuserre, Menkauhor, Djedkare and Unas.

The Sixth Dynasty ruled from 2345 to 2181 BCE. Kings included Teti, Userkare, Pepi I Meryre, Merenre and Pepi II Neferkare.

OLD OR MIDDLE KINGDOM EGYPTIAN

RULERS (CONTINUED)

The First Intermediate Period was an interval of disarray and chaos from 2183 to 2060 BCE. The Seventh, Eighth, Ninth, Tenth and Eleventh Dynasties ruled during this time. Mentuhotep II ruled Upper Egypt from 2060 to 2040 BCE before reuniting both Upper and Lower Egypt to form the Middle Kingdom that lasted from 2040 to 1802 BCE. The Eleventh Dynasty began during the First Intermediate Period. Rulers of the Middle Kingdom included Mentuhotep II and Mentuhotep III. The Twelfth Dynasty ruled from 1991 to 1802 BCE. Kings included Amenemhat I, Senusret I, Amenemhat II, Senusret II, Senusret III, Amenemhat III, Amenemhat IV and Sobekkare (the first attested Queen). The Second Intermediate Period ran from 1802 to 1550 BCE. The Thirteenth Dynasty couldn't retain control of the whole of Egypt and a breakaway Canaanite Fourteenth Dynasty ruled the eastern Delta. The Hyksos who comprised the Fifteenth Dynasty conquered the 14th and then seized Upper Egypt from the Sixteenth Dynasty. A separate line of kings may have independently ruled Abydos. The Seventeenth Dynasty ruled Upper Egypt from 1650 to 1550 BCE until Ahmose I founded the New Kingdom.

HIGHLAND RAIDERS

3000 TO 1001 BCE

HISTORICAL NOTES

This list covers early upland peoples from the Zagros mountains, including Guti, Lullubi, early Kassites and Hurrians.

The Guti were a prominent nomadic tribe who lived in the Zagros mountains in the time of the Akkadian Empire. Lullubum appears in historical times as one of the lands Sargon the Great subjugated within his Akkadian Empire, along with the neighbouring province of Gutium. From around 2190 BCE the Gutians overran a large portion of Mesopotamia and ruled some cities as a warrior aristocracy. They also formed alliances with unconquered cities. After the Akkadian Empire fell to the Gutians, the Lullubians rebelled against the Gutian king Erridupizir. In the second millennium BCE, the term "Lullubi" or "Lullu" seems to have become a generic Babylonian and Assyrian term for "highlander", while the original region of Lullubi was also known as Zamua. However, the "land of Lullubi" makes a reappearance in the late 12th century BCE, when both Nebuchadnezzar I of Babylon and Tiglath-Pileser I of Assyria claim to have subdued it.

The Kassites first appeared in the annals of history in the 18th century BCE when they attacked Babylonia in the 9th year of the reign of Samsu-iluna, the son of Hammurabi. The first known Hurrian kingdom emerged around the city of Urkesh (modern Tell Mozan) during the third millennium BCE. In the late 19th and 18th centuries BCE they migrated west and came into conflict with the early Hittite kings. By the 13th century BCE all the Hurrian states had been vanquished by other peoples.

TROOP NOTES

Gutian and Lullubi warriors are shown without shields.

EARLY LIBYAN

3000 TO 651 BCE

HISTORICAL NOTES

This list covers all independent Libyan armies based beyond the western borders of Egypt until the introduction of four-horse chariots. A period of increased desertification started around 3900 BCE and intensified again around 2200 BCE. The Libyans were a constant threat to the Egyptians of the Nile valley. Around 1000 BCE the Meshwesh and Libu invaded and settled until eventually a Libyan dynasty ruled Egypt.

TROOP NOTES

Libyan troops of this period are shown without shields. Initially equipped only with javelins, throwing sticks and a few bows, they later became better equipped with increased bow use, some chariots from Egypt and then swords. The Meshwesh developed a reputation for invincibility.

HISTORICAL ENEMIES

Old or Middle Kingdom Egyptian 1102; Early Libyan 1105; Nubian 1110; Hyksos 1202; New Kingdom Egyptian 1208; Libyan Egyptian 1309; Kushite Egyptian 1407; Saitic Egyptian 1410.

LIBYAN TRIBES

The Tehenu are first mentioned in pre-dynastic Egyptian records. They seem to have lived west of the Delta. The Libu or Rebu are first mentioned in the reign of Ramesses II. They seem to have lived in the area the Greeks called Cyrenaica. The Meshwesh are first mentioned in the reign of Amenhotep III. They took control of Egypt throughout the 22nd and 23rd Dynasties.

SUMERIAN

2800 TO 2501 BCE

HISTORICAL NOTES

This list covers Sumerian armies from the introduction of the 4-wheeled battle car and the adoption of spearmen until the introduction of body shields and shield bearers. Inter-city warfare was endemic.

TROOP NOTES

By 2800 BCE, the bulk of a Sumerian army was close order foot with long spears held in both hands. These initially lacked shields, relying instead on a leather or thick felt cape, studded with copper discs. Guardsmen were equipped with heavy axes. Four-wheeled battle cars were drawn by four onager-donkey cross equids.

HISTORICAL ENEMIES

Early Nomad 1103; Highland Raiders 1104; Sumerian 1106; Elamite 1107; Early Syrian 1108.

SUMERIAN CITY STATES

The leading city states included Adab, Kish, Lagash, Umma, Ur, and Uruk. Other cities included Bad-Tibira, Eridu, Girsu, Kutha, Larsa, Marad, Nippur, Shuruppak, and Sippar.

SUMERIAN KINGS

The Sumerian King List is an ancient cuneiform text. It is considered unreliable but several kings are known from other sources. These include:

Kish	Uruk	Ur	Lagash	Umma
Enmebargesi	Gilgamesh	A-Imdugud	En-hegal	Pabilgagaltuku
Aga		Ur-Pabilsag	Lugalshaengur	Ush

ELAMITE

2800 TO 1100 BCE

HISTORICAL NOTES

This list covers the armies of Elam. It also covers eastern highland kingdoms such as Markhashi, Awan and Aratta and the semi-nomadic cultures of trans-Elamite Bactria and Margiana from 2500 to 1800 BCE.

Elam was a threat to its western neighbours when strong and a tempting target for conquest when weak.

TROOP NOTES

Elamite armies were noted for their archers.

HISTORICAL ENEMIES

Highland Raiders 1104; Sumerian 1106; Indus Valley Civilisation 1109; Later Sumerian 1110; Akkadian Empire 1112; Neo-Sumerian 1113; Isin-Larsa 1114; Later Amorite 1115; Dynasty of Sealand 1116; Mitanni 1205; Kassite Babylonian 1206; Middle Assyrian 1211; Early Vedic Indian 1215; 2nd Dynasty of Isin 1301.

RULERS

The Awan is the earliest known royal dynasty of Elam. Kings of the Awan Dynasty include Hishep-ratep, Luh-ishan and Emahshini.

After Elam achieved independence at the collapse of the Akkadian Empire, rulers included Epirmupi, Ill-ishmani and Puzur-Inshushinak.

The Skimashki Dynasty ruled Elam from 2050-1850 BCE. For much of this period Elam was divided. Rulers included Erbatl I and Kindattu.

The Sukkalamah Dynasty ruled Elam from 1980-1500 BCE. Rulers included Siwe-Palar-Khuppak.

A series of kings referred to as the Kidinuids (named after Kidinu) ruled from c.1500-1400 BCE.

They were followed by the Igi-halkid Dynasty (named after Igi-halki) whose rulers included Kidin-Hutran II.

The Shutukrid Dynasty ruled 1200-1000 BCE and included Shutruk-Nahhunte I, Kutir-Nahhunte II, Shilhak-Inshushinak I and Hutelutush-Inshushinak.

EARLY SYRIAN

2700 TO 2200 BCE

HISTORICAL NOTES

This list covers the early Syrian states including Mari and Ebla. They were influenced by Sumerian culture. It also covers Syrian allies until the invasion of the Amorites in 1894 BCE. At its greatest extent, Ebla controlled an area roughly half the size of modern Syria. One of the most important of these vassals was Armi, but more than 60 vassal kingdoms and city states are known. Ebla may have been sacked by either Mari or Sargon of Akkad and later rebuilt. Mari engaged in a long war with its rival Ebla. Mari was destroyed and burned by Sargon of Akkad but rebuilt and governed by the Akkadians.

TROOP NOTES

Syrian armies included archers and nomadic javelinmen as well as following Sumerian styles of fighting.

HISTORICAL ENEMIES

Old or Middle Kingdom Egyptian 1102; Early Nomad 1103; Highland Raiders 1104; Sumerian 1106; Early Syrian 1108; Later Sumerian 1110; Akkadian Empire 1112.

RULERS

Two tablets listing Kings of Elba have been found. One tablet mentions 10 names, the other 33 names. These include Kun-Damu, Adub-Damu, Igrish-Halam, Irkab-Damu and Isar-Damu. Kings of Mari are mentioned in the Sumerian King Lists. The names for the First Kingdom bear no resemblance to any historically attested monarchs. 12 names are referred to as the Second Kingdom of Mari and approximately date between 2450 and 2300 BCE. These include Ikun-Shamash, Ikun-Shamagan, Ansud, Sa’umu, Ishtup-Isar, Ikun-Mari, Iblul-Il, Nizi, Enna-Dagan, Ikun-Ishar, Hidar, and Ishqi-Mari.

INDUS VALLEY CIVILISATION

2600 TO 1700 BCE

HISTORICAL NOTES

The Indus Valley or Harappan Civilisation flourished between 2600 and 1700 BCE. They formed large urban centres and traded extensively (seals from Harappa have been found in Ur). It is believed that these are the people referred to as Meluhha in Sumerian texts.

TROOP NOTES

Archaeology has recovered slingshot, arrows, and spearheads. Guardsmen are noted on trading ships. There is no evidence for war elephants or chariots.

NUBIAN

2600 TO 1280 BCE

HISTORICAL NOTES

Nubia was the region of the Nile valley south of the first cataract. It served as a trade corridor between Egypt and tropical Africa. During this period, Nubia is divided into three categories: A-group culture (to 2800 BCE); C-group culture (2300 to 1600 BCE) and the Kingdom of Kerma (2500 to 1500 BCE).

TROOP NOTES

Nubia was noted for its archers.

AKKADIAN EMPIRE

2334 TO 2193 BCE

HISTORICAL NOTES

The Akkadian Empire was centred in the city of Akkad and was the first to unite Akkadian and Sumerian speakers under one rule. It controlled all of Mesopotamia. It was founded by Sargon of Akkad 2334 BCE and lasted for 180 years. Akkadian armies campaigned far beyond Mesopotamia into Syria, Cyprus and the Mediterranean, Anatolia, highland Iran, and down the Gulf to Oman. It was eventually overrun by the Gutis and Lullubi.

TROOP NOTES

This period saw the introduction of the first chariots.

HISTORICAL ENEMIES

Early Nomads 1103; Highland Raiders 1104; Elamites 1107; Early Syrians 1108; Indus Valley Civilisation 1109; Later Sumerians 1110; Akkadian Empire 1112.

RULERS

The Sargonic dynasty ruled the Akkadian Empire. The rulers were:

Sargon	2334 – 2279 BCE
Rimush	2278 – 2270
Manishtushu	2269 – 2255
Naram-Sin	2254 – 2218
Shar-Kali-Sharri	2217 – 2193

After the death of Shar-Kali-Sharri there was a chaotic period in which four rulers took the throne: Igigi, Imi, Nanum and Illulu. The last two rulers were:

Dudu	2189 – 2169 BCE
Shar-Kali-Sharri	2168 – 2154

At this time Akkad was overthrown by the Gutians.

NEO-SUMERIAN

2200 TO 2004 BCE

HISTORICAL NOTES

After the anarchy following the collapse of the Akkadian Empire there followed a "Sumerian Renaissance". Armies of the Third Dynasty of Ur drove out the Gutti and Lullubi and achieved stability. It rose to prominence 2112 BCE and fell to an Elamite invasion in 2004 BCE.

TROOP NOTES

The large rectangular shields of former times were replaced towards the end of the dynasty by lighter and more manageable Amorite shields.

HISTORICAL ENEMIES

ISIN-LARSA

2028 TO 1762 BCE

HISTORICAL NOTES

This list covers the southern Mesopotamian successor kingdoms of the Isin-Larsa period following the collapse of the Third Dynasty of Ur, including Hurrian influenced Eshnunna 2028 to 1762 BCE, Larsa 2025 to 1762 BCE, and the First Dynasty of Isin 2017 to 1787 BCE.

TROOP NOTES

All these kingdoms appear to have preserved a more substantial element of "Sumerian" military tradition for a longer period than other Mesopotamian states. Eshnunna was under Elamite and Hurrian influence. Although some bows started to appear on early chariots, the shooting weapon has been classified as javelin.

HISTORICAL ENEMIES

LATER AMORITE

1894 TO 1430 BCE

HISTORICAL NOTES

This list covers the armies of the mature, urbanised Amorite dynasties of Syria and Mesopotamia that developed out of the invading Amurru/Early Amorite hordes before the conquests of the Hittite king Mursilis I opened the way for Hurrian control. They include Yamhad, Carchemish, Qatanum (Qatna), Ebla, and especially the northern kingdom (or so-called Old Assyrian Empire) of Shamshi-Adad and his successors, 1813 to 1755 BCE, the First Dynasty of Babylon, 1894 to 1595 BCE (particularly during the reign of Hammurabi, 1792 to 1750 BCE), Mari until destroyed in 1759 BCE and Aleppo until destroyed in 1600 BCE.

TROOP NOTES

The new Amorite states basically combined Amorite tactics and equipment with Sumero-Akkadian wealth, culture, and technology. The outstanding change from previous civilised armies was the abandonment of standing in close ranks poking at the enemy with long spears. Levies from the powerful semi-nomadic Amorite tribes, in the north and west, such as the Hanu confederation with its Sim'alu ("northerner") and Yaminu ("southerner") branches, or the Sutu, were an important element of armies.

CHANGES FROM LAST VERSION

Extended the end date to include Assur until the Mitannian conquest.

DYNASTY OF SEALAND

1732 TO 1460 BCE

HISTORICAL NOTES

This list covers the "2nd Dynasty of Babylon" (although it was independent of Amorite-ruled Babylon) that was named for the province in the far south of Mesopotamia. The kings bore pseudo-Sumerian names. There is circumstantial evidence that they briefly ruled Babylon itself. A fort has recently been discovered and excavated in southern Iraq.

TROOP NOTES

There is little evidence for the armies of this dynasty except for the fact they were a constant threat to the kings of Babylon.

HISTORICAL ENEMIES

Early Nomad 1103; Elamite 1107; Later Amorite 1115; Kassite Babylonian 1206.

RULERS

Kings of the Sealand Dynasty include Illima, Ittili, Damqili, Iski, Sussi, Gulkisar, Pes-gal, A-a-dàra, Ekurul, Melamma and Eaga.

BATTLES AND CAMPAIGNS

Revolt of Ilum-ma-ili against Babylon (under Samsu-iluna). First battle indecisive, second a victory for Ilum-ma-ili who founds the Dynasty of Sealand	1732 BCE
Invasion of Sealand by Babylon (under Abi-eshh) defeated by Ilum-ma-ili	1705
Capture of Babylon (under Samsu-ditana) by Sealand (under Gulkisar)	Late 17th century
Conquest of Sealand (under Ea-gamil) by Kassites (led by Ulam-Burias)	1460
