CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The ninth century BCE witnessed a new Assyrian expansion. Some of the Syro-Hittite states were conquered and territories including Israel and the Phoenician cities of Tyre and Sidon were paying tribute. The Phoenicians established a trading empire across the Mediterranean and went on to found colonies, most notably Carthage in North Africa.

To the north of Assyria, the state of Urartu emerged. To the north of Urartu, the Cimmerians appeared from the Pontic steppe and threatened both Urartu and the Phrygian kingdoms. Next to Urartu in north west Iran were the Mannaiaans. Other tribes including the Medes and Persians appeared on the Iranian plateau. Beyond Babylon the state of Elam also emerged from the dark age.

In 745 BCE, the Assyrian kingdom was once again invigorated with the ascension of Tiglath-Pileser III. The Assyrians defeated the Urartians and conquered both Babylon and Damascus. They conquered much of the Fertile Crescent and obtained vassalage from most of their neighbours. In Egypt, the Kushites advanced southwards and overthrew the Libyan dynasties. The Kushites were however unable to resist the Assyrians who established a puppet king as Pharaoh.

In 702 BCE, the Cimmerians defeated and killed the Assyrian king Sargon II. They invaded and conquered Phrygia and weakened the kingdom of Urartu with their constant attacks. They however overextended themselves in invading Lydia and were themselves defeated. This left the Lydians as the major power in Western Anatolia.

In the seventh century BCE, the Assyrian empire tore itself apart with civil wars. A coalition of Medes, Scythians and Babylon overthrew the Assyrians and destroyed Nineveh in 612 BCE. The Medes seized much of the north whilst the Babylonians seized the Assyrian heartland and under Nebuchadnezzar II control was in full control of Babylonia, Assyria, Phoenicia, Israel, Palestine, northern Arabia, and parts of Asia Minor. Nebuchadnezzar II died in 562 BCE and a succession of weak kings followed. The scene was set for Cyrus the Great of Persia to seize the Median Empire, capture Babylon and establish the Achaemenid Persian empire.

A NOTE ON CHRONOLOGY

The first completely reliable date in history is 763 BCE. In the tenth year of Ashur Dan III a solar eclipse was observed and recorded. Modern astronomers can calculate the date of this eclipse to 763 BCE. For events after this date the evidence from Assyria and Babylon can be cross-referenced with Greek historians to provide precise dating. Before this event, it is not possible to date events precisely.

These lists and history notes generally follow traditional chronology. An alternative chronology of the ancient Near East was developed by English Egyptologist David Rohl and other researchers. It is best known from the book “A Test of Time” published in 1995. Problems with the chronology in the Egyptian Third Intermediate Period led to the proposal to bring forward conventional dating of earlier periods by up to 350 years.

The new chronology is not widely accepted in academic circles. It introduces as many problems as it solves. It does highlight that the traditional chronology contains issues, particularly during the Third Intermediate Period. It is also likely that the “Dark Ages” period between 1100 and 800 BCE may be shorter than the traditional chronology might suggest.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

PHRYGIAN

850 TO 676 BCE

HISTORICAL NOTES

During the 8th century BCE, the Phrygian kingdom with its capital at Gordium in the upper Sakarya River valley expanded into an empire dominating most of central and western Anatolia and encroaching upon the larger Assyrian Empire to its southeast and the kingdom of Urartu to the northeast. Midas may have been a king of Phrygia. The Phrygian kingdom was overwhelmed by Cimmerian invaders in the seventh century BCE.

TROOP NOTES

Little is known about Phrygian armies. They appear to have consisted of chariotry, cavalry, spearmen, and archers similar to neighbouring states.

HISTORICAL ENEMIES

Dark Age Greek 1304; Highland States 1308; Later Syro-Hittite 1310; Early Neo-Assyrian Empire 1314; Early Urartian 1315; Cimmerian 1404; Urartian 1405; Neo-Assyrian Empire 1406; Lydian 1408; Later Sargonid Assyrian 1409.

RULERS

The only attested Phrygian king is Mita (Midas) who ruled Phrygia from the late 8th century to 676 (or 695) BCE when Gordium was destroyed. His father is recorded as Gordias.

CIMMERIAN

750 TO 630 BCE

HISTORICAL NOTES

The Cimmerians probably originated on the Pontic Steppe and invaded Anatolia by crossing the Caucasus. They are first mentioned in Assyrian annals in 714 BCE when they assisted Sargon II to defeat the kingdom of Urartu. They also seemed to have occupied Mannai territory. In around 696 or 695 BCE they conquered Phrygia. In 679 BCE they invaded Assyrian territory but were defeated by Esarhaddon of Assyria. They were defeated again by Ashurbanipal. In 654 or 652 BCE they invaded Lydia killing the Lydian king Gyges. Ten years later they captured Sardis and raided some of the Greek cities in Ionia. Their success was short-lived, and they were expelled by Alyattes II. This defeat marked the end of Cimmerian power.

TROOP NOTES

The Cimmerians were a classic horse archer army with a best equipped nobility.

URARTIAN

746 TO 585 BCE

HISTORICAL NOTES

In 714 BCE, the Urartu kingdom suffered heavily from Cimmerian raids and the campaigns of Sargon II. The main temple at Mushashir was sacked, and the Urartian king Rusa I was crushingly defeated by Sargon II at Lake Urmia. Rusa's son Argishti II (714 to 685 BCE) restored Urartu's position against the Cimmerians, however it was no longer a threat to Assyria and peace was made with the new king of Assyria Sennacherib in 705 BCE. This in turn helped Urartu enter a long period of development and prosperity, which continued through the reign of Argishti's son Rusa II (685 to 645 BCE).

After Rusa II, however, the Urartu grew weaker under constant attacks from Cimmerian and Scythian invaders. Late during the 7th century BCE, Urartu was invaded by Scythians and Medes. In 612 BCE, the Median king Cyaxares the Great together with Nabopolassar of Babylon and the Scythians conquered Assyria after it had been badly weakened by civil war. The Medes then took over the Urartian capital of Van towards 585 BCE, effectively ending the sovereignty of Urartu.

TROOP NOTES

Urtarian armies may have been influenced by fighting the Cimmerians. Urtarian chariots may have had 4 horses but seem to have kept only 2 crew. In 743 BCE the Urtarians allied with the Syro-Hittite states of Kummuh, Arpad and Gurgum but were defeated by Tiglath-Pileser III.

NEO-ASSYRIAN EMPIRE

745 TO 681 BCE

HISTORICAL NOTES

When Tiglath-Pileser III ascended the throne civil war and pestilence were devastating the country. He invaded Babylonia and defeated its king Nabonassar. After subjecting Babylon to tribute, defeating Urartu, and conquering the Medes, Persians, and Neo-Hittites, Tiglath-Pileser III directed his armies into Aramea, of which large swathes had regained independence, and the commercially successful Mediterranean seaports of Phoenicia. He took Arpad near Aleppo in 740 BCE after a siege of three years, and razed Hamath. Azariah, king of Judah had been an ally of the king of Hamath, and thus was compelled by Tiglath-Pileser to do him homage and pay yearly tribute. In 738 BCE, Tiglath-Pileser III occupied Philistia and invaded Israel, imposing on it a heavy tribute. At the instigation of the king of Judah he attacked Damascus and forced tribute from the Arabs. In 729 BCE he captured the Babylonian king and was crowned the King of Babylon. In 725 BCE he died and was succeeded by Shalmaneser V. King Hoshea of Israel suspended paying tribute and allied himself with Egypt against Assyria in 725 BCE. This led Shalmaneser to invade Syria and besiege Samaria (capital city of Israel) for three years. Shalmaneser V died suddenly in 722 BCE, while laying siege to Samaria, and the throne was seized by Sargon II, the Turtanu (General) who quickly took Samaria and carried the people of Israel into captivity. Sargon II led a series of campaigns against Elam, Babylon, Carchemish, Media, Parsua, Mannaia and Urartu. As a result of his victories Cyprus gave allegiance and Phrygia offered friendship. In 705 BCE, Sargon was killed in battle while driving out the Cimmerians. He was succeeded by his son Sennacherib. In 701 BCE the Egyptians, Judah and Phoenicians formed an alliance against the Assyrians. Sennacherib defeated them. In 694 BCE he attacked Elam. In retaliation the Elamites installed a new ruler in Babylon. It took four years to retake the city which was then deliberately flooded by opening the canals. In 681 he was murdered by his own son.

TROOP NOTES

The conquered provinces were organized under an elaborate bureaucracy, with the king at the head. Each district paid a fixed tribute and provided a military contingent. The Assyrian forces at this time became a professional standing army.

KUSHITE EGYPTIAN

732 TO 593 BCE

HISTORICAL NOTES

The Twenty-fifth dynasty of Egypt is also known as the Kushite Empire. The rulers originating in the Nubian Kingdom of Kush. They had been extending their influence into Egypt for twenty years when Piye invaded in 732 BCE and defeated the combined might of several native Egyptian rulers. Piye made various unsuccessful attempts to extend Egyptian influence. In 720 BCE he sent an army in support of a rebellion against Assyria but was defeated by Sargon II. Shabaka supported another uprising against the Assyrians, but this was also defeated by Sargon II.

In 671 BCE Esarhaddon of Assyria, tired of attempts by Egypt to meddle, began an invasion. Taharqa was defeated, and Egypt conquered by Esarhaddon. Tarharqa fled to his Nubian homeland. Two years later he returned and seized control of Egypt as far north as Memphis. Ashurbanipal of Assyria sent a general with a small, well-trained army corps which easily defeated and ejected Taharqa from Egypt once and for all. A native Egyptian ruler, Psamtik I, was placed on the throne, as a vassal of Ashurbanipal of Assyria. He effectively united Egypt and when the Assyrian Empire began to tear itself apart was able to become independent.

TROOP NOTES

Kushite forces included archers, slingers, spearmen, chariotry and cavalry.

LYDIAN

687 TO 540 BCE

HISTORICAL NOTES

Gyges of Lydia seized the throne in around 687 BCE by assassinating the previous ruler Candaules. He devoted himself to consolidating his kingdom and making it a military power. The capital was relocated from Hyde to Sardis. In around 654 BCE the Cimmerians invaded Lydia and sacked Sardis. Gyges was killed. At the start of the 6th century BCE the Lydians came into conflict with the Medes who had conquered Assyria. After a war that had been going on for five years, a battle between the Medes and Lydians ended abruptly due to a solar eclipse on 28 May 585 BCE. By the peace treaty, the River Halys was agreed to be the border between the two empires. In 546 BCE the Lydian empire ended when Croesus attacked the Persian Empire of Cyrus II and was defeated.

TROOP NOTES

The strength of the army was in its cavalry which was equipped with spears.

LATER SARGONID ASSYRIAN

680 TO 609 BCE

HISTORICAL NOTES

In 681 BCE Sennacherib was succeeded by Esarhaddon. Esarhaddon had to defeat a rebellion south of Babylon instigated by the Elamites and Chaldeans. In 679 BCE he had to drive off a Cimmerian invasion of Cilicia. Defeating the Scythians, Cimmerians, and Medes he then turned his attention to Phoenicia. He raided Egypt in 673 BCE and two years later launched a full invasion that ended the Kushite empire. He then defeated Urartu and expanded down the Persian Gulf as far as Dilmun (Bahrain). This was Assyria's greatest territorial extent.

Ashurbanipal inherited the throne in 668 BCE and ruled for over 40 years. He continued to campaign in Egypt and installed a native Egyptian, Psamtik I, as a vassal king in 664 BCE. By 652 BCE the Egyptian was independent. Ashurbanipal had to face a rebellion from his older brother Shamash-shum-ukin which lasted until 648 BCE. Ashurbanipal set about punishing the Chaldeans, Arabs and Nabateans who had supported the revolt. Elam was invaded and Susa sacked. The state had been weakened and upon Ashurbanipal's death in 627 BCE, the empire began to disintegrate rapidly. A series of bitter civil wars broke out involving several claimants to the throne. In 620 BCE Nabopolassar finally captured Nippur, becoming master of Babylonia. In 616 BCE Cyaxares, the Median king, made an alliance with Nabopolassar and with the help of the Scythians and Cimmerians attacked Assyria. Nineveh was destroyed after a long siege in 612 BCE. Harran held out until 609 BCE, but an Assyrian Egyptian army was defeated by the Medes and Babylonians.

TROOP NOTES

The role of cavalry had reduced the role of chariots to a shock force. Four horse chariots carried a four-man crew. The cavalry had improved and became increasingly armoured. The infantry consisted of a professional standing army supported by regular provincial troops.

SAITIC EGYPTIAN

664 TO 525 BCE

HISTORICAL NOTES

Psamtik I appears to have been a member of the royal family in Sais, an Egyptian sub-kingdom of the Assyrians. After the kingdom was defeated, he fled to the Assyrian empire and returned to Egypt when the Assyrian king Assurbanipal drove the Kushite Egyptians south. He was placed as Pharaoh by the Assyrians but used the opportunity of the Assyrian civil wars in the 650s to become fully independent. He ruled for a total of 54 years. The dynasty (26th) were the last native dynasty to rule Egypt. In 570 BCE Apries was overthrown by Ahmose II and fled to Babylon. He returned with a Babylonian army in 567 BCE but appears to have been defeated and killed. The last of the dynasty, Psamtik III succumbed to a Persian invasion led by Cambyses II in 525 BCE.

TROOP NOTES

The main forces of Egypt at this time were provided by a warrior caste. They formed into separate dense blocks of spearmen and archers. Chariots now were drawn by 4 horses. Greek mercenaries were originally supplied by Gyges of Lydia but later recruited from Ionia and Caria.

ASSYRIAN BABYLONIAN

652 TO 648 BCE

HISTORICAL NOTES

Shamash-shum-ukin was the eldest son of Esarhaddon. When the Assyrian king Ashurbanipal inherited the throne, he held ritual power in Babylon. Friction grew between the two brother kings and in 652 BCE Babylon rebelled. Babylon was supported by Chaldean and Aramean tribes, Persians, Arabs, Nabateans, and Elam.

TROOP NOTES

It is assumed that the army was a mix of Assyrian rebels and Babylonian troops.

HISTORICAL ENEMIES

Later Sargonid Assyrian 1409.

NEO-BABYLONIAN EMPIRE

626 TO 539 BCE

HISTORICAL NOTES

After the death of Assurbanipal of Assyria in 627 BCE, Babylonia rebelled under Nabopolassar. In alliance with the Medes, Persians, Scythians, and Cimmerians, they sacked the city of Nineveh in 612 BCE. A Babylonian and Median army defeated the last Assyrian general Ashur-uballit II in 609 BCE. The Babylonians possessed much of Assyria. Nebuchadnezzar II became king in 605 BCE after the death of his father. He conducted successful military campaigns in Syria and Phoenicia, forcing tribute from Damascus, Tyre, and Sidon. In 601 BCE he fought a major but inconclusive battle against the Egyptians. In 597 BCE, he invaded Judah and captured Jerusalem and deposed its king Jehoiachin. After an 18-month siege, Jerusalem was captured in 587 BCE, and thousands of Jews were deported. By 572 Nebuchadnezzar was in full control of Babylonia, Assyria, Phoenicia, Israel, Philistinia, northern Arabia, and parts of Asia Minor. In 568 BCE he invaded Egypt itself. Nebuchadnezzar II died in 562 BCE and after three rulers in seven years an Assyrian Nabonidus took the throne. He was an unpopular ruler and was overthrown by Cyrus the Great.

TROOP NOTES

Nabopolassar and Nebuchadnezzar II appear to have adopted some of the military systems of the Assyrians they conquered.

MEDIAN EMPIRE

620 TO 550 BCE

HISTORICAL NOTES

Cyaxares inherited the throne of Media after his father, Phraortes, was killed in battle against the Assyrians. Cyaxares defeated a Scythian invasion, reorganised the Median army and formed an alliance with King Nabopolassar of Babylon. These allies overthrew the Assyrian empire and destroyed Nineveh in 612 BCE. After the victory the Medes occupied northern Mesopotamia. By 585 BCE they had conquered Urartu and after a five-year war had agreed the Halys River as a boundary with the Lydian empire. Cyaxares was succeeded by Astyages who ruled from 585 to 549 BCE. Astyages was overthrown by the Persian Cyrus the Great, apparently with the support of some of the Median nobility. The joint rule of the Persians and Medians forged the foundation of the Achaemenid Persian empire.

TROOP NOTES

According to Herodotus, Cyaxares introduced changes that separated the Median spearmen and archers.
