CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The Pontic-Caspian or Ukrainian steppe is a vast grassland extending from Moldova and western Ukraine to western Kazakhstan. At the start of our period it was dominated by the Scythians. Gradually the Sarmatians displaced the Scythians such that by the 1st century CE the Scythians ruled a kingdom extending from the lower Dnieper to the Crimea.

The Sarmatians were at their most powerful around the 1st century CE. Their dominance of the western Pontic steppe was broken by the Germanic Goths. With the Hunnic invasions of the 4th century CE many Sarmatians joined the Goths and other Germanic tribes in the settlement of the Western Roman Empire. A related people to the Sarmatians, known as the Alans, survived in the North Caucasus.

The Balkans north of Greece and Macedon were dominated by the Dardanians, Paeonians and Thracians. The Celts moved south, leading to the Galatian invasion of Macedonia in 281 BCE. In the aftermath of the invasion a new tribal confederation, the Scordisci emerged. At around the same time the Bastarnae emerged in the region between the Carpathian Mountains and the river Dnieper.

South of the Danube, the Thracian kingdoms survived. By 212 BCE an Odrysian king, Pleuratus, destroyed the Celtic kingdom of Tylis that had dominated Thrace after the Galatian invasions. In 146 BCE the Romans established the province of Macedonia. Over the next 200 years the Romans would expand until the frontier was the river Danube. Under Trajan the Roman empire would reach its greatest extent with the conquest of Dacia.

Sometime around the 1st century CE Germanic peoples migrated from the Baltic Sea through present-day Poland. Upon arriving on the Pontic Steppe, the tribes started to adopt the ways of the Sarmatians and other nomads. Around 160 CE these movements led to the Marcomannic Wars along the whole length of the river Danube. It led to an invasion of Italy but by 171 CE the invaders had been evicted from Roman territory.

The first incursion into the Roman empire that can be attributed directly to the Goths occurred in 238 CE. Between 255 and 275 A.D the Goths carried out major raids around the Black Sea. In 267 CE the Heruls sacked Byzantium and invaded Greece through the pass at Thermopylae.

Around 370 CE the Goths came under pressure from the Huns. In 376 CE Fritigern appealed to the Roman emperor Valens to be allowed to settle with his people on the south bank of the Danube. A famine broke out and Rome was unwilling to supply them with the food they were promised, nor the land and open revolt ensued. The subsequent defeat of the Romans at the Battle of Adrianople in 378 CE weakened the Roman empire. The Visigoths, a group derived either from the Tervingi or from a fusion of mainly Gothic groups, eventually invaded Italy and sacked Rome in 410 CE, before settling in Gaul. They were followed into Roman territory by a confederation of Herulian, Rugian, and Scirian warriors, under Odoacer, that deposed Romulus Augustulus on 4 September 476 CE.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

EARLY SCYTHIAN OR SAKA

680 TO 301 BCE

HISTORICAL NOTES

The Scythians dislodged the Cimmerians from power on the Pontic steppe. In the west they are generally known as Scythians whilst in the east they are known as Saka. Around 650 to 630 BCE they dominated the Median empire. They defeated an Achaemenid Persian invasion ordered by Darius I. The western Scythians were defeated in 335 BCE by Alexander the Great and gradually became dominated by the Sarmatians. Alexander met eastern Scythians during his conquest of Bactria and defeated them by the Jaxartes in 329 BCE.

TROOP NOTES

The Scythians were renowned for their light horse archers, who were supported by separate bodies of better armed noble led cavalry. Most armies were all cavalry, relying on their mobility, but on occasions the Scythians could field considerable numbers of infantry.

THRACIAN LOWLAND TRIBES

680 BCE TO 25 CE

HISTORICAL NOTES

This list would cover tribes such as the Odrysae and Getae. Divided into separate tribes, the Thracians did not form any lasting political organizations until the founding of the Odrysian state in the 4th century BCE. The Odrysians (Odrysae or Odrusai) were one of the most powerful Thracian tribes that dwelled in the plain of the Hebrus river. The Getae were several Thracian tribes inhabiting the regions to either side of the Lower Danube. From the 7th century BCE onwards, the Getae came into economic and cultural contact with the Greeks, who were establishing colonies on the western side of Pontus Euxinus, nowadays the Black Sea. Between the 5th and 3rd centuries BCE, the Getae were mostly under the rule of the flourishing Odrysian kingdom. In 313 BCE, the Getae formed an alliance with Callatis, Odessos, and other western Pontic Greek colonies against Lysimachus. In 72 to 71 BCE, Marcus Terentius Varro Lucullus became the first Roman commander to march against the Getae. This was done to strike at the western Pontic allies of Mithridates VI, but he had limited success. A decade later, a coalition of Scythians, Getae, Bastarnae and Greek colonists defeated C. Antonius Hybrida at Histria. Augustus aimed at subjugating the entire Balkan peninsula and used an incursion of the Bastarnae across the Danube as a pretext to devastate the Getae and Thracians. He put Marcus Licinius Crassus in charge of the plan. In 29 BCE, Crassus defeated the Bastarnae with the help of the Getic prince Rholes. After Crassus had reached as far the Danube Delta, Rholes was appointed king. In 16 BCE, the Sarmatae invaded the Getic territory and were driven back by Roman troops. The Getae were placed under the control of the Roman vassal king in Thrace, Rhoemetalses I. In 6 CE, the province of Moesia was founded, incorporating the Getae south of the Danube River. The Getae north of the Danube continued tribal autonomy outside the Roman Empire.

TROOP NOTES

Thracian armies were essentially made up of cavalry, warriors, javelinmen and archers. The Getae fought as horse archers. The Odrysian king in 171 BCE had 1,000 elite cavalry, probably royal bodyguards, nobles, and followers. Infantry adopted the thureos before the Greeks did, probably from contact with either the Celts or Illyrians. Light armed javelin units were attached to the cavalry.

PAEONIAN

512 TO 265 BCE

HISTORICAL NOTES

Paeonia lay to the north of Macedonia and consisted of several tribes, most notably the Agrianes who fought in Alexander the Great's campaigns. The Paeonians were forced to submit to the Persians by Darius I but then coalesced into a kingdom that in 360 BCE was raiding Macedonian territory in support of an Illyrian invasion. The Paeonians were reduced by Philip II of Macedon to a subordinate status. In 310 BCE the Paeonian king Audoleon co-operated in a preventative attack against the Autariatae. The kingdom gradually became hellenized and absorbed into Macedonia.

TROOP NOTES

The Paeonian tribes included the Agrianians who were renowned for their javelinmen.

EARLY SARMATIAN

350 BCE TO 100 CE

HISTORICAL NOTES

The Sarmatians were a group of tribes who came to dominate the Pontic steppe from the mid-4th century BCE onwards. At their greatest extent they ruled from the river Volga to the Danube and the Hungarian plain.

TROOP NOTES

Like all steppe nomads, the Sarmatians relied heavily on cavalry. The Siracae were semi-nomadic with hill forts. The Roxolani seem to have made more the use of the bow longer than the other Sarmatian tribes whose nobles appear to have relied more on the lance.

BOSPORAN

348 BCE TO 341 CE

HISTORICAL NOTES

The Bosporan Kingdom was in eastern Crimea and the Taman Peninsula on the shores of the Cimmerian Bosphorus (modern day Strait of Kerch). The prosperity of the Kingdom was based upon the export of wheat, fish, and slaves. Several Greek cities were located on the coast.

The kingdom was ruled by the Spartocid dynasty until c 110 BCE. The last Spartocid king faced increasingly severe attacks from the Scythians and Sarmatians and called in the help of Diophantus, general of Mithridates VI of Pontus. The Bosporan kingdom became a client of Pontus. Pharnaces, the youngest son of Mithridates, rebelled against his father and acquired the kingdom on the death of Mithridates. He then supplicated to Pompey but was defeated by Julius Caesar at Zela in 47 BCE when he tried to acquire Pontus.

The Bosporan Kingdom then became a client state of the Roman empire. From the mid-3rd century, the kingdom came under increasing pressure from the Goths and declined rapidly in the mid-4th century.

TROOP NOTES

The Bosporan kingdom was influenced by Greek and later Roman fighting styles but adapted to the threat of mobile armies from the steppes.

LATER SCYTHIAN

300 BCE to 50 CE

HISTORICAL NOTES

On the Pontic steppe the Scythians were dominated by the rise of the Sarmatians. By the 1st century CE, the Crimean Scythians had created a new kingdom extending from the lower Dnieper to the Crimea. Palacus was the last Scythian king whose name is attested in classical sources. He succeeded his father Skilurus who died fighting Pontic forces. He enlisted the aid of the Roxolani. He was defeated by Pontic forces under Diophantus. The remaining Scythians were absorbed by their Sarmatian neighbours. The capital city, Neapolis, was destroyed by the Goths in the mid-3rd century CE.

TROOP NOTES

he later Scythian nobles appear to have adopted the lance like their Sarmatian neighbours. The horse archers remained the predominant troop type.

SCORDISCI

240 BCE TO 9 CE

HISTORICAL NOTES

The Scordisci were a Celtic tribe that occupied Moesia and lands between Thrace, Illyria, and Dacia. They were a threat to the Roman province of Macedonia during the 1st century BCE. Tiberius forced the Scordisci into an alliance with Rome in around 15 BCE. After the Romans suppressed the Great Illyrian Revolt the Scordisci disappear as an independent tribe.

TROOP NOTES

The Scordisci were a Celtic tribe and fought in a similar style to the Gauls.

BASTARNAE

179 BCE TO 300 CE

HISTORICAL NOTES

The Bastarnae inhabited the region between the Carpathian Mountains and the river Dnieper between 200 BCE and 300 CE They were probably a Germanic tribe but were influenced by the Celts, Scythians and Sarmatians. The Bastarnae first came into conflict with the Romans in the 1st century BCE when they were allied with the Dacians and Sarmatians. In the late 2nd century and mid-3rd century CE they contributed to invasions of Roman territory in the Balkans. In the late 3rd century, many Bastarnae were resettled in Moesia. In 299 CE the emperor Diocletian defeated a coalition of Bastarnae and Carpi. They then disappear from the historical record, probably being assimilated by the Goths.

TROOP NOTES

The Bastarnae appear to have influenced or been influenced by Celtic, German, and Thracian styles of fighting.

DACIAN OR CARPI

82 BCE TO 318 CE

HISTORICAL NOTES

The Dacians lived in and around the Carpathian Mountains and west of the Black Sea. They are believed to have been related to the Thracians but also received Celtic and Sarmatian influences. The Dacian kingdom reached its maximum extent under king Burebista (ruled 82 to 44 BCE). After his death the kingdom disintegrated. The Roman advances in the Balkans and the incorporation of Moesia into a Roman province by Augustus led the Dacians into conflict with Rome.

In 86 CE the Dacians attacked Roman troops leading to the emperor Domitian conducting an inconclusive campaign against them. Trajan fought two wars against the Dacians (101 to 106 CE) resulting in large parts being incorporated into a new Roman province of Dacia. The remaining areas were controlled by the Carpi who were probably a Dacian tribe. By 238 CE the Carpi emerge as a major threat to Roman borders and between 250 and 270 CE launched a series of invasions. The Romans in turn inflicted multiple defeats on the Carpi between 273 and 317 CE. Many Carpi were forcibly relocated to Pannonia. The Carpodacae, "Carpi from Dacia" apparently survived on the borders of the empire and are mentioned being defeated by the emperor Theodosius along with the Scirii and Huns.

TROOP NOTES

The Dacians and Carpi may have been influenced by both Thracian and Bastarnae styles of fighting.

THRACO-ROMAN

20 BCE TO 46 CE

HISTORICAL NOTES

During the middle of the 1st century BCE the Sapaeans became one of the most important Thracian tribes. The Sapaeans and the Odrysian kingdom of Thrace became a Roman client kingdom around 12 BCE under the rule of Rhoemetals I. He trained some of his warriors to fight in the Roman fashion. Thrace remained a Roman client kingdom until incorporated into the Roman empire as a province in 46 CE.

TROOP NOTES

The Odrysian army was little changed except for troops trained to fight in the Roman fashion.

ALAN

60 TO 650 CE

HISTORICAL NOTES

The Alans (or Alani) are first mentioned invading Parthia in c 61 CE. By the early 2nd century CE, the Alans were in firm control of lands around the Lower Volga and Kuban rivers. These lands had earlier been occupied by the Aorsi and the Siraces, whom the Alans apparently absorbed, dispersed and/or destroyed, since they were no longer mentioned in contemporaneous accounts. In 135 CE, the Alans made a huge raid into Asia Minor via the Caucasus, ravaging Media and Armenia. They were eventually driven back by Arrian, the governor of Cappadocia, who wrote a detailed report ("War Against the Alans") that is a major source for studying Roman military tactics. Between 215 and 250 CE, the Germanic Goths expanded south-eastwards and broke the Alan dominance on the Pontic Steppe. Around 370 CE the Huns attacked the Alans. Some Alans accompanied the Huns in their westward expansion. Other Alan groups fought with the Goths. The Alans subsequently split into various groups, some joining the Vandals and the Suebi in their invasion of Roman Gaul. Yet other Alans remained in their original area of settlement north of the Caucasus.

TROOP NOTES

The Alans fought like other Sarmatian tribes. Arrian assumes that all Alans will charge.

LATER SARMATIAN

100 TO 390 CE

HISTORICAL NOTES

The Sarmatians remained dominant on the Pontic Steppe until the Gothic ascendancy in the Black Sea area. The Goths were amongst a significant migration by Germanic tribes of Scandinavian origin in the mid-2nd century CE. In 332 CE Constantine helped the Sarmatians to settle on the north banks of the Danube to defend against the Goths' attacks. In the 4th and 5th centuries, the Huns expanded and conquered both the Sarmatians and the Germanic tribes living between the Black Sea and the borders of the Roman Empire.

TROOP NOTES

Although carrying a weak bow, Sarmatian cavalry depended on their formidable charge with a heavy lance, the kontos ("barge pole").

QUADI

166 TO 406 CE

HISTORICAL NOTES

The Quadi were a Suebian Germanic tribe who lived approximately in modern Moravia in the time of the Roman empire. In the 4th century, the emperor Valentinianus spent much of his reign defending the Rhine frontier against a mixed horde of Sarmatians, Goths, and Quadi.

TROOP NOTES

The Quadi accepted Sarmatian exiles. Some Quadi may have fought with the kontos.

EARLY VANDAL

166 TO 442 CE

HISTORICAL NOTES

This list covers the Asding and Siling Vandals from their first appearance until Gaiseric's consolidation of their African conquests. During this time, they crossed the Rhine into Gaul in 406 CE. They continued across the Pyrenees into Spain in 409 CE. The Siling Vandal state in Spain was destroyed in 416 CE by the Visigoths on behalf of Rome. The Asding Vandals and an Alan remnant crossed to Africa in 428 CE, capturing Carthage in 439 CE.

TROOP NOTES

Modern scholarship has suggested that the Vandals may have fought mounted before they migrated across the Roman empire. It is possible they might have adopted such tactics from the Sarmatian tribes. A contrary argument is that the terrain in which the Vandals lived, north of Pannonia, was not suited for such tactics. The list provides for both options.

TERVINGI

220 TO 376 CE

HISTORICAL NOTES

This list covers the Tervingi “men of the forest” from their arrival on the Dniester. There were two main Gothic groups, the Tervingi in the west and the Greuthingi in the east. Both groups raided Roman territory during the chaos of the 3rd century. During the 4th century they defeated the Vandals and expanded westward at the expense of the Sarmatians in the middle Danube.

In the summer of 376 CE, many Goths arrived on the Danube River, requesting asylum from the Huns. The Goths were admitted but so many people in so small an area caused a food shortage. Led by Fritigern they defeated a Roman army at Marcianople. Roman troops of Gothic origin joined the revolt as did Gothic slaves, Roman prisoners, and Roman slaves. This new force has its own Gothic list.

TROOP NOTES

The Tervingi may have differed from the Greuthingi by fighting mostly as infantry with javelins and swords.

TAIFALI

220 TO 380 CE

HISTORICAL NOTES

One of the earliest mentions of the Taifali puts them in the following of the Gothic king Cniva around 250 CE. A group of Taifali were defeated by Constantine the Great in 328 CE. By 358 CE the Taifali were independent foederati of Rome. Some Taifali allied with the Huns as early as 378 CE and Taifali fought for Attila in 451 CE. Other Taifali remained with the Visigoths and fought against the Huns in 451 CE. Taifali were absorbed into the Merovingian Frankish empire.

TROOP NOTES

The Taifali were associated with the Goths, but apparently were mainly cavalry.

SCIRII

220 TO 476 CE

HISTORICAL NOTES

The Scirii or Sciri were neighbours of the Ostrogoths and Heruli. Their origins and movements are obscure. In around 380 Zosimus records a coalition of Huns, Scirii and Carpodacae invaded over the Danube. The Scirii then appear as subjects of the Huns and fought for Attila. They regained independence when the Hunnic empire collapsed. In 469 they formed an alliance with the Gepids and Suevi against the Ostrogoths. Odoacer, who deposed the last western Roman emperor, may have been a Scirian. From around 470 CE he commanded a group of Germanic foederatii including Heruls and Rugii. After the murder of Odoacer by Theodoric, the Scirii following Odoacer appear to have been subjugated.

TROOP NOTES

The Scirii are assumed to fight in a similar fashion to the Heruli and Ostrogoths.

GREUTHINGI OR EARLY OSTROGOTH

220 TO 497 CE

HISTORICAL NOTES

This list covers the Greuthingi/Greutungi (“men of the steppes”) Goths from arrival in the Ukraine until the organisation of the Italian Ostrogothic kingdom. The first incursion of the Roman Empire that can be attributed to Goths is the sack of Histria in 238 CE. Seaborne raids followed from around 255 CE onwards. Initially raiding in the Black Sea, the Goths soon broke out into the Aegean Aea, sacking several Greek cities. Pressure on the Romans caused them to abandon the province of Dacia beyond the Danube. In 336 CE Constantine restored Dacia to the Roman Empire but it was abandoned following his death. Hunnic domination of the Gothic kingdoms began in the 370s. The Greuthingi seem to have split up under attack from Attila’s Huns. Part of the Goths remained independent and invaded Italy under Radagaisus in 405 CE, this is covered in the Gothic list. The largest part became Hunnic subjects from 441 CE until the break-up of the Hunnic empire in 454 CE. After Attila’s death, they unified as the Ostrogothic nation. The Eastern Roman Emperor Marcian recognised Ostrogothic control of Pannonia.

TROOP NOTES

The Gothic cavalry used spears. Unlike Germanic tribes there is little evidence for javelins. At the Battle of Nedao in 454 CE, Jordanes describes the Ostrogoths as using the kontos. Huns were hired by Vithimer to fight other Huns in around 370 CE.

HERULI

220 TO 508 CE

HISTORICAL NOTES

The Heruli or Heruls were amongst the Gothic tribes that ravaged the coasts of the Black Sea and entered the Aegean in the 3rd century CE. The Heruli later moved from an area north of the Black Sea to the Roman frontier at the same time as the Goths. Conquered by the Huns they appear to have rebelled with the Gepids after the death of Attila and established a kingdom on the Danube. The Heruli king Rodulf lost his kingdom to the Lombards at some point before 508 CE. Heruli are mentioned serving in the armies of the Gepids and East Romans into the second half of the 6th century.

TROOP NOTES

The Heruli were renowned for their swift-footed light infantry. Their cavalry was said by the eyewitness Procopius not to have worn metal armour or helmets, but to be protected only by shields and thick jackets.

GEPID

220 TO 567 CE

HISTORICAL NOTES

The Gepids were closely related to the Goths. In the 4th century, they were incorporated into the Hunnic Empire. Under their leader Ardaric, the Gepids united with other Germanic tribes and defeated the Huns at the Battle of Nedao in 454 CE. The Gepids then founded a kingdom centred in Pannonia. The Gepids reached the zenith of their power after 537 CE, settling in the rich area around Singidunum. In 552 CE the Gepids suffered a disastrous defeat from Alboin, king of the Lombards, in the Battle of Asfeld. The Gepids were finally overrun by the Avars in 567 CE.

TROOP NOTES

The Gepids may have had three classes - a rich upper class fighting as cavalry, a less wealthy class of infantry spearmen whose weapons included heavy throwing spears, and a poor class fighting as archers.

HUNNIC

375 TO 454 CE

HISTORICAL NOTES

The Huns may have included descendants of the Hsiung-nu who had threatened the Han Chinese. During the 3rd century they were present north-west of the Caspian Sea. From 370 CE onwards they moved westwards subjugating tribes including the Alans, Ostrogoths and Gepids. In 395 CE a major raid pillaged Armenia and Syria. In 408 CE the Huns and Scirii invaded Moesia but were defeated by the Romans. Under Rua and then Attila the Huns were unified as a single entity and extracted an annual tribute from the Roman empire. In 447 CE Attila led an invasion that reached as far as Thermopylae but failed to take Constantinople. In 451 CE Attila invaded Gaul but was defeated by an alliance of foederate kings and the Romans at Campus Mauriacus. The following year he invaded Italy and sacked several cities.

After the death of Attila, the Hun empire quickly broke up. The Ostrogoths and Gepids rebelled and defeated the Huns. Remnant tribes were absorbed by the Bulgars and Avars by the mid-6th century CE.

TROOP NOTES

The Huns appear to be distinct from other steppe tribes in their willingness to engage in close combat.

GOthic

377 TO 419 CE

HISTORICAL NOTES

After the victory at Adrianople in 378 CE, the Goths were settled by treaty and provided recruits for Roman regular units. Alaric became Magister Militum per Illyricum first on behalf of the Eastern Empire 395 to 399 CE, then on behalf of the Western Empire 403 to 407 CE. Losing the post after Stilicho's murder in 408, he was joined by Greuthingi, by ex-prisoners from the army of Radagaisus and by escaped slaves, and plundered Rome. His successors invaded Gaul, then Spain and fought on behalf of the Romans against rebels, Suevi, and Vandals, before settling as foederati in south Gaul.

TROOP NOTES

After Adrianople, the Romans seem to have been unwilling to face the Goths in open battle.

Radagaisus' army of 401 to 406 CE was mostly Goths, but was also reported to include Rugi, Suevi, Vandals, Burgundians, and Alans.

The Gothic armies seem to have constantly struggled to find food and forage. This suggests they wouldn't have been able to support large numbers of mounted troops. The cavalry at Adrianople were recent arrivals from across the Danube.

HISTORICAL ENEMIES
