CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

Yehud Medinata (Aramaic for "the province of Judah"), was part of the satrapy of Syria. It had been held by the Neo-Babylonian Empire since the fall of the kingdom of Judah in around 597 BCE. It came under Persian rule when Cyrus the Great conquered Babylon in 539 BCE. After the death of Cyrus, his son Cambyses invaded and conquered Egypt (525 to 522 BCE).

The Persian conquest was significant for the Jews as it allowed some inhabitants of Jerusalem who had been exiled by the Babylonians to return to Jerusalem. An initial contingent returned in the reign of Darius I and a later contingent in the reign of Artaxerxes I. The Temple at Jerusalem was rebuilt and the roles of the High Priest and the aristocracy were established that were to have a significant effect on history four centuries later.

Persian rule in Egypt (known to historians as the 27th dynasty) was not accepted by the priesthood. In around 411 BCE, Amyrtaeus, a native Egyptian, revolted against Darius II. He succeeded in expelling the Persians from Memphis in 405 BCE with assistance from Cretan mercenaries. Following the death of Darius in 404 BCE he proclaimed himself Pharaoh of Egypt. Although Artaxerxes II attempted to lead an expedition to retake Egypt he was unable to due to the revolt by his brother Cyrus the Younger. This allowed Amyrtaeus to solidify Egyptian rule over Egypt.

Nefaarud I founded the 29th Dynasty by defeating Amyrtaeus in open battle. On his death, two rival factions fought for the throne, one behind his son Muthis, and the other supporting a usurper Psammuthes. Although Psammuthes was successful, he only managed to reign for a year. He was overthrown by Hakor, who claimed to be the grandson of Nefaarud I. He successfully resisted Persian attempts to reconquer Egypt, drawing support from Athens, and from the rebel king of Cyprus, Evagoras. Although his son Nefaarud II became king on his death, the younger Nefaarud was unable to keep hold on his inheritance.

The 30th Dynasty was founded after the overthrow of Nefaarud II in 380 BCE by Nectanebo I. He spent much of his reign defending his kingdom from Persian reconquest with the occasional help of Sparta or Athens. In 365 BCE, Nectanebo made his son Teos co-king and heir, and until his death in 363 BCE father and son reigned together. After his father's death, Teos invaded the Persian territories of modern Syria and Israel and was beginning to meet with some successes when he lost his throne due the machinations of his own brother Tjahapimu. Tjahapimu took advantage of Teos' unpopularity within Egypt by declaring his son, Nectanebo II, king. The Egyptian army rallied around Nectanebo, which forced Teos to flee to the court of the king of Persia.

Nectanebo II's reign was dominated by the efforts of the Persian rulers to reconquer Egypt. Artaxerxes III attempted an unsuccessful invasion of Egypt in the winter of 351/350 BCE. The repercussions of his defeat prompted revolts in Cyprus, Phoenicia, and Cilicia. Although Nectanebo gave support to these revolts, Artaxerxes would eventually suppress these rebellions and was once again able to invade Egypt in 343 BCE. This second invasion proved successful, and Nectanebo fled south to Nubia. He may have managed to maintain some form of independent rule in the south of Egypt for 2

more years. Although a shadowy figure named Khababash proclaimed himself king and led a rebellion against the Persians from about 338 to 335 BCE. Nectanebo has been considered the last native pharaoh of Egypt.

In 333 BCE Alexander the Great defeated Darius at Issus. He proceeded to take possession of Syria, and most of the coast of the Levant. In the following year, he was forced to attack Tyre, which he captured after a long and difficult siege. Alexander moved against Egypt and met resistance at Gaza. After three unsuccessful assaults, the stronghold fell, but not before Alexander had received a serious shoulder wound. Alexander advanced on Egypt where he was regarded as a liberator. He founded Alexandria, which would become the prosperous capital of the Ptolemaic Kingdom after his death.

After the death of Alexander, Perdiccas appointed Ptolemy as satrap of Egypt. Ptolemy soon established himself as ruler in his own right and successfully defended Egypt against an invasion by Perdiccas in 321 BCE. When Antigonus, ruler of Syria, tried to reunite Alexander's empire, Ptolemy joined the coalition against him. In 312 BCE he defeated Demetrius, the son of Antigonus, in the battle of Gaza. Ptolemy lost Cyprus after the naval battle outside Salamis, but after the death of Antigonus took the opportunity to secure Coele-Syria and Palestine (which had been allocated to Seleucus). This led to a series of wars between the Ptolemaic and Seleucid empires that were to last until the arrival of the Romans. Ptolemy III was to march as far as Babylonia but Seleucus II was able to retain his throne. In 170 BCE Antiochus IV Epiphanes invaded Egypt and deposed Ptolemy VI. Antiochus was thwarted by the intervention of the Romans and their envoy Popilius Laenus and forced to withdraw.

The Ptolemaic kingdom now declined in power due to family feuds. In 51 BCE Ptolemy XI died leaving his kingdom to be shared between Cleopatra VII and her brother Ptolemy XII. Cleopatra was expelled but re-established her position when Caesar arrived in Alexandria after his victory at Pharsalus. Caesar was besieged in the palace quarter (48 to 47 BCE) but eventually defeated the Ptolemaic troops and Alexandrian mob with the help of a relief army from Syria. In 41 BCE Cleopatra met Mark Anthony. After several years, he committed himself to Cleopatra and tried to rule the eastern Mediterranean as a triumvir from Alexandria. Octavius rallied Rome against Anthony and Cleopatra, depicting it as an invasion by a foreign power. Anthony and Cleopatra were defeated at Actium and Egypt became the personal property of Octavian (Augustus) and part of the Roman Empire.

The Jewish rebellion against the Seleucid kingdom was triggered by an attempt to impose Hellenistic customs upon the Jews. From 161 BCE the Seleucid king Demetrius I sent three expeditions. The third defeated the rebels and for ten years the region was relatively peaceful. In 132 BCE Antiochus VII captured Jerusalem after a two-year siege. John Hyrcanus accompanied Antiochus on his Parthian expedition but survived the rout and for the next twenty-five years ruled an independent Jewish kingdom. Under his successors the growth of a Greater Judaea continued whilst the Seleucid kingdom collapsed.

In 64 BCE Pompey reached Syria after the Armenian king Tigranes had been expelled. Two rivals Hyrcanus and Aristobulus claimed the kingdom. Pompey favoured Hyrcanus but the supporters of Aristobulus seized Jerusalem. Pompey was forced to besiege and capture Jerusalem. Pompey's

settlement left the region unstable and his successor in Syria, Gabinius, was forced to continually intervene in Judaea. By 55 BCE the kingdom was effectively a Roman client kingdom. From this state emerged Herod who was able to negotiate the complex world of Jewish and Roman politics and, once confirmed by Octavian, governed Judaea until his death in 4 BCE. The kingdom was divided amongst his sons but was converted into a Roman province about ten years later.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

CYRENEAN GREEK

630 TO 74 BCE

HISTORICAL NOTES

Cyrenaica was colonized by the Greeks beginning in the 7th century BCE. They established five cities; the most important colony was Cyrene, established in about 631 BCE. The area fell under the rule of the Achaemenid Persians in around 525 BCE but later re-established independence. In 324 CE a mercenary Greek commander Thimbron recruited by Cyrenean exiles defeated a Cyrenean army and captured two towns. The Oligarchic party in charge of the city recruited Libyans and Carthage to their cause. The Oligarchs were forced out of the city in 322 and invited Ptolemy to restore them. Ptolemy sent his general Ophellas and a large force that defeated Thimbron. Cyrene was then annexed by Ptolemy I but gained independence under Magas a stepson of Ptolemy until his death. It was separated from the main kingdom by Ptolemy VII and given to his son Ptolemy Apion who bequeathed it to Rome in 96 BCE. The Romans didn't organise it into a province, together with Crete, until 74 BCE.

TROOP NOTES

The bulk of the Cyrenean forces were citizen hoplites. Chariots were used to transport the hoplites over long distances. The city also apparently used four-horse chariots copied from their Libyan neighbours.

After Ptolemy seized Cyrene the forces may have included phalangites. Cyreneans appear to have enlisted in the Ptolemaic army in some numbers.

HISTORICAL ENEMIES

Saitic Egyptian 1410; Cyrenean Greek 2201; Early Ptolemaic 2206; Mercenary Greek 2406; Achaemenid Persian - Satrapal Army 2602; Libyan 2701.

RULERS

Battiad dynasty.

Battus I	c.630 – 600 BCE
Arcesilaus I	c.600 – 583
Battus II	583 – 560
Arcesilaus II	560 – 550
Battus III	550 – 530
Arcesilaus III	530 – 515

The Persians nominally ruled Cyrenaica, as the satrapy of Libya, from 515. It probably regained its independence in 404. The existing rulers were installed as satraps.

Battus IV	515 – 465
Arcesilaus IV	465 – 440

The monarchy was abolished.

Ophellas (nominally as governor for Ptolemy I)	322 – 308
Magas (initially as governor, co-ruler with Berenice II from 258)	276 – 250
Demetrius the Fair (co-ruler with Berenice II)	250 – 249

CYRENEAN GREEK

RULERS (CONTINUED)

Republic government was established in 249, but Ptolemaic control re-established in 246. Cyrene was then ruled either directly from Egypt or independently.

Ptolemy III	246 – 221 BCE
Ptolemy IV	221 – 204
Ptolemy V (Regency until 196)	204 – 180
Ptolemy VI (Regency until 170, then as co-rulers with Cleopatra II and Ptolemy VIII)	186 – 164
Ptolemy VIII (Awarded Cyrene by intervention of the Roman republic)	163 – 116
Ptolemy Apion	116 – 96

Ptolemy Apion bequeathed Cyrenaica to the Roman Republic.

CITIES

The five prominent cities (Pentapolis) of Cyrenaica were Cyrene (with its port of Appolonia), Barca, Balagrae, Euesperides (renamed Berenice) and Taucheira (renamed Arsinoe).

MEROITIC KUSHITE

592 BCE TO 350 CE

HISTORICAL NOTES

The Kushite kingdom, known as "Aithiopia" in Greek sources, was established south of Egypt with a capital at Meroe. An Achaemenid Persian invasion under Cambysses perished in the desert. Meroitic kings supported Egyptian revolts against the Ptolemies and raided Roman Egypt. The kingdom, weakened by attacks from the Nobades, fell to the Axumite kingdom in around 350 CE.

TROOP NOTES

Strabo describes the Aethiopians as badly commanded and badly armed. The spearmen carried large shields made of raw hides. Some were spear-armed, others armed with hatchets or axes. Meroitic art depicts archers armed with an axe, sword, or spear in addition to bow and there are Ptolemaic figurines with axe and shield only. There is evidence for war elephants, presumably inspired by Ptolemaic practice.

HISTORICAL ENEMIES

LATE PERIOD EGYPTIAN

460 TO 343 BCE

HISTORICAL NOTES

In around 405 BCE an Egyptian prince of Sais (28th Dynasty) revolted against the Persians, ruling for six years. He was succeeded by Nephherites I (29th Dynasty) who ruled until 380 BCE. A series of three pharaohs (30th Dynasty) ruled until defeated by the Persians under Artaxerxes in 343 BCE. During this time, they inflicted several defeats upon the Persians with the aid of Greek mercenaries.

TROOP NOTES

The native Egyptian army had been a warrior caste supported by land grants. Greek mercenaries had been engaged in Egypt since the 6th century BCE.

NABATAEAN

312 BCE TO 106 CE

HISTORICAL NOTES

The Nabataean kingdom was an Arabic kingdom on the territory of modern Jordan, Syria, Saudi Arabia, Egypt, and Israel with its capital at Petra. The Nabataeans were allies of the first Hasmoneans in their struggles against the Seleucid monarchs. They then became rivals of the Judean dynasty. Under the reign of Aretas III (87 to 62 BCE) the kingdom seems to have reached its territorial zenith but was defeated by a Roman army. It was annexed by Rome around 106 CE.

TROOP NOTES

The Nabataeans were Arabs but as they expanded the kingdom, they were increasingly influenced by their Hellenistic and then Parthian neighbours.

HISTORICAL ENEMIES

RULERS

Evidence for a monarchy prior to the mid-2nd century BCE is limited. The Nabataeans may have been a tribal confederacy ruled by a council of elders.

PRE-ISLAMIC ARAB

300 BCE TO 400 CE

HISTORICAL NOTES

This list covers the minor Arab peoples including wealthy centres such as Yathrib, Mecca, Oman, the kingdoms of Yemen and desert nomads. The Roman name for these people was Saraceni.

TROOP NOTES

Herodotus describes Arabs using the bow. Strabo adds spear, sword, and sling. Arab camel-riders are mentioned in the Seleucid army at Magnesia. Horses were ridden from the 2nd century BCE onwards but initially were rare in the Arab tribes.

EARLY PTOLEMAIC

280 TO 200 BCE

HISTORICAL NOTES

Ptolemy I died in 283 BCE leaving a strong and stable kingdom to Ptolemy II. The Ptolemaic kings were to fight a series of wars for control of southern Syria and Judaea. A victory was obtained at Raphia in 217 BCE but the army was defeat at Panium in 200 BCE and many of the settler phalangites captured or killed.

TROOP NOTES

The Ptolemaic army followed the Macedonian tradition. Settlers were given land in return for military service and extensive use made of mercenaries. The Roman victories in the 2nd century BCE appear to have influenced the army. Egyptians were armed for the Raphia campaign. This proved a source of trouble for later rulers. Some Elephants were obtained from Ethiopia although Indian elephants captured from the Seleucid kingdom were also used.

PTOLEMAIC

199 TO 55 BCE

HISTORICAL NOTES

After the defeat at Panium in 200 BCE, the Egyptians lost their possessions in Asia Minor. A peace treaty left the Seleucid kingdom overlords of Coele-Syria. A rebellion in Upper Egypt was ended with the recapture of Thebes in 187 and the last insurgents in the delta were suppressed in 183. By 170 the Ptolemaic kingdom had regained enough strength to invade Coele-Syria but were forestalled by Antiochus IV. In 168 Egypt would have fallen into the hands of the Seleucid king but for the Roman envoy Popilius Laenas. During a Seleucid civil war, the tables were turned when Ptolemy VI was offered the crown by the citizens of Antioch. He wisely refused, keeping only Coele-Syria but was defeated and killed two years later and Coele-Syria reverted to the Seleucid kingdom (145). From this date Ptolemaic history can be summarised as a series of civil wars between different members of the dynasty which continued even after Pompey intervened in 59 BCE. Roman forces became an almost permanent presence from 55 BCE.

TROOP NOTES

This list reflects the Ptolemaic army after the defeat at Panium in 200 BCE. The core of the army, the Macedonian phalanx suffered heavy losses. Mercenaries were used to replace these losses and reorganised into units called semeia which may have copied Roman maniples.

JEWISH

167 BCE TO 6 CE

HISTORICAL NOTES

The Maccabean Revolt was a Jewish rebellion, lasting from 167 to 160 BCE, led by the Maccabees against the Seleucid Empire. Between around 140 BCE and 116 BCE the Hasmonean dynasty ruled semi-autonomously from the Seleucids. From 110 BCE, with the Seleucid empire disintegrating, the Hasmonean dynasty became fully independent and expanded into the neighbouring regions of Samaria, Galilee, Iturea, Perea, and Idumea. In 63 BCE the kingdom became a Roman client state. In 37 BCE Herod seized power. In 6 CE the Roman province of Judaea was established.

TROOP NOTES

The army of Judas Maccabaeus started out as a guerrilla force. As the kingdom grew it appears that a more regular army developed, probably organised by Jews who had served in the Seleucid or Ptolemaic armies.

LATE PTOLEMAIC

54 TO 31 BCE

HISTORICAL NOTES

The Ptolemaic kingdom at this time was dominated by Roman politics. The role of the army was largely to protect the ministers who controlled the Pharoah, to collect taxes and suppress revolts. Legionaries originally raised by Aulus Gabinius were stationed in Egypt. Mark Anthony later stationed legionaries in Egypt.

TROOP NOTES

Caesar reports that the army of his day largely comprised brigands and ex-pirates from Cilicia and Syria, exiles, and runaway slaves.

BLEMMYE

30 BCE TO 500 CE

HISTORICAL NOTES

The Blemmye were a nomadic people living in the desert between the Nile and the Red Sea from at least the 1st century BCE. During the 3rd century CE raids on Egypt increased and in 298 CE the Blemmye and Nobatae occupied Nubia after the emperor Diocletian withdrew Roman troops. In the 5th or 6th century the Blemmye were “driven into the eastern desert” by the Nubians.

TROOP NOTES

The Blemmye raided with archers on foot and cavalry mounted on donkeys or horses. A 4th-5th century source describes them as bold fighters using spears and bows. War Elephants were used.

HISTORICAL ENEMIES

Meroitic Kushite 2202; Blemmye 2210; Axumite 2212; Early Imperial Roman 2516; Imperial Roman 2517; Foederate Roman 2518; Eastern Later Roman 3301.

JEWISH REVOLT

66 TO 135 CE

HISTORICAL NOTES

The Jews revolted on three occasions, in 66 to 73 CE, 115 to 117 CE and 132 to 135 CE. The first, the Great Revolt, was defeated by Vespasian and his son Titus. The destruction of the Temple in Jerusalem in 70 CE was a turning point in Jewish history, leading to the synagogue becoming the centre of Jewish life. The second revolt (known as the Kitos War), while poorly organized, was extremely violent and took two years for the Roman armies to subdue. The third revolt was led by Simon bar Kokhba. This resulted in genocide, a ban on Judaism, and the renaming of the province from Judaea to Palestine.

TROOP NOTES

The Jewish rebels lacked military organisation. The historian Josephus appears to have been an exception in trying to put his troops on an organised footing. Jewish troops were mostly armed with javelins, sword or knife and a long shield. A minority were equipped with bows. A small amount of captured Roman equipment was also available.

HISTORICAL ENEMIES

AXUMITE

150 TO 970 CE

HISTORICAL NOTES

Axum emerged in the 1st century CE on the highland plateau of modern Eritrea and Tigray. At the height of its power, it dominated the region and controlled the profitable trade route through the Red Sea from south Asia to the Mediterranean.

TROOP NOTES

Axumite armies were like Blemmye armies. Cavalry was rare. Spears were short and accompanied by javelins, a short sword and large round hide shield. Little armour was worn.

HISTORICAL ENEMIES

Meroitic Kushite 2202; Blemmye 2210; Southern Pre-Islamic Arabian 2214; Umayyad in Africa and Spain 3104; Christian Nubian 5901.

RULERS

These Axumite kings are largely known only through the currency they issued.

3rd or 4th century: Sembrouthes, Endubis, Aphilas, Wazeba, Osanus, Mehadeyis, Ouzaebas.

Ezana (adopted Christianity)	c.340s – 360s CE
------------------------------	------------------

5th century: Eon, Ebana, Nezool (or Nezana), Ousas (or Ousanas II), Alla Amidas.

Kaleb	514 – 542 CE
-------	--------------

6th century: Wazena, Ioel, Hataz (or Iathlia), Israel.

7th century: Gersem.

Najashi	614 – 630 CE
---------	--------------

After this time the names of kings depend upon regnal lists that date back to the 13th century. For kings prior to this time, they are considered incomplete and untrustworthy.

LATER PRE-ISLAMIC BEDOUIN

250 TO 636 CE

HISTORICAL NOTES

This list covers the Bedouin armies of the Salih and Ghassanids, allied to the Romans from c. 420 to 636 CE. It also covers the Lakhmids, allied to the Persians from c. 400 to 602.

TROOP NOTES

Most armour that was available to the Bedouin tribes was probably either gifts from the Persians or Romans (depending upon who the tribe was allied to) or was captured loot during raids. The horse was preferred as a mount rather than a camel.

SOUTHERN PRE-ISLAMIC ARABIAN

401 TO 638 CE

HISTORICAL NOTES

This list covers the settled states of southern Arabia to when they joined the emerging Muslim state and the Ridda Wars.

TROOP NOTES

Armies appear to have been like those of the Arab Conquest, but without the additional motivation provided by Islam. Many of these states were Christian or Jewish. Allied nomad Bedouin were often used. The Sassanids intervened in south Arabia at the end of the 6th and start of the 7th century to prevent Byzantine domination.
