GREECE AND MACEDON

AUTHORISED ARMY LISTS FOR

**MORTEM
ET GLORIAM**

ARMY LISTS

GREECE AND MACEDON

Edited by Richard Jeffrey-Cook. Contributions from Simon Hall, Nik Gaukroger and Lance Flint. Front image by Simon Clarke.

CONTENTS

2401	Classical Greek	670 to 275 BCE	2410	Epirote	334 to 167 BCE
2402	Thracian Hill Tribes	670 BCE to 26 CE	2411	Thraco-Macedonian	323 to 281 BCE
2403	Spartan	668 to 394 BCE	2412	Macedonian Successor	323 to 280 BCE
2404	Early Macedonian	500 to 357 BCE	2413	Coalition against Antigonos	302 to 301 BCE
2405	Illyrian	500 BCE to 20 CE	2414	Pyrrhic	294 to 272 BCE
2406	Mercenary Greek	401 to 298 BCE	2415	Later Macedonian	279 to 168 BCE
2407	Later Spartan	393 to 228 BCE	2416	Hellenistic Greek	275 to 146 BCE
2408	Alexandrian Macedonian	356 to 323 BCE	2417	Hellenistic Spartan	227 to 195 BCE
2409	Alexandrian Expeditionary	334 to 324 BCE			

CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

In the 8th century BCE, Greece began to emerge from the Dark Ages which followed the fall of the Mycenaean civilization. Rapidly increasing population in the 8th and 7th centuries resulted in emigration of many Greeks to form colonies across the Mediterranean.

In Sparta, the Messenian Wars resulted in the conquest of Messenia and enslavement of the Messenians. The subjugated population, farmed and laboured for Sparta, whilst every Spartan male citizen became a soldier of the Spartan Army in a permanently militarized state.

By the 6th century BCE four cities had emerged as dominant in Greek affairs: Athens, Sparta, Corinth, and Thebes. The intervention of Sparta in 510 BCE in the affairs of Athens led to a revolution and Athens became a “democracy”, albeit with a very limited franchise.

Around 540 BCE the Persians conquered the Greek cities of Ionia in Asia Minor. In 499 BCE the Greek cities revolted against the rule of Darius I. The cities received help from Athens and Eretria. After suppressing the revolt in 493 BCE, Darius decided to conquer the whole of Greece. Thrace and Macedonia were conquered and an expedition sent against Athens. This expedition was defeated at the battle of Marathon in 490 BCE.

Ten years later Xerxes I, son and successor of Darius attempted a second invasion. Leonidas with 300 Spartans and various allies attempted to hold the pass at Thermopylae which was bypassed. The Spartans were surrounded and died fighting to the last man. The Persians were able to march unimpeded through Boeotia and Attica, but the Persian navy was defeated at Salamis. The following year the Greeks defeated the Persians at Plataea and the Persian threat was eliminated.

The following 50 years saw the dominance of Athens and the creation of the Athenian Empire. The dominant position of Athens was a threat to Sparta and led to the Peloponnesian War. This lasted from 431 to 404 BCE. A disastrous expedition to Syracuse (415 to 413 BCE) weakened the Athenian position and in 404 BCE they sued for peace.

Sparta dominated Greek affairs for the next thirty years until they were defeated by the Thebans at the battle of Leuctra in 371 BCE. A further battle at Mantinea in 362 BCE was won by the Thebans but their leader, Epaminondas, was killed. The Greeks remained divided for the next thirty years.

Power was now to shift to the northern kingdom of Macedon. In 359 BCE Philip II came to the throne and set about reforming the army. He conquered the surrounding territories. In 338 BCE he defeated an alliance of Thebans and Athenians at the battle of Chaeronea. His son, Alexander, played a prominent part in the battle.

Philip planned to lead an invasion against the Persians. He was however assassinated in 336 BCE and was succeeded by Alexander. Alexander defeated the Persians in three major battles, conquered the Persian Empire and reached as far as India. Alexander died in 323 BCE at the age of 32.

Almost immediately the Greeks attempted to throw off Macedonian rule but were defeated in the Lamian War. Alexander's generals fought for control of his Empire. In the next forty years a series of wars were fought on Greek and Macedonian territory.

In 281 BCE Celtic tribes invaded Macedonia, killed the current king Ptolemy Ceraunus and devastated Macedonia, Thrace and northern Greece. Some were invited by the king of Bithynia to Asia Minor where they established a kingdom in Phrygia which was subsequently known as Galatia. Antigonus Gonatus, grandson of one of Alexander's generals, defeated a group of Celts that had remained in Europe and seized the throne of Macedon. Hiring more Galatians as mercenaries he established stability. His successors ruled Macedon until 168 BCE. Antigonus also controlled Corinth and Chalcis and was thus able to influence affairs in Greece.

Greek affairs became dominated by the Aetolian and Achaean leagues. In 235 BCE a Spartan king, Cleomenes III, came to the throne of Sparta. He reformed the Spartan state, which had been short of manpower ever since Leuctra. From 229 BCE he fought a war against the Achaean League until he was defeated by an allied army of Macedon and the Achaean League at Sellasia in 222 BCE.

The end of the Second Punic War saw the Romans turn their attention to Greece. During the Second Punic War, Philip V of Macedon had offered an alliance to the Carthaginians. Invited by the Aetolian League, the Romans declared war on Macedon and defeated Philip at the battle of Cynoscephelae in 197 BCE.

A further war against Macedonia resulted in the Macedonian defeat at Pydna in 168 BCE. Roman rule of Greece and Macedon was established permanently after the sack of Corinth in 146 BCE. Carthage was sacked in the same year.

Greece and Macedonia remained under Roman rule for the next six centuries until the collapse of the Western Roman empire.

TROOP NOTES

At the start of our period the dominant troop type in Greece was the hoplite. The hoplite was equipped with helmet, a large round shield, metal or linen body armour, greaves and a long spear 8 foot in length. Formed in a rigid formation typically 8 ranks deep known as a phalanx they dominated Greek warfare. Hoplites were supported by peltasts, javelinmen carrying a pelta shield and psiloi, equipped with bows and slings.

During the Peloponnesian War, larger numbers of troops were required. Not all troops could afford full hoplite panoply so hoplite equipment generally became lighter. The role of the peltast became more important.

In the 4th century BCE Iphikrates introduced reforms, doubling the length of the spear and replacing the hoplon shield with a smaller pelte shield. Philip II of Macedon equipped his troops with a two-handed pike and the phalangite came to dominate Hellenistic warfare for the next 200 years.

This period also saw an increase in the use of mercenaries. When not employed fighting amongst themselves, many Greeks found employment with the Persians. The Thracians and Illyrians also supplied mercenaries.

Most of Greece with the exception of Thessaly was unsuited for cavalry warfare and, until the time of Philip, cavalry played only a minor part in Greek warfare. Under Philip and then Alexander, the cavalry became the strike force of the army equipped with the xyston, a 12-foot lance. During the 3rd century BCE the use of the lance disappeared and by the start of the 2nd century BCE Macedonian cavalry appear to have been equipped with javelins.

During his campaigns in mountainous terrain, Alexander regularly re-equipped his phalangites with javelins. His successors also used lighter equipped troops, referred to as Euzonoi.

During the 3rd century BCE the hoplite was replaced by the thureophoroi and thorakitai. The thureos is an oval shield compared to the round hoplon shield. Thorakitai refers to the chest armour worn by some troops.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

CLASSICAL GREEK

670 TO 275 BCE

HISTORICAL NOTES

The Greeks emerged from the fall of the Mycenaean civilization. Due to the nature of the terrain Greece was divided into many small self-governing communities. A growing population and shortage of land resulted in both widespread colonization and internal strife between the poor and rich. By the 5th century the dominant cities were Athens, Sparta, and Thebes.

The defeat of the Persian invasions in 490 BCE and 479 BCE led to the rise of Athens as the pre-eminent state. The Peloponnesian War from 431 to 404 BCE saw Sparta defeat Athens and dominate the Greek world. The Spartans were then defeated at Leuctra (371 BCE) and Mantinea (362 BCE) which saw Thebes become the leading state. The tactics of Epaminondas, the Theban general, influenced Philip of Macedon. Macedon dominated Greek affairs after the defeat by Philip of an allied Theban and Athenian army at Chaeronea in 338 BCE.

Greece was then contested by various successors of Alexander until the invasion of the Galatians in 279 BCE.

TROOP NOTES

Thessalian cavalry: The wide plains of Thessaly meant Thessaly had the best source of cavalry in Greece. Greek cavalry appear to be equipped with either an 8' spear or javelins.

Greek cavalry: Most states could field some cavalry even though on occasions armies were sent without cavalry. Wealthy citizens could afford horses but would generally fight as hoplites. Light cavalry: Some Greek cavalry were equipped with javelins and seem to primarily have been skirmishers. In the fourth century BCE the city state of Tarentum in Italy appears to have adopted shields for its cavalry. Tarentine cavalry then appear in numerous Hellenistic armies.

Citizen hoplites: The standard troop type of the Greek city state was the citizen hoplite. All citizens with sufficient wealth to afford hoplite panoply would be expected to perform military service. Equipped with an 8' to 12' spear, large hoplon shield, body armour and greaves. During the fifth century equipment became lighter with linen body armour replacing bronze corslets and boots preferred to greaves. Mercenary hoplites: From the late 5th onwards increasing numbers of Greeks sought mercenary service. As full-time soldiers they were probably better drilled than their part-time citizen equivalents. Sacred Band: Some cities maintain elite units of citizen soldiers. The best known is the Sacred Band of Thebes.

Iphicrean "Peltasts": In 374 BCE the Athenian commander Iphicrates reformed the weapons of the classical Greek hoplite. He doubled the length of the spear (to 16') and replaced the hoplon shield with a pelta - a smaller shield.

Thracians: Thracian tribesmen were regularly employed by Greek states as mercenaries. Some may have used a longer spear but not in a hoplite formation. Others were equipped with short spears and javelins.

Peltasts: Lighter infantry, peltasts were used throughout this period. They were equipped with a pelta, a small wicker shield (as distinct from the pelta) and javelins. Aitolian,

Arkanian, Phokian or Thessalian javelinmen: The mountain states of the Balkans had a plentiful supply of peltasts.

Slingers: Some Greek skirmishing infantry, notably those from Rhodes, used the sling. Archers: The bow was also used by Greek skirmishing infantry. The Cretans were renowned for their archery and were employed by many armies in the Hellenistic period.

BATTLES AND CAMPAIGNS

Second Messenian War (Spartan conquest of Messene)	c. 660 – 650 BCE
Athenians send troops to aid the Ionian Revolt	499
Battle of Sepeia (Sparta vs Argos)	c. 494
Battle of Marathon	10 th September 490
Battle of Thermopylae (Spartans and Greek allies outflanked by Persian army)	480 BCE
Second Persian Invasion of Greece	480 – 479
Battle of Plataea (Spartan led Greek coalition defeats the Persian army under Mardonius)	August 479
Wars of the Delian League (ending with the Peace of Callias)	477 – 449
Battle of Eurymedon (Greek victory over the Persian army)	469 or 466
Messenian Revolt	465 – 461
Battle of Papremis (Athenian and Egyptian victory over the Persians)	460
First Peloponnesian War	460 – 445
Battle of Oenophyta (Athenian victory over Boeotians)	457
Battle of Tanagra (Spartan victory over Athens)	457
Battle of Salamis (Greek victories on land and sea in Cyprus against the Persians)	450
Battle of Coronea (Boeotian victory over Athens)	447
Peloponnesian War	431 – 404
Athenian campaign against Lycia (Lycian victory)	429
Battle of Spartolos (Athens vs Chalcidan League)	429
Aetolian Campaign (Athens vs Aetolia)	426
Battle of Idomene (Athenian victory over Ambracia)	426
Battle of Olpae (Athens and allies victorious over Sparta and allies)	426
Battle of Tanagra (Athens victory over Thebes and Tanagra)	426
Battle of Pylos (Athenian victory over the Spartans)	425
Battle of Sphacteria (Athenian victory over the Spartans)	425
Battle of Delium (Boeotian victory over the Athenians)	424
Battle of Megara (Indecisive battle between Athens vs Megara and the Peloponnesian League)	424
Battle of Amphipolis (Spartan victory over the Athenians)	422
Battle of Mantinea (Sparta and allies victorious over Athens and allies)	418
Sicilian Expedition (Athens vs Syracuse, Sparta and allies ending in the annihilation of the Athenians)	415 – 413

CLASSICAL GREEK

BATTLES AND CAMPAIGNS (CONTINUED)

Corinthian War	395 – 387 BCE
Battle of Haliartus (Theban victory over the Spartans)	395
Battle of Coronea (Sparta and allies victorious over Thebes and allies)	394
Battle of Nemea (Sparta and allies victorious over Thebes, Athens and allies)	394
Battle of Lechaeum (Athenian army under Iphicrates victorious over Sparta)	391
Illyrian Raid on Ephesus	385
Macedonian intervention in Thessaly (Macedonia vs Larrisa then Thebes)	379
Theban Spartan War	378 – 362
Battle of Tegyra (Theban victory over Sparta)	375
Battle of Leuctra (Thebes and Boeotian League victory over Sparta)	6 July 371
Battle of Mantinea (Thebes and allies victorious over Sparta and allies)	4 July 362
War between Athens and Cotys I (Thracian aided by Iphicrates captures the Chersonese)	362 – 360
Macedonian War against Athens	359
Third Sacred War	356 – 346
Siege of Methone (Captured by Philip II but lost an eye)	355 – 354
Capture of Pagasae (in Thessaly)	354
Third Sacred War	354 – 352
Macedonian war against the Phocians (in Thessaly) and Battle of Crocus Field	353 – 352
Macedonian capture of Olynthus and cities of Chalcidian League	348
Battle of Chaeronea (Athens and allies vs Macedonia)	338
Battle of Thebes (resulting in destruction of Thebes)	335
Lamian War	323 – 322
Battle of Crannon (Macedonian victory over Athens, Aeotolia and allies)	August 322
Four Years' War (Athens supported by Antigonus vs Cassander)	307 – 303
Invasion of Aetolia and Epirus (by Demetrius)	289
Campaign against Aetolians	280
Galatian Invasions (raid on Delphi, victory of Phocian and Aetolian troops)	279
Battle of Thermopylae (Brennus repeats turning operation of Xerxes)	279

ARMY COMMANDER	1	Any	DATES	670 BCE to 275 BCE
SUB-GENERALS	0-3	Any	TERRAIN	Standard, Coastal, Mountains
INTERNAL ALLIED GENERALS	0-2	Any	CAMP	Unfortified or Flexible; Poor or Average
NOTES				

The army's state must be specified. Any allied contingent must be of another specific state. A command may not mix troops from different specified states. External allies must specifically name Thebes, Thessaly, Aitolia, Arkania and Phokis to use these options. After 275 BCE mainland Greek armies should use the Hellenistic Greek list.

The following internal allied combinations are permitted: Thebans in 394 BCE - Argive and Athenian, Thebans in 362 BCE -Thessalian, Thebans in 338 BCE - Athenian, Thebans in 279 BCE Athenian and Aitolian; Athenians from 323 BCE to 322 BCE - Thessalian and/or Aitolian, Athenians in 279 BCE - Boiotian and Aitolian; Argives in 418 BCE - Athenian; Phokians from 357 BCE to 347 BCE - Athenians; Aitolians in 321 BCE - Thessalian.

TYPE									
NAME	TRAINING AND	QUALITY	SHOOTING SKILL		MANDATORY	BASE	OPTIONAL	MIN	UG SIZE
	FORMATION	PROTECTION	WEAPONRY	MELEE WEAPONRY	CHARACTERISTICS	PTS	CHARACTERISTICS	MAX	
Citizen hoplites	INFANTRY	Average	-	Long Spear	Shove, Shield Cover	95	Orb (2)	12	6,8
	Formed Close	Protected	-					90	
REPLACE CITIZEN HOPLITES WITH									
Elite or Sacred Band hoplites	INFANTRY	Superior	-	Long Spear	Shove, Shield Cover	140	Orb (3)	0	6,8
	Drilled Close	Protected	-					8	
Mercenary hoplites (from 450 to 405 BCE)	INFANTRY	Average	-	Long Spear	Shove, Shield Cover	100	Orb (2)	0	6,8
	Drilled Close	Protected	-					24	
Mercenary hoplites (from 404 BCE)	INFANTRY	Average	-	Long Spear	Shove, Shield Cover	100	Orb (2)	0	6,8
	Drilled Close	Protected	-					48	
Iphikretean "peltasts" (only Athens from 391 to 355 BCE)	INFANTRY	Average	-	Pike	Combat Shy	70	Orb (2)	0	8
	Drilled Close	Protected	-					16	

Thracians	INFANTRY	Average	Unskilled	Short Spear	-	60	Shoot & Charge (2)	0	6,8,9
	Tribal Loose	Protected	Javelin					9	
Peltasts	INFANTRY	Average	Experienced	-	-	29	Shoot & Charge (4)	0	6,9
	Skirmisher	Unprotected	Javelin					18	

Psiloi - javelinmen	INFANTRY	Average	Experienced	-	Combat Shy	25	-	0	6,9
	Skirmisher	Unprotected	Javelin					18	
Psiloi - archer	INFANTRY	Average	Experienced	-	Combat Shy	40	-	0	6,9
	Skirmisher	Unprotected	Bow					12	
Psiloi - slinger	INFANTRY	Average	Experienced	-	Combat Shy	35	-	0	6,9
	Skirmisher	Unprotected	Sling					12	
Cretan archers	INFANTRY	Average	Skilled	-	-	70	Combat Shy (-4)	0	6,9
	Skirmisher	Unprotected	Bow					9	
Regrade Cretan archers	INFANTRY	Average	Experienced	Short Spear	-	54	-		6,9
	Skirmisher	Protected	Bow					All or none	

Note: Allied contingents from this list may not include Cretan archers with Skilled Bow.

ONLY THESSALIANS

Thessalian cavalry	CAVALRY	Superior	Unskilled	Short Spear	-	131	Shoot & Charge (4)	0	4,6
	Formed Loose	Protected	Javelin					18	
Thessalian light horse	CAVALRY	Average	Experienced	-	-	47	Cantabrian (16), Combat Shy (-4)	6	4,6
	Skirmisher	Unprotected	Javelin					30	
Javelinmen	INFANTRY	Average	Experienced	-	-	29	Shoot & Charge (4)	12	6,9
	Skirmisher	Unprotected	Javelin					72	

Note: Minimum for Thessalians only applies if a Thessalian army or contingent is used.

STATES OTHER THAN THESSALIAN

Cavalry (see note)	CAVALRY	Average	Unskilled	Short Spear	-	95	Shoot & Charge (4), Horse Killers (6)	0	4,6
	Formed Loose	Protected	Javelin					6	
Additional cavalry (only Thebans, see note)	CAVALRY	Average	Unskilled	Short Spear	-	95	Shoot & Charge (4), Horse Killers (6)	0	4,6
	Formed Loose	Protected	Javelin					6	

Note: LIST CHARACTERISTIC: This optional characteristic may be chosen by Theban or Boeotian cavalry from 418 BCE and by Athenian or Argive cavalry from 365 BCE. Represent these by a marker of skirmishing javelinmen accompanying the cavalry. As long as the cavalry does not exceed skirmishing infantry move distance, the UG may claim the Melee Expert characteristic when fighting cavalry. If a cavalry move exceeds skirmishing infantry move distance for whatever reason, then remove the marker and the characteristic cannot be claimed. This rule must be notified to your opponent when the UG is deployed.

Light horse	CAVALRY	Average	Experienced	-	-	47	Cantabrian (16), Combat Shy (-4)	0	4,6
	Skirmisher	Unprotected	Javelin					6	

ONLY AITOLIAN, ARKANIAN OR PHOKIAN STATES

Javelinmen	INFANTRY	Average	Experienced	-	-	29	Shoot & Charge (4)	18	6,9
	Skirmisher	Unprotected	Javelin					180	

Note: Aitolians and Arkanians must take more javelinmen than hoplites.

ALLIES

LIST

Macedonian allies - Early Macedonian (Athenians from 432 to 421 BCE and in 359 BCE)	2404
Spartan allies - Later Spartan (Phokians from 357 to 347 BCE)	2407

CHANGES FROM LAST VERSION

None.

THRACIAN HILL TRIBES

670 BCE TO 26 CE

HISTORICAL NOTES

This list would cover Thracian tribes such as the Bessi and Dii. The Thracians were a group of tribes occupying southeast Europe between Macedonia and the Black Sea. The mountainous regions were notorious for various tribes regarded as warlike and ferocious. In the first decade of the 5th century BCE the Persians subjugated parts of Thrace and Thracians contributed to the army of Xerxes. After the withdrawal of the Persians the Thracian presence was pervasive enough for Herodotus to say they were potentially the most powerful people if not for their lack of unity.

The Thracians were partly conquered by Philip II of Macedon and then ruled by Lysimachus (see Thraco-Macedonian list). In 279 BCE a group of Celts invaded Thrace and whilst many moved into Asia Minor, some remained in Thrace until the end of the 3rd century BCE establishing the kingdom of Thylis.

Thrace remained nominally independent after the Romans created the province of Macedonia in 146 BCE. A Roman client state was established by 25 BCE (see Thraco-Roman list). Thrace wasn't incorporated into a Roman province until 46 CE.

TROOP NOTES

Thracian warriors were armed with a mix of spears and javelins. During the 4th century BCE, the rhomphaia, starts to make its appearance in the hill tribes. The rhomphaia had a long straight or slightly curved single-edged blade attached to a handle.

Cavalry: Although Nobles sometimes wore heavier equipment it is doubtful the hill tribes could field many cavalry. Most cavalry of the hill tribes were light skirmishers armed with javelins.

Javelinmen: The Thracians were renowned for their javelin equipped peltasts.

Archers: The Thracians used the bow.

Slingers: The Thracians used the sling on occasions.

SPARTAN

668 TO 394 BCE

HISTORICAL NOTES

The Spartans emerged as a significant power in Greece after the Second Messenian War. In 480 BCE, 300 Spartans under King Leonidas led the force to hold the pass of Thermopylae from the Persians and made a legendary last stand after being outflanked. The following year the Spartans led Greek army that defeated the Persians at the battle of Plataea. The growth of the Athenian empire following the defeat of the Persians ultimately led to the Peloponnesian War between Athens and Sparta from 431 to 404 BCE. Sparta was ultimately victorious and for the next thirty years was the predominant power in Greece.

TROOP NOTES

As the number of spartiates fell, they were increasingly supported by non-spartiates (hence referring to them as Spartan hoplites in the list rather than spartiates). The army could also be supported by separate units of periokoi, supplied by towns in Messene and Laconia that were ruled from Sparta. The remaining population were helots, slaves to the Spartans. Whether the helots fought is controversial.

The bulk of the army were hoplites.

The decline in the quality of the Spartan army over time reflects the lower proportion of spartiates and the declining reputation of the Spartan army.

HISTORICAL ENEMIES

Cavalry (see note)	CAVALRY		Poor	Unskilled				0	4,6
	Formed Loose		Protected	Javelin	Short Spear	-	59	Horse Killers (4)	

LIST CHARACTERISTIC: Horse Killers. This option characteristic may be chosen from 395 BCE, but not in Asia. Represent these by a marker of skirmishing javelinmen accompanying the cavalry. As long as the cavalry does not exceed skirmishing infantry move distance, the UG may claim the Melee Expert characteristic when fighting cavalry. If a cavalry move exceeds skirmishing infantry move distance for whatever reason, then remove the marker and the characteristic cannot be claimed. This rule must be notified to your opponent when the UG is deployed.

CHANGES FROM LAST VERSION

Removed date restrictions from Cretan archers.

EARLY MACEDONIAN

500 TO 357 BCE

HISTORICAL NOTES

Macedonia was a kingdom on the northern periphery of Greece. Around 512 BCE it became a vassal state of Achaemenid Persia. Persian control lapsed during the Ionian revolt but was re-established in 492 BCE. The kingdom regained its independence following the defeat of the Persians in 479 BCE. Prior to the reign of Philip II it was dominated by the great city states of Athens and Sparta. The list ends before the reforms attributed to Philip II had time to be implemented.

TROOP NOTES

Nobles: Macedonian cavalry in the 5th century were equipped with spears and javelins. At some point in the 4th century they started to charge home, a reform leading ultimately to the Companion cavalry of Alexander the Great.

Warriors: Macedonian infantry were equipped in a similar fashion to their Thracian and Illyrian neighbours with a mixture of spears and javelins.

Hoplites: Contingents of hoplites are recorded in Macedonian armies, even in highland districts.

Illyrians: Illyrian contingents are recorded being hired as mercenaries by the Macedonians.

Greek hoplites: The Macedonians were able to field some hoplites from the Greek cities within their territories.

Pezetairoi: Iphicrates had close ties with the Macedonian royal family. It is possible that in the reign of Alexander III (370 - 368 BCE) that the reforms of Iphicrates were tried by the Macedonians and this led to the later development of the Macedonian pike phalanx. Pezetairoi means "Companion". In time of Alexander the Great it is a term associated with the pike phalanx.

Light horse: Some Macedonian cavalry were armed with javelins.

Javelinmen: The mountains of the Balkans offered a plentiful supply of javelinmen.

Archers: The bow is recorded as being used by the Macedonians.

ILLYRIAN

500 BCE TO 20 CE

HISTORICAL NOTES

The Illyrians were a group of tribes that inhabited the western part of the Balkans and the south-eastern coast of Italy (Messapia). Illyrian piracy was a significant danger to neighbouring peoples. The first known king was Bardyllis who was defeated by Philip II of Macedon in 358 BCE. In the Illyrian Wars of 229 BCE, 219 BCE and 168 BCE Roman armies overran Illyria and suppressed piracy. Further wars in the interior of the western Balkans continued for a further 150 years. An Illyrian revolt from 6 CE to 9 CE was crushed under Augustus and resulted in the creation of the Roman provinces of Dalmatia and Pannonia.

TROOP NOTES

Warriors: The Illyrians used a mixture of javelins and spears in a similar fashion to their Balkan neighbours. On occasion they seem to have formed up in a denser formation, hence the flexible classification.

Hoplites: Against Epiros in 385 BCE a group of Illyrians were equipped by Syracuse as Hoplites. Later the Illyrians may have taken hoplite panoply from Greek states within their territories.

Light horse: Some Illyrian cavalry were armed with javelins.

Javelinmen: The mountains of the Balkans offered a plentiful supply of javelinmen.

Archers and Slingers: The bow and sling were being used by the Illyrians at this time.

MERCENARY GREEK

401 TO 298 BCE

HISTORICAL NOTES

This list represents the Greek mercenary armies that operated independently including the "Ten Thousand".
Philon was the leader of the Greek mercenaries in Bactria that revolted. Letodoros's battlefield desertion with 3,000 men led to Philon's defeat by Pithon.
Thibron was a Lacedaemonian who was an officer under Harpalus, the Macedonian satrap of Babylon under Alexander the Great. In 324 BCE he murdered Harpalus and seized his fleet, army, and treasury. He sailed to Cyrene and defeated the Cyreneans. Some Cyreneans appealed for help from Ptolemy I, ruler of Egypt. Ptolemy sent a large force under Ophellas who defeated Thimbron. Thimbron was captured by Libyans and later crucified.
Aristodemus was sent by Antigonus to the Peloponnese with 1000 talents and orders to wage war against Cassander.
Cleonymus went as a mercenary leader to help Tarentum against the Lucani with the backing of the Spartan administration.

TROOP NOTES

Unreliability and even desertions were frequent amongst mercenary companies.

HISTORICAL ENEMIES

Cyrenean Greek 2201; Lowland Gallic 2302; Macedonian Successor 2412; Lucanian 2509; Asiatic Successor 2805.

BATTLES AND CAMPAIGNS

LATER SPARTAN

393 TO 228 BCE

HISTORICAL NOTES

In 371 BCE the Spartans were defeated by Epaminondas of Thebes at the Battle of Leuctra. Sparta never recovered from this and a further defeat in 362 BCE at Mantinea. It remained a minor power until the reforms of Cleomenes III in 227 BCE.

TROOP NOTES

The defeat at Leuctra resulted in the deaths of many Spartiates and accelerated the decline of the Spartan army. As Spartan power weakened, they appear to have been more reluctant to use helots in military roles.

HISTORICAL ENEMIES

Classical Greek 2401; Illyrian 2405; Alexandrian Macedonian 2408; Macedonian Successor 2412; Pyrrhic 2414; Hellenistic Greek 2416; Later Achaemenid Persian 2605.

RULERS

Sparta had a system of being ruled by two kings simultaneously coming from two separate lines. Many regnal dates are approximate.

Agiad dynasty	Eurypontid dynasty
Agesipolis I (395 – 380)	Agesilaus II (401 – 360)
Cleombrotus I (380 – 371)	Archidamus III (360 – 338)
Agesipolis II (371 – 369)	Agis III (338 – 331)
Cleomenes II (369 – 309)	Eudamidas I (331 – 305)
Areus I (309 – 265)	Archidamus IV (305 – 275)
Acrocatus II (265 – 262)	Eudamidas II (275 – 245)
Areus II (262 – 254)	Agis IV (245 – 241)
Leonidas II (254 – 242, 241 – 235)	Eudamidas III (241 – 228)
Cleombrotus II (242 – 241)	Archidamus V (228 – 227)
Cleomenes III (235 – 222)

ALEXANDRIAN MACEDONIAN

356 TO 323 BCE

HISTORICAL NOTES

Philip II was the youngest son of king Amyntas III and queen Eurydice. The deaths of Philip's elder brothers, King Alexander II and Perdiccas III, allowed him to take the throne in 359 BCE. Originally appointed regent for his infant nephew Amyntas IV, who was the son of Perdiccas III, Philip managed to take the kingdom for himself that same year. Shortly after gaining the throne of Macedon Philip II set about reforming the army. Philip improved on the military innovations of Epaminondas of Thebes and Iphicrates of Athens, introducing the use of the two-handed pike. For the first time in Greek warfare, cavalry became a decisive arm in battle. The Macedonian army perfected the co-ordination of different troop types.

After campaigns against the Illyrians, Greeks, Thracians, and Scythians, and defeating an alliance of Thebans and Athenians at the Battle of Chaeronea in 338 BCE Philip established a position of having the majority of Greeks under Macedonian sovereignty. In 337 BCE he was elected as leader of the army of invasion against the Persian empire. Assassinated in 336 BCE, he was succeeded by his son Alexander, who later became known as Alexander the Great.

In 334 BCE Alexander invaded the Persian empire and in a series of decisive battles broke the power of Persia. He went on to invade India and only stopped when his army refused to go any further. He died in Babylon in 323 BCE.

TROOP NOTES

Elephants: Alexander captured 15 elephants after the Battle of Gaugamela but is not recorded using elephants before entering India.

Agema: The Agema was the elite unit of Companions, led personally by Alexander. Companion cavalry: The Companion cavalry were the strike force of the Macedonian army. The main weapon was a 12' thrusting spear, a xyston. A sword was also carried. Thessalian cavalry: Thessaly became significantly wealthier in the mid-4th century BCE. Weapons appear to be either a spear or 2 javelins. Greek cavalry: Equipped as the Thessalian cavalry. Scythian horse archers: Horse archers were added to the army as it campaigned in the east from 328 BCE onwards. The main weapon was the composite bow, but a sagaris, an axe-like weapon was also carried.

Hypaspists: Two theories exist for the equipment of the hypaspists. The first is that they were equipped in the same fashion as the phalangites. The alternative theory, based upon the Alexander sarcophagus is that they used Hoplite equipment. In either case it seems they often discarded the heavier weapons and took javelins when used on forced marches, hill campaigns or other mobile operations. Foot companions: The pezetairos were equipped as phalangites with a 15' to 18' pike and a smaller shield than a hoplon, called an aspis or pelte. The shaft of the pike was made in two pieces joined by a sleeve. Hoplites: Philip and Alexander employed mercenaries as well as hoplites from his Greek allied states. After defeating the Persians, many Greeks were settled as garrison troops throughout the Empire. The hoplites were often used in a second line as a reserve.

Thracians: Both Philip and Alexander used Thracians throughout their campaigns. Indians: After entering India, Alexander levied infantry from states that had submitted to him.

Prodomoi: Light cavalryman equipped with a xyston. Light cavalry: The Macedonians used more conventionally equipped light cavalry with javelins.

Agrianians: An elite unit of light javelinmen. Alexander used these troops regularly on his mobile operations.

Light troops: The Macedonians used a range of light troops including Cretan archers, Rhodian slingers and javelinmen from the Balkans.

ALEXANDRIAN EXPEDITIONARY

334 TO 324 BCE

HISTORICAL NOTES

This list covers the expeditionary columns led by Alexander the Great during his Asian conquest away from his main field army where the equipment of the hypaspists and phalangites had been lightened.

TROOP NOTES

- Companions: The Royal Agema invariably accompanied Alexander on these expeditions.
- Hypaspists: These seem to have been the core of these expeditionary forces.
- Phalangites: These were re-equipped with javelins.
- Light horse: The prodomoi were replaced by mounted archers in the East.
- Agrianians: These seem to have been the favoured strike force.
- Archers: Archers often accompanied the Agrianians.

HISTORICAL ENEMIES

Early Scythian or Saka 2101; Mountain Indian 2603; Later Achaemenid Persian 2605.

BATTLES AND CAMPAIGNS

Seizure of the defile at Telmissos (held by Pisidian mountain tribesmen)	333 BCE
Capture of the Persian Gates	331
Rock of Ariomazes (Capture of Roxanne)	327
Rock of Aornus (Captured after an assault and 2-day siege)	327

EPIROTE

334 TO 167 BCE

HISTORICAL NOTES

The list covers the armies of the Mollosian and Epirote leagues excluding the armies of Pyrrhus (covered by the Pyrrhic list). Originally formed by unifying the three main tribes of Epirus the Molossians, Thesprotians, and Chaonians. Olympias, a princess of Epirus married Philip II of Macedon and was the mother of Alexander the Great. In 334 BCE Alexander I of Epirus (brother of Olympias) invaded Italy at the request of the Greek city of Tarentum to aid them against the Samnites, Lucanians and Bruttians. He was killed at the battle of Pandosia in 331. Except for Pyrrhus, the rulers of Epirus were uninspiring. After the death of the last Aeacid ruler in 233 the state became a federal republic. With the growing influence of Rome, it remained neutral in the first two Macedonian wars but split in the Third Macedonian War (171–168 BC), with the Molossians siding with the Macedonians and the Chaonians and Thesprotians siding with Rome. This was disastrous for the Molossians with 150,000 inhabitants being enslaved by the Romans. It effectively ended the league as an independent entity.

TROOP NOTES

It was probably Alexander I who introduced the Macedonian phalanx to Epirus.

HISTORICAL ENEMIES

Illyrian 2405; Epirote 2410; Macedonian Successor 2412; Later Macedonian 2415; Hellenistic Greek 2416; Lucanian 2508; Samnite 2509; Bruttian 2511; Mid Republican Roman 2513.

THRACO-MACEDONIAN

323 TO 281 BCE

HISTORICAL NOTES

Lysimachus was one of the bodyguards of Alexander the Great. After Alexander's death in 323 BCE, he was appointed as governor of Thrace. In the next 10 years he consolidated his control of Thrace and in 315 BCE had to suppress a major revolt of the Thracian and Sythian tribes and Greek cities instigated by Antigonus. In 302 BCE he allied with Seleucus and Cassander to defeat and kill Antigonus at the battle of Ipsus in 301 BCE (covered in the Coalition against Antigonus list). In 288 BCE he invaded Macedonia and with Pyrrhus expelled Demetrius. He then expelled Pyrrhus and seized the Macedonian throne. He was defeated by Seleucus at the battle of Corupedium in 281 BCE and killed.

TROOP NOTES

The sources for Lysimachus and his armies are scant. His army appears to have been like the other successors but may have relied to a greater extent on the Thracians and Greek coastal cities within his realm. After Ipsus he had greater access to recruit in Asia Minor and as King of Macedon he was able to call on the Macedonian phalanx.

MACEDONIAN SUCCESSOR

323 TO 280 BCE

HISTORICAL NOTES

After the death of Alexander the Great, Macedonia was controlled by a series of generals. Initially Antipater held a quasi-regency but in 319 BCE he succumbed to old age. He appointed Polyperchon as his successor, but Polyperchon was challenged by Cassander who seized Philip Arrhidaeus (a half-brother of Alexander). Polyperchon was joined by Olympias, Alexander's mother who controlled Alexander's grandson. Olympias was captured in 316 BCE and put to death by Cassander. In 313 BCE Antigonus and his generals attacked Cassander and gained control of a significant part of Greece.

In 310 BCE a nephew of Antigonus, Polemaeus offered an alliance to Cassander. Antigonus responded by enlisting Polyperchon to invade Macedonia, but Polyperchon switched sides to ally himself with Cassander. In 304 BCE Antigonus sent his son Demetrius to recapture Greece. This forced Cassander into an alliance with Lysimachus, Ptolemy and Seleucus that led to the defeat and death of Antigonus at the battle of Ipsus in 301 BCE.

In 298 BCE Cassander died. The eldest son Philip IV died shortly after his father and the kingdom was divided between two further sons Alexander and Antipater. Alexander invited both Pyrrhus and Demetrius to support him against his brother. Pyrrhus responded first and restored the balance of power. Demetrius then arrived, murdered Alexander, and then seized the remainder of the kingdom from Antipater. Demetrius however couldn't hold the loyalty of the kingdom and in 289 BCE it was invaded by and divided up between Pyrrhus and Lysimachus. Lysimachus was able to seize the whole kingdom by 288 BCE.

In 281 BCE Lysimachus was killed at the Battle of Corupedium by Seleucus, but as Seleucus crossed the Dardanelles he was killed by Ptolemy Ceraunus who seized the Macedonian throne. Ceraunus however survived barely one year before being killed whilst fighting an invasion of Celts known as the Galatians.

TROOP NOTES

Elephants: Following Antipater's death, Polyperchon as the nominated regent gained control of 65 of these as part of the royal army, which he used to unsuccessfully attack Megalopolis. Cassander gained control of most of them, with Olympias getting hold of the rest. Hers starved to death in the siege in which she was finally captured.

Xystophoroi: These were present in all armies, but generally in small numbers. They would have included Thessalians as well as Macedonians.

Greek cavalry: Greek mercenary cavalry was also available, equipped as in earlier times.

Phalangites: Available to whoever wielded Royal Power. Despite the exodus of Macedonians into the conquered Persian empire, some 20,000 were available to Polyperchon.

Greek mercenaries: Greek mercenaries were employed by all the successors.

Thracians: Although not specifically attested, Thracians were certainly available and used by other successors.

Illyrians: Illyrians are mentioned.

Light horse: Light horse may have been used in small numbers.

Euzenoi: Euzenoi "lightened" were phalangites re-equipped with javelins for expeditions where the pike would not be suitable.

Archers, Slingers: The Macedonians made use of both archers and slingers.

Javelinmen: Plenty of javelinmen were available from within Macedonia and the adjacent territories.

COALITION AGAINST ANTIGONUS

302 TO 301 BCE

HISTORICAL NOTES

This list represents the army of Lysimachus, Cassander and Seleucus that defeated Antigonus at Ipsus in 301 BCE. Seleucus marched with 480 elephants from India arriving late in 302 BCE.

TROOP NOTES

The army of the coalition comprised forces from the Macedonian army of Cassander, the Thracian army of Lysimachus and the army of Seleucus. Little is known as to the actual composition of the army because the main ancient source stops on the eve of the battle. The Seleucid component included a large (up to 500) contingent of Elephants and substantial numbers of Iranian cavalry.

HISTORICAL ENEMIES

Asiatic Successor 2805.

PYRRHIC

294 TO 272 BCE

HISTORICAL NOTES

Pyrrhus was son of Aeacides, king of Epirus, who was dethroned in 317 BCE. He held the throne from 307 until expelled in 302. He then took service with Demetrius and then Ptolemy who restored Pyrrhus to the throne of Epirus. By 294 he was securely on the throne when he received a call for aid from Alexander, son of Craterus. In 289 he defeated a general of Demetrius. In 288 he seized the western half of Macedonia but was subsequently expelled by Lysimachus. In 281 he received an invitation from the Greek city of Tarentum in southern Italy to help them against the Romans. He landed in 280 and fought two major battles at Heraclea and Asculum. The term "Pyrrhic victory" derives from these battles. In 278 he received a call for help from Syracuse and landed in Sicily. He defeated the Carthaginians who were pushed back into the fortress of Lilybaeum. His Siciliote subjects refused to support the effort for an expedition to Africa and Pyrrhus abandoned them to return to Epirus. In 274 Pyrrhus invaded Macedonia and captured the western portion from Antiogonus Gonatas but could not hold on to it. He then went to the aid of a Spartan pretender but failed to capture Sparta and was killed at Argos.

TROOP NOTES

Elephants: Pyrrhus obtained his elephants either from Demetrius or Ptolemy Ceraunus. He took 20 to Italy. It was the first occasion the Romans encountered elephants in battle.

Xystophoroi: Pyrrhus had a guard unit of cavalry, the Agema.

Cavalry: Pyrrhus's cavalry included Epirotes, Thessalians, Ambracians, Tarentines, Apulians, Bruttians, Lucanians and Samnites.

Phalangites: The Epirotes had fought in the style of the Illyrians but converted to the Macedonian system either by Pyrrhus or his predecessor Alexander of Epirus. The army transported to Italy included 5,000 Macedonians.

Hoplites: Pyrrhus may have obtained hoplites from allies in Greece, Italiot Greek mercenaries, and Greek mercenaries in Sicily.

Epirote javelinmen: These are Epirotes or neighbouring states who still fought in a traditional style.

Tarentine Phalangites: It is believed that Pyrrhus trained the Tarentines to fight as phalangites.

Italian javelinmen: Whilst in Italy Pyrrhus recruited Samnite, Bruttian and Lucanian javelinmen. Oscan tribesmen typically wore helmets, used an oval shield, and sometimes wore greaves. They carried up to four javelins or a short thrusting spear. A few could afford armour.

Light horse: By this date Tarentine already was known for supplying light horse.

Archers and slingers: Were obtained in both Greece and Italy.

Javelinmen: Javelinmen were widely available in both the Balkans and Italy.

Aitolian allies - Classical Greek (only in 294 BCE)	2401
Siciliot Greek allies - up to 2 contingents (only in Sicily from 278 to 276 BCE)	2703

CHANGES FROM LAST VERSION

Adjustments in Italy and Sicily.

LATER MACEDONIAN

279 TO 168 BCE

HISTORICAL NOTES

In 277 BCE Antigonus Gonatas, the son of Demetrius, defeated a large band of Galatian marauders. On returning to Macedonia, which was in chaos after the Galatian invasions, he was acclaimed as king thereby founding a dynasty that was to last for 110 years. Over the next 38 years he consolidated his power in Macedon, eventually winning a major naval battle against Ptolemy to secure control of the Aegean Sea. In Greece he was unable to prevent the rise of the Achaean league but held onto Corinth. Antigonus was succeeded by Demetrius II who in turn was succeeded by Antigonus Doson. In 222 BCE, allied to the Achaean league, he defeated the reformed army of Sparta under Cleomenes. He died in 221 BCE and was succeeded by Philip V. Philip was defeated by the Romans at the battle of Cynoscephalae in 197 BCE. His son Perseus was defeated by the Romans at the battle of Pydna in 168 BCE. Macedonia was divided into four federal republics but after a revolt (149 to 148 BCE) was converted into a Roman province.

TROOP NOTES

Elephants: Gonatus obtained elephants from Ceraunus and Pyrrhus.

Cavalry: Cavalry played a minor role in Antigonid armies. At some point during the 3rd century BCE the Macedonian cavalry stopped using the xyston and reverted to javelins and short thrusting spears along with a shield.

Agema: The Antigonids maintained an Agema, an elite corps within the "peltasts".

Peltasts: These were the best native Macedonian phalangites. Philip had 5,000 Agema and Peltasts in 219 BCE.

Phalangites: The phalanx was made up to two corps "chalkaspides" (bronze shields) and "leukaspides" (white shields). The former sometimes appear without the latter on expeditions - perhaps because they were the younger men called up to serve first. As part-time soldiers, the quality of drill may not have been as good as in earlier times.

Thorakitai and Thureophoroi: During the 3rd century BCE, the hoplon shield was abandoned in favour of the oval thureos. Thorakitai were armoured.

Thracians, Illyrians, and Galatians: The Macedonians used mercenaries from the surrounding states. Thracians by this date were increasingly equipped with rhomphaia.

Light horse: Tarentine and other light horse were used on occasion but not in large numbers.

Euzenoi: The Greeks and Macedonians did continue the practice of lightening equipment. Images of thureophoroi with javelins may represent euzenoi.

Archers, Slingers and Javelinmen: All were available to the Macedonians including Cretan archers.

LATER MACEDONIAN

RULERS

Antigonus Gonatas	277 – 274,272 – 239
Meleager	279 BCE
Antipater	279
Sosthenes (general, refused the diadem)	279 – 277
Pyrrhus of Epirus	274 – 272
Demetrius II	239 – 229
Antigonus III Doson	229 – 221
Philip V	221 – 179
Perseus	179 – 168

In 167, Rome left Macedonia after dividing it into four republics. In 149, a pretender Andriscus claimed the throne as Philip, son of Perseus. He was defeated by a Roman force and Macedon converted into a Roman province.

BATTLES AND CAMPAIGNS

Battle of Lysimachia (defeated Galatians under Cerethrius)	277 BCE
Battle of the Aous River (defeated by Pyrrhus)	274
Chremonidean War (vs Athens, Sparta and Ptolemaic Egypt)	267 – 261
Battle of Corinth (defeated Sparta)	265
Battle of Derdia (Macedonian victory over Alexander II of Epirus)	c.260
Capture of the Acrocorinth (by Aratus)	243
Invasion of Boeotia (Boeotians submitted)	236
Invasion of the Dardani (defeated Demetrius)	230 or 229
War against Sparta	226 – 222
Battle of Sellasia (Macedonian victory against Sparta)	222
Invasion by Illyria (defeated)	221
Social War or War of the Allies (Macedonian and Hellenic League victory over (Aetolia, Elis and Sparta)	220 – 217
Macedonian invasion of Illyria	216 – 212
First Macedonian War (Macedonia and the Achaean League vs Rome and allies)	214 – 205
Attalid campaign allied with Romans against Philip V of Macedon	209 – 208
First Battle of Lamia (Macedonian victory vs Aetolian League	209
Second Battle of Lamia (Macedonian victory vs Aetolian League	209
Cretan War	205 – 200
Macedonian invasion of Pergamon after Battle of Chios (Invasion repelled)	201
Second Macedonian War (Macedonia and allies vs Rome and allies)	200 – 196
Battle of the Aous (Roman victory)	198
Battle of Cynoscephelae (Roman victory)	197

LATER MACEDONIAN

BATTLES AND CAMPAIGNS (CONTINUED)

Roman – Seleucid War (Macedon was a Roman ally)	192 – 188 BCE
Third Macedonian War (vs Rome)	172 – 168
Battle of Callinicus (Macedonian victory)	171
Battle of Pydna (Macedonian defeat)	168
Fourth Macedonian War	150 – 148

HELLENISTIC GREEK

275 TO 146 BCE

HISTORICAL NOTES

This list covers Aitolian League, Boiotia, Elis and minor states on the mainland and in Asia Minor including Athens and Heraclea. It also covers Achaean League armies from 251 BCE. Between 275 BCE and 146 BCE Greece was dominated by Macedonia, the Aitolian League, and the Achaean league. The Aitolian League became a major power after defeating the Galatian invasion of Greece. It was a disruptive force in Greek politics, inviting the Romans in their fight against Philip V of Macedon and allying themselves with Antiochus III. This last act led to Roman reprisals which effectively destroyed the League as a political force. From 245 BCE the Achaean League was transformed from a group of minor cities into a powerful force by Aratus of Sicyon. It dominated the Peloponnese until the sack of Corinth in 146 BCE when Greece became a Roman province. Athens never regained its former glory.

TROOP NOTES

Cavalry: Greek cavalry appear to have retained javelins and/or a short thrusting spear during this period, but both Athenian and Achaean cavalry are recorded charging with xyston as in earlier times.

Hoplites, thorakitai and thureophoroi: During the 3rd century BCE the round Hoplon shield was replaced by the oval thureos. This may have been under Celtic influence.

Thorakitai wore body armour.

Phalangites: At different dates, some of the Greek states adopted the pike phalanx.

Thracians and Illyrians: The Achaeans used both Thracians and Illyrian mercenaries on occasion.

Light horse: Tarentine and other light horse were used on occasion but not in large numbers.

Euzenoi: The Greeks and Macedonians did continue the practice of lightening equipment. Images of thureophoroi with javelins may represent euzenoi.

Aitolians: The Aitolians used large numbers of javelin skirmishers in their mountain homeland.

Archers, Slingers and Javelinmen: All were available to the Macedonians including Cretan archers.

HELLENISTIC SPARTAN

227 TO 195 BCE

HISTORICAL NOTES

In 227 BCE Cleomones III instituted a series of reforms and revived the fortunes of Sparta. He was defeated in 222 at the battle of Sellasia. Sparta was forced into the Achaean league in 195 and annexed in 192.

TROOP NOTES

Cleomones re-equipped the spartiates and at least some of the Spartan periokoi as phalangites. In 222 BCE some 2,000 freed helots were equipped as phalangites.

HISTORICAL ENEMIES

Illyrian 2405; Later Macedonian 2415; Hellenistic Greek 2416; Mid-Republican Roman 2513.

RULERS

Sparta had a system of being ruled by two kings simultaneously coming from two separate lines. In 227 Cleomones appointed an Agiad. In 219 the dual monarchy was re-established, but in 215 Lycurgus deposed the last Agiad and Sparta was ruled by sole kings. Many regnal dates are approximate.

Cleomones III	235 – 222 BCE
Eucleidas	227 – 222
Agesipolis III	219 – 215
Lycurgus	219 – 210
Pelops, regent Machanidas (210-207)	210 – 206
Nabis	206 – 192
Laonicus	192

BATTLES AND CAMPAIGNS

War against Achaean League and Macedonia	226 – 222 BCE
Battle of Sellasia (Spartan defeat)	222
Battle of Mantinea (Achaean League victory vs Sparta)	207
Battle of Gythium (Roman and Achaean allies defeat Spartans under Nabis)	195
