

PERSIA, INDIA AND IRAN

UTHER USED ARMY LISTS FOR

**MORTEM
ET GLORIAM**

ARMY LISTS

PERSIA, IRAN AND INDIA

Edited by Richard Jeffrey-Cook. Contributions from Simon Hall, Nik Gaukroger and Lance Flint. Front image by Simon Clarke.

CONTENTS

2601	Achaemenid Persian – Royal Army	550 to 424 BCE
2602	Achaemenid Persian – Satrapal Army	530 to 424 BCE
2603	Mountain Indian	500 to 170 BCE
2604	Classical Indian	500 BCE to 350 CE
2605	Later Achaemenid Persian	423 to 329 BCE
2606	Later Saka	300 to 115 BCE
2607	Graeco-Bactrian	250 to 140 BCE
2608	Parthian	250 BCE to 225 CE
2609	Indo-Greek	180 BCE to 10 CE
2610	Kushan or Indo-Scythian	150 BCE to 500 CE
2611	Parthian Vassal States	147 BCE to 241 CE
2612	Indo-Parthian	75 BCE to 100 CE
2613	Early Sassanid Persian	224 to 336 CE
2614	Middle Sassanid Persian	337 to 488 CE
2615	Hephthalite	356 to 625 CE

CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

Around 550 BCE, Cyrus a descendent of Achaemenes, overthrew his father-in-law Astyages, emperor of Media. As king of the Persians, Cyrus had been a vassal of Astyages but won the Median aristocracy to his side. In 547 BCE the Lydian king Croesus led an army into Media. Cyrus fought an indecisive battle but then pursued Croesus back to Lydia, defeated the Lydians and captured Croesus. A revolt was put down savagely and the Persian empire now stretched from the Aegean Sea to the Iranian plateau.

Not content, Cyrus next invaded the steppes north and east of the Iranian plateau. He defeated the Saka tribes and conquered land up to the River Jaxartes. By 539 BCE Cyrus had invaded Babylonia, defeated their ruler Nabodinus and declared himself “King of Babylon”. In a period of 12 years he had defeated and united three empires to form the largest empire the world had seen at that time.

Under his successor, Cambyses, the Persians invaded and captured Egypt. But in 522 BCE Cambyses was overthrown and from the disorder arose Darius the Great, who continued the policy of expansion. In 518 BCE a Persian army invaded India and the kingdoms in the Punjab submitted. In 513 BCE a Persian army crossed into Europe. The army was sent north against the Scythians that controlled the steppes around the Black Sea, who withdrew. The army focused on the north Aegean coast. The Thracians and Macedonians submitted to the Persian king.

In 499 BCE the Greeks in Ionia (western Asia Minor) revolted. A peace settlement was imposed in 493 BCE, but the Persians had been aided by the cities of mainland Greece. In 490 BCE a Persian force landed at Marathon but was defeated by the Athenians.

Darius died before he had a chance to launch an invasion of Greece. It was his son, Xerxes, who was to take up this challenge. In 480 BCE the Greeks won a decisive victory over the Persian fleet at Salamis. Xerxes withdrew some of his army but left a large force under his satrap, Mardonius. Mardonius was killed at the Battle of Plataea. The Greek cities in Asia Minor revolted and the Persians lost their European territories. After a further Persian defeat at Eurymedon in 469 BCE military action was halted. Peace was finally agreed in 449 BCE.

The Persian empire had reached its limit of expansion. During the later 5th century BCE it relied increasingly on Greek mercenaries to provide the infantry element of its armies. Cyrus, satrap of Lydia, hired 10,000 Greek mercenaries including Xenophon in his rebellion against his brother Artaxerxes II but was defeated at Cunaxa.

At the same time the Egyptians revolted. Artaxerxes II reigned for 45 years but Egypt was only re-conquered by Artaxerxes III in 343 BCE. During the reign of Artaxerxes II the satraps of Cappadocia, Phrygia and Armenia revolted.

In 336 BCE Darius III, satrap of Armenia, became king. He succeeded in putting down a revolt in Egypt when Alexander the Great began his invasion of the Persian empire. The Persian empire fell at the battle of Gaugamela in 331 BCE. In the next 8 years the Macedonians subdued the Iranian plateau and conquered new territories in the Indus valley. These lands were settled by Greeks in new cities, many of which were founded by Alexander the

Great. The eastern satrapies were a backwater during the wars of Alexander's successors, but by 300 BCE they were in the control of Seleucus I, founder of the Seleucid empire. Seleucus appointed his son as regent over the "Upper satrapies" as they were known, and the lands remained in Seleucid control until about 250 BCE.

Around 255 BCE a Saka tribe, the Parnii, captured the satrap of Parthia. Under their leader Arsaces, they encouraged Iranian customs whilst maintaining a tenuous hold on their new territories. The neighbouring satrap of Bactria, Diodotus, declared his independence by issuing coinage in his own name, founding the first Graeco-Bactrian kingdom. The Greeks were to maintain their rule in Bactria and the surrounding satrapies for 120 years.

Meanwhile in India a new empire arose. Perhaps inspired by Alexander the Great, the Mauryan empire had by 300 BCE come to dominate much of northern India including the Punjab. The emperor Chandragupta Maurya arranged a treaty with Seleucus I. For a reported 500 elephants, Chandragupta was confirmed as ruler in Arachosia and the Paropamisadae (southern Afghanistan). It was the collapse of the Mauryan empire around 180 BCE that encouraged the Greeks in Bactria to invade these Indian territories. By 150 BCE the Greeks had control of the northern Indus valley and under Menander their influence extended to the Ganges valley.

The invasion of India may have weakened the Greek hold in Bactria. An invasion by the Saka, who themselves were fleeing from the Yuezhi, captured Bactria in the 140s BCE. They were subsequently further displaced south and ended up in the lower Indus valley where they established several Indo-Scythian kingdoms.

The Yuezhi captured Bactria from where their leading clan, the Kushans, established an empire. They advanced south into modern Afghanistan, Pakistan and northern India. They reigned to around 225 CE.

The collapse of the Seleucid empire was to see the growth of the Parthian empire. Mithridates I (c. 171 to 138 BCE) seized Media and then Mesopotamia from the Seleucids. The defeat of Antiochus VII by Phraates II in 129 BCE ended the Seleucid threat to the Parthians. Under Mithridates II (c. 124 to 90 BCE) they recovered lands from the Indo-Scythians in Seistan and expanded their influence westwards into Characene and Armenia.

The Parthians came into contact with the Romans and a border was established on the Euphrates. Although victories were obtained over Crassus at Carrhae and against Mark Antony, the Parthians generally came out worse in conflicts against the Romans. The Romans were however unable to hold on to Parthian territory and an uneasy stalemate emerged.

The Parthian empire was to survive until 228 CE Ardashir I, local Iranian ruler of Persis, began defying Arsacid rule and in 224 CE defeated Artabanus V at Hormozdgān. This allowed him to establish the Sassanid Empire that would assume Parthia's legacy. The Sassanids expanded into Bactria and

seized the western portions of the Kushan empire. They embarked on a series of wars against the Romans. Under Shapur II they also expanded east into Transoxiana. At the time of Shapur II's death in 379 CE the Empire was at its strongest, with Armenia under Persian control.

The next century was a largely peaceful period with the Romans. In 427 CE an invasion in the east by the Hephthalites was defeated. These nomads were believed to be an offshoot of the Huns who were to cause so much disruption in Europe, but it is now considered more likely that they were a group of Turks. By 479 CE the Hephthalites had conquered Sogdia. The Hunas, believed to include Hephthalites, invaded northern India and overran part of the Gupta empire.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

ACHAEMENID PERSIAN - ROYAL ARMY

550 TO 424 BCE

HISTORICAL NOTES

The Achaemenid empire was founded by Cyrus the Great who conquered the Median (550 BCE), Lydian (546 BCE) and Babylonian (539 BCE) empires. His son Cambyses II conquered Egypt creating the largest empire the world had yet known. In response to mainland Greeks sending aid to rebellious Greek cities in Asia Minor Darius I sent an expedition that was beaten by the Athenians at Marathon (490 BCE). Ten years later his son, Xerxes I, launched a full-scale invasion of Greece that was defeated at Salamis by sea and Plataea on land. The final defeat of the Persians at Mycale encouraged the Greek cities of Asia to revolt, and the Persians lost all their territories in Europe. After Xerxes I was assassinated, he was succeeded by his eldest son Artaxerxes I who ruled until 424 BCE. Hostilities between Persia and the Greeks continued until 450 BCE.

TROOP NOTES

The Royal army is assumed to be any army commanded by the King of Kings. As such he could levy troops from anywhere in the Empire, as Xerxes did in 480 BCE to invade Greece. The core of the Persian army were the Immortals. A division of 10,000 (baivarabam) consisting of the best Persian, Median or Elamite youth. A unit of 1,000 picked troops constituted the King's personal guard and were selected from this division. A guard unit of 1,000 cavalry also accompanied the King. The Persians inherited their military approach from the Medes. The main weapon was the bow, each file of 10 consisting of 9 archers protected by the Spear-bearer (sparabara) who carried a spear and pavise. Cavalry were also primarily bow armed.

HISTORICAL ENEMIES

Phoenician 1306; Later Vedic Indian 1312; Lydian 1408; Saitic Egyptian 1410; Neo-Babylonian Empire 1412; Median Empire 1413; Paeonian 2103; Meroitic Kushite 2202; Thracian Hill Tribes 2402; Spartan 2403; Mountain Indian 2603; Classical Indian 2604; Asiatic Greek 2801; Lycian 2802.

RULERS

Cyrus the Great	559 – 530 BCE
Cambyses II	530 – 522
Gaumata	522
Darius the Great	522 – 486
Xerxes I	486 – 465
Artaxerxes I	465 – 424
Xerxes II	424
Sogdianus	424 – 423

ACHAEMENID PERSIAN - ROYAL ARMY

BATTLES AND CAMPAIGNS

Capture of Ecbatana (from the Medes)	550 BCE
Battle of Pteria (Indecisive battle against the Lydians)	547
Battle of Thymbra (Decisive victory for the Persians under Cyrus against the Lydians)	547
Conquest of Lydia	c.547
Conquest of Sogdia	546 – 539
Ionian Campaign (Subdugation of Ionian cities including Magnesia and Priene)	546 – 542
Campaign against Gedrosia (Persians defeated)	c. 540
Conquest of Eastern Satrapies	540 – 533
Battle of Opis (Persian victory over the Neo-Babylonian Empire)	539
First Invasion of India (Persians annex areas west of the Indus river)	535
Campaign of Cyrus against the Saka (Persian emperor collects tribute)	533
Battle against the Massegetae (Persian defeat and death of Cyrus)	530
Battle of Pelusium (Persians defeat Egyptian pharaoh Psamtik III)	525
Invasion of Kush by Cambyses (Persian expedition fails in the desert)	c. 524
Campaign against Meroe (Persians establish control up to the 2 nd cataract)	524
Second Invasion of India (Persians annex regions up to the Jhelum River)	518
Invasion of the Balkans (Subjugation of Thrace)	513
Scythian campaign of Darius I (Persians unable to bring the Scythians to battle)	513
Battle of Marathon (Athenian victory over the Persian army)	10 th September 490
Battle of Thermopylae (Spartans and Greek allies outflanked by Persian army)	480
Second Persian Invasion of Greece	480 – 479

ALLIESLIST

Mede rebel allies - Median Empire (only in 550 BCE)	1413
Saka allies - Early Scythian or Saka (only in 530 BCE)	2101

CHANGES FROM LAST VERSION

None.

ACHAEMENID PERSIAN - SATRAPAL ARMY

530 TO 424 BCE

HISTORICAL NOTES

The satrapal system was adopted by Cyrus the Great around 530 BCE as the Persian empire was too large to be controlled centrally.

TROOP NOTES

Satrapas might be given divisions of Immortals to command (such as Mardonius in 479 BCE). Troops would be a core of Persian, Median or Elamites supplemented by local levied troops.

HISTORICAL ENEMIES

Phoenician 1306; Early Arab 1307; Saitic Egyptian 1410; Early Scythian or Saka 2101; Thracian Lowland Tribes 2102; Paeonian 2103; Cyrenean Greek 2201; Classical Greek 2401; Thracian Hill Tribes 2402; Spartan 2403; Mountain Indian 2603; Classical Indian 2604; Asiatic Greek 2801; Lycian 2802.

SATRAPIES

A list of the provinces under Darius survives. Herodotus also records the satrapies divided into taxation districts.

Darius	District	Satrapies
1.	X	Media
2.	VIII	Susiane, Cissia
3.	IX	Mesopotamia (Babylon)
4.	IX	Assyria
5.	V	Arabia, Phoenicia (and Cyprus according to Herodotus)
6.	VI	Egypt
7.	XIII	Armenia
8.	III	Cappadocia (and Phrygia, Bithynia, Paphlagonia and Syria)
9	II	Lydia (and Mysia)
10.	I	Ionia (and Carians, Lycians and Pamphylians)
11.	IV	Cilicia and Cyprus
12.	XIV	Sargatia (Persian Gulf)
13	XVI	Parthia
14.	XVI	Aria
15.	XII	Bactria
16.	XVI	Sogdiane

ACHAEMENID PERSIAN - SATRAPAL ARMY

SATRAPIES (CONTINUED)

Darius	District	Satrapies
17.	XX	Arachosia
18.	XX	India
19.	VII	Gandhara
20.	XVII	Maka
-	XI	Caspians
-	XV	Sacae
-	XVIII	Matienians, Saspies and Alrodians (north-west of Media)
-	XIX	Mushki, Tibareni, Macrones, Mossynoeci and Marres (Colchis and Iberia)

BATTLES AND CAMPAIGNS

Defeat of Greeks in Asia Minor (Persian army under Harpagos victorious)	547 BCE
Persian intervention (Sack of Barca)	515
Ionian Revolt	499-493
Siege of Naxos (Naxos repels Persian Empire and Miletus)	499
Battle of Ephesus (Persian army defeats Athenians and Ionians)	498
Raid on Sardis (Athens and Ionians burn lower city of Sardis, Persian satrapal capital)	498
Battle of Salamis (Persian victory over Cypriots and Ionians)	497
Battle of Marsyas (Persian victory over the Carians)	496
Battle of Labraunda (Persian victory over Carians and Milesians)	496
Battle of Pedasus (Carian victory over the Persians)	496
Fall of Miletus (Persian army captures and sacks the city)	494
Battle of Malene (Persian victory over Histaeus of Lesbos)	493
Battle of Marathon (Athenian victory over the Persian army)	10 th September 490
Battle of Plataea (Spartan led Greek coalition defeats the Persian army under Mardonius)	August 479
Wars of the Delian League (ending with the Peace of Callias)	477 – 449
Battle of Eurymedon (Greek victory over the Persian army)	469 or 466
Battle of Papremis (Athenian and Egyptian victory over the Persians)	460
Battle of Salamis (Greek victories on land and sea in Cyprus)	450

ACHAEMENID PERSIAN - SATRAPAL ARMY

MOUNTAIN INDIAN

500 TO 170 BCE

HISTORICAL NOTES

Tribes on the north-western mountains of India included the Assakenoi and Parapamisadae. They were used by both the Persians and Alexander. The Mauryans allied with them. The Assakenoi fielded 2,000 to 30,000 cavalry, 30 elephants and 20 to 30,000 infantry against Alexander the Great.

TROOP NOTES

The light horse of the Paropamisadae were brigaded with the Arachosians by the Persians and Alexander. The infantry was described as using both spears and bows but were outshot by the Macedonians. Mercenary javelinmen are described as fighting against Alexander.

CLASSICAL INDIAN

500 BCE TO 350 CE

HISTORICAL NOTES

By 6th century BCE there were four major kingdoms and many minor kingdoms spread across the Indo-Gangetic plains of northern India. Early "republics" such as the Vajji (or Vriji) confederation centred in the city of Vaishali also flourished. In 530 BCE Cyrus the Great, King of the Persian Achaemenid Empire crossed the Hindu Kush mountains to seek tribute from the tribes of Kamboja, Gandhara and the trans-India region (modern eastern Afghanistan and Pakistan). Persian control and influence persisted for the next two centuries. India supplied troops to Persian armies.

Alexander the Great arrived in 326 BCE after defeating the Persians. There he defeated King Porus in the Battle of the Hydaspes (near modern-day Jhelum, Pakistan) and conquered much of the Punjab. Having reached the Hyphasis (modern Beas River) the army refused to march further east. The invasion of Alexander had repercussions in the north-western regions of the Indian subcontinent.

The Maurya Empire (322 to 185 BCE) stretched to the north up to the natural boundaries of the Himalayas and to the east into what is now Assam. To the west, it reached the Hindu Kush mountains and into Arachosia (southern Afghanistan).

The Satavahana Empire (c. 200 BCE to 320 CE) controlled much of central India. To the north and east the Shunga Empire (187 to 78 BCE) controlled much of the Ganges basin. With the collapse of the Mauryan empire, the Graeco-Bactrian king Demetrius invaded India and an Indo-Greek kingdom was established by 175 BCE. Under Menander (c.155 to 130 BCE) the kingdom expanded greatly covering much of north-west and northern India. It then disintegrated into smaller kingdoms, the last Indo-Greek king, Strato II ruled until c. 10 CE. Elsewhere the Satavahana Empire (1st century BCE to 2nd century CE) competed with the Shunga Empire (187 to 75 BCE) and the Kanva Dynasty (75 to 30 BCE) in Eastern and Central India.

The Greeks were supplanted by the Scythians and then the Kushans. By the 3rd century, the Kushan empire in India was disintegrating. This saw the rise of the Bharshive dynasty from c. 170 to 350 CE. Much of India was then re-united under the Gupta empire.

TROOP NOTES

Traditional Indian armies were formed of four troop types, elephants, chariots, cavalry and infantry. Not all states had elephants or chariots.

Cavalry were equipped with shields and short spears.

The majority of infantry were archers although some carried javelins or short spears and shields. All troops might carry a sword. Some troops used clubs. Outside of nobles, armour appears to have been rare.

Skirmishers included archers and slingers.

The Indians did adopt some weapons and fighting styles from the nations that invaded them.

LATER ACHAEMENID PERSIAN

423 TO 329 BCE

HISTORICAL NOTES

Artaxerxes was succeeded by his son Xerxes II but he was immediately assassinated on the orders of his illegitimate brother, Sogdianus. Sogdianus was captured and killed by his half-brother Darius II. In 404 BCE Darius died. The eldest son Artaxerxes II inherited the throne. His younger brother Cyrus rebelled and hired 10,000 Greek mercenaries including Xenophon. The army of Cyrus was stopped at the battle of Cunaxa (401). At this time Egypt revolted.

Artaxerxes ruled for 45 years. Artaxerxes II became involved in a war with Persia's erstwhile allies, the Spartans, who, under Agesilaus II, invaded Asia Minor. In 385 he campaigned against the Cadusians. An attempt to reconquer Egypt in 373 was completely unsuccessful, but an Egyptian and Spartan effort to conquer Phoenicia was defeated. Between 372 and 362 he quashed a series of revolts by satraps in Asia Minor.

Artaxerxes III inherited the throne in 358. He defeated a revolt by Artabazus of Lydia. In 351 he attempted to recover Egypt but suffered a crushing defeat that led to Phoenicia, Asia Minor and Cyprus declaring independence. An attempt to recover Phoenicia was defeated and Artaxerxes III personally led an army to recapture Sidon. This was followed by an invasion of Egypt and the rebels were defeated at the battle of Pelusium. In 343 a force was sent to recover Cyprus.

Artaxerxes III and his son were assassinated and Darius III, previously satrap of Armenia was placed on the throne. In 334, just after the Persians had subdued another revolt in Egypt, Alexander the Great led an invasion of Asia Minor. Alexander defeated the Persian armies at Granicus (334), Issus (333) and Gaugamela (331). Darius was taken prisoner by Bessus, satrap of Bactria, and murdered. Bessus was captured by Alexander, put on trial in a Persian court and executed.

TROOP NOTES

During the 5th century BCE, the earlier Persian system of paying tribute directly to the King was modified. The satraps retained some of the tribute to pay for local defence. The satraps increasingly relied on mercenaries rather than the households of the Persian nobles.

Cavalry adopted shields (probably from the Saka) during the 5th century BCE. The use of the spear and shock tactics increased, particularly in the west. The bow was still used in the east. During the 4th century BCE, the quality of much of the cavalry deteriorated.

Infantry were largely mercenaries recruited both inside and outside the empire. Large number of Greeks were employed, particularly in the west. The Persians also recruited tribesmen from Pisidia, Mysia and Hyrcania. Kardaka appear to have been Asian troops trained as hoplites to replace the shortage of Greeks in the 4th century BCE. Iphicrates may have introduced his reforms for the Persian army that invaded Egypt.

Scythed chariots. These appear to have been introduced at this time to break up enemy formations before the cavalry charged.

ALLIES

LIST

Theban allies - Classical Greek (only in 351 BCE) 2401

Iphicrean peltasts and Theban allies are not allowed if the C-in-C is king. If Theban allies are taken, Bactrian or Saka cavalry may not be taken.

CHANGES FROM LAST VERSION

None.

LATER SAKA

300 TO 115 BCE

HISTORICAL NOTES

Saka tribes including the Parni, Dahae and Massagetae occupied the steppe to the north of the Parthian and Bactrian satrapies. Around 250 BCE the Parni invaded Parthia which led to the establishment of the Parthian empire. The migration of the Yeuzhi displaced the remaining Saka who invaded Bactria around 140 BCE resulting in the collapse of the Graeco-Bactrian kingdom. One group of Saka settled in Seistan. Some Saka then invaded and established kingdoms in India (see Indo-Scythian list).

TROOP NOTES

During the 4th century the equipment of the nobles became heavier and developed into the cataphract. These were supported by the horse archer. Infantry, if present, were equipped either with bows, slings or javelins and short spears.

HISTORICAL ENEMIES

Graeco-Bactrian 2607; Parthian 2608; Asiatic Successor 2805; Early Seleucid 2811; Yuezhi 4207.

SAKA TRIBES

Two confederations of Saka lived in contact with the Persians and Greeks. These were the Massegetae and the Dahae. Sub-tribes of the Dahae included the Parnii, Zanthioi and Pissouroi. Saka tribes also lived in the Tarim basin around Tumshuq, Kashgar and Khotan.

BATTLES AND CAMPAIGNS

Dahae invasion of Margiana and Aria	c.300 BCE
Parnii conquer Astauene	247
Invasion of Parthia by the Parnii (Parnii expel Andragoras, Seleucid satrap of Parthia)	238
Defeat of Sakas by the Yuezhi (occupying their lands)	165
Conquest of Bactria by Saka and Yuezhi	140s
Invasion of Saka and Yuezhi (Death of Phraates II and Artabanus I)	127 – 124
Conquest of Sakastan (Drangiana)	between 124 and 115

GRAECO-BACTRIAN

250 TO 140 BCE

HISTORICAL NOTES

Around 250 BCE Diodotus, the satrap of Bactria, declared independence by issuing coins with his own portrait. Although forced by Antiochus III to submit, the Bactrian kingdom regained its independence which it maintained until the invasion of the Saka and Yuezhi tribes (including the Kushans) in around 140 BCE. During this time the kingdom was strong enough to invade India undoubtedly helped by the collapse of the Mauryan empire.

TROOP NOTES

Elephants: The Graeco-Bactrian kingdoms used elephants, presumably obtained from the Mauryans.

Cavalry: Greek coins do show cavalry using the xyston. The Greek cavalry must have been supplemented by Bactrian nobles and their followers who had been present before the invasion by Alexander the Great.

Infantry: Pike butts were found during the excavations at Ai Khanum. A pikeman was represented on a Greek coin. Images of thureophoroi have been found on tablets in Bactria. Mountain Indians would have been recruited from Arachosia and the Parpamisadae.

HISTORICAL ENEMIES

Mountain Indian 2603; Classical Indian 2604; Later Saka 2606; Graeco-Bactrian 2607; Parthian 2608; Indo-Greek 2609; Early Seleucid 2811.

LIST OF RULERS

Diodotus I	c.246 – 235
Diodotus II	c.235 – 224
Euthydemus I	224 – 195
Demetrius I	c.195 – 180
Eucratides	171 – 145

Other kings are known by the coins they issued, but the chronology and relationships are uncertain. These include Pantaleon, Agathocles, Antimachus, Demetrius II and Eucratides II.

PARTHIAN

250 BCE TO 225 CE

HISTORICAL NOTES

The Parthians were a Saka tribe, the Parni, who invaded Parthia in the mid-3rd century BCE. Under Mithridates I (171 to 138 BCE) the Parthians expanded into Media and Mesopotamia. They then came into conflict with Armenia and then Rome. They soundly defeated Crassus at the battle of Carrhae (53 BCE). In 40 and 39 BCE they raided throughout Syria and Asia Minor but were defeated by Ventidius. In the following 250 years the Romans regularly raided deep into Parthian territory, occupying Ctesiphon on multiple occasions but were never able to hold on to the city. The dynasty was ended when Ardashir I established the Sassanid empire in 224 CE.

TROOP NOTES

The cavalry appear to have been largely supplied by the nobles and their followers.
Cataphracts: Introduced from the steppes but existing in the Seleucid kingdom before the arrival of the Parthians, the cataphracts were fully armoured riders on armoured horses equipped with a long spear.
Horse archers: Comprising the largest component of the army, the horse archer was equipped with a bow and some also carried light spears. They relied upon rate of fire and the ability to evade opponents. Once an opponent was disrupted the horse archers might charge in. On at least one occasion the horse archers believed the Romans to be disrupted, charged in, and were then beaten.
Infantry: Infantry were largely used as garrison troops for cities and frontier defences. 20,000 infantry were raised against the Alans in 136 CE.

None.

INDO-GREEK

180 BCE TO 10 CE

HISTORICAL NOTES

Sometime after 200 BCE the Graeco-Bactrian kings occupied Arachosia. During the following decades the kings expanded towards India as the Mauryan empire collapsed. This power reached its peak under Menander who probably ruled from 155 BCE. Greek rule at this period extended to Ravi River and the Swat valley. After the death of Menander, the kingdom disintegrated into a number of smaller states, some of which survived into the 1st century BCE.

TROOP NOTES

Troop classifications are based upon limited evidence and by association with Graeco-Bactrian and Indian armies of the period.
Elephants: The Elephant scalp headdress is a feature of Indo-Greek coins.
Cavalry: Indo-Greek coins depict a lancer who also carries a bow.

HISTORICAL ENEMIES

Classical Indian 2604; Graeco-Bactrian 2607; Kushan or Indo-Scythian 2610; Indo-Parthian 2612.

RULERS

These kings were Graeco-Bactrian kings who ruled Indian territory.

Demetrius I	c.195 – 180 BCE
Eucratides	171 – 145

These kings primarily ruled Indian territory.

Apollodotus I	c.175 – 165
Antimachus II	c.160 – 155
Menander I	c. 165 – 130

Other kings are known by their coinage but the chronology and relationships are uncertain. These include Zoilus I, Agathoclea, Lysias, Strato I, Antialcidas, Heliocles, Polyxenus, Demetrius III, Philoxenus, Diomedes, Amyntas, Epander, Theophilus, Peucolaus, Thraso, Nicias, Menander II, Artemidorus, Hermaeus, Archebius, Telephus, Apollodotus II, Hippostratus, Dionysius, Zoilus II, Apollophanes and Strato II.

BATTLES AND CAMPAIGNS

Invasion of India by Demetrius I	c. 186 – 175 BCE
Sack of Pataliputra (Capital of Shunga kingdom, attacked by Menander)	c. 150
Conquest of Indo-Greek territories in the Punjab and Gandhara by Maues	c. 88 BCE
Conquest of last Indo-Greek kingdom by Indo-Scythian, Rajuvula	c. 10 CE

KUSHAN OR INDO-SCYTHIAN

150 BCE TO 412 CE

HISTORICAL NOTES

Pressed by the migration of the Yuezhi, the Saka (Scythian) tribes invaded Bactria and Parthia. Against the Parthians they won several battles, and it required the Parthian king Mithridates II to reconquer areas including Seistan. From Seistan they advanced south and east into what is now southern Pakistan. They later appear to have also moved northwards replacing some of the Indo-Greek kings. In the 1st century CE, they also advanced further south-eastwards into modern India. Their power declined in the second century CE, and they were eventually destroyed by the Gupta Empire at the start of the 5th century CE.

The Kushans were one of the five noble clans of the Yuezhi who conquered the Graeco-Bactrian kingdom around 135 BCE. By 1 CE they had achieved dominance over the other clans. The Yuezhi started encroaching on northern India from c. 70 BCE onwards and at the height of its power, the Kushan empire included Bactria, Sogdia and much of Northern India. After 240 CE its western territories were lost to the Sassanid Persians and in the 4th century CE its eastern territories were conquered by the expanding Gupta empire. The remaining Kushan territories fell to the Kidarites by the end of the 4th century CE.

TROOP NOTES

Depictions of Kushan warriors include cataphracts and horse archers. The Indo-Scythian and Kushans in India also appear to have made use of local warriors. The use of Elephants is also attested.

HISTORICAL ENEMIES

Classical Indian 2694; Parthian 2608; Indo-Greek 2609; Indo-Parthian 2612; Early Sassanid Persian 2613; Middle Sassanid Persian 2614; Hephthalite 2615; Eastern Han 4214; Gupta Indian 4703.

INDO-SCYTHIAN RULERS

Indo-Scythian rulers in Gandhara included: Maues, Azes, Azilises, Zeionises, Kharahostes and Hajatria.

The Western Satraps began with the short-lived Kshaharata dynasty. Rulers included Abhiraka, Bhumaka and Nahapana.

These were replaced by the Kardamaka dynasty. Rulers included Chastana, Jayadaman, Rudradaman I, Damajadasri I, Jivadaman, Rudrasimha I, Rudasena I, Vijayasena, Damajadasri III, Rudrasena II, Rudrasimha II, Yasodaman II.

KUSHAN RULERS

The Yuezhi confederation was united around 30 or 40 CE by Kujula Kadphises. Further Kushan rulers include Vima Takto, Vima Kadphises, Kanishka I, Huvishka, Vasudeva I, Kanishka II, Vasishka, Kanishka II, Vasudeva II, Mahi, Shaka and Kipunada.

PARTHIAN VASSAL STATES

147 BCE TO 241 CE

HISTORICAL NOTES

The Parthian Arsacid rulers were titled the "King of Kings", as a claim to be the heirs to the Achaemenid Empire. They accepted many local kings as vassals where the Achaemenids would have had centrally appointed, albeit largely autonomous, satraps. This includes the states of Media Atropatene, Osroene (Edessa), Araba (Hatra), Characene, Adiabene, Elymais and Persis. Over time these rulers were either replaced or absorbed into the Arsacid royal family by marriage.

TROOP NOTES

The nobility in these states fought in the same way as the Parthians. Larger numbers of locally supplied infantry were also used.

HISTORICAL ENEMIES

Pre-Islamic Arab 2205; Later Republican Roman 2514; Early Imperial Roman 2516; Parthian 2608; Early Sassanid Persian 2613.

RULERS

Media Atropatene was established after the death of Alexander the Great by the Persian satrap Atropates. The Atropatid dynasty were supplanted in the early 1st century CE by an Arsacid dynasty that survived until 226 CE when it was turned into a province of the Sassanid empire.

Osroene was ruled by the Agbarid dynasty until deposed by the Roman Emperor Caracalla in 214 or 216 CE. It was briefly reestablished during the reign of Gordianus III around 240 CE.

Hatra was ruled by an Arab dynasty from the 170s until the fall of Hatra in 241 CE.

Elymais was ruled by the Kamnaskirid dynasty from c. 147 to 139 BCE. It was reestablished c. 82 BCE and survived until the late 1st century CE when it was replaced by the Arsacid dynasty.

Persis was ruled by the Daryanid dynasty from c. 132 BCE until the rebellion that overthrew the Parthian Arsacids.

PARTHIAN VASSAL STATES

BATTLES AND CAMPAIGNS

Parthian conquest of Media Atropatene	c. 145 BCE
Parthian conquest of Characene and Elymais	141
Parthian conquest of Elymais (for assisting the Seleucid invasion)	138
Parthian conquest of Persis	c. 137
Rebellion of Characene (Capture of Babylon by Hyspaosines from Parthia)	125
Subjugation of Elymais (by Parthians)	124
Capture of Adiabene, Osrhoene and Edessa (by Parthians)	96
Roman campaign of Pompey against Media Atropatene	65
Roman-Parthian War (Osroene king Agbar aided and then may have betrayed the Romans)	53
Romans under Mark Antony besiege Fraaspa in Media Atropatene (Unsuccessful)	38
Armenian invasion of Media Atropatene	c. 30 BCE
Armenian invasion of Adiabene (expels Adiabene king Monobazes)	61 CE
Alan invasion of Media Atropatene and Armenia (Alan victories) I	72
Rebellion of Edessa against the Romans (resulting in the sack of Edessa)	116
Siege of Hatra (by Roman army under Trajan, unsuccessful)	116
Siege of Hatra (twice, both unsuccessful by Roman army under Septimius Severus)	198
Revolt of Ardashir V of Persis (led to establishing the Sassanian empire)	221
Battle of Shahrazoor (Victory of Hatra over Sassanid army)	238
Destruction of Hatra (by the Sassanid army of Shapur I)	241 CE

CHANGES FROM LAST VERSION

Adjusted end date.

INDO-PARTHIAN

75 BCE TO 100 CE

HISTORICAL NOTES

The House of Suren were a powerful noble family in the Parthian kingdom and controlled areas of Seistan. Surena was a member of the family and best known for defeating Crassus at the Battle of Carrhae in 53 BCE. Gondophares I, a ruler in Seistan, conquered parts of the former Indo-Scythian kingdom, seizing Arachosia and the Kabul valley. The kingdom started to decline after his death and from the middle of the 1st century CE the Kushans start to absorb the northern part of the kingdom. The kingdom disappears by about 100 CE.

TROOP NOTES

It is assumed that the troops fought in the traditional manner of Parthians and Arachosians but this is largely guesswork.

HISTORICAL ENEMIES

Classical Indian 2604; Indo-Greek 2609; Kushan or Indo-Scythian 2610.

EARLY SASSANID PERSIAN

224 TO 336 CE

HISTORICAL NOTES

The Sassanid Persian dynasty was founded by Ardashir I, ruler of Persis, who revolted against and defeated the last Parthian king, Artabanus V. He then consolidated central control despite various local rebellions. In 230 CE he raided deep into Roman territory and a Roman counter-offensive two years later ended inconclusively. Ardashir's son Shapur I continued the expansion of the empire, conquering Bactria and the western portion of the Kushan empire. Shapur captured Carrhae and Nisibis but was then defeated in 243 at Rhesaina. The Roman emperor Gordian III subsequently advanced down the Euphrates but was defeated at Meshike in 244. War resumed in 253 when Shapur defeated the Romans at Barbalissos. Roman counterattacks ended in disaster when the emperor Valerian was captured. He advanced into Anatolia but was repulsed by the Romans and their Palmyrene ally Odaenathus. The Romans sacked Ctesiphon in 283 under the emperor Carus. In 296 the emperor Galerius was defeated by Narseh near Callinicum but in 298 Galerius took the offensive and won successive victories and sacked Ctesiphon. The Romans inflicted a severe peace treaty. Unrest spread throughout the empire until suppressed by Shapur II.

TROOP NOTES

The Sassanid dynasty usurped the Arsacid dynasty and early Sassanid armies were like later Parthian armies. Ardashir I introduced elephants that had not been used by the Parthian dynasties. Cataphracts. Early Sassanid armies retained the use of cataphracts. The leaders were fully armoured but some of the followers may not have been able to acquire full panoply. Overall, the classification of fully armoured seems justified. Horse archers. The Sassanids used horse archers but perhaps used them more aggressively than the Parthians had. Over time, Sassanid armies relied less on the cataphract and more on the armoured horse archer. Infantry: Neyve-daran were equipped with spears and wicker shields. Other paighan (infantry) were swordsmen (Ammianus Marcellinus describes Sassanid infantry as armed like Mirmillo gladiators). Archers could be armoured. Sassanid infantry were not able to match Roman infantry but capable of fighting them.

MIDDLE SASSANID PERSIAN

337 TO 488 CE

HISTORICAL NOTES

Shapur II ruled from 309 to 379 CE. In 337 he broke the peace concluded in 297. This led to a series of long-drawn-out wars (nine major battles were fought) which continued until 363 when the Emperor Julian was killed, and his successor Jovian agreed to an unfavourable peace treaty. During this period Shapur II was attacked by central Asian tribes. Towards the end of his reign, he subdued the Kushans.

From Shapur II's death until Kavadh I's first coronation (488), there was a largely peaceful period with the Romans interrupted only by two brief wars in 421 and 440. Several invasions by the Huns were defeated but they returned in 483 and defeated the Sassanid emperor Peroz I. Peroz I attempted to drive out the Huns but was defeated and killed.

TROOP NOTES

Over time, Sassanid armies relied less on the cataphract and more on the armoured horse archer.

UPGRADE ARMOUR ON BOTH ASVARAN AND ZHAYEDAN AND ASVARAN WITH BOW

Regrade asvaran and zhayedan	CAVALRY	Superior	Experienced	-	Shower Shooting	187	-		4,6
	Formed Close	ArmHrs/F Armoured	Bow					All or none	
Regrade asvaran with bow	CAVALRY	Average	Experienced	-	Shower Shooting	143	-		4,6
	Formed Close	ArmHrs/F Armoured	Bow					All or none	

Note: If any asvaran and zhayedan or asvaran with bow are regraded or upgraded then all asvaran and zhayedan and all asvaran with bow must be.

LIST CHARACTERISTIC: Shower Shooting. Cancels their opponent's general claim for +1 vs non-charging cavalry who shot. If not running away calculate slowing effect of fire as normal but then add a further 1BW to the slowing effect for every S result on the dice. Close cavalry may not skirmish or run away. Loose cavalry may not skirmish but may run away.

None.

HEPHTHALITE

356 TO 625 CE

HISTORICAL NOTES

A group of nomads called Chionites (or Xionites) are mentioned by the Armenian historian, Moses of Khorene (5th century) as capturing the city of Balkh sometime between 194 and 214 CE. At the end of the 4th century a new wave of nomadic tribes invaded Bactria.

Called Ephthalites by the Greeks, the origin of the Hephthalites is uncertain but they arrived north-east of the Sassanid Persian empire, raided its provinces and by 485 CE had reduced the Sassanids to tributary status. A series of wars from 503 to 513 CE drove them out of Persia. The Hunas, based north of the Hindu-Kush, had established themselves in north-west Pakistan by the early 5th century. In 455 CE Skandagupta repelled a Hunas invasion. Around 475 CE the Hunas conquered Gandhara. They were defeated in 528 CE and had been driven out of the northern Indian plains by 542 CE. An alliance of the Sassanids and Gokturks defeated them c 560 CE after which they disappear from the historical record. This list includes both the Chionites, the Hephthalites and Hunas (or Alchon).

TROOP NOTES

The connection with the Huns who migrated to Europe is now doubted. The Hephthalites appear to have fought in a similar fashion to the Turks.

HISTORICAL ENEMIES

Kushan or Indo-Scythian 2610; Middle Sassanid Persian 2614; Sassanid Persian 3305; Rouran Khaganate 4313; Sogdian 4402; Gokturk 4404; Gupta Indian 4703.

HEPHTHALITE

BATTLES AND CAMPAIGNS

Shapur II repels Xionites and Kushans but loses Gandhara, Kashmir and Punjab	356 CE
Invasion of Gandhara by the Kidarites	End of 4 th century
Invasion of Kidarite territory by Yazdegerd II	450s
Battle of the Indus River (Gupta Empire under Skandagupta defeats the Hunas)	458
Invasion of Gandhara by the Hunas (or Alchon)	c. 475
Capture of Sassanian emperor Peroz by Hephthalites	481
Battle near Gurgan (Decisive victory for Sassanid army under Sukhra against the Hephthalite army of Khushnavaz)	484
Battle of Herat (Decisive victory for Hephthalites over Sassanid army of Peroz)	484
Sassanian campaign against Hephthalites in Seistan and Khorasan	508 – 512
Battle of Eran (Gupta emperor Bhanugupta defeated by the Hunas)	510
Aulikara under Prakasadharman defeats Hunas under Toramana.	515
Conquest of Aulikars under Yashodharman over the Hunas and Gupta Empire	528
Battle of Sondani (Alliance of Indian kings defeat the Alchon Huns under Mihirakula)	528
Battle of Bukhara (or Gol-Zarriun) (Sassanids and Gokturks decisively defeat the Hephthalites)	c.557
Battle of Qarshi (Turks defeat Hephthalites)	565
Battle of Hyrcanian Rock (Sassanids led by Bahram Chobin ambush army of Turks and Hephthalites)	588
Gokturk conquest of Tokharistan from Hephthalite (Alchon) principalities	625

	Tribal Loose	Protected	Javelin	-	-			9	
Indian spearmen	INFANTRY	Average	-	Short Spear	-	67	Combat Shy (-22)	0	6,8,9
	Tribal Flexible	Protected	-		-			9	
Indian archers	INFANTRY	Average	Experienced	-	-	48	Combat Shy (-14)	0	6,8
	Tribal Loose	Unprotected	Bow	-	-			18	

Note: Indian subjects must be in a separate command. If used, the number of Indian infantry bases must exceed the number of elephants. Indian foot can be combined in TuGs of 1/3 spearmen and 2/3 archers in units of 6 or 9. An ally contingent may not use Indian subjects. If any subject Indian troops are taken then the camp may not be mobile.

CHANGES FROM LAST VERSION

Extended end date to include Alchon principalities.
