CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

At the start of the 5th century most of modern England and Wales was under Roman rule. Urban life had generally grown less intense by the fourth quarter of the 4th century and by 407 there appear to be no new Roman coins going into circulation. In 407 the army chose Constantine III to become emperor. He crossed into Gaul but was defeated by Honorius. It is unclear whether any troops returned to Britain. A Saxon incursion was repelled in 408. A letter from Emperor Honorius in 410 has traditionally been seen as rejecting a British appeal for help but the letter may not have been addressed to Britain at all. With the imperial layers of the military and civil government gone, administration and justice fell to municipal authorities, and local warlords gradually emerged all over Britain. By 430 it appears that coinage had been abandoned as a medium of exchange.

In British/Welsh tradition, pagan Saxons were invited by Vortigern to assist in fighting the Picts and Irish. The new arrivals rebelled, plunging the country into a series of wars that eventually led to the Anglo-Saxon occupation of Lowland Britain by 600.

In Scotland, the Picts were the dominant tribal group north of the Forth and Clyde rivers. To the east emerged the Gaelic over-kingdom of Dalriada, often referred to in Latin sources as the Scoti, a term used earlier for the Irish who raided Roman Britain. They are also referred to as Gaels because they spoke Gaelic. During the 6th and 7th centuries they occupied an area corresponding roughly to modern Argyll in Scotland and county Antrim in Ireland. After defeats inflicted by the Saxon kingdom of Northumbria, they became clients of Northumbria and then subjects of the Picts. The Viking incursions of the 9th century led to the creation of the kingdom of Alba from a merger of the Picts and Dalriadans.

In the 5th century Christianity arrived in Ireland. It may have first arrived with refugees fleeing the Saxon invasions. It appears to have been established before the arrival of St Patrick. Little is known of the Irish kingdoms of Leinster, Meath, Ulster and Connacht at this time apart from a few sagas. Plagues in the mid-7th century seem to have had a devastating effect. The Northumbrians even raided Ireland in 684.

The period from the conquest of Britain by the Anglo-Saxons until the overlordship of Egbert of Wessex in 829 is known as the Heptarchy. Despite the suggestion of seven, the number of kingdoms fluctuated. The main kingdoms were Northumbria, East Anglia, Mercia and Wessex. Essex, Kent and Sussex were conquered during this period whilst other minor kingdoms and territories are mentioned.

A few areas resisted Anglo-Saxon control. Between the 5th and 8th centuries the kingdom of Dumnonia appeared in Devon and the South West. The kingdom of Gwynedd dominated Wales and led to the creation of the boundary with Mercia under Offa. In Cumbria and southern Scotland emerged the Kingdom of Strathclyde.

A new era in British history emerged following the Viking raid on the monastery at Lindisfarne in 793. Over the next eight decades the coasts of Britain were repeatedly raided. In 865 a large army was formed and rapidly captured York and much of northern and eastern England. The Danes were defeated by Alfred of Wessex at the battle of Edington in 878. A subsequent treaty established the boundary of Viking Danelaw. It also led to

the unification of the remaining Anglo-Saxon kingdoms under Edward and Aethelstan. A new wave of Vikings appeared in England in 947, when Erik Bloodaxe captured York. In 1016 Cnut, a Danish Prince, became King of England and subsequently inherited the throne of Denmark.

The islands to the north and west of Scotland were heavily colonised by Vikings. This led to separate fiefdoms including the Earldom of Orkney and the King of the Isles. The Vikings conquered the Isle of Man and established colonies in Ireland, the main settlement in Dublin. The last major battle between the Vikings and the Irish was at Clontarf near Dublin in 1014. It saw, Brian Boru, High King of Ireland, defeat a large pan-Viking force. Viking power was broken in Ireland.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

EARLY POST-ROMAN BRITISH

407 TO 468 CE

HISTORICAL NOTES

This list covers the lowland states of mainland Britain after the departure of the Romans to Gaul in 406 CE and the expedition of Riothamus to Gaul in 468. The departure was not intended to be permanent and there is a possibility that the east coast forts were temporarily reoccupied in 417. Vortigern may have used Saxon mercenaries for the defence of Kent. Further Saxons were brought in and these may have revolted, establishing the first Anglo-Saxon kingdom. Tradition has Ambrosius Aurelianus as "the last of the Romans" fighting Vortigern.

In 468, Riothamus "King of the Britons" sailed with 12,000 warriors to Gaul to aid the last Roman part of Gaul against the Visigoths. This may be the origin of Arthur's continental campaign in Geoffrey of Monmouth's account. If "Arthur" was a single historical figure then Riothamus might be a candidate, but other sources suggest a later (although disputed) date.

TROOP NOTES

Constantine III took the last Roman field army units out of Britain in 407 CE. In 410, the Romano-British may have been told "to look to their own defence" by the emperor Honorius - an acknowledgement that further reinforcement from Rome was unlikely in the short term. It seems plausible that some garrison units were left behind and candidates include the Equites Catafractarii Iuniores, Equites Scyri, Equites Scutarii Aureliaci and the comitatenses legion Primani Iuniores. Archaeological evidence includes a large number of martiobarbuli (darts) suggesting that Roman equipment continued to be manufactured in the fifth century in Britain.

LATER SCOTS-IRISH

450 TO 950 CE

HISTORICAL NOTES

Irish sea raiding had been a thorn in the side of the mainland British since the 4th century CE, and settlements were made in Pembroke and Galloway, the latter becoming the kingdom of Dál Riata and bequeathing their tribal name to the future kingdom of Scotland (Scotti). The balance between rival kingdoms in the North and Ireland was transformed in 793 when ferocious Viking raids began on monasteries like Iona and Lindisfarne. Orkney, Shetland, and the Western Isles eventually fell to the Norsemen. The king of Fortriu, Eógan mac Óengusa, and the king of Dál Riata, Áed mac Boanta, were among the dead after a major defeat to the Vikings in 839. There was also a merger of the Gaelic and Pictish crowns, although it is open for debate whether it was a Pictish takeover of Dál Riata, or the other way around. This culminated in the rise of Cínaed mac Ailpín (Kenneth MacAlpin) in the 840s, which brought to power the House of Alpin, who became the leaders of a combined Gaelic-Pictish kingdom.

TROOP NOTES

Irish weapons were still light during this period, only becoming heavier with the influence of the Vikings. They made no use of the bow.

MIDDLE POST-ROMAN BRITISH

469 TO 579 CE

HISTORICAL NOTES

Post Roman British kingdoms survived in the west, resisting the Anglo-Saxon invasion. The earliest narrative account of Arthur is Nennius' Historia Brittonum, which states that Arthur fought as Dux Bellorum together with the kings of the Britons in 12 battles, culminating in the decisive victory of Badon. The Annales Cambrian appears to date Badon to 518 CE and Callan, in which it says Arthur perished, to 539 although these dates are disputed. Salisbury fell to the Saxons in 552, Bedford in 571, Bath, Gloucester and Cirencester all fell in 577 because of the battle of Dyrham and York fell in 580. Wroxeter (near Shrewsbury) appears to have been occupied until 680 (after 580 use an Early Welsh list).

TROOP NOTES

Armies after 470 CE are assumed to be based on the comitatus of a king, initially swordsmen fighting on foot, supported by peasant pedyt. By the time of the Gododdin, the comitatus are mailed cavalry with a large shield and thrown and thrust spears and sword.

LATER PICTISH

500 TO 850 CE

HISTORICAL NOTES

This list covers Pictish armies up to the union of the Picts and Scots under Cináed mac Ailpín. The confederation of Pictish tribes that developed north of the Firth of Forth may have stretched up as far as Orkney. It probably developed out of the tribes of the Caledonii (whose name continued to be used for at least part of the confederation), perhaps as a response to the pressure exerted by the presence of the Romans to the south. They first appear in Roman records at the end of the 3rd century CE as the Picti (the painted people: possibly a reference to their habit of tattooing their bodies) when Roman forces campaigned against them. The first identifiable king of the Picts, who seems to have exerted a superior and wide-ranging authority, was Bridei mac Maelchon (r. c. 550 to 84). His power was based in the kingdom of Fidach, and his base was at the fort of Craig Phadrig, near modern Inverness. After his death, leadership seems to have shifted to the Fortriu, whose lands were centred on Strathearn and Menteith and who raided along the eastern coast into modern England. Christian missionaries from Iona appear to have begun the conversion of the Picts to Christianity from 563.

In the 7th century, the Picts acquired Bridei mac Beli (671 to 693) as a king, perhaps imposed by the kingdom of Alt Clut, where his father Beli I and then his brother Eugein I ruled. At this point the Anglo-Saxon kingdom of Bernicia was expanding northwards, and the Picts were probably tributary to them until, in 685, Bridei defeated them at the Battle of Dunnichen in Angus, killing their king, Ecgfrith. In the reign of Óengus mac Fergusa (729 to 761), the Picts appear to have reached the height of their influence, defeating the forces of Dál Riata (and probably making them a tributary), invading Alt Clut and Northumbria, and making the first known peace treaties with the English. Succeeding Pictish kings may have been able to dominate Dál Riata, with Caustantín mac Fergusa (793 to 820) perhaps placing his son Domnall on the throne from 811.

TROOP NOTES

The option to regrade warriors with Shieldwall comes from the Aberlemno stone, believed to depict the battle of Nechtanesmere in 685, showing helmeted cavalry attacking Pictish spearmen. The classification of Short Spear, Shieldwall instead of Long Spear is for consistency with other spearmen.

HISTORICAL NOTES

The Anglo Saxon Kingdoms (Heptarchy) took over much of Britain after the end of Roman rule in the 5th century. Though heptarchy suggests the existence of seven kingdoms, the number fluctuated, as kings contended for supremacy at various times.

TROOP NOTES

The early Anglo-Saxon invaders followed the tactics of other Germanic tribes. Nobles and their close retainers could fight either on foot or horseback.

HISTORICAL NOTES

This list covers the British kingdoms from 580 onwards including Elmet (annexed by Northumbria in the early 7th century), Goddodin (annexed by Bernicia c. 638), Rheged (annexed by Northumbria in the 8th century), Alt Clud or Strathclyde (annexed by the Scots before 1053) and Dumnonia and Cornwall (annexed before 1042).

TROOP NOTES

The British kingdoms appear to have continued to rely on a minority of warrior aristocracy who fought mounted. Tactics seem to have been to use clusters of infantry from which the cavalry would operate as an attacking force, relying on javelins and spears.

EARLY WELSH

580 TO 1100 CE

HISTORICAL NOTES

The Early Welsh list covers the time from the Roman departure from Wales and the rise of Merfyn Frych to the throne of Gwynedd. In that time there was a gradual consolidation of power into increasingly hierarchical kingdoms. The end of the period is from when the modern England to Wales border would take its near-final form, a line broadly followed by Offa's Dyke, a late eighth-century earthwork. Successful unification into something recognisable as a Welsh state would come in the next era under the descendants of Merfyn Frych. Wales was divided into several separate kingdoms, the largest of these being Gwynedd in northwest Wales and Powys in east Wales. Gwynedd was the most powerful of these kingdoms in the 6th century and 7th century. The seventh and eighth centuries were characterised by ongoing warfare by the northern and eastern Welsh kingdoms against the intruding Anglo-Saxon kingdoms of Northumbria and Mercia. From the 8th century on, Wales was by far the largest of the three remnant Brythonic areas in Britain, the other two being the Hen Ogledd (in southern Scotland) and Cornwall.

TROOP NOTES

Welsh tactics developed from the post-Roman British tactics but adapted to take advantage of the mountainous terrain in Wales.

MIDDLE ANGLO-SAXON

701 TO 1016 CE

HISTORICAL NOTES

Most of the Anglo-Saxon kingdoms came under the overlordship of Egbert of Wessex in 829 CE. This list covers the Kingdoms of Wessex, Mercia, East Anglia, and Northumbria from the accession of Edwin of Northumbria until united as England under Edgar in 959, and then under Ethelred the Redeless until the Danish conquest and accession of Knut (King Canute) in 1016.

The end of the Anglo-Saxon Kingdoms was a gradual process. The 9th century Viking raids that led to the establishment of a Danish-controlled enclave at York, and ultimately to the Danelaw, gained considerable advantage from the petty rivalries between the old kingdoms. The need to unite against the common enemy was recognised, so that by the time Alfred of Wessex resisted the Danes in the late 9th century, he did so essentially as the leader of an Anglo-Saxon nation. Successive kings of Wessex (and especially Athelstan) progressively reinforced the English unitary state, until, with the simultaneous dissolution of Mercia and submission of Northumbria upon Edgar's succession in 959, the old constituent kingdoms in effect became consolidated into one.

TROOP NOTES

A considerable increase in the size of Anglo-Saxon shields around the 8th century CE is assumed to reflect a change to shield-wall tactics. A Saxon boy was given a spear and shield on his 12th birthday, taking his place in the rear ranks or to guard the baggage. Hird include Earls, Thegns, Gesiths and all hearth troops.

HISTORICAL NOTES

Vikings were members of tribes, originally from Scandinavia, of Norse ancestry, who gained a reputation for their raids and piracy in many parts of Europe, especially England, Ireland, and Frankish territories. This list covers the overseas raiding and conquest armies in the period from 793 to the late 11th-century CE in Europe. Home armies are covered in the Leidang list. In this era Viking activity started with raids on Christian lands in England and eventually expanded to mainland Europe, including parts of present-day Russia. While maritime battles were rare, Viking bands proved very successful in raiding coastal towns and monasteries due to their efficient ships, intimidating war-tactics, skilful hand-to-hand combat, and fearlessness. What started as Viking raids on small towns transformed into the establishment of important agricultural spaces and commercial trading-hubs across Europe through rudimentary colonization. Vikings' tactics in warfare gave them an enormous advantage in successfully raiding (and later colonizing) despite their small population in comparison to that of their enemies.

Between 865 and 875 a coalition of Norse warriors known by the Anglo-Saxons as the Great Heathen Army, invaded the four Anglo-Saxon kingdoms that constituted England. It was only when Alfred the Great defeated the Vikings at the Battle of Edington that a treaty was agreed upon, whereby the Vikings were able to remain in control of much of northern and eastern England.

This list includes Normans from 911 to 986 CE.

TROOP NOTES

This list either represents a more mobile raiding force or a steadier invading army.

NOTES

A Viking army must either be a raider (any date), Swedish (in 991 CE), in England (from 867 to 927 and 937 to 954 CE), in Ireland (from 853 to 900 CE), or in Normandy (from 911 to 986 CE). Raiders and Swedish must always be the invader (unless fighting another that must invade!). Roll the dice to choose invader/defender as normal as a strategic intercept is still possible.

HISTORICAL NOTES

This list represents the first united Kingdom of the Scots. There was a merger of the Gaelic and Pictish crowns leading to the rise of Cínaed mac Ailpín (Kenneth MacAlpin) in the 840s CE. The reign of Causantín (Constantine II) from 900 to c. 942 was important to the formation of the Kingdom of Alba. Strathclyde was annexed in 945.

TROOP NOTES

The spear is the main weaponry of the army with other arms in supporting roles, perhaps influenced by the Saxons. Numbers of heavier cavalry increased and were in due course supplemented by small numbers of Norman knights welcomed into the country during the reign of Macbeth. Wild Galwegian foot were often present and are classed as internal allies. These troops had little protection and were decimated at the Battle of the Standard by missile fire.

NORSE-IRISH

900 TO 1167 CE

HISTORICAL NOTES

The Norse are first recorded in Ireland in 795 CE when they sacked Lambay Island. Sporadic raids then continued until 832, after which they began to build fortified settlements throughout the country. Norse raids continued throughout the tenth century, but resistance to them increased. The Norse established independent kingdoms in Dublin, Waterford, Wexford, Cork, and Limerick. These kingdoms did not survive the subsequent Norman invasions, but the towns continued to grow and prosper. The Anglo-Norman invasion of Ireland and Henry II's claim to the title of Lord of Ireland effectively spelled the end of the Norse Irish, as a Norman system of government and the dominance of England gradually spread through Ireland.

TROOP NOTES

The Norse brought Viking weapons and tactics to the Irish. Irish troops at Clontarf formed a phalanx. Njal's saga talks of a centre and wings.

ANGLO-DANISH

1014 TO 1071 CE

HISTORICAL NOTES

The Danelaw is a historical name given to the part of England in which the laws of the Danes held sway and dominated those of the Anglo-Saxons. From 1016 to 1035, Cnut the Great ruled over a unified English kingdom, itself the product of a resurgent Wessex, as part of his North Sea Empire, together with Denmark, Norway, and part of Sweden. Cnut was succeeded in England on his death by his son Harold Harefoot, until he died in 1040, after which another of Cnut's sons, Harthacnut, took the throne. Since Harthacnut was already on the Danish throne, this reunited the North Sea Empire. Harthacnut lived only another two years, and from his death in 1042 until 1066 the monarchy reverted to the English line in the form of Edward the Confessor.

Edward died in January 1066 without an obvious successor, and an English nobleman, Harold Godwinson, took the throne. In the autumn of that same year, two rival claimants to the throne led invasions of England in short succession. First, Harald Hardrada of Norway took York in September, but was defeated by Harold at the Battle of Stamford Bridge, in Yorkshire. Then, three weeks later, William of Normandy defeated Harold at the Battle of Hastings, in Sussex and in December he accepted the submission of Edgar the Ætheling, last in the line of Anglo-Saxon kings, at Berkhamsted.

This list ends at the completion of the Norman Conquest.

TROOP NOTES

The core of the Anglo-Danish army were the huscarls and thegns. These could be backed up by the Select Fyrd. The Great Fyrd were only called up to face invasions or raids.
