CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltraps, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

China was nominally ruled by the Zhou dynasty from 1046 to 256 BCE. The Eastern Zhou period is so named after the capital was moved from Haojing to Luoyi in 771 BCE. It consists of two phases, the Spring and Autumn period and the Warring States period. These lists cover the “Warring States” period and the subsequent Qin (221 to 206 BCE) and Han dynasty (206 BCE to 220 CE).

Seven states dominated the Warring States period. These were:

- The State of Qin – in the far west.
- The Three Jins – north-east of Qin on the Shanxi plateau.
- Qi – located in the east of China on the Shandong peninsular.
- Chu – located in the south of China.
- Yan – located in the north-east, centered on modern-day Beijing.

Minor states included:

- Yue – on the south-east coast near Shanghai. It was annexed by the Chu in 334 BCE.
- Sichuan – in the far south-west. This area was conquered by the Qin.
- Zhongshan: between the Yan and the Zhao. It was annexed by the Zhao in 296 BCE.

At the start of the Warring States period, the six clans of the state of Jin in the Spring and Autumn period had been reduced to four – the Zhi, Zhao, Han, and Wei clans. By about 450s BCE the Zhi clan was the most dominant. In 453 BCE the Zhao, Han and Wei clans combined to annihilate the Zhi clan. The three remaining clans were so balanced that none could get the upper hand over the others. In 403 BCE they agreed a division, known as the “three Jins”. They were recognised by king Weilie of the Eastern Zhou dynasty.

In 370 BCE the leader of the Wei died without naming a successor. As a result the Zhao from the north and Han from the south invaded Wei. However the leaders fell into disagreement and king Hui was able to ascend the throne of Wei. Meanwhile a King Wei of the Qi launched successful attacks against the Zhao and Wei. In 344 BCE king Hui of Wei and king Wei of Qi recognised themselves as “kings”, in effect declaring their independence from the Zhou court. From this point on, rulers did not even pretend to be vassals of the Zhou dynasty.

During the period from 340 BCE the Qin became increasingly aggressive. The Qin attacked a weakened Wei state and after a significant victory captured large parts of Wei territory. The Wei relied on the Qi for protection. The Qin prime minister Fan Sui, initiated an aggressive expansionist

policy. The Han were attacked and the city of Xinzheng taken in 230 BCE. The Zhao surrendered in 228 BCE and the Yan in 226 BCE. The Wei city of Daliang was taken in 225 BCE and the Chu surrendered in 223 BCE. In 221 BCE they deposed the Zhou dynasty remnants and conquered the Qi.

The Qin dynasty was the first imperial dynasty of China lasting from 221 to 206 BCE named for its heartland of Qin, in modern-day Gansu and Shaanxi, and its founding emperor named Qin Shi Huang. During his reign his generals expanded the size of the Chinese state: adding lands in the south and conquering the Ordos loop from the nomadic Xiongnu. He is now best known for creating the Terracotta Army that guarded his city-sized mausoleum. He died in 210 BCE.

After his death the Qin dynasty quickly collapsed. A popular revolt broke out in 209 BCE. Chu rebels defeated the imperial forces. The Chu leader was betrayed by Liu Bang who declared himself Emperor Gaozu of the new Han Dynasty in 202 BCE. Despite the short duration of the Qin dynasty, it was very influential on the structure of future dynasties.

Spanning over four centuries, the Han period is considered a golden age in Chinese history. The Han Empire was divided into areas directly controlled by the central government using an innovation inherited from the Qin known as commanderies, and a number of semi-autonomous kingdoms. These kingdoms gradually lost all vestiges of their independence, particularly following the Rebellion of the Seven States in 154 BCE.

The Xiongnu, a nomadic steppe confederation defeated the Han in 200 BCE. Emperor Wu launched several military campaigns against them. The ultimate Han victory in these wars eventually forced the Xiongnu to accept vassal status as Han tributaries. These campaigns expanded Han sovereignty into the Tarim Basin of Central Asia, divided the Xiongnu into two separate confederations, and helped establish the vast trade network known as the Silk Road, which reached as far as the Mediterranean world. The territories north of Han's borders were quickly overrun by the nomadic Xianbei confederation.

Emperor Wu also launched successful military expeditions in the south, annexing Nanyue in 111 BCE and Dian in 109 BCE, and in the Korean Peninsula where the Xuantu and Lelang Commanderies were established in 108 BCE. Chinese influence reached as far as Vietnam where the Chinese influenced Triêu dynasty was replaced with more direct rule.

The Han Dynasty was interrupted in 9 CE when the Wang Mang, who had been appointed as regent in 6 CE, declared himself emperor. Wang Mang's rule known as the Xin Dynasty ultimately failed due to massive flooding of the Yellow River resulting in it splitting into two new branches. The floods dislodged many peasant farmers who were recruits for various rebel groups. In 23 CE one mob forced its way into the palace and killed Wang Mang.

A rebel group known as the Red Eyebrows assassinated the next emperor but the Empire was restored by Emperor Guangwu who seized power in 25 CE. For the next 11 years he waged war to reunite the Empire. The period between the foundation of the Han dynasty and Wang Mang's reign is

known as the Western Han dynasty. During this period the capital was at Chang'an (modern Xi'an). From the reign of Guangwu the capital was moved eastward to Luoyang. The era from his reign until the fall of Han is known as the Eastern Han dynasty.

During the turbulent reign of Wang Mang, the Han lost control over the Tarim Basin, which was conquered by the Northern Xiongnu. Between 73 CE and 89 CE the Han reconquered the area by defeating the Xiongnu and contacted the Kushan empire. The period was the high point of the dynastic house. Subsequent reigns were increasingly marked by eunuch intervention in court politics and their involvement in the violent power struggles of the imperial consort clans.

Daoist religious uprisings in 184 CE known as the Yellow Turban Rebellion and Five Pecks of Rice Rebellion weakened central authority. The governor of Yan province Cao Cao seized control of the emperor in 200 CE. When Cao Cao was defeated at the Battle of Red Cliffs in 208 CE, China was divided into three spheres of influence. In 220 CE Cao Cao's son, Cao Pi forced the last Han ruler to abdicate and the period known as the Three Kingdoms had begun.

CHINESE NAMES AND TERMS

There are currently two systems for the transliteration of Chinese into English, the Wade-Giles system and the Pinyin system. Pinyin is the newer system and has been adopted in these army lists. Many works however use Wade-Giles and the following table lists the transliteration of names and terms used in these lists.

Pinyin	Wade-Giles
Di	Ti
Jin	Chin/Ts'in
Qiang	Ch'inag
Qin	Ch'in
Xianbei	Hsien-pei
Xiongnu	Hsiung-nu
Yuehchi	Yueh-chih

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

BAIYUE

497 TO 110 BCE

HISTORICAL NOTES

The Baiyue (or One Hundred Yue) were the tribes that lived in the mountainous and coastal regions of Southern China and Northern Vietnam. It includes the states of Minyue and Âu Lạc (Luoyue) and Âu Việt (Ouyue) but excludes Nanyue which has its own list. It would take five successive military excursions before the Qin finally defeated the Yue in 214 BC. The Qin army was unfamiliar with the jungle terrain and was defeated and nearly annihilated by the southern Yue tribes' guerrilla tactics, suffering casualties of over 10,000 men in addition to the death of a Qin commander. Chinese domination was brief, and the collapse of the Qin dynasty led the Yue tribes to regain their independence. Between 135 BCE and 111 BCE the Han sent further expeditions that secured Chinese control of the area.

TROOP NOTES

The crossbow was introduced from China.

HISTORICAL ENEMIES

Early Warring States 4202; Middle Warring States 4203; Qin 4204; Later Warring States 4205; Nanyue 4210; Western Han 4211.

BATTLES AND CAMPAIGNS

Battle of River Li (Yue attacks Wu while their forces are campaigning against the Lu and Qi annexing Wu)	473 BCE
Chu and Qi conquer Yue	306
Âu Việt–Lạc Việt War (Âu Việt under Thục Phán conquers Lạc Việt creating the Âu Lạc kingdom)	258
Qin campaign against the Yue tribes	221 – 214
Qin invade Ouyue but Yue wage guerilla warfare	220
Nanyue under Zhao Tuo conquer Louyue	208
Han campaigns against the Minyue	138 – 111
Minyue attack on Nanyue (Zhao Mo of Nanyue calls on Han assistance, but Minyue king is assassinated)	137
Han invasion of Minyue	135
Han conquest of Dongyue	111

EARLY WARRING STATES

475 TO 355 BCE

HISTORICAL NOTES

The rulers of Jin had been steadily losing political powers since the middle of the 6th century BCE. This allowed other clans to gain fiefs and military authority, and decades of internecine struggle led to the establishment of four major families, the Han, Zhao, Wei, and Zhi. The Battle of Jinyang (453 BCE) saw the allied Han, Zhao and Wei destroy the Zhi family and their lands were distributed among them. In 403 BCE, the Zhou court under King Weilie officially recognized Zhao, Wei, and Han as immediate vassals, thereby raising them to the same rank as the other warring states.

From before 405 until 383 the three Jins were united under the leadership of Wei and expanded in all directions. The most important figure was Marquess Wen of Wei (445–396). In 408–406 he conquered the State of Zhongshan to the northeast on the other side of Zhao. At the same time, he pushed west across the Yellow River to the Luo River taking the area of Xihe.

The growing power of Wei caused Zhao to back away from the alliance. In 383 it moved its capital to Handan and attacked the small state of Wey. Wey appealed to Wei which attacked Zhao on the western side. Being in danger, Zhao called in Chu. As usual, Chu used this as a pretext to annex territory to its north, but the diversion allowed Zhao to occupy a part of Wei. This conflict marked the end of the power of the united Jins and the beginning a period of shifting alliances and wars on several fronts.

In 376 BCE, the states of Han, Wei and Zhao deposed Duke Jing of Jin and divided the last remaining Jin territory between themselves, which marked the end of the Jin state.

In 370 BCE, Marquess Wu of Wei died without naming a successor, which led to a war of succession. After three years of civil war, Zhao from the north and Han from the south invaded Wei. On the verge of conquering Wei, the leaders of Zhao and Han fell into disagreement about what to do with Wei, and both armies abruptly retreated. As a result, King Hui of Wei was able to ascend the throne of Wei.

By the end of the period Zhao extended from the Shanxi plateau across the plain to the borders of Qi. Wei reached east to Qi, Lu and Song. To the south, the weaker state of Han held the east-west part of the Yellow River valley, surrounded the Zhou royal domain at Luoyang and held an area north of Luoyang called Shangdang.

TROOP NOTES

During this period the emphasis in accounts of battles changes from archery duels between charioteers to massed infantry combat. The most popular weapons were varieties of dagger-axes that came in various lengths from 9 to 18 feet. Swords and armour begin to appear, although swords were mostly bronze. The crossbow was invented around 500 BCE but only starts to make an appearance on the battlefield in the 4th century BCE.

HISTORICAL ENEMIES

Chinese Nomadic Barbarians 4104; Baiyue 4201; Early Warring States 4202.

LIST OF STATES

The politics of this ear was dominated by seven Warring States: Qin; Han; Wei; Zhao; Qi; Chu; and Yan.

EARLY WARRING STATES

BATTLES AND CAMPAIGNS	
Battle of River Li (Yue attacks Wu while their forces are campaigning against the Lu and Qi annexing Wu)	473 BCE
Battle of Jinyang (Zhao victory over the Zhi alliance)	453
Xirong attack Qin	430
Wei army led by Wu Qi supported by Zhao and Han defeat Qin	413 – 409
Qi attack Jin	413
Qi attack Lu	412
Han army defeat Zheng	408
Zheng army defeats Han	407
Qi attack Lu taking city of Cheng	408
Qi attack Wey taking the city of Guanqiu	407
Wei overthrows Zhongshang	406
Qin invade Han county of Yiyang (taking six pieces of land)	391
Han attack Zheng (taking Yangcheng)	385
Han attack Song (taking Pengcheng)	385
Zhao defeat Qi	385
Han, Zhao and Wei invade Qi (reaching Sangqiu)	380
Han, Zhao and Wei invade Qi (reaching Lingqiu)	378
Han defeat Zheng	375
Qi invaded by Lu, Wei, Wey and Zhao	375 – 371

MIDDLE WARRING STATES

355 TO 278 BCE

HISTORICAL NOTES

This period covers the Wars of Wei. King Hui of Wei (370 to 319 BCE) set about restoring the state. Between 362 and 359 BCE he exchanged territories with Han and Zhao in order to make the boundaries of the three states more rational. In 364 BCE Wei was defeated by Qin at the Battle of Shimen and was only saved by the intervention of Zhao. Qin won another victory in 362 BCE. In 361 BCE the Wei capital was moved east to Daliang to be out of the reach of Qin.

In 354 BCE, King Hui of Wei started a large-scale attack on Zhao. By 353 BCE, Zhao was losing badly and its capital, Handan, was under siege. The State of Qi intervened. The famous Qi strategist, Sun Bin the great-great-great-grandson of Sun Zi (author of the Art of War), proposed to attack the Wei capital while the Wei army was tied up besieging Zhao. In 341 BCE, Wei attacked Han. Qi allowed Han to be nearly defeated and then intervened. The generals from the Battle of Guiling met again (Sun Bin and Tian Ji versus Pang Juan), by using the same tactic, attacking Wei's capital. Sun Bin feigned a retreat and then turned on the overconfident Wei troops and decisively defeated them at the Battle of Maling. After the battle all three of the Jin successor states appeared before King Xuan of Qi, pledging their loyalty. In the following year Qin attacked the weakened Wei. Wei was devastatingly defeated and ceded a large part of its territory in return for truce. With Wei severely weakened, Qi and Qin became the dominant states in China.

Towards the end of the Warring States period, the Qin state became disproportionately powerful compared to the other six states. In 318 BCE all states except Qi launched a joint attack on Qin. The attack was not successful.

King Hui of Qin died in 311 BCE, followed by prime minister Zhang Yi one year later. The new monarch, King Wu, reigned only four years before dying without legitimate heirs. Conflicts ensued throughout 307 BCE before a son of King Hui by a concubine could be established as King Zhao, who in stark contrast to his predecessor went on to rule for an unprecedented 53 years.

TROOP NOTES

The number of crossbowmen increases during the 4th century BCE. Cavalry appear in increasing numbers and the importance of the chariot was further reduced.

HISTORICAL ENEMIES

Chinese Nomadic Barbarians 4104; Baiyue 4201; Middle Warring States 4203; Qin 4204; Later Warring States 4205; Qiang 4206; Yuezhi 4207; Dian Tribes 4208.

MIDDLE WARRING STATES

BATTLES AND CAMPAIGNS	
Battle of Guiling (Qi defeat Wei)	353 BCE
Battle of Maling (Qi victory over Wei)	342
Chu defeats the Wei and Yue	334 or 333
Qi attack Yan capturing 10 cities (which are later returned)	331
Qi overrun Yan by are driven away by a Yan revolt	314 – 311
Wei attack Chu (for betraying a 5-state alliance)	312
Wei attacked by Qi	310
Chu and Qi conquer Yue	306
Battle of Chuisha (Han, Wei and Chi defeat Chu)	301
Yan conquest of Liaodong Peninsula	300
Qi victory against Song (leading to destruction of Song state)	286
Qi defeat Chu but promptly counterattacked and lose the territory they gained	286
Qi invaded by Yan with support of Wei and Zhao (capital of Qi state Linzi is sacked and Qi conquered)	284

QIN

335 TO 206 BCE

HISTORICAL NOTES

Over the course of the Warring States period, the Qin state had evolved to become the most powerful of the seven major states in China. In 238 BCE, Ying Zheng came to the throne of Qin after eliminating his political rivals Lü Buwei and Lao Ai. With help from Li Si, Wei Liao and others, Ying Zheng formulated a plan for conquering the other six major states and unifying China. The plan, which focuses on annexing each state individually, is based on "allying with distant states and attacking nearby ones", one of the Thirty-Six Stratagems. Its key steps were ally with Yan and Qi; hold down Wei and Chu; conquer Han and Zhao.

In 221 BCE, after the conquest of Qi, Ying Zheng proclaimed himself "Qin Shi Huang" ("First Emperor of Qin") and established the Qin dynasty. The Qin Empire was divided into 36 prefectures, with Xianyang as its capital. Qin Shi Huang created a centralised state and empire that would become the bedrock of future Chinese dynasties. Although the Qin dynasty lasted for 15 years only, its influence on Chinese history lasted for centuries to come.

In 209 BCE, during the reign of Qin Er Shi, Qin Shi Huang's son and successor, Chen Sheng and Wu Guang started an uprising in Dazexiang to overthrow the Qin dynasty due to the Qin government's brutal and oppressive policies. Although the revolt was crushed by imperial forces, several other rebellions also started consecutively all over China over the next three years. The last Qin ruler, Ziyang, surrendered to a rebel force led by Liu Bang in 206 BCE, bringing an end to the Qin dynasty. Several of the rebel forces claimed to be restoring the former states that were annexed by Qin and numerous pretenders to the thrones of the former states emerged. In 206 BCE, Xianyang was occupied and sacked by the forces of Xiang Yu, a descendant of the Chu general Xiang Yan.

TROOP NOTES

On the battlefield Qin troops were "dreaded for their berserk charges, throwing off their armour and charging helmetless and barefoot, brandishing their halberds". This was encouraged by a system which simply rewarded men for the number of enemy heads they cut off!

Conscript close fighters	INFANTRY		Average	-	Polearm	Devastating Chargers	82	Combat Shy (-22)	12	6,8
	Tribal Loose		Protected	-					48	

Note: OPTIONAL SPECIAL RULE: Applies to Qin close fighters with the Devastating Chargers characteristic, either all or none. When they declare a charge they become Unprotected but gain the Fleet of Foot and Melee Expert characteristics (and can declare the charge at skirmish movement distance). They remain this way for the rest of the game. If using this rule, it must be notified to your opponent when the UGs are deployed. It is recommended to use a marker (perhaps some discarded armour) to indicate which TuGs have charged. In a multi-round tournament if this option is used it must apply to all games.

LATER WARRING STATES

316 TO 202 BCE

HISTORICAL NOTES

This list covers the enemies of Qin.

In 279 BCE General Bai Qi of Qin attacked the Chu from Qin's new territory in Sichuan to the west of Chu. The capital of Ying was captured and Chu's western lands on the Han River were lost. The effect was to shift Chu significantly to the east.

Zhao had been much strengthened by King Wuling of Zhao. In 307 BCE he enlarged his cavalry by copying the northern nomads. In 306 BCE he took more land in the northern Shanxi plateau and in the next year he defeated the northeastern border state of Zhongshan. The following year he pushed far to the northwest and occupied the east-west section of the Yellow River in the north of the Ordos Loop. His successor, King Huiwen chose able servants and expanded against the weakened Qi and Wei. In 296 BCE his general Lian Po defeated two Qin armies.

In 269 BCE Fan Sui became chief advisor to Qin. He advocated authoritarian reforms, irrevocable expansion, and an alliance with distant states to attack nearby states (the twenty-third of the Thirty-Six Stratagems). His maxim "attack not only the territory, but also the people" enunciated a policy of mass slaughter that became increasingly frequent. After Chu was defeated, the remaining great powers were Qin in the west and Zhao in the north-centre. There was little room for diplomatic manoeuvre and matters were decided by war. In 265 BCE King Zhaoxiang of Qin made the first move by attacking the weak state of Han which held the Yellow River gateway into Qin. He moved northeast across Wei territory to cut off the Han exclave of Shangdang north of Luoyang and south of Zhao. The Han king agreed to surrender Shangdang, but the local governor refused and presented it to King Xiaocheng of Zhao. Zhao sent out Lian Po who based his armies at Changping and Qin sent out general Wang He. Lian Po was too wise to risk a decisive battle with the Qin army and remained inside his fortifications. Qin could not break through, and the armies were locked in stalemate for three years. The Zhao king decided that Lian Po was not aggressive enough and sent out Zhao Kuo who promised a decisive battle. At the same time Qin secretly replaced Wang He with the notoriously violent Bai Qi. When Zhao Kuo left his fortifications, Bai Qi used a Cannae manoeuvre, falling back in the centre and surrounding the Zhao army from the sides. After being surrounded for 46 days, the starving Zhao troops surrendered in September 260 BCE. It is said that Bai Qi had all the prisoners killed and that Zhao lost 400,000 men.

TROOP NOTES

The invention of the crossbow and the better organisation of infantry formations led to a further decline in the importance of the chariot.

In 307 BCE, King Wuling of Zhao is credited with introducing cavalry and horse archery into the Zhao military.

QIANG

315 BCE TO 300 CE

HISTORICAL NOTES

The Qiang are said to be the progenitor of both the modern Qiang and the Tibetan people and lived a nomadic lifestyle. They are first mentioned in the 17th century BCE. Various Qiang tribes are mentioned including the Chuo Chiang, "Brown Onion", "White Horse" and "Yellow Ox" Qiang. Some groups were called Ma Qiang (Horse-Qiang) or Duo Ma Qiang (Many-Horse-Qiang) suggesting they may have bred horses.

TROOP NOTES

Little is known about Qiang warfare.

YUEZHI

300 TO 130 BCE

HISTORICAL NOTES

The Yuezhi were a group of nomads living on the steppes in the western part of modern Gansu. By the late 3rd century BCE, the Yuezhi were so powerful that the Xiongnu monarch Touman sent his eldest son Modu as a hostage to the Yuezhi. After a major defeat by the Xiongnu in the 2nd century they split into at least two groups. The first group known as the Greater Yuezhi migrated northwest where they displaced Saka tribes. This led to the invasions of Bactria that destroyed the Graeco-Bactrian kingdom. A clan within the Yuezhi subsequently ruled Bactria and created the Kushan Empire. A second group known as the Lesser Yuezhi migrated south into Tibet, but some are reported to have settled with the Qiang.

TROOP NOTES

The existence of Cataphracts is hypothetical but might have been acquired from the Saka.
The Yuezhi were described as initially fiercer than the Xiongnu.

DIAN TRIBES

295 BCE TO 176 CE

HISTORICAL NOTES

The Dian were a group of tribes that inhabited the Dian Lake plateau in northern Yunnan. The Dian Kingdom was annexed by the Han under the reign of Emperor Wu of Han in 109 BCE. The king of Dian hoped for assistance against rival tribes and was left as the local ruler until rebellions during the rule of Emperor Zhao in 86 and 83 BCE led to the Han conquering the area, reaching all the way to modern-day Burma. Dian tribes to the west resisted Chinese attempts at expansion and triggered rebellions in 42 to 45 CE and 176 CE.

TROOP NOTES

Chinese stories suggest a Chu army settled in the region and may have established the Dian Kingdom.
Dian infantry used exceptionally long spears.
Some Dian art shows similarities to Scythian art, resulting in speculation that a Saka tribe may have migrated to this area after being expelled by the Yuezhi in the 2nd century BCE.

XIONGNU

250 BCE TO 155 CE

HISTORICAL NOTES

The Xiongnu were a confederation of nomadic peoples who inhabited the eastern Asian Steppe from the 3rd century BCE to the late 1st century CE. Chinese sources report that Modu Chanyu, the supreme leader after 209 BCE, founded the Xiongnu Empire. After their previous overlords, the Yuezhi, migrated into Central Asia during the 2nd century BCE, the Xiongnu became a dominant power on the steppes of north-east Central Asia, centred on an area known later as Mongolia. Between 129 BCE and 119 BCE the Chinese inflicted a series of defeats on the Xiongnu. As a result of these battles the Chinese controlled the strategic region from the Ordos and Gansu corridor to Lop Nor. They succeeded in separating the Xiongnu from the Qiang peoples to the south. The defeats also destabilised the Xiongnu and reduced the threat to the Han Chinese. The power of the Xiongnu increased after the death of Ban Chao in 102 CE. The emperors of subsequent dynasties were never again able to reach so far west.

TROOP NOTES

The Xiongnu seem to have fought as typical nomadic horsemen.

HISTORICAL ENEMIES

CHANGES FROM LAST VERSION

Added Han Rebel allies.

NANYUE

207 TO 111 BCE

HISTORICAL NOTES

In 207 BCE, Qin warlord Zhao Tuo (Triệu Đà in Vietnamese) established his own independent kingdom in present-day Guangdong/Guangxi area called Nanyue. In 196 BCE, Zhao Tuo paid obeisance to the Emperor Gaozu of Han but by 183 BCE was strong enough to declare himself Emperor. In 179 BCE he conquered the neighbouring kingdom of Âu Lạc in the Red River delta. Nanyue maintained independence until conquered by Emperor Wu in 111 BCE. This period is controversial as on one side, some Vietnamese historians consider Triệu's rule as the starting point of the Chinese domination, since Triệu Đà was a former Qin general, whereas others consider it still an era of Vietnamese independence as the Triệu family in Nam Việt were assimilated to local culture.

TROOP NOTES

Nanyue armies of this period were heavily influenced by the Chinese approach to warfare. Horses struggled to cope with the climate and disease, so numbers of cavalry were limited.

HISTORICAL ENEMIES

Adjusted hill tribesmen.

WESTERN HAN

206 BCE TO 23 CE

HISTORICAL NOTES

The Han dynasty was the second imperial dynasty of China (206 BCE–220 CE), preceded by the Qin dynasty (221–206 BCE) and succeeded by the Three Kingdoms period (220–280 CE). Spanning over four centuries, the Han period is considered a golden age in Chinese history. It was founded by the rebel leader Liu Bang, known posthumously as Emperor Gaozu of Han, and briefly interrupted by the Xin dynasty (9–23 CE) of the former regent Wang Mang. This interregnum separates the Han dynasty into two periods: the Western Han or Former Han and the Eastern Han or Later Han.

This list covers both the Western Han and Xin dynasties.

TROOP NOTES

At the beginning of the Han dynasty, every male commoner aged twenty-three was liable for conscription into the military. The minimum age for the military draft was reduced to twenty after Emperor Zhao's (87–74 BC) reign. Conscripted soldiers underwent one year of training and one year of service as non-professional soldiers. The year of training was served in one of three branches of the armed forces: infantry, cavalry, or navy. The year of active service was served either on the frontier, in a king's court or under the Minister of the Guards in the capital. A small professional (paid) standing army was stationed near the capital.

All mounted armies date from the reign of Wudi.

Artillery was developed from the crossbow. It had been used in defensive positions before the Han, but the Han appear to have developed a range of bolt shooters including some mounted on a pair of chariots.

CHINESE DOMINATED VIETNAM

111 BCE TO 544 CE

HISTORICAL NOTES

In 111 BCE, Han troops invaded Nam Việt and established new territories, dividing Vietnam into Giao Chỉ, now the Red River delta; Cửu Chân from modern-day Thanh Hóa to Hà Tĩnh; and Nhật Nam, from modern-day Quảng Bình to Huế. While governors and top officials were Chinese, the original Vietnamese nobles (Lạc Hầu, Lạc Tướng) from the Hồng Bàng period still managed in some of the highlands.

In 40 CE, the Trưng Sisters led a successful revolt against Han Governor Su Dung (Vietnamese: Tô Định) and recaptured 65 states. Trưng Trắc became the Queen. In 43 CE, Emperor Guangwu of Han sent his famous general Ma Yuan with a large army to quell the revolt. After a long, difficult campaign, Ma Yuan suppressed the uprising and the Trưng Sisters committed suicide to avoid capture. To this day, the Trưng Sisters are revered in Vietnam as the national symbol of Vietnamese women.

Learning a lesson from the Trưng revolt, the Han and other successful Chinese dynasties took measures to eliminate the power of the Vietnamese nobles. The Vietnamese elites were educated in Chinese culture and politics. A Giao Chỉ prefect, Shi Xie, ruled Vietnam as an autonomous warlord for forty years and was posthumously deified by later Vietnamese emperors. Nearly 200 years passed before the Vietnamese attempted another revolt. In 225 another woman, Triệu Thị Trinh, popularly known as Lady Triệu (Bà Triệu), led another revolt which lasted until 248. Once again, the uprising failed and Triệu Thị Trinh threw herself into a river.

At the same time, in present-day Central Vietnam, there was a successful revolt of Cham nations in 192. Chinese dynasties called it Lin-Yi (Lin village; Vietnamese: Lâm Ấp). It later became a powerful kingdom, Champa, stretching from Quảng Bình to Phan Thiết (Bình Thuận).

TROOP NOTES

Vietnamese armies of this period were heavily influenced by the Chinese approach to warfare. Horses struggled to cope with the climate and disease, so numbers of cavalry were limited.

CHANGES FROM LAST VERSION

Adjusted hill tribesmen.

HAN REBELS

17 TO 205 CE

HISTORICAL NOTES

The Red Eyebrows or Chimei was one of the two major agrarian rebellion movements against Wang Mang's short-lived Xin dynasty, the other being Lülin. It was so named because the rebels painted their eyebrows red. The rebellion, initially active in the modern Shandong and northern Jiangsu regions, eventually led to Wang Mang's downfall by draining his resources, allowing Liu Xuan (Emperor Gengshi), leader of the Lülin, to overthrow Wang and temporarily re-establish an incarnation of the Han dynasty. The Red Eyebrows later overthrew Emperor Gengshi and placed their own Han descendant puppet, teenage Emperor Liu Penzi, on the throne, who ruled briefly until the Chimei leaders' incompetence in ruling the territories under their control (which matched their brilliance on the battlefield) caused the people to rebel against them, forcing them to retreat and attempt to return home. When their path was blocked by the army of Liu Xiu's (Emperor Guangwu) newly established Eastern Han regime, they surrendered to him. The Yellow Turban Rebellion, also translated as the Yellow Scarves Rebellion, was a peasant revolt in China against the Han dynasty. The uprising broke out in the year 184 during the reign of Emperor Ling. It took 21 years until the uprising was suppressed in the year 205. The rebellion, which got its name from the colour of the cloths that the rebels wore on their heads, marked an important point in the history of Taoism due to the rebels' association with secret Taoist societies.

TROOP NOTES

Rebel armies under charismatic leaders attracted large numbers of followers.

HISTORICAL ENEMIES

Western Han 4211; Eastern Han 4214; Southern Xiongnu 4216; Xianbei 4217.

BATTLES AND CAMPAIGNS

Red Eyebrow (Chimei) Rebellions overthrowing the Xin Dynasty, the Gengshi Emperor and surrendering to the Eastern Han	17 – 27 CE
Battle of Kunyang (Han rebels defeat Wang Mag)	23
Yellow Turban Rebellion	184 – 185

Xiongnu allies (from 188 to 189 CE)										4209

CHANGES FROM LAST VERSION

Added Xiongnu allies.

EASTERN HAN

25 TO 208 CE

HISTORICAL NOTES

The Eastern Han, also known as the Later Han, formally began on 5 August 25 CE, when Liu Xiu became Emperor Guangwu of Han. From the reign of Guangwu the capital was moved eastward to Luoyang. Emperor Zhang's reign (75 to 88 CE) was viewed as the high point of the dynastic house. The empire restored control over the Tarim basin and contacted the Kushan empire. Subsequent reigns were increasingly marked by eunuch intervention in court politics and their involvement in the violent power struggles of the imperial consort clans. Imperial authority was also seriously challenged by large Daoist religious societies which instigated the Yellow Turban Rebellion and the Five Pecks of Rice Rebellion. Following the death of Emperor Ling (r. 168 to 189 CE), the palace eunuchs suffered wholesale massacre by military officers, allowing members of the aristocracy and military governors to become warlords and divide the empire. When Cao Pi, King of Wei, usurped the throne from Emperor Xian, the Han dynasty ceased to exist. This list ends in 208 CE when the empire had divided into three spheres of influence.

TROOP NOTES

During the Eastern Han, conscription could be avoided if one paid a commutable tax. The Eastern Han court favoured the recruitment of a volunteer army. The volunteer army comprised the Southern Army, while the standing army stationed in and near the capital was the Northern Army.

BUYEO

49 TO 347 CE

HISTORICAL NOTES

Buyeo was a kingdom in Manchuria, north of the Korean peninsula. The Buyeo state became a vassal of Eastern Han in 49 CE. It was an agricultural state and useful to the Chinese as an ally against the Xianbei. It was weakened by a Xianbei invasion in 285, by a Goguryeo attack before 347 and an invasion of the Former Yan in 347. Goguryeo and Baekje absorbed most of the Buyeo state and both considered themselves as successors to Buyeo.

TROOP NOTES

The Buyeo army was a cavalry aristocracy that could be supported by foot archers. Buyeo warriors are described as having shields and bows. Forts were described as round and resembling prisons!

HISTORICAL ENEMIES

Eastern Han 4214; Xianbei 4217; Wei - Three Kingdoms 4303; Baekje Korean 4305; Xianbei Kingdoms 4306; Goguryeo Korean 4311.

SOUTHERN XIONGNU

50 TO 202 CE

HISTORICAL NOTES

In 50 CE a confederation of eight Xiongnu tribes became tributary vassals of Han China. Chinese and Xiongnu formed mixed settlements known as the Southern Xiongnu. Relationships between the Chinese and Xiongnu were tense, and the communities did not integrate. As the Han empire collapsed the Xiongnu were drawn into the rebellions. The Xiongnu were reorganised into five hordes.

TROOP NOTES

The Southern Xiongnu armies could include infantry drawn from Chinese communities.

HISTORICAL ENEMIES

Qiang 4206; Xiongnu 4209; Han Rebels 4213; Eastern Han 4214; Southern Xiongnu 4216; Xianbei 4217.

**CHANGES FROM LAST VERSION**

Adjusted end date.

XIANBEI

90 TO 300 CE

HISTORICAL NOTES

The Xianbei were proto-Mongols residing in what became today's eastern Mongolia, Inner Mongolia, and Northeast China. Along with the Xiongnu, they were one of the major nomadic groups in northern China during the Han Dynasty and subsequent dynastic periods. They eventually established their own northern dynasties, including the Northern Wei founded in the 4th century CE by the Tuoba clan.

The Book of the Later Han records a memorial submitted in 177 CE: Ever since the Xiongnu ran away, the Xianbei have become powerful and populous, taking all the lands previously held by the Xiongnu and claiming to have 100,000 warriors. ... Refined metals and wrought iron have come into the possession of the Xianbei rebels. Han deserters also seek refuge and serve as their advisers. Their weapons are sharper and their horses are faster than those of the Xiongnu.

TROOP NOTES

The Xianbei supplanted the Xiongnu but their style of nomadic warfare appears to have been very similar.

HISTORICAL ENEMIES

Xiongnu 4209; Han Rebels 4213; Eastern Han 4214; Buyeo 4215; Southern Xiongnu 4216; Xianbei 4217; Wei - Three Kingdoms 4303; Xianbei Kingdoms 4306; Tuyuhun 4307.

BATTLES AND CAMPAIGNS

Xianbei defeat Xiongnu	87 CE
Xianbei and Wuhuan raid Wuyuan Commandery	109
Xianbei rebellion against the Han	121
Xianbei raid Dai Commandery	145
Xianbei crush and subjugate Northern Xiongnu	155
Xianbei and Southern Xiongnu attack Shaanxi and Gansu but are repulsed by the Han	158
Xianbei and Wuhuan raid Han territory but surrender when confronted	166
Han and Southern Xiongnu defeated by Xianbei	177
Battle of Yijing (forces of Yuan Shao with Xianbei and Xiongnu allies defeat Gongsun Zan and Heishan bandits)	198 – 199
Gongsun Du supports Buyeo against Xianbei and Goguryeo	c. 200
Battle of White Wolf Mountain (Han under Cao Cao defeat Wuhuan and Yuan Shang)	207
Xianbei and Wuhuan defeated by Wei under Cao Zheng	218
Xianbei under Murong Hui defeat Buyeo	285

4217

XIANBEI
