4316	Western Wei and Northern Zhou	535 to 581 CE

CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The Three Kingdoms (220 to 280 CE) was the tripartite division of China between the states of Wei, Shu, and Wu, following the Han dynasty. The head of each state claimed to be the legitimate emperor succeeding the Han dynasty. To distinguish the states from other historical states with similar names they are generally known as the Cao Wei, Shu Han and Dong (or Eastern) Wu. The authoritative historical record of the era is the “Records of the Three Kingdoms” by Chen Shou with later annotations by Pei Songzhi.

The period was one of the bloodiest in Chinese history. On 11 December 220 Cao Pi ascended the imperial throne as the Emperor of Wei. On 15 May 221 Liu Bei responded by proclaiming himself Emperor of Han (his state would become Shu Han). Sun Quan recognised Cao Pi but was effectively ruler of the state of Wu and by 222 had declared independence. By the end of 221, Shu had invaded Wu but Liu Bei died in 223 and an alliance between the two states was established. In 227 the Shu attacked the Wei but the death of the Shu leader Zhuge Liang halted the invasion. The Wu were under pressure from the north but expanded successfully in the south.

Meanwhile the Wei had captured the northeastern territory of Liaodong (part of present day Manchuria) with the assistance of Goguryeo (one of the Three Kingdoms of Korea). This led to the depopulation of Liaodong and the northern part was seized by the Xianbei. Goguryeo came into conflict with the Wei and was devastated. The Chinese were also contacted by the Wa people of Japan at this time.

In 263 the Wei launched an attack against the Shu. They seized the capital Chengdu and forced the emperor Liu Shan to surrender. This was the end of the state of Shu. The following year the Wei emperor abdicated in favour of Sima Yan who established the Jin dynasty. The Wu state was in steady decline from 252 onwards. A Jin invasion led to the capture of Wu by 280.

The Jin dynasty is divided into two periods. The Western Jin (256 to 316 CE) was a successor state to Cao Wei and had reunited China by 280. The unity was short-lived as the state was weakened by political turmoil and internal conflicts. From 291 to 306 there was devastating civil wars leading to the invasions of the Five Barbarians (the Xiongnu, Jie, Xianbei, Di, and Qiang). The capital was captured in 311 and the remnants of the Jin court fled east, re-establishing a capital in 318 at Jiankang (the Eastern Jin state). In the north, the Five Barbarians established numerous kingdoms, leading to the period being known as the Sixteen Kingdoms.

For the next 270 years China was ruled by a series of local regimes, mostly led by barbarian elites in the north and native Chinese in the south. Due to fierce competition among the states and internal political instability, the kingdoms of this era were mostly short-lived. From 376 to 383, the Former Qin briefly unified northern China, but its collapse led to even greater political fragmentation. The Sixteen Kingdoms is considered to be one of the most chaotic periods in Chinese history. The collapse of the Western Jin Dynasty and the rise of barbarian regimes in China during this period resembles the decline and fall of the Western Roman Empire amidst invasions by the Huns and Germanic tribes in Europe, which also occurred in the 4th to 5th centuries. These Sixteen Kingdoms (with ethnicity of the rulers) were:

- Former Zhao 304 to 329 (Xiongnu)
- Cheng Han 304 to 347 (Ba)
- Later Zhao 319 to 350 (Jie tribe of the Xiongnu)
- Former Liang 320 to 376 (Chinese)
- Former Yan 337 to 370 (Xianbei)
- Former Qin 351 to 394 (Di)
- Later Qin 384 to 417 (Qiang)
- Later Yan 384 to 407 (Xianbei)
- Western Qin 385 to 400 and 409 to 431 (Xianbei)
- Later Liang 386 to 403 (Di)
- Northern Liang 397 to 439 (Xiongnu)
- Southern Liang 397 to 414 (Xianbei)
- Southern Yan 398 to 410 (Xianbei)
- Western Liang 400 to 421 (Chinese)
- Xia 407 to 431 (Xiongnu)
- Northern Yan 407 to 436 (Chinese)

The Northern Dynasties (with ethnicity) were:

- Northern Wei 386 to 535 (Tuoba clan of the Xianbei)
- Eastern Wei 535 to 550 (Tuoba clan of the Xianbei)
- Western Wei 535 to 557 (Tuoba clan of the Xianbei)
- Northern Qi 550 to 577 (Chinese/Xianbei)
- Northern Zhou 577 to 581 (Tuoba clan of the Xianbei)

The succession in the south was:

- Eastern Jin 317 to 420
- Liu Song 420 to 479
- Southern Qi 479 to 502
- Liang 502 to 557

- Chen 557 to 589

The Three Kingdoms of Korea should not be confused with the Chinese Three Kingdoms. The name refers to the three kingdoms of Baekje, Silla and Goguryeo, which was later known as Goryeo, from which the name Korea is derived. The period starts in 57 BCE and ends when Silla forces expelled Tang Chinese protectorate armies from the peninsula in 676 CE.

Goguryeo emerged on the north and south banks of the Yalu (Amrok) River. At the beginning, the state was located on the border with China; it gradually expanded into Manchuria and destroyed the Chinese Lelang commandery in 313. Goguryeo was a highly militaristic state. The state was at its zenith in the fifth century when it dominated both Chinese Manchuria and the Korean peninsula.

Baekje was a member of was a loose confederacy of Mahan statelets that existed from around the 1st century BCE in the southern Korean peninsula. Baekje absorbed or conquered the other statelets and, at its peak in the 4th century, controlled most of the western Korean peninsula. It was a naval power and exported continental culture to Japan. In the late 5th century, under attack from Goguryeo, the capital of Baekje was moved south.

Silla was the smallest and weakest of the Three Kingdoms of Korea, but it used cunning diplomatic means to make opportunistic pacts and alliances with the more powerful Korean kingdoms. The southern peninsula was a loose confederacy of chiefdoms. The kingdom annexed these chiefdoms. Goguryeo and Baekje responded by forming an alliance so the Silla made a pact with the Tang Chinese. After the conquest of Goguryeo and Baekje in by the Tang, the Silla kingdom drove the Tang forces out of the peninsula, capturing Baekje in 660 CE and Goguryeo in 668 CE. This ended the Three Kingdoms period in Korea.

CHINESE NAMES AND TERMS

There are currently two systems for the transliteration of Chinese into English, the Wade-Giles system and the Pinyin system. Pinyin is the newer system and has been adopted in these army lists. Many works however use Wade-Giles and the following table lists the transliteration of many names and terms used in these lists.

Pinyin	Wade-Giles	Pinyin	Wade-Giles	Pinyin	Wade-Giles
Di	Ti	Qiang	Ch'inag	Xiongnu	Hsiung-nu
Jin	Chin/Ts'in	Qin	Ch'in	Yan	Yen
Qi	Ch'i	Xianbei	Hsien-pei	Zhou	Chao

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

WU - THREE KINGDOMS

199 TO 280 CE

HISTORICAL NOTES

Sun Ce established the Wu state in around 199 CE. His brother Sun Quan turned to the aborigines of the southeast, whom the Chinese collectively called the "Shanyue". A collection of successes against the rebellious tribesmen culminated in the victory of 224 CE. In that year, Zhuge Ke ended a three-year siege of Danyang with the surrender of 100,000 Shanyue. Of these, 40,000 were drafted as auxiliaries into the Wu army. Meanwhile, Shu was also experiencing troubles with the indigenous tribes of their south. The southwestern Nanman peoples rose in revolt against Shu authority, captured and looted cities in Yi Province. Zhuge Liang, recognizing the importance of stability in the south, ordered the advance of the Shu armies in three columns against the Nanman. He fought several engagements against the chieftain Meng Huo, at the end of which Meng Huo submitted. A tribesman was allowed to reside at the Shu capital Chengdu as an official and the Nanman formed their own battalions within the Shu army.

In the times of Zhuge Liang's northern offensives, the state of Wu had always been on the defensive against invasions from the north. The area around Hefei was the scene of many bitter battles and under constant pressure from Wei after the Battle of Red Cliffs. Warfare had grown so intense that many of the residents chose to migrate and resettle south of the Yangtze River. After Zhuge Liang's death, attacks on the southern Huai River region intensified but nonetheless, Wei could not break through the line of the river defences erected by Wu, which included the Ruxu fortress.

TROOP NOTES

Troop quality varied enormously in this period, with many troops being of poor quality. The bow started to replace the crossbow as the preferred infantry missile weapon.

HISTORICAL ENEMIES

Chinese Dominated Vietnam 4212; Eastern Han 4214; Shu - Three Kingdoms 4302; Wei - Three Kingdoms 4303.

RULERS

Eastern Wu dynasty.

Sun Ce (as General Who attacks rebels then as Marquis of Wu)	198 – 200 CE
Sun Quan (as King of Wu from 221 and Emperor of Eastern Wu from 229)	200 - 252
Sun Liang	252 – 258
Sun Xiu	258 – 264
Sun Hao	264 – 280

WU - THREE KINGDOMS

BATTLES AND CAMPAIGNS

Battle of Xiakou (inconclusive battle between forces of Sun Quan and forces of Liu Biao under Huang Zu)	203 CE
Battle of Jiangxia (forces of Sun Quan defeat Huang Zu)	208
Battle of the Red Cliffs (forces of Sun Quan, Liu Bei and Liu Qi defeat forces of Cao Cao)	208
Battle of Ruxu (forces of Sun Quan defeat forces of Cao Cao)	213
Battle of Xiaoyao Ford (Cao Cao forces Sun Quan to retreat)	214 – 215
Conquest of Jing Province (by forces of Sun Quan under Lü Meng from Liu Bei)	219 – 220
Battle of Xiaoting (Wu victory over Shu)	221
Unsuccessful Wei invasion of Wu	222 – 225
Battle of Dongku (Inconclusive naval battle)	222
Battle of Ruxu (Wei retreat)	222 – 223
Siege of Jiangling (Wei repelled by Wu)	223
Battle of Qichun (Wu victory over Wei)	223
Battle of Hefei (Wu retreat after an inconclusive battle against Wei)	230
Battle of Hefei (Wei victory over Wu attacking Wei forces as they tried to disembark)	233
Battle of Hefei (Wei victory over Wu)	234
Battle of Fancheng (Wei victory over Wu)	241
Battle of Quebei (unsuccessful Wu offensive against Wei)	241
Rebellion of Lady Triệu against the Wu dynasty (unsuccessful)	248
Battle of Dongxing (Wu victory over Wei)	253
Battle of Hefei (Wei victory over Wu)	253
Siege of Yong'an (Wei repel Wu attack)	264
Jiaozhi Rebellion (Wu victory to reclaim Jiao Province from Wei and Western Jin)	266 – 271
Battle of Jiaozhi (Wu victory over Jin)	271
Battle of Jiuzhen (Wu victory completing conquest of Jiao Province)	271
Battle of Xiling (Wu victory over Western Jin)	272
Conquest of Wu by Western Jin	280

SHU - THREE KINGDOMS

208 TO 263 CE

HISTORICAL NOTES

Liu Bei was a Han warlord who came to prominence towards the end of the Han dynasty. In 223 CE, Liu Shan rose to the throne of Shu following his father's defeat and death. From 224 to 225, during his southward campaigns, Zhuge Liang conquered the southern territories up to Lake Dian in Yunnan. In 227, Zhuge Liang transferred his main Shu armies to Hanzhong and opened the battle for the northwest with Wei. The next year, he ordered Zhao Yun to attack from Ji Gorge as a diversion while Zhuge himself led the main force to Mount Qi. The vanguard Ma Su suffered a tactical defeat at Jieting and the Shu army was forced to withdraw. In the next six years Zhuge Liang attempted several more offensives, but supply problems limited the capacity for success. In 234 he led his last great northern offensive, reaching the Battle of Wuzhang Plains south of the Wei River. Due to the death of Zhuge Liana, the Shu army was forced once again to withdraw but were pursued by Wei. The Shu forces began to withdraw; Sima Yi deduced Zhuge Liang's demise and ordered an attack. Shu struck back almost immediately, causing Sima Yi to second guess and allow Shu to withdraw successfully.

TROOP NOTES

Troop quality varied enormously in this period, with many troops being of poor quality.

WEI - THREE KINGDOMS

208 TO 316 CE

HISTORICAL NOTES

Cao Cao was a Han warlord who controlled the emperor. After Cao's defeat at the naval Battle of Red Cliffs in 208 the Eastern Han kingdom split into the three kingdoms. Cao Cao dominated the north which became the Wei kingdom. In 226 CE, Sima Yi successfully defended Xiangyang against an offensive from Wu; this battle was the first time he had command in the field. In 227, Sima Yi was appointed to a post at Chang'an where he managed the military affairs along the Han River. In 238, Sima Yi was dispatched to command a military campaign against Gongsun Yuan of Manchuria, resulting in Sima Yi's capture of his capital Xiangping and massacre of his government. Between 244 and 245, General Guanqiu Jian was dispatched to invade Goguryeo and severely devastated that state. The north-eastern frontier of Wei was now secured from any possible threats. The Western Jin (265 to 316 CE) was a successor state to the Wei. It reunited China in 280 CE but quickly fell into a succession crisis, civil war and an invasion by the "Five Barbarians" that inaugurated the "Sixteen Kingdoms" era.

TROOP NOTES

The constant warfare in the north meant that the Wei probably had the strongest armies within China at this time.

GAYA CONFEDERACY

249 TO 412 CE

HISTORICAL NOTES

The Gaya or Kaya Confederacy emerged from the earlier Byeonhan confederacy. It consisted of several small city-states occupying an area between the Baekje and Silla kingdoms. The Gaya Confederacy disintegrated under pressure from Goguryeo between 391 CE and 412, although the last Gaya polities remained independent until they were conquered by Silla in 562, as punishment for assisting Baekje in a war against Silla.

TROOP NOTES

The bulk of the infantry were raised by a draft system like Chinese armies. The conscripts raised were given some training and drill and appear to have fought effectively. A smaller number of garrison troops were maintained on a more permanent basis. Most troops appear to have been unarmoured and it is assumed that the garrison troops would be the ones issued with armour.

Cavalry were provided by the nobles. Although the Gaya polities were small the majority of iron cavalry armour associated with cataphracts has been found in Gaya territory; they are also depicted on Gaya ceramics. Cataphract armour was adopted from Goguryeo in the early 5th century.

The main combat weapon on the infantry appears to have been a long spear of 3 to 4 metres in length. These were adopted by the Japanese from contact with the southern Korean states during the Japanese Yamato era. Spear heads are the most common weapon finds archeologically, although a small number of other polearm types are found.

Mixed infantry units along Chinese lines do not appear to have been used.

Japanese intervened in Gaya from the late 4th century.

HISTORICAL ENEMIES

Baekje Korean 4305; Goguryeo Korean 4311; Silla Korean 4314.

MEMBER STATES

Myths surrounding the foundation of the Gaya confederacy speak of six main states.

Polities of Gaya included Geugmgwan Gaya, Daegaya, Ara Gaya, Goryeong Gaya, Bihwa Gaya and Seongsan Gaya.

BAEKJE KOREAN

249 TO 663 CE

HISTORICAL NOTES

Baekje was founded as a member of the Mahan confederacy. Two sons of the founder of Goguryeo are recorded to have fled a succession conflict, to establish Baekje around the present Seoul area.

Baekje absorbed or conquered other Mahan chiefdoms and, at its peak in the 4th century CE, controlled most of the western Korean peninsula.

Baekje was once a great military power on the Korean Peninsula, especially during the time of Geunchogo, but was critically defeated by Gwanggaeto the Great and declined.

In the late 5th century, under attack from Goguryeo, the capital of Baekje was moved south to Ungjin (present-day Gongju) and later further south to Sabi (present-day Buyeo).

TROOP NOTES

Baekje armies were like those of the other Korean states. The bulk of the infantry was raised by a draft system like Chinese armies. The conscripts raised were given some training and drill and fought effectively against the Tang Chinese. A smaller number of garrison troops were maintained on a more permanent basis. Most troops appear to have been unarmoured and it is assumed that the garrison troops would be the ones issued with armour.

Baekje appear to have fielded slightly more guard cavalry than other Korean states other than, maybe, Silla.

Cataphract cavalry equipment was adopted from Goguryeo early in the 5th century although it may not have been universal and there are depictions of armoured cavalry on unarmoured horses.

Despite the association of archery with Korea, the cavalry are described as charging and emphasising melee. Tomb depictions of unarmoured horsemen using bows are in hunting contexts.

HISTORICAL ENEMIES

XIANBEI KINGDOMS

284 TO 436 CE

HISTORICAL NOTES

During the 3rd century CE the Xianbei tribes fragmented and during the Sixteen kingdoms period established six significant empires, the Former Yan (281-370), Western Yan (384-394), Later Yan (384-407), Southern Yan (398-410), Western Qin (385-430) and Southern Liang (397-414). This list also covers the Northern Yan (409-436) which was ruled by a Han Chinese emperor and the Northern Wei before they unified northern China.

TROOP NOTES

The Xianbei may have introduced fully armoured horsemen to China. Chinese troops might be conscripted into the army.

TUYUHUN

284 TO 634 CE

HISTORICAL NOTES

After the disintegration of the Xianbei state, nomadic groups were led by their khagan, Tuyuhun, founded a new kingdom by defeating Qiang tribes. The empire was expanded by defeating the Western Qin and Zia kingdoms. The Empire stretched to include the Tarim Basin, Tibet, Gansu, and other parts of China. The Tuyuhun Empire came to a gradual decline and was increasingly caught in the conflict between China and Tibet. In 634 CE the Tibetans defeated the Tuyuhan who became scattered.

TROOP NOTES

The Tuyuhan followed the martial tradition of the Xianbei, a mix of cataphracts and horse archers.

HISTORICAL ENEMIES

DI

300 TO 550 CE

HISTORICAL NOTES

The Di were an ancient ethnic group that lived in western China and are one of the non-Han Chinese peoples that overran northern China during the Jin Dynasty and the Sixteen Kingdoms period. The tribe of Di was originally from the southern part of Gansu Province. Its leader was Fu Jian, who founded the Former Qin Kingdom (351 to 394 CE). He established his capital in Chang'an. In 370, Fu Jian conquered the Kingdoms of Former Yan and Former Liang. He then embarked upon a plan to conquer southern China which was under the Eastern Jin Dynasty. He met the Jin's main forces at the Fei River in Anhui. the battle is known as the Battle of Fei River. Fu Jian's campaign to conquer the south ended in disaster and his empire fell apart. In 394 the Kingdom of Former Qin was conquered by the Kingdom of Later Qin.

TROOP NOTES

Di armies were probably like the armies of the Qiang.

HISTORICAL ENEMIES

LATER XIONGNU

304 TO 439 CE

HISTORICAL NOTES

This list covers the Former Zhao (304-329), Later Zhao (319-350), Northern Liang (397-439) and Xia (407-431) kingdoms. It also covers the Former Liang (320-376) and Western Liang (400-421) which were ruled by Han Chinese emperors.

As the Three Kingdoms in China declined, the Xiongnu aristocracy in the Southern Xiongnu kingdom set its sights on greater things. In 304 CE, Liu Yuan became Chanyu of the Five Hordes. In 308, declared himself emperor and founded the Han Zhao Dynasty. In 311, his son and successor Liu Cong captured Luoyang, and with it the Emperor Huai of Jin China. In 316, the Emperor Min of Jin China was captured in Chang'an. Both emperors were humiliated as cupbearers in Linfen before being executed in 313 and 318. North China came under Xiongnu rule while the remnants of the Jin dynasty survived in the south at Jiankang.

In 318, after suppressing a coup by a powerful minister in the Xiongnu-Han court (in which the Xiongnu-Han emperor and a large proportion of the aristocracy were massacred), the Xiongnu prince Liu Yao moved the Xiongnu-Han capital from Pingyang to Chang'an and renamed the dynasty as Zhao. However, the eastern part of north China came under the control of a rebel Xiongnu-Han general of Jie ancestry named Shi Le. Liu Yao and Shi Le fought a long war until 329, when Liu Yao was captured in battle and executed. Chang'an fell to Shi Le soon after, and the Xiongnu dynasty was wiped out. North China was ruled by Shi Le's Later Zhao dynasty for the next 20 years. However, the "Liu" Xiongnu remained active in the north for at least another century.

The northern Tiefu branch of the Xiongnu gained control of the Inner Mongolian region in the 10 years between the conquest of the Tuoba Xianbei state of Dai by the Former Qin empire in 376, and its restoration in 386 as the Northern Wei. After 386, the Tiefu were gradually destroyed by or surrendered to the Tuoba, with the submitting Tiefu becoming known as the Dugu. Liu Bobo, a surviving prince of the Tiefu fled to the Ordos Loop, where he founded a state called the Xia (thus named because of the Xiongnu's supposed ancestry from the Xia dynasty) and changed his surname to Helian. The Helian-Xia state was conquered by the Northern Wei in 428–31, and the Xiongnu thenceforth effectively ceased to play a major role in Chinese history, assimilating into the Xianbei and Han ethnicities.

TROOP NOTES

During this period the Xiongnu appear to have adopted the horse armour used by the Xianbei.

GOGURYEO KOREAN

313 TO 668 CE

HISTORICAL NOTES

Goguryeo emerged on the north and south banks of the Yalu (Amrok) River, in the wake of Gojoseon's fall. The first mention of Goguryeo in Chinese records dates from 75 BCE in reference to a commandery established by the Chinese Han dynasty. Evidence indicates Goguryeo was the most advanced, and likely the first established, of the three kingdoms. Goguryeo, eventually the largest of the three kingdoms, had several capitals in alternation: two capitals in the upper Yalu area, and later Nangrang (Lelang in Chinese) which is now part of Pyongyang. At the beginning, the state was located on the border with China; it gradually expanded into Manchuria and destroyed the Chinese Lelang commandery in 313 CE. The cultural influence of the Chinese continued as Buddhism was adopted as the official religion in 372.

Goguryeo was a highly militaristic state; it was a powerful empire and one of the great powers in East Asia. The state was at its zenith in the fifth century, during the rule of King Gwanggaeto the Great and his son King Jangsu, and particularly during their campaign against China in Manchuria. For the next century or so, Goguryeo was the dominant nation in Chinese Manchuria and the Korean peninsula. Goguryeo eventually occupied the Liaodong Plains in Manchuria and today's Seoul area. Gwanggaeto achieved a loose unification of the Three Kingdoms of Korea.

Goguryeo controlled not only Koreans but also Chinese and Tungusic tribes in Manchuria and North Korea. After the establishment of the Sui Dynasty and later the Tang Dynasty in China, the state continued to aggress China and Korean Silla and Baekje until conquered by allied Silla–Tang forces in 668. Most of its territory was absorbed by Tang Dynasty China and the territory of former Baekje was absorbed by Korean Silla.

TROOP NOTES

Goguryeo armies were like those of the other Korean states.

Korean cataphract cavalry equipment appears to have been developed in Goguryeo in the 4th century. Although widespread it is possible that some Korean cavalry did not adopt it. Halberdiers and swordsmen are depicted on figures from the Tung Shou tomb and are clearly inspired by Chinese types. Crossbows appear to have been used less in Goguryeo than in other parts of Korea.

A minority of Goguryeo combat infantry used a very long spear and were called Yemeak. Goguryeo troops are described as warlike and so the conscripts do not have a Combat Shy option.

Goguryeo often used large number of Malgal (Manchurian) tribal cavalry. These are described as mostly unarmoured, although some used leather or horn armour, and were armed with bows and lances.

Extended end date.

SOUTHERN DYNASTIES

317 TO 589 CE

HISTORICAL NOTES

The Eastern Jin (317 to 420 CE) was established when Sima Rui moved the capital to Jiankang (modern Nanjing). The Jin was succeeded by a series of short-lived dynasties: Liu Song (420 to 479 CE), Southern Qi (479 to 502), Liang (502 to 557) and Chen (557 to 589). Because all these dynasties had their capital at Jiankang except Liang, they are sometimes grouped together with Eastern Wu and Eastern Jin as the Six Dynasties. The rulers of these short-lived dynasties were generals who seized and then held power for several decades but were unable to securely pass power of rule onto their heirs to continue their dynasty successfully. Emperor Wu of Liang (502 to 549) was the most notable ruler of his age, being a patron of the arts and of Buddhism.

Under the later waning leadership of the Chen dynasty, the southern Chinese were unable to resist the military power amassed in the north by Yang Jian, who declared himself Emperor Wen of Sui and invaded the south.

TROOP NOTES

Elephants were used by the Liang dynasty against the Western Wei.

Mu-ping were volunteers.

100 war wagons with large crossbows were used by Liu Yu in 416 CE against the Northern Wei. Carts were also used to create instant fortifications.

ROURAN KHAGANATE

330 TO 555 CE

HISTORICAL NOTES

The Rouran were a confederation led by Xianbei people who remained in the Mongolian steppes after most Xianbei migrated south to Northern China. They were first noted as having defeated the Tiele and establishing an empire extending all the way to the Hulun (an alliance in eastern Inner Mongolia). The Hephthalites may have been vassals of the Rouran in the 4th century. The name Rouran was used by the Northern Wei as a derogatory term when they waged war against the Rouran. The power of the Rouran was broken by an alliance of Göktürk, the states of Northern Qi, Northern Zhou, and Central Asian tribes in 552 or 555 CE.

TROOP NOTES

The Rouran do not appear to have adopted the widespread use of horse armour.

SILLA KOREAN

356 TO 936 CE

HISTORICAL NOTES

Silla was the smallest and weakest of the Three Kingdoms of Korea, but it used cunning diplomatic means to make opportunistic pacts and alliances with the more powerful Korean kingdoms, and eventually Tang China, to its great advantage.

Renamed from Saro to Silla in 503 CE, the kingdom annexed the Gaya confederacy (which in turn had absorbed Byeonhan earlier) in the first half of the 6th century. Goguryeo and Baekje responded by forming an alliance. To cope with invasions from Goguryeo and Baekje, Silla deepened its relations with the Tang Dynasty, with her newly gained access to the Yellow Sea making direct contact with the Tang possible. After the conquest of Goguryeo and Baekje with her Tang allies, the Silla kingdom drove the Tang forces out of the peninsula and occupied the lands south of Pyongyang.

Following the unification of the Korean Three Kingdoms under Silla, the invading Tang Chinese were driven from the peninsular. The Chinese never tried to invade Korea again during the period Silla ruled and their main enemy was the Balhae kingdom to the north who took over most of the territory formally ruled by Goguryeo.

This list also includes the armies of the Later Baekje that was formed with the decline of the Silla by Kyon Hwon, a Silla general. He revolted in 892 and ruled until 935. He was overthrown and the country fell to Goryeo in the following year.

TROOP NOTES

The Silla adopted similar tactics to the other Korean states. Silla used crossbows in larger numbers than the other Korean states and Silla crossbows were much sought after by the Tang; they apparently could outrange the Chinese crossbows.

The main combat weapon on the infantry appears to have been a long spear of 3-4m length.

Hwarang were nobles' sons who were trained in military schools and noted for their heroism. There is no historical evidence for them fighting as unarmoured horse archers, although they appear as such in some modern reconstructions so we include this interpretation for variety.

Cataphract cavalry equipment was adopted from Goguryeo early in the 5th century although it may not have been universal and there are depictions of armoured cavalry on unarmoured horses.

Sodong were a standing guards unit at the capital first raised in 572 CE.

Silla armies remained the same as they had been in the pre-unification period. However, the standing forces were expanded with a Chon cavalry unit stationed in each of the 10 Korean provinces. Many of the new units were recruited from former enemies.

After the conquest of Goguryeo, the Silla took over a unit of infantry who used exceptionally long spears and these formed the "Red Banner" unit. Refugee Malgal from Goguryeo were also incorporated into the army.

NORTHERN DYNASTIES

439 TO 577 CE

HISTORICAL NOTES

This list covers the Northern Wei (439-535), Eastern Wei (535-550) and Northern Qi (550-577).

With the fall of the Northern Liang in 439 CE, Emperor Taiwu united northern China, ending the Sixteen Kingdoms period and beginning the Northern and Southern dynasties period with their southern rivals, the Liu Song.

As conflict swelled in the north between successive leaders, Gao Huan took control of the east and Luoyang (holding Emperor Xiaojing of Eastern Wei as a puppet ruler) by 534, while his rival Yuwen Tai took control of the west and the traditional Chinese capital of Chang'an by 535. Eventually, Gao Huan's son Gao Yang forced the Eastern Wei emperor to abdicate in favour of his claim to the throne, establishing the Northern Qi dynasty (551 to 577).

TROOP NOTES

At this time the nomadic peoples were becoming de-tribalised. They retained their nomadic style of fighting. Infantry were regarded of little assistance.

HISTORICAL ENEMIES

Tuyuhun 4307; Di 4309; Later Xiongnu 4310; Southern Dynasties 4312; Rouran Khaganate 4313; Northern Dynasties 4315; Western Wei and Northern Zhou 4316; Pre Dynastic Khitan 4401; Gokturk 4404.

WESTERN WEI AND NORTHERN ZHOU

535 TO 581 CE

HISTORICAL NOTES

This list covers the Western Wei (535-557) and Northern Zhou (557-580). Yuwen Tai's son Yuwen Jue seized the throne of power from Emperor Gong of Western Wei, establishing the Northern Zhou dynasty (557 to 580). The Northern Zhou dynasty was able to defeat and conquer Northern Qi in 577, reunifying the north. However, this success was short-lived, as the Northern Zhou was overthrown in 581 by Yang Jian, who became Emperor Wen of Sui. With greater military power and morale, along with convincing propaganda that the Chen dynasty ruler Chen Shubao was a decadent ruler who had lost the Mandate of Heaven, the Sui Dynasty was able to effectively conquer the south. After this conquest, the whole of China entered a new golden age of reunification under the centralization of the short-lived Sui dynasty and succeeding Tang dynasty.

TROOP NOTES

This period sees the introduction of more effective infantry. The xiang bing developed into the fubing of Tang armies. Cavalry tactics remained the same at this time.
