ARMY LISTS

GENGHIS

Edited by Richard Jeffrey-Cook. Contributions from Simon Hall, Simon Clarke and Nik Gaukroger. Front image by Simon Clarke.

CONTENTS

4501	Goryeo Korean	918 to 1399 CE	4511	Mongol Conquest	1207 to 1259 CE
4502	Khitan-Liao	927 to 1125 CE	4512	Golden Horde	1251 to 1502 CE
4503	Later Zhou and Early Northern Song	951 to 1005 CE	4513	Ilkhanate	1256 to 1357 CE
4504	Later Northern Song	1006 to 1127 CE	4514	Chagatai Khanate	1259 to 1370 CE
4505	Western Xia	1038 to 1227 CE	4515	Yuan Dynasty	1260 to 1368 CE
4506	Pre-Conquest Mongol	1100 to 1211 CE	4516	Later Nomadic Mongol	1264 to 1508 CE
4507	Jurchen - Jin	1113 to 1234 CE	4517	Early Ming Chinese	1356 to 1435 CE
4508	Qara Khitan	1124 to 1211 CE	4518	Joseon Korean	1400 to 1500 CE
4509	Southern Song	1127 to 1279 CE	4519	Ming Chinese	1436 to 1500 CE
4510	Khwarazmian	1154 to 1231 CE			

CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The collapse of the T'ang Dynasty and the subsequent anarchy of the Five Dynasties and Ten Kingdoms was ended by the rise of the Song Dynasty.

In Korea, the Three Kingdoms had been replaced by the Goryeo Dynasty which was to rule Korea for the next five hundred years.

After the collapse of the Uyghur Khaganate, the steppes were contested by many different tribal confederations. Two Uyghur states survived. The Kingdom of Qocho survived until 1330, first as a vassal of the Qara Khitai and then as a vassal of the Mongols. The Ganzhou Uyghurs were annexed by the Western Xia (or Xi Xia) in 1036. The Western Xia or Tangut Empire was united after a bungled Song attempt to conquer them.

In the 10th century the Khitan tribal organization was converted into a centralized monarchy, the Liao Dynasty. The Khitan-Liao expanded to control Mongolia and northern Manchuria. They seized territory in China and held this despite several Song attempts to recapture it. The Liao however fell to a revolt of their Jurchid vassals who established the Jin Dynasty. The Jin Dynasty attacked the Song who had helped them to overthrow the Liao. The Song lost the northern half of China and evacuated to a new capital in the South. From this time (1127) they are known as the Southern Song.

Kingdom of Khotan, a Tarim Basin state, was conquered in 1006 by the Qarakhanids. The Qarakhanids, Turks who had converted to Islam, had seized control of Transoxiana from the Arab Samanid Dynasty. When the Qarakhanids split due to civil wars, the Western Khanate was seized by the Seljuk Turks. The Eastern Khanate survived until Khitans fleeing the loss of their own Liao Dynasty seized control of the Western Khanate. The Qarakhanids became vassals to the Qara Khitai. The Khwarazm defeated the Qara Khitai in 1211 and the Qarakhanids were quickly conquered. The Khwarazm went on to conquer the Ghurids who had seized Afghanistan and India from the Ghaznavids.

The scene was set for a Mongolian to establish the largest empire the world had seen. Temujin united the Mongol tribes and then started a series of conquests that were to result in Mongol control reaching from Korea to the Mediterranean. He is popularly known as Genghis Khan although academics spell his name as Chinggis. The first g in Genghis should be soft as in general.

The list of Mongol conquests is impressive. The Western Xia surrendered in 1210 but were destroyed by 1227 after refusing to supply contingents to the Mongols. Jin was conquered between 1211 and 1224. The Khitan-Liao in 1218 and the Khwarazmian Empire by 1221. The Mongols then marched through Armenia and Georgia and in 1223 beat the Cuman Kipchaks and the Kievan Rus.

After the death of Genghis, Ogedei consolidated the Mongol hold on Persia and Khorasan. Manchuria was conquered. The Mongols returned to complete the conquest of the Caucasus. In 1235 Kashmir was captured. By 1239 the Rus had been conquered. By 1241 Korea had sued for peace. Poland and Hungary were invaded and it was only the death of Ogedei that resulted in their recall. Under Mongke, Damascus and Aleppo, Ayyubid cities in Syria had been taken.

Even before the death of Mongke in 1259 the Mongol Empire had shown signs of starting to fall apart. The Empire was divided into four main parts under grandsons of Genghis. The Golden Horde controlled much of modern Russia and was ruled by the descendants of Batu. The Chagatai Khanate was ruled by descendents of Chagatai, second son of Genghis. It ruled Transoxiana and Kashmir. The Syrian and Persian territories were ruled by the Il-khans (subordinate Khans). Hulagu was the first Il-khan, appointed by his brother Kublai. Kublai established the Yuan Dynasty in China. The Song established a defensive line of rivers and fortified cities that the Mongols found extremely hard to crack. The Mongols tried to outflank the Chinese by conquering the Kingdom of Dali (Nanzhao). Eventually the Song fell, in part because of an Islamic invention, the Trebuchet, which was able to demolish Chinese fortifications.

The Yuan Dynasty ruled China and parts of Mongolia for the next 100 years. Increasing resentment amongst the Chinese eventually led to a series of revolts. A Buddhist monk and rebel leader established himself as the Ming Emperor and replaced the Yuan Dynasty.

CHINESE NAMES AND TERMS

There are currently two systems for the transliteration of Chinese into English, the Wade-Giles system and the Pinyin system. Pinyin is the newer system and has been adopted in these army lists. Many works however use Wade-Giles and the following table lists the transliteration of names and terms used in these lists.

Pinyin	Wade-Giles
Balhae	Po-Hai
Bubing	Pu-ping
Bushe	Pu-she
Goryeo	Koryo
Guaizima	Kuai-tzu ma
Jin	Chin/Ts'in
Song	Sung
Xi Xia	Hsi Hsia

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

GORYEO KOREAN

918 TO 1399 CE

HISTORICAL NOTES

Goryeo was established in 918 CE by King Taejo. It united the Later Three Kingdoms in 936 and ruled most of the Korean Peninsula until it was removed by the founder of the Joseon in 1392. In 993, the Khitan Liao dynasty invaded Goryeo's northwest border. After a military stalemate, the Koreans agreed to abandon their alliance with the Song and become a Liao tributary state. In return the Goryeo took control of border land which was occupied by Jurchen tribes. In 1009 a coup overthrew the emperor and led to Khitan armies invading Korea. After a decade of indecisive warfare, the previous relationship was resumed. In the 12th century the power of the monarch was weak and a military coup in 1170 placed King Myeongjong on the throne. An elite guard unit, the Tobang, controlled the throne and a series of generals ruled.

Fleeing the Mongols, the Khitan invaded Korea in 1216, but combined Mongol and Korean forces had defeated them by 1219. In 1231, Mongols under Ögedei Khan invaded Goryeo but the Koreans resisted and after ten campaigns a peace was finally agreed in 1259. The repeated invasions caused huge loss of life and devastation. In 1259 the Goryeo Crown Prince Wonjong swore allegiance to the Yuan dynasty. Kublai never imposed direct rule on Korea and the dynasty survived as a client state. When the Ming overthrew the Yuan, the Koreans had to repel several invasions by the Red Turbans. A final attempt to invade by the Ming failed in 1364 and Korean independence was secured.

TROOP NOTES

Kwang-gun were professional troops, both infantry and cavalry that replaced older regional military settlers. Guard units included Singi cavalry who were heavily armoured lancers, To-bang a regiment of "spearmen" and Tae-gak a crossbow regiment. Spearmen were armed with a mix of polearms as well as conventional spears. Hang-ma-gun were Buddhist monks armed with shields and javelins. They were part of a force with Singi cavalry and spearmen called the Py-lom-u-ban to fight Jurchen and Liao armies. Great use was made of temporary and permanent fortifications. "Battle chariots with swords on their axles" are said to have been used in 1010 against the Khitan and are mentioned as late as 1095.

HISTORICAL ENEMIES

Silla Korean 4314; Goryeo Korean 4501; Khitan-Liao 4502; Later Northern Song 4504; Jurchen – Jin 4507; Mongol Conquest 4511; Yuan Dynasty 4515.

Gongmin	1351 – 1374
U	1374 – 1388
Chang	1388 – 1389
Gongyang	1389 – 1392

The period from 1170 to 1270 is known as the Goryeo military regime. From 1196 to 1258 the Ubong Choe family ruled, the “regime of the Choe clan”.

GORYEO KOREAN

BATTLES AND CAMPAIGNS

Battle of Gongsan or Palgong Mountain (Later Baekje forces under Kyon Hwon inflict a defeat on Goryeo army under Taejo)	927 CE
Battle of Gochang (Decisive Goryeo victory over the Later Baekje army)	930
Battle of Hongseong (Decisive Goryeo victory over the Later Baekje army)	934
Goryeo conquest of Later Baekje	936
Goryeo - Khitan War (Khitan invade Goryeo who accept nominal tributary status)	993
Second Goryeo-Khitan War (Khitans invade and sack Kaesong but then withdraw)	1010 – 1011
Third Goryeo -Khitan War (Khitan invasion of Korea)	1018 – 1019
Battle of Kaju (Liao army is defeated by Goryeo)	1019
Toi invasion (Jurchen pirates raid Japan but are then defeated by Goryeo navy)	1019
Goryeo repels the Eastern Jurchens	1056
Goryeo army under Munjong conquers 10 Jurchen villages	1080
Jurchen army defeats Goryeo army capturing Chongju castle	1104
Goryeo army temporarily captures Jurchen territory and agrees peace treaty	1107 – 1108
Rebellion of Myo Cheong (suppressed by Imperial forces led by Kum Bu-sik)	1135 – 1136
Khitans fleeing the Mongols invade Korea	1216 – 1219
Khitans overrun Korean peninsula	1216
Korean army led by Kim Ch'wiryŏ forces Khitans to retreat	1217
Mongol army with allied Koreans and Jurchens defeats Khitans at Kangdong	1219
First Mongol invasion of Korea, Koreans relocate capital to Gangwha Island	1231 – 1232
Second Mongol invasion of Korea, halted when Mongol general Saritai killed	1232
Koreans push Mongols led by Hong Bok-won from Pyongyang	1233
Third Mongol invasion of Korea	1235 – 1239
Fourth Mongol invasion of Korea	1247 – 1248
Fifth Mongol invasion of Korea	1253 – 1254
Sixth Mongol invasion of Korea	1254
Seventh Mongol invasion of Korea	1255 – 1256
Eighth and Ninth Mongol invasions of Korea	1257
Rebellion of Im Yon suppressed with the aid of 3,000 Yuan troops	1269
Sambyeolcho Rebellion	1270 – 1273
First raids by "Japanese" pirates on Korea	1349
Invasions of Red Turban troops defeated by Goryeo troops led by Choe Yeong, Yi Seong-gye, Jeong Seun, and Yi Bang-sil	1359 and 1361

	Formed Flexible	Unprotected	Bow					Up to half	

CHANGES FROM LAST VERSION

None.

KHITAN-LIAO

927 TO 1125 CE

HISTORICAL NOTES

Following Abaoji's death in 926 CE the Khitan empire continued to expand. In 936 the Khitan supported a rebel Shatuo leader in the formation of the Later Jin state and received as payment territory in China itself, the "Sixteen Prefectures" which included modern Beijing. The Song became obsessed with its recovery but failed to retake the area. In 957 a major Khitan invasion captured the Song capital at modern Kaifeng and, in the aftermath the Khitan ruler declared the Liao dynasty. They failed to hold the territory around Kaifeng, however, and retreated north. Between 979 CE and 1005 CE the Liao fought incessantly against the Song who were trying to regain the Sixteen Prefectures. The peace treaty agreed in 1005 CE, the Chanyuan Treaty, proved to be very long-lasting. The Liao also fought several wars against Korea but did not make any significant territorial gains. Between 1115 and 1125 the Liao faced a rebellion by their Jurchen subjects which overthrew the Liao. A remnant escaped to the west where they formed the Qara Khitan state which lasted until conquered by the Mongols.

TROOP NOTES

The Khitan-Liao introduce the ordo - a military ranking based upon the decimal system. By the time of the Liao/Song wars it is estimated that the Liao could field 50 to 60 thousand ordo cavalry.

Khitan regular cavalymen were required to be equipped with 3 horses, 1 forager, 1 orderly, 9 pieces of iron armour, saddle cloths, bridles, armour of leather and iron according to their strength, 4 bows, 400 arrows, a long and a short spear, a club (probably a mace), axe, halberd, small banner, hammer, awl, knife and flint, bucket for the horse, bag for dried food, a grappling hook, a felt umbrella, and 200 foot of rope to tie horses. Foragers were armoured and carried weapons.

The Khitan cavalry were described by a Song general as armoured, partially armoured, and unarmoured cavalry. The bow was the primary weapon of the cavalry. Combat doctrine was to stand off, pour massed archery into the enemy, make probing charges with sub-units then a decisive charge with the whole unit when the enemy wavered. On occasion old and young civilians were driven in front of the army to absorb missile fire, a technique later used by the Mongols. The Khitan and their successes may have inspired the Mongols in several ways.

HISTORICAL ENEMIES

Pre Dynastic Khitan 4401; Tribal Mongolian 4417; Uyghur Successor States 4419; Five Dynasties China 4421; Goryeo Korean 4501; Khitan-Liao 4502; Later Zhou and Early Northern Song 4503; Later Northern Song 4504; Western Xia 4505; Pre-Conquest Mongol 4506; Jurchen – Jin 4507.

KHITAN-LIAO

EMPERORS

Taizong	926 – 947 CE
Shizong	947 – 951
Muzong	951 – 969
Jingzong	969 – 982
Shengzong	982 – 1031
Xingzong	1031 – 1055
Daozong	1055 – 1101
Tianzuo	1101 - 1125

BATTLES AND CAMPAIGNS

Ongirats rebel from the Khitans	928 CE
Khitans attack the Tanguts	933
Khitans and Later Jin forces defeat Later Tang forces led by Zhao Dejun resulting in the end of the Later Tang dynasty	936
Khitans under Emperor Taizong conduct two invasions of Later Jin territory but withdraw	944
Jin forces led by Fu Yanqing defeat Liao army	944
Battle of Zhongdu Bridge (Jin forces surrounded and captured by Liao under Emperor Taizong)	946
Liao Khitans sack Later Jin Xiang Province	947
Northern Han with Liao Khitan allies repels a Later Zhou invasion	952 and 954
Later Zhou invade Liao Khitan but retreat when the emperor dies	959
Northern Han with Liao Khitan allies repels a Northern Song invasion	964
Ongirats and Shiwei rebel from the Khitans	965
Song forces under Emperor Taizu invade Northern Han placing Taiyuan under siege but are forced to retreat when Han receive Liao assistance	968
Northern Han and Liao allies repel Northern Song invasion	976 and 977
Liao attempt to assist Northern Han but are intercepted and defeated by Song forces	979
Liao invade Song China retaking territory in Hebei but are defeated at Yanmen Pass	980
Song attack the Khitans but are defeated	986
Battle of Gaoliang River (decisive Liao victory over the Song)	979
Rebellion of Li Jiqian with Liao support, recognised by Song emperor	982 – 985
Liao under Emperor Shengzong defeat Zubu	983
Khitans invasion of Song territory sacking border regions	988 – 989
Khitans attack the Tanguts	992

KHITAN-LIAO

BATTLES AND CAMPAIGNS (CONTINUED)

Goryeo - Khitan War (Khitan invade Goryeo who accept nominal tributary status)	993 CE
Mongolian tribes rebel against the Khitans	997
Liao invade Song China but are repulsed	998 – 1000, 1001 and 1003
Battle of Chanzhou (Liao army under Emperor Shengzong invades Song China but is repulsed and a peace treaty agreed)	1004 – 1005
Liao defeat Ganzhou Uyghurs	1008
Second Goryeo-Khitan War (Khitans invade and sack Kaesong but then withdraw)	1010 – 1011
Jalairs rebel against the Khitan and are defeated	1014 – 1015
Third Goryeo -Khitan War (Khitan invasion of Korea)	1018 – 1019
Battle of Kuju (Liao army is defeated by Goryeo)	1019
Liao defeat Ganzhou Uyghurs	1026

LATER ZHOU AND EARLY NORTHERN SONG

951 TO 1005 CE

HISTORICAL NOTES

In 951 CE the Later Han were replaced by the Later Zhou. The Later Zhou started the process by which China was once again unified under a single ruling dynasty. Centralised power increased at the expense of regional governors. This was especially true in the army. In 960 the senior Later Zhou general, Zhao Kuangyin seized the throne and inaugurated the Song dynasty. The new emperor completed the process of enforcing central control on the military by forcing senior generals to retire at a drinking party. This incident became known as "dissolving military power with a cup of wine". Zhao Kuangyin became known as Song Taizu. He conquered southern China and the Northern Han but failed to retake the 16 prefectures ceded by the Later Jin in 936. Taizu's younger brother succeeded him in 976 and embroiled the Song in a 25-year war with the Liao, which was only ended in 1005 by his son, the emperor Zhezong. The peace treaty, the Chanyuan Covenant, lasted for over a century.

TROOP NOTES

Armies during this period continued to fight using the tactics of earlier Five Dynasties and Ten Kingdoms armies. Horse armour made a reappearance.

LATER NORTHERN SONG

1006 TO 1127 CE

HISTORICAL NOTES

The Song dynasty began in 960 and continued until 1279 CE. It is divided into two distinct periods, Northern and Southern. During the Northern Song the Song capital was in the northern city of Bianjing (now Kaifeng) and the dynasty controlled most of what is now Eastern China. The Song fought several campaigns against the Khitan Liao dynasty in the northeast and the Xi Xia in the northwest. A significant war was also fought against the Ly dynasty of Vietnam between 1075 and 1077. When the Jurchen rebelled against the Liao and formed the Jin dynasty, the Song formed an alliance with the Jurchen. The Liao were overthrown but the poor performance of the Song army was noted by the Jurchen who immediately broke the alliance and between 1125 and 1127 captured the northern part of the kingdom. The Song regrouped under Emperor Gaozong and withdrew south to a new capital at Lin'an (modern Hangzhou).

TROOP NOTES

During this period the quality of the army declined. There does however appear to have been an increase in the numbers of troops equipped to fight cavalry. Song cavalry were generally armed with the bow. Some apparently used a couched lance but a wide variety of other weapons include lighter spears and halberds were also in use. Specialist horse archer units also seem to have existed. Most infantry were equipped with shield, sword and either spear, polearm, crossbow, or bow. Crossbows and bows were sometimes used within the same unit, the crossbow providing a better effect against cavalry but the bow being able to maintain a higher rate of fire. Such units are treated as crossbows. Specialist anti-cavalry squads were trained, equipped with weapons such as a two-handed "horse-chopping sword". Caltraps were used as a defence against cavalry. Dongwu Che were like large mobile wheelbarrows used extensively in urban areas, often at the head of an attack.

	Tribal Loose	Unprotected	Crossbow					6	

CHANGES FROM LAST VERSION

None.

WESTERN XIA

1038 TO 1227 CE

HISTORICAL NOTES

Following the collapse of Tibetan power in the Ordos region of what is now north-west China, several Tangut warlords set up independent states. After years of squabbling, they were induced to unite by a bungled Song attempt to conquer them between 982 and 1004 CE. This state is known variously as the Western Xia, Xi Xia or the Tangut Empire. Intermittent wars with the Song continued until 1119. Defeated by Genghis Khan in 1207, they became nominal subjects of the Mongols. A rash decision not to supply troops when asked for led to their destruction in 1227.

TROOP NOTES

Little is known about the Western Xia military. Heavily armoured cavalry were called "Iron Sparrowhawks". A Chinese source describes the Western Xia as trying to "break our formation or crush our infantry" so it is possible that they had adopted the fighting style of the Tibetans who had previously ruled the area. Infantry may have fought in a Chinese style as the area had once been Chinese provinces.

CHANGES FROM LAST VERSION

Extended end date to 1211 to include Naimans under Kuchlug.

JURCHEN - JIN

1113 TO 1234 CE

HISTORICAL NOTES

The Jin, also known as the Juchen Jin, emerged from Taizu's rebellion against the Liao dynasty. In 1121 CE they allied with the Song against the Liao. After vanquishing the Liao, the Jin launched an over hundred-year war against the Song dynasty. They quickly captured Northern Song territories where they were supported by anti-Song Chinese clans. In 1127 they sacked the capital of the Northern Song kingdom. The Song dynasty retained a hold of the south. In 1211 the Mongols invaded. Both "western" and "eastern" capitals were taken and the "central" capital Zhongdu was besieged. The Jin agreed to a humiliating treaty. The Jin then attacked the Southern Song and ended up fighting a war on two fronts and they fell to the Mongols in 1234.

TROOP NOTES

Chinese writers ascribed the Jin success to their cavalry. The Iron Pagodas were an elite unit, possibly up to 6,000 strong, who initially had major success against the Song until eventually destroyed by Yui Fei. Guaizima was a system of two ranks of lancers supported by three ranks of horse archers used by Jurchen cavalry. The Jin made use of both their Khitan and Chinese subjects in their armies. Balhae was a Manchurian state. Zhongxiao jun were militia. The Mongol siege of Kaifeng in 1233 saw the Jin make extensive use of gunpowder.

QARA KHITAN

1124 TO 1211 CE

HISTORICAL NOTES

The Qara Khitai dynasty was founded by Yelü Dashi, who led the remnants of the Liao dynasty to Central Asia after fleeing from the Jurchen conquest of their homeland. The empire was usurped by the Naimans under Kuchlug in 1211 CE and conquered by the Mongol Empire in 1218.

TROOP NOTES

Qara Khitan cavalry were like the cavalry under the Liao. More Turkic and tribal cavalry were fielded. Armour was common, with a proportion on armoured horses. At the battle of Qatwan they “all bloodied their lances”. Elephants captured in 1205 CE were used to break down gates in a siege of 1210 but there is no evidence they fought in battle.

HISTORICAL ENEMIES

SOUTHERN SONG

1127 TO 1279 CE

HISTORICAL NOTES

The Southern Song state began when the Song regrouped under Emperor Gaozong and withdrew south to a new capital at Lin'an (modern Hangzhou). In 1234 CE, the Jin dynasty was conquered by the Mongols, who took control of northern China. The Mongols sought to conquer the whole of China. Möngke Khan, the fourth Great Khan of the Mongol Empire, died in 1259 while besieging the city of Chongqing. His younger brother Kublai Khan was proclaimed the new Great Khan, though his claim was only partially recognized by the Mongols in the west. In 1271, Kublai Khan was proclaimed the Emperor of China, founding the Yuan dynasty. After two decades of sporadic warfare, Kublai Khan's armies conquered the Song dynasty in 1279.

TROOP NOTES

The Southern Song had fewer cavalry than the Northern Song. Between 1129 and 1141 CE, Yue Fei successfully used large numbers of men armed with halberds and zhanmadao ("horse-chopping swords") against the Jin cavalry. Mixed formations appear to have fallen out of favour according to the military manuals of the time. Some infantry carried an 18-foot spear but had no shield.

Khwarazmian

1154 to 1231 CE

HISTORICAL NOTES

The Khwarazmian dynasty ruled large parts of Central Asia and Iran first as vassals of the Seljuqs and Qara Khitan, and later as independent rulers, up until the Mongol invasion.

TROOP NOTES

The Khwarazmian state's army consisted of the ruler's household; armoured cavalry provided by emirs, their relations and followers; city militia (service in which was a condition of residence); hill-dwelling farmers, herdsmen and bandits who provided poorly-armed horsemen, plentiful when winning but disappearing rapidly if not or if the money ran out; and tribal confederations of nomads, such as the Kankali. Khitan's were defeated in 1207 CE and a group incorporated into the Khwarazmian army.

HISTORICAL ENEMIES

MONGOL CONQUEST

1207 TO 1259 CE

HISTORICAL NOTES

After Genghis had united the Mongol tribes he initiated a series of conquests.

The Xi Xia surrendered in 1210 CE and served loyally until 1217. After this date they refused to support Genghis and between 1225 and 1227 he destroyed most of the country in punishment. Genghis died during this campaign.

In 1211 the Mongols invaded the Jin. In 1215 the Jin capital of Zhongdu (modern Beijing) was besieged, captured and sacked. This forced the Jin ruler to move his capital south to Kaifeng. Between 1232 and 1233 Kaifeng fell to the Mongols under Ogedei and the dynasty collapsed the following year.

The Khitai Liao were conquered in 1218.

The Khwarazmian Empire was conquered between 1219 and 1221.

After the defeat of the Khwarazmian Empire in 1220, the Mongol army split into two forces. Genghis led the army through Afghanistan and into Northern India. Another army under Jebe and Subatai marched through Armenia and devastated the kingdom of Georgia. On the return journey in 1223 they defeated the allied forces of the Cuman-Kipchaks and the Kievan Rus but may have been defeated by the Volga Bulgars.

After the death of Genghis, Ogedei went on to consolidate the Mongol hold on Persia and Khorasan. He also crushed the Eastern Xia in southern Manchuria and the Tatars in northern Manchuria. The Mongols also returned to Armenia and completed the conquest of the Caucasus region. In 1231 he ordered the invasion of Korea. The Goryeo sued for peace in 1238 and the war ended in 1241.

In 1235 a Mongol army captured Kashmir. In 1241 a Mongol army invaded India but after taking Lahore withdrew.

In 1235 Ogedei ordered the conquest of the Rus. By 1239 the Mongols had defeated the Rus and moved on to crush the Kipchaks and Alans in the Crimea. In 1241 the Mongols invaded both Hungary and Poland. They devastated Hungary and reached the Dalmatian coastline. News of the death of Ogedei arrived in spring 1242 resulted in the Mongols withdrawing, but more than 20% of the population had died.

Ogedei's successor Guyuk ruled for only two years. The Empire started to break up into separate Khanates among the grandsons of Genghis. In 1251 Mongke was elected the Great Khan. He invaded Goryeo Korea as the court refused to submit to him. The country was largely taken by 1254 but the court held out until 1258.

The Mongols continued their conquest of the Middle East, taking Baghdad in 1258, Damascus and Aleppo in 1259.

Meanwhile the Mongols had been continuing to raid Song territory. The Song had created a defensive system of cities and rivers that the Mongols found very hard to break through.

The Mongols tried to outflank the Song by invading the Kingdom of Dali (formerly NanZhao). The Mongols also invaded Vietnam and Tibet. The Tibetans submitted to the Mongols, but the Vietnamese were able to wait until the climate had taken its toll on the Mongol army before attacking and defeating it. To avoid further war the Vietnamese king submitted to the Mongols. Mongke died of illness caught during the prolonged siege of Hechuan in southern China.

MONGOL CONQUEST

TROOP NOTES

Genghis reorganised the Mongol tribes into Tumen (units of 10,000) commanded by a leader loyal to the Khan. By breaking up the tribal confederations and introducing new Yassa laws he turned a group of squabbling tribes into one of the most fearsome armies the world had seen. The speed and endurance of the armies was as big a factor in their success as their fighting potential. Drill was practised, "each time they turn, their ranks are proper, each time they turn, their order is proper". Few Mongols were armoured, at least initially, but all carried a bow. Western sources suggest only some carried a light lance, but Muslim and Chinese sources suggest they all did. The Black Army was a force of 12,000 Xi and Jurchen cavalry. Nomadic horsemen are assumed to be tribes that had not been incorporated into the Mongol army but were supplied from vassal tribes. The Khitan rebel joined Genghis. A Jin ally represented the Chinese warlords who came over to the Mongols.

GOLDEN HORDE

1251 TO 1502 CE

HISTORICAL NOTES

The Golden Horde was named for the gilded tent of its first ruler, Batu, the grandson of Genghis. Although nominally part of the Mongol Empire until 1266 CE, Batu was in practice independent from 1251. As a result of the original Mongol conquest of the Volga Bulgars, the great principality of Vladimir, the Cumans and Alans, and the south-Russian principalities, with the subsequent reduction of the north-Russian principalities to vassal status, the Horde ruled an enormous territory. From 1262 it was generally hostile to the Ilkhanids and formed alliances with the Mamluks, Byzantines and the Genoese. The Horde adopted Islam as a state religion under Uzbek Khan in the 14th century. The horde experienced civil wars from 1359 until 1381 when it was briefly reunited under Toktamysch. After the 1396 invasion of Tumor, the Golden Horde broke into smaller Tatar khanates and began to fall apart. This allowed the state of Muscovy to rid itself of the "Tatar Yoke" in 1480. The residue of the Horde was subjugated by the Crimean Khanate by 1502.

TROOP NOTES

The Golden Horde remained a nomadic horse archer army. It could incorporate contingents from subject tribes and states.

ILKHANATE

1256 TO 1357 CE

HISTORICAL NOTES

The Il-Khans arose during the break-up of the Mongol Empire. Hulegu was appointed Ilkhan by Kublai (his brother). He established his dynasty over the southwestern part of the Mongol Empire that stretched from Transoxiana to Syria. Hulegu destroyed the Abbasid Caliphate in 1258 CE and advanced as far as Gaza, briefly conquering Ayyubid Syria. A Mongol force was defeated at Ain Jalut at the hands of the Mamluks of Egypt. Islam was not adopted as a state religion until 1295. In the 1330s outbreaks of the Black Death ravaged the Ilkhanate empire and after the last il-khan, Abu Sa'id, died in 1335 the state disintegrated rapidly.

TROOP NOTES

Most Ilkhanid Mongols continued to be unarmoured horse archers, the majority being Mongolized Kipchaks. Some Crusaders fought with the Mongols. The Hospitallers at Homs in 1281 CE. The Ilkhanids valued crossbowmen.

Chinese naptha throwers accompanied Hulagu to Iran.

CHAGATAI KHANATE

1259 TO 1370 CE

HISTORICAL NOTES

The Chagatai Khanate was a Mongol and later Turkicized khanate that comprised the lands ruled by Chagatai Khan, second son of Genghis Khan, and his descendants and successors. It became a functionally separate khanate after 1259 CE. The Chagatai Khanate recognized the nominal supremacy of the Yuan dynasty in 1304. In the 1340s it split into two parts, the Western Chagatai Khanate, and the Moghulistan Khanate. The latter is included in the Later Nomadic Mongol list.

TROOP NOTES

The Chagatai Khanate remained a nomadic horse archer army. It could incorporate troops from subject tribes.

HISTORICAL ENEMIES

Uyghur Successor States 4419; Ilkhanate 4513; Chagatai Khanate 4514; Yuan Dynasty 4515; Later Nomadic Mongol 4516; Muslim Indian Sultanates 4710; Islamic Persian 5301; Timurid 5309.

KHANS

Mubarak Shah (regent Orqina Khatun from 1252 - 1260)	1252 – 1260, 1266 CE
Alghu bin Baidur	1260 – 1266
Ghiyas-ud-din Baraq	1266 – 1270
Negübei (under Kaidu bin Kashin)	1270 – 1272
Buqa Temür (under Kaidu bin Kashin)	1272 – 1282
Duwa (under Kaidu bin Kashin and Chapar bin Kaidu)	1282 – 1306
Könchek	1307 – 1308
Taliqu	1308 – 1309
Kebek	1309 – 1310, 1318 – 1325
Esen Buqa I	1310 – 1318
Eljigidey	1326 – 1329
Duwa Temür	1329 – 1330
Tarmashirin	1331 – 1334
Buzan	1334 – 1335
Changshi	1335 – 1337
Yesun Temur	1337 – 1339
‘Ali Khalil	1339 – 1342
Muhammad I ibn Pulad	1342 – 1343

YUAN DYNASTY

1260 TO 1368 CE

HISTORICAL NOTES

This list covers the Mongol armies of Kubalai Khan after his conquest of the Song Chinese and the subsequent Chino-Mongol Yuan Dynasty, through its declining years after Kubalai's death through to its ultimate absorption into the Ming Dynasty. Included in this period are the two failed expeditions to Japan - the second famously destroyed by the Kamikaze winds.

TROOP NOTES

The army is a blend of Mongol heritage and Chinese fighting troops with some technology incorporated from the Islamic world, most notably the trebuchet which enabled the Mongols to take heavily fortified Chinese cities. Mongols remained the core of the army but over time their quality declined as many could not adapt to a settled way of life in areas not suitable for horse-breeding. Both Northern, and later, Southern Song troops were incorporated into the army. Northern troops were judged to be better. Poorer southern troops can be represented by downgrading the quality of the Chinese infantry. Handgunners are first recorded in 1288 CE but may have been used earlier. Cannon were not used until 1322.

HISTORICAL ENEMIES

Goryeo Korean 4501; Southern Song 4509; Chagatai Khanate 4514; Yuan Dynasty 4515; Later Nomadic Mongol 4516; Early Ming Chinese 4517; Kamakura Samurai 4607; Champa 4803; Indonesian or Malay 4806; Kingdom of Pagan 4809; Medieval Dai Viet 4812; Thai Kingdoms 4814.

EMPERORS

Kublai Khan	1260 – 1294 CE
Temür Khan	1294 – 1307
Külüg Khan	1307 – 1311
Ayurbarwada Buyantu Khan	1311 – 1320
Gegeen Khan	1320 – 1323
Yesün Temür	1323 – 1328
Ragibagh Khan	1328
Jayaatu Khan Tugh Temür	1328 – 1329, 1329 – 1332
Khutughtu Khan Kusala	1329
Rinchinbal Khan	1332
Toghon Temür	1332 - 1368

YUAN DYNASTY

LATER NOMADIC MONGOL

1264 TO 1508 CE

HISTORICAL NOTES

This list includes the Mongols led by Kaidu, a cousin who opposed Kublai Khan, the "Eastern Mongols" or "Northern Yuan" who were in Mongolia after the collapse of the Yuan dynasty, the Oirats and the Moghulistan Khanate. It also includes the Jurchen, later known as Manchu, who lived in Manchuria and fought both for and against the Ming Chinese and Joseon Korean.

TROOP NOTES

These armies retained traditional Mongol tactics.

HISTORICAL ENEMIES

Golden Horde 4512; Chagatai Khanate 4514; Yuan Dynasty 4515; Later Nomadic Mongol 4516; Early Ming Chinese 4517; Joseon Korean 4518; Ming Chinese 4519; Timurid 5309; Tatar Khanates 5314.

RULERS

EARLY MING CHINESE

1356 TO 1435 CE

HISTORICAL NOTES

In 1351 CE several Han Chinese groups revolted against the Yuan, including the Red Turbans. Zhu Yuanzhang joined the Red Turbans in 1352. In 1356, Zhu's rebel force captured the city of Nanjing. In 1363, Zhu Yuanzhang eliminated his arch-rival and leader of the rebel Han faction, Chen Youliang, in the naval Battle of Lake Poyang. In 1368 Zhu declared the founding of the Ming dynasty. In 1381, the Ming dynasty annexed areas of Yunnan province in the southwest. In 1387 the Ming sent a military campaign to attack Naghachu which concluded with the Ming conquest of Manchuria. The Ming sporadically sent armed forays into Tibet during the 14th century, which the Tibetans successfully resisted.

TROOP NOTES

Ming armies expanded the number and range of gunpowder weapons in use and formed bodies of infantry using handguns started to appear. Handguns were relatively ineffective against Mongol cavalry who remained the major threat to the Ming during this period. Mixed infantry TuGs represent troops depicted with a front rank of men carrying shields and spears and rear ranks of crossbowmen and archers. Gensidui, translated as dare-to-die men, were tough shock troops picked, often ad hoc, for dangerous assignments. They were equipped with a mix of weapons including grenades, fire-lances, firearms, halberds, swords, and other weapons suitable for the mission. The Ming created a huge regular army which on paper grew to about 1.1 million strong. Most of these were “guard” regiments who trained regularly and were rotated around various garrisons. All men were supposed to be trained with, or familiar with, gunpowder weapons. The regular army was supplemented by local forces who were less efficient.

	Skirmisher	Unprotected	Guns					4	

Note: SPECIAL RULE - LIGHT GUNS. Instead of being deployed separately, light guns may be attached to any drilled infantry TuG except Gansidui. In the army builder, insert "Experienced-Guns" shooting in the firing section of one shooting base of the TuG, and use a light gun base for this. Note that this base is still an infantry base not an artillery base. The TuG moves at BWg speeds (but may double move) and with any move the TuG may abandon the light guns, in which case replace the artillery base with a normal infantry base that matches the rest of the TuG, and revert to infantry speeds for movement thereafter. Note that a file may only shoot once and the file with the artillery must choose whether to shoot the artillery or to shoot as bow, crossbow or handgun in which case the base with Guns shoots as the rest of the TUG. The rule for charging guns (KaB test) will apply if the base with light guns is charged – so it must be in the front rank to get this benefit. This special rule should be explained to opponents as soon as the first TuG of this type is deployed.

JOSEON KOREAN

1400 TO 1500 CE

HISTORICAL NOTES

In 1392, General Yi eliminated Jeong Mong-ju, highly respected leader of a group loyal to Goryeo dynasty and ascended the throne. The dynasty was named Joseon, reflecting the ancient state of Gojoseon. A power struggle soon followed between the heirs to the throne and royal power was only consolidated by Taejong who ruled from 1400 to 1418. He killed many of his rivals but set the foundation for the rule of Sejong the Great (1418-1450). He expanded Korea's northern territories at the expense of the Jurchen. During his reign he established the Korean Hangul alphabet. Science and engineering flourished. The kingdom retained a strong military for the remainder of the century.

TROOP NOTES

Until 1400 when private armies were outlawed, the Korean forces were the same as the earlier Goryeo period. Further reforms were introduced between 1457 and 1464. The cavalry used both the lance and the bow. In the 16th century the Japanese were apparently outshot by some of the Korean mounted archers. The best troops were the guard units. Infantry came from a specific military class, supported by volunteers. A mass conscript levy could be raised, consisting of mostly spearmen.

MING CHINESE

1436 TO 1500 CE

HISTORICAL NOTES

With the accession of Emperor Yingzong as a child a period of regency and eunuch rule resulted in a severe decline in the capability of the Ming empire. The nadir was reached when an ill advised expedition in 1449, including the emperor, was defeated and the Emperor captured by the Mongols. The emperor was released the following year, partly as the Mongols did not know what to do with their captive. Subsequently the Ming adopted a defensive posture in relation to the Steppe which resulted in the creation of the Great Wall of China as we recognise it today.

TROOP NOTES

The quality of the army declined with fewer cavalry and poorer quality infantry.

HISTORICAL ENEMIES

Later Nomadic Mongol 4516; Bamarised Shan Kingdoms 4815.

EMPERORS

Yingzong	1435 – 1449, 1457 – 1464 CE

Southern tribal auxiliaries	INFANTRY	Average	Experienced	Short Spear	-	63	Combat Shy (-22)	0	6,8,9
	Tribal Loose	Protected	Javelin					16	
Regrade tribal warriors	INFANTRY	Average	-	-	Devastating Chargers	60	-		6,8,9
	Tribal Loose	Protected	-					Any	
Guns	LT ARTILLERY	Average	Experienced	-	-	76	Barricades (40)	0	2
	Skirmisher	Unprotected	Guns					4	

Note: SPECIAL RULE - LIGHT GUNS. Instead of being deployed separately, light guns may be attached to any infantry TuG except Gansidui, provincial or tribal troops. In the army builder, insert "Experienced-Guns" shooting in the firing section of one shooting base of the TuG, and use a light gun base for this. Note that this base is still an infantry base not an artillery base. The TuG moves at BWg speeds (but may double move) and with any move the TuG may abandon the light guns, in which case replace the artillery base with a normal infantry base that matches the rest of the TuG, and revert to infantry speeds for movement thereafter. Note that a file may only shoot once and the file with the artillery must choose whether to shoot the artillery or to shoot as bow, crossbow or handgun in which case the base with Guns shoots as the rest of the TUG. The rule for charging guns (KaB test) will apply if the base with light guns is charged – so it must be in the front rank to get this benefit. This special rule should be explained to opponents as soon as the first TuG of this type is deployed.

Cannon	HVY ARTILLERY	Average	Experienced	-	Barricades, Combat Shy	168	-	0	2
	Skirmisher	Unprotected	Cannons					2	
Skirmishing archers	INFANTRY	Average	Experienced	-	Combat Shy	40	-	0	6,9
	Skirmisher	Unprotected	Bow					9	
Skirmishing crossbowmen	INFANTRY	Average	Experienced	-	-	49	Combat Shy (-4)	0	6,9
	Skirmisher	Unprotected	Crossbow					9	
Hand-launch rocketeers	INFANTRY	Average	Unskilled	-	-	28	-	0	6
	Skirmisher	Unprotected	Firearm					12	
War wagons (from 1450 CE)	BATTLE WAGONS	Average	Experienced	-	Combat Shy	116	-	0	2,3,4
	Formed Loose	Protected	Crossbow					8	
Thunder-bomb oxen	CAVALRY	Poor	-	-	Expendables, Devastating Chargers, Combat Shy	45	-	0	3
	Tribal Close	Protected	-					3	

Note: SPECIAL RULE: Thunder-bomb Oxen count the Devastating Chargers combat factor in only 1 rank. This rule must be notified to your opponent at deployment.

ALLIES

LIST

Mongol allies - Later Nomadic Mongol	4516
Shan allies - Bamarised Shan Kingdoms (from 1440 to 1454 CE)	4815
Only one external ally may be taken.	

CHANGES FROM LAST VERSION

None.
