CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

After the region came under contacts with Indian subcontinent circa 400 BCE, Southeast Asia began a gradual process of Indianisation where Indian ideas such as religions, cultures, architectures and political administrations were brought by traders and religious figures and adopted by local rulers. The exception was northern Vietnam that was under the influence of China from the north.

As early as the 2nd century BCE, Pyu city-states controlled an overland trading route from India to China. By the 2nd century CE a maritime trading route from Sri Lanka to China was well established, as evidenced by finds of Roman coins in the Mekong Delta. This trade may have helped promote Khmer civilization. The states of the Oc Eo culture developed into the Kingdom of Funan which was replaced by the Angkor empire. Helped by irrigation and the unique conditions in Cambodia which supported an agricultural surplus, the Angkor kings were able to build magnificent temple complexes including Angkor Wat.

The Viet were dominated by the Chinese influenced kingdom of Annam from 600 to 905 CE. From 906 CE onwards, the Viet were able to maintain autonomy before obtaining independence in 938. After the Mongol conquest of the Song Empire, the Viet were able to defeat three invasions by the Yuan dynasty in 1258, 1285 and 1287 but both the Viet and Champa chose to pay tribute to the Yuan.

The Champa civilisation was located in what is today central Vietnam and was a highly Indianised Hindu Kingdom. They were a regular threat to the Angkor Empire. The Champa were distinct from the Dai Viet, the northern Vietnamese. The Vietnamese launched a massive conquest against the Cham people in 1471, ransacking and burning Champa, slaughtering thousands of Cham people, and forcibly assimilating them into Vietnamese culture.

In Burma the earliest kingdoms were heavily Indianised Pyu and Mon states. In the 9th century the Pyu states were destroyed by repeated invasions of the Nanzhao. The Nanzhao dominated the Yunnan plateau. The Bamar people from Nanzhao established a garrison at Bagan and the Pyu became absorbed into the expanding Pagan kingdom.

The Mongols conquered the Nanzhao kingdom of Dali in 1253 CE. The Mongols also invaded Pagan Kingdom in Burma from 1277 to 1287, resulting in fragmentation of the state. The Hanthawaddy Kingdom arose from a loose collection of Mon-speaking regions. It eventually dominated the Kingdom of Ava which was the major Shan kingdom in Burma.

The Tai were a people who migrated southwards from modern Guangxi in southern China in the 8th to 10th centuries CE. They entered Burma and put pressure on both the Burmese kingdoms and Angkor empire. In the 13th century an Angkor governor rebelled and founded the Sukhothai kingdom which grew to control most of present day Thailand. Sukhothai was replaced by the Ayutthaya Kingdom by 1438 CE.

To the south of the Angkor Empire, the Malay peninsular and Indonesian islands were controlled by a series of Hindu and Buddhist states. The most powerful was the Srivijaya Kingdom, a confederacy of states that dominated Sumatra and the Malay peninsular from 7th to 13th centuries CE.

Muslim influence in Indonesia arose in the 12th century CCE with the Kedah Sultanate established in 1136. The Malacca Sultanate embraced Islam in the 15th century and accelerated the conversion to Islam in the region. The strategic value of the Strait of Malacca, which was controlled by Sultanate of Malacca in the 15th and early 16th century, did not go unnoticed by Portuguese writer Duarte Barbosa, who in 1500 wrote "He who is lord of Malacca has his hand on the throat of Venice. This led to the arrival of the Europeans in the 16th century.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

EARLY KHMER

100 TO 801 CE

HISTORICAL NOTES

This list covers the Kingdom of Funan and the Chenla Kingdom that preceded the Angkor Empire. Chinese records dating from the 3rd century CE, record the arrival of two Funanese embassies at the Kingdom of Wu. In the late 4th and 5th centuries, Indianization advanced more rapidly, in part through renewed impulses from the south Indian Pallava dynasty and the north Indian Gupta Empire. Funan may have been the Suvarnabhumi referred to in ancient Indian texts. Roman coins found at Oc Eo demonstrate that long-distance trading took place.

The History of the Chinese Sui dynasty contains entries of a state called Chenla, a vassal of the Kingdom of Funan, which had sent an embassy to China in 616 or 617. Chenla gained independence and then conquered Funan. The New Book of Tang asserts that shortly after 706, the country was split into Land Chenla and Water Chenla. The existence of Chenla is contested and that Cambodia was not united until the rise of the Angkor kingdom of Jayavarman II.

The list also includes the Cham kingdom of Lâm Ấp which emerged in 192 CE and developed into a unified Cham polity.

TROOP NOTES

Early Khmer warriors used javelins or short spears and carried small shields.

HISTORICAL ENEMIES

Chinese Dominated Vietnam 4212; Southern Dynasties 4312; Early Khmer 4801; Champa 4803.

RULERS

Rulers of Funan include, Fan Shiman, Chan-T'an, Chiao Chen-ju (Kaundinya), Jayavarman and Rudravarman.

REBEL VIETNAM

544 TO 938 CE

HISTORICAL NOTES

A revolt against Chinese rule was led by Lý Bôn and his general and heir Triệu Quang Phục whose Early Lý dynasty ruled for almost half a century, from 544 to 602, before Sui China reconquered their kingdom Vạn Xuân. The Viet continued to rebel against Chinese rule until it was overthrown in the early 10th century. In 722 CE Mai Thúc Loan succeeded in capturing Hanoi with the help of Champa and Chenla allies. He was quickly defeated by Tang armies. He is still recognised today as one of the early heroes of Vietnamese nationalism.

TROOP NOTES

Hill tribes appear to have been distinguished from lowland Vietnamese.

HISTORICAL ENEMIES

Southern Dynasties 4312; Sui China 4405; Tang China – Southern 4409; Late Tang China – Southern 4415; Champa 4803; Annam 4804.

CHAMPA

600 TO 1500 CE

HISTORICAL NOTES

From the 7th to the 10th centuries, the Cham controlled the trade in spices and silk between China, India, the Indonesian islands, and the Abbasid empire in Baghdad. They supplemented their income from the trade routes not only by exporting ivory and aloe, but also by engaging in piracy and raiding.

In the latter half of the 10th century, the kings of Indrapura waged war against the **Đại Việt** of what is now northern Vietnam. In 979, the Cham King Parameshvaravarman I (Phê Mi Thuê to the Viet) sent a fleet to attack Hoa Lư in support of Ngô Nhứt-khanh following the Anarchy of the 12 Warlords. However, the ill-fated expedition was scuttled by a tempest. In 982, Viet troops sacked Indrapura and killed Parameshvaravarman. As a result of these setbacks, the Cham abandoned Indrapura around 1000. The centre of Champa was relocated south to Vijaya in modern Bình Định. When the Cham capital fell in 982 to Vietnam, several Cham fled to Hainan and Guangzhou.

TROOP NOTES

Champa armies appear to have been like Angkor armies. Judging by the reliefs the Champa used more cavalry and fewer elephants than the Angkor Empire.

HISTORICAL ENEMIES

ANNAM

602 TO 905 CE

HISTORICAL NOTES

During the Tang dynasty, Vietnam was called Annam until 866. With its capital around modern Bắc Ninh, Annam became a flourishing trading outpost, receiving goods from the southern seas. The Book of the Later Han recorded that in 166 the first envoy from the Roman Empire to China arrived by this route, and merchants were soon to follow. The 3rd-century Tales of Wei (Weilüe) mentioned a "water route" (the Red River) from Annam into what is now southern Yunnan. From there, goods were taken over land to the rest of China via the regions of modern Kunming and Chengdu. In 866, Annam was renamed Tĩnh Hải quân.

TROOP NOTES

Annam appears to have adopted Chinese methods of warfare. Chinese style troops would be either garrisons or locally trained militia units.

PYU AND EARLY MON 660 TO 1057 CE

HISTORICAL NOTES

Peittaung, a semi-legendary chieftain of Pyu is the first recorded ruler in Burma. The Pyu had migrated from further north and established a series of walled cities and towns. Pyu culture was heavily influenced by India. In the 9th century the Pyu states were destroyed by repeated invasions of the Nanzhao. The Bamar people from Nanzhao established a garrison at Bagan and the Pyu became absorbed into the expanding Pagan kingdom.

The Mon were a separate people occupying parts of lower Myanmar and northern Thailand. Several city states or kingdoms existed, one around the trading city of Thaton. Around 1000CE many Mon fled west into Lower Burma from the expanding Khmer Empire. The city of Thaton was taken by Pagan forces in 1057.

TROOP NOTES

Spearmen, with a shield and spear formed the bulk of the army. Jackets, padded with cotton, were worn as armour.

INDONESIAN OR MALAY

700 TO 1511 CE

HISTORICAL NOTES

Indonesia was influenced by Indian culture through dynasties including the Pallava, Gupta, Pala and Chola. A number of Hindu and Buddhist states flourished and then declined across Indonesia. Tarumanagara, flourished between 358 and 669 CE on the island of Java and was succeeded by the Sunda kingdom. In the 6th to 7th century, the Kalingga Kingdom was established on the northern coast of central Java. The Kahuripan kingdom was established in 1019 in East Java but split into two in 1045. The Kediri Kingdom was the more dominant and survived until 1222 when it was replaced by the Singhasari kingdom. In 1275, the ambitious king Kertanegara, launched a naval expedition northward and obtained the allegiance of kingdoms in the Malaya region. In 1284 Bali was captured. In 1280, the empire came to the attention of Kublai Khan who demanded tribute. The third envoy was returned with a refusal cut into his face. In late 1292 Kublai Khan sent 1,000 war junks for a punitive expedition that arrived off the coast of Java in early 1293. In the meantime, the ruler of Kediri, Jayakatwang, launched a coup. The king sent his son-in-law, Raden Wijaya, to defeat the rebels. Seizing the opportunity to ally with the Mongols, the Mongols defeated Jayakatwang. Raden Wijaya then defeated the Mongols who were forced to retire. Raden Wijaya then ascended the throne and established the Majapahit Empire. Majapahit in East Java was the greatest of the pre-Islamic Indonesian states. It existed from existed from 1293 to circa 1500.

Srivijaya was an ethnic Malay kingdom on Sumatra. It was a confederacy of states rather than a true kingdom. It was a formidable naval power from the 7th to 13th centuries but its influence waned in the 11th century after attacks by the Chola empire. The Malacca Sultanate was founded around 1400 by a Malay Raja of Singapura (Singapore), Parameswara, also known as Iskandar Shah. At the height of the sultanate's power in the 15th century, its territory covered much of the Malay Peninsula, the Riau Islands and a significant portion of the northern coast of Sumatra in present-day Indonesia. The Sultanate fell to the Portuguese in 1511.

TROOP NOTES

Indonesian warriors typically had little protection except for a shield, some carried large shields other smaller shields. Weapons included spears and bladed weapons. The kerambit was a curved blade symbolising a tiger claw. A parang sawalaku was a broad sword on a wooden shaft. Kris blades were asymmetric. Skirmishers were armed with bows, javelins and blowpipes.

NANZHAO

728 TO 1382 CE

HISTORICAL NOTES

The Nanzhao kingdom was formed by the unification of six Tai kingdoms in 729 CE when one local ruler in Yunnan overcame his neighbours, with Tang Chinese support. The new kingdom played the Tang off against the Tibetans, allying with and deserting each in turn. Nanzhao was also able to dominate the East-West trade routes from China and Tongking through Myanmar (Burma) to India. By the 9th century Nanzhao had become an imperialistic state. The Pyu kingdom in northern Burma was made tributary in the 760s and destroyed in 832 CE. Tongking was captured in 862 CE. Nanzhao declined during the late 9th century and fell in 902 CE, when a rebel official killed its last emperor and set up a new state. Three dynasties followed in quick succession before Duan Siping seized power in 937, establishing himself at Dali founding the Dali kingdom. The Mongols under the leadership of Kublai Khan conquered the area in 1253 CE. The Dali King Duan Xingzhi himself defected to the Mongols. During the preceding two centuries, the Tai had been moving southward in large numbers, eventually forming the bulk of the population in what is present-day Thailand.

TROOP NOTES

Cavalry seem to have been a significant arm of the Nanzhao army. The main weapons of the army were spear and shield, or crossbow. Most troops wore elephant, rhino, or buffalo-hide armour. Nanzhao subdued many local tribes, raising tribal troops who were called "fierce and unrelenting fighters" by one Chinese source. Other tribes were deported and resettled in Nanzhao territory; these also supplied troops, who may have been conscripted into regular units armed in Nanzhao style.

ANGKOR EMPIRE

802 TO 1431 CE

HISTORICAL NOTES

The Angkor Empire (commonly referred to as the Khmer Empire), dominated Cambodia, Laos, and Thailand from the 9th to 15th centuries. The empire grew out of the former kingdoms of Funan and Chenla. Its greatest legacy is Angkor, in present-day Cambodia, which was the site of the capital city during the empire's zenith. During its peak in the 11th to 13th centuries, Angkor was the largest pre-industrial urban centre in the world.

The foundation of the kingdom is attributed to Jayavarman II who reigned from 802 to 835. The kingdom expanded in the 9th century but split in the early 10th century. Only with Rajendravarman II (944 to 968) was the kingdom reunited. Again, the kingdom split at the start of the 11th century but was re-united by Suryavarman I (1006 to 1050) who established diplomatic relations with the Indian Chola empire. The Chola and Khmer allied themselves against the Sumatran Srivijaya Empire and Malayan Tambralinga kingdom. In 1074 the Empire fought a war against the Cham. In 1174 a Cham fleet reached and sacked the capital. King Jayavarman VII retook the capital and 22 years later had defeated the Champa and conquered large parts of their territory.

During the 13th century the kingdom started to decline. An alliance of the Đại Việt and the Champa pushed back the Khmer and the Thai rebelled in the west. In 1283 the Mongols threatened and from 1285 the empire started paying tribute to the Yuan dynasty. By the 14th century the empire was in decline. The Black Death may have reduced the population leading to failure of water management. Many sites were abandoned. The kingdom was overthrown by the Siamese Ayutthaya, abandoning Angkor and moved to the Phnom Penh area.

TROOP NOTES

Images of Khmer troops are carved into the temples of Angkor Wat. Some however are scenes from Hindu texts and need to be interpreted with caution. Chariots depicted are from heroic epics or in ceremonial scenes and there is no evidence they were used on the battlefield. Maiden guard are depicted riding protected horses and armed with the Ph'kak. The best infantry wore protective jackets and carried larger shields. Other infantry carried smaller shields, and some wore no jackets. The ph'kak is an axe-like weapon resembling a hockey stick with an axe blade at right angles to its end. The artillery was Chinese-type "double crossbows" man-handled on wheels or mounted (or possibly only transported) on elephants.

KINGDOM OF PAGAN

849 TO 1301 CE

HISTORICAL NOTES

The Kingdom of Pagan was the first kingdom to unify the regions that would later constitute modern-day Burma. Pagan's 250-year rule over the Irrawaddy valley and its periphery laid the foundation for the ascent of Burmese language and culture. The kingdom grew out of a small 9th-century settlement at Pagan by the Mranma (Burmans) who had recently entered the Irrawaddy valley from the Kingdom of Nanzhao. Over the next two hundred years, the small principality gradually grew to absorb its surrounding regions until the 1050s and 1060s when King Anawrahta founded the Pagan Kingdom. By the late 12th century Anawrahta's successors had extended their influence farther to the south into the upper Malay peninsula, east, west and north. In the 12th and 13th centuries, Pagan, alongside the Angkor Empire, was one of two main empires in mainland Southeast Asia.

TROOP NOTES

Before the unification of Burma by King Anawrahta (1044 - 1077), Burmese armies were of infantry with only a few elephants. Anawrahta shifted the emphasis to massed elephants which probably fought with 4 crew riding a howdah and 8 escort. Others may have had a two-tier platform with 3 upper and 3 lower tier crew on each side and 2 in the rear. Cavalry were shieldless, wore quilted armour and affixed black or white bulls' hair at the heads of their spears as a mark of nobility. They were mainly recruited from the Shan who occupied the only extensive grasslands in Burma. The guard were established by King Narapatisithu (1173 - 1210), armoured with sword and shield. Crossbowmen may have carried spears or halberds.

AUTONOMOUS VIETNAM

906 TO 938 CE

HISTORICAL NOTES

Early in the 10th century, as China became politically fragmented, successive lords from the Khúc clan, followed by **Dương Đình Nghệ**, ruled **Tĩnh Hải quân** autonomously under the Tang title of Jiedushi (Vietnamese: **Tiết Độ Sứ**), Virtuous Lord, but stopped short of proclaiming themselves kings. In 938, Southern Han sent troops to conquer autonomous **Giao Châu**. **Ngô Quyền**, **Dương Đình Nghệ**'s son-in-law, defeated the Southern Han fleet at the Battle of **Bạch Đằng** (938). He then proclaimed himself King **Ngô** and effectively began the age of independence for Vietnam.

NGÔ, ĐINH AND EARLY LÊ VIETNAM

939 TO 1009 CE

HISTORICAL NOTES

After domination by the Tang, the Vietnamese maintained independence through the Ngô, Đinh and Lê dynasties. Ngô Quyền defeated a Southern Han army at the Battle of Bạch Đằng River (938 CE). The Ngô dynasty ended with the Anarchy of the 12 Warlords (966 to 968 CE). Đinh Bộ Lĩnh defeated the other eleven lords to establish his dynasty. When he died his second son and grandson were murdered. The Dowager Empress granted Lê Hoàn rule of the country. The Early Lê Dynasty ruled for three generations from 980 to 1009 CE and was known for repelling Song invasions. In 990 CE the Champa agreed to become a vassal state. The last Lê emperor was characterized by debaucheries, wild orgies and decadence.

TROOP NOTES

The army consisted of "Sons of Heaven" the court troops, the Ten Circuit Army which was the main militia and regional forces.

MEDIEVAL DAI VIET

1010 TO 1500 CE

HISTORICAL NOTES

Dai Viet remained independent except for a brief Ming Chinese occupation (1407-1427). Major dynasties were the Later Ly (1009-1225), Tran (1225-1413).

TROOP NOTES

The Viet army was based on a territorial peasant militia, the "Ten Circuit Army", decimally organised and wearing distinctive leather-covered square hats; plus, a Chinese-influenced standing army of court troops called "Sons of Heaven", "Permanent troops", or "Troops under arms" under various dynasties. Vietnamese artillery imported into China with instructors in 1410 was considered superior to Chinese.

THAI KINGDOMS

1238 TO 1510 CE

HISTORICAL NOTES

Around 1238 Sukhothai revolted against the Khmer Empire and the Sukhothai kingdom was founded. By the beginning of the fourteenth century, the Sukhothai kingdom controlled most of present-day Thailand. The Ayutthaya kingdom in the south arose from the further decline of the Khmer empire and in 1349 invaded Sukhothai. By 1378 Sukhothai was a vassal of the Ayutthaya Kingdom. It was absorbed into the Ayutthaya kingdom in 1438.

TROOP NOTES

Thai warfare was influenced by India. Armies consisted of elephants, cavalry and infantry although cavalry were scarce. Elephants typically had a crew of 2 or 3 accompanied by 4 on foot as escort (one for each leg). Infantry were armed with spears or bows and crossbows. All carried swords.

BAMARISED SHAN KINGDOMS

1287 TO 1510 CE

HISTORICAL NOTES

Founded in 1364, the Ava kingdom was the successor state to the petty kingdoms of Myinsaing, Pinya and Sagaing that had ruled central Burma since the collapse of the Pagan Kingdom in the late 13th century. From the 1420s to early 1480s, Ava regularly faced rebellions in its vassal regions. Several states broke away including Taungoo which eventually conquered Ava in 1555.

TROOP NOTES

From 1430 onwards the Arakanaese kings received assistance from the Sultanate of Bengal. The reputation of the Shan as fierce warriors derives from British accounts in the 19th century.

HANTHAWADDY KINGDOM

1287 TO 1510 CE

HISTORICAL NOTES

In 1287, the Pagan Empire collapsed due to Mongol invasions, and all its vassal states became independent. For its first 100 years, the kingdom of Hanthawaddy was merely a loose collection of three Mon-speaking regions. A more centralised rule came with the reign of King Razadarit, who also fended off the Burmese kingdom of Ava in a war between 1385 and 1424. After the war, Hanthawaddy entered its golden age whereas its rival Ava gradually went into decline.

TROOP NOTES

Hanthawaddy armies followed the fighting styles of the Mon.

LAN XANG

1350 TO 1500 CE

HISTORICAL NOTES

Fa Ngum to expand Lan Xang's borders to the western escarpment of the Khorat Plateau, the crest of the Annamite Chain in the east, and the northern edge of Khmer and Cham civilizations in the south. To the north and east especially, however, mountain tribes resisted absorption and maintained a degree of independence.

TROOP NOTES

Lan Xang supposedly maintained a standing army of 150,000 men. Regiments included cavalry, infantry, and an elephant corps. Prince Fa Ngum, Lan Xang's founder, redeveloped the old Mongol model of an army composed of units of 10,000, which gave rise to the name of the successive reign, Sam Sen Thai, or, 10,000 Thai.
