CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The Crusades were a series of religious wars sanctioned by the Latin Church in the medieval period. The most commonly known are the campaigns in the Eastern Mediterranean aimed at recovering the Holy Land from Islamic rule and this set of lists focusses on these campaigns. The term "Crusades" is however also applied to other church-sanctioned campaigns.

The defeat of the Byzantine Empire at Manzikert in 1071 CE enabled Seljuk Turkmen generals to carve their own principalities out of formerly Byzantine Anatolia. It was to lead the Byzantine Emperor Alexios I Komnenos to request western aid to help repel the Seljuk Turks from Anatolia. Alexios was probably hoping for a small body of mercenary reinforcements he could direct and control. At the Council of Clermont Pope Urban II preached for a crusade. The Pope had previously contacted and obtained support from some nobles. The result was probably not what the Pope expected. Almost immediately Peter the Hermit preached to thousands of mostly poor Christians whom he led out of Europe in what became known as the People's Crusade. This mass of people, most of whom had little or no military experience, advanced into Anatolia to be ambushed and massacred by the Turks.

Meanwhile the First Crusade, led by a group of nobles started to arrive in Byzantium. The initial aim was to capture Nicaea which had been declared the capital of the Sultanate of Rum. This was achieved and followed up by a victory at Dorylaeum. The Crusaders marched on to Antioch which they started to besiege. Lacking the resources to fully invest the city it took eight months until the city was captured through bribery. Days later the Crusaders were themselves besieged. They suffered further losses until a determined attack caused the Turks to withdraw. After months arguing who would have the captured territory the Crusading army eventually set out for Jerusalem. This had been recently taken from the Turks by the Fatimid Egyptians. This initial attack failed but a later attack captured the city. A surprise attack on an Egyptian relief force consolidated the Crusader hold on the territory and the Kingdom of Jerusalem was created.

Prior to capturing Jerusalem another Crusader, Baldwin of Boulogne, had travel to Edessa and succeeded as ruler, adopting the title Count. This region was occupied by Orthodox Christians. Baldwin became King of Jerusalem when his brother Geoffrey of Bouillon died. The County of Edessa passed to his cousin. The Principality of Antioch, the County of Edessa, the Kingdom of Jerusalem and the County of Tripoli were to form the Outremer states that would have a presence in the Middle East for the next two centuries.

The Christian position was tenuous. To the north was the Sultanate of Rum, a Seljuk state that controlled most of Anatolia. Beyond was the Byzantine Empire but the Byzantine Emperors had little sympathy for the Crusaders who had gone back on their original promise of handing over their conquests to the Empire. To the East was the Seljuk empire which fortunately for the Crusaders had weak central authority and consisted of several lesser rulers in Syria and beyond attempting to hold and expand their own positions. To the south the Fatimid empire also lacked political stability. Over the next few decades there was a succession of wars and battles.

The loss of Edessa to the forces of Zengi, the atabeg of Mosul, in 1144 was to result in the Second Crusade. It launched an unsuccessful attack on Damascus, a failure that was ultimately to have disastrous consequences for the Kingdom of Jerusalem. In 1171 Saladin became the first Ayyubid Sultan of Egypt. He went on to capture Jerusalem and overrun the Kingdom in 1187 and precipitated the Third Crusade. The Third Crusade led to the capture of Cyprus and although it failed to capture Jerusalem, it allowed Richard the Lionheart to agree a treaty with Saladin which granted Muslim control over Jerusalem but allowed unarmed Christians to visit the city. The successes allowed the Crusaders to maintain their presence on the Syrian coast for a further 100 years.

The Fourth Crusade was originally intended to capture Jerusalem but a sequence of events culminated in the Crusaders sacking the city of Constantinople. They set up the Latin Empire and partitioned other Byzantine territories among themselves. The Crusade was one of the more prominent acts in the schism between the Eastern Orthodox and Roman Catholic churches. Byzantine resistance based in unconquered sections of the empire such as Nicaea, Trebizond, and Epirus ultimately recovered Constantinople in 1261.

The Fifth Crusade (1213 to 1221) was an attempt to reacquire Jerusalem and the Holy Land by conquering the Ayyubid state in Egypt. After occupying the port of Damietta, the Crusaders marched south towards Cairo in July 1221, but were turned back after their dwindling supplies and forced to retreat. A night time attack by Sultan Al-Kamil resulted in a great number of Crusader losses, and eventually in the surrender of the army.

The Sixth Crusade started in 1228 as an attempt to regain Jerusalem. It began seven years after the failure of the Fifth Crusade and involved very little actual fighting. The Egyptian sultan, occupied with the suppression of rebellious forces in Syria, agreed to cede Jerusalem to the Franks, along with a narrow corridor to the coast. The ten-year expiration of the treaty with Al-Kamil caused Pope Gregory IX to call for a new crusade to secure the Holy Lands for Christendom beyond 1239. This initiated the Barons' Crusade, a disorganized affair which wound up with relatively limited support. The Barons' Crusade consisted of two separate crusades: one that took place in Constantinople and the other one in the Holy Land. The Crusaders used diplomacy to successfully play the two warring factions of the Muslim Ayyubid dynasty (in Egypt and Syria) against each other. For a few years, the Barons' Crusade returned the Kingdom of Jerusalem to its largest size since 1187.

The Seventh Crusade was a crusade led by Louis IX of France from 1248 to 1254. His troops were defeated by the Egyptian army led by the Ayyubid Sultan Turanshah supported by the Bahariyya Mamluks. The Mamluks were to seize control of Egypt. Louis IX of France's failure to capture Tunis in the Eighth Crusade led Henry III of England's son Edward to sail to Acre in what is known as the Ninth Crusade. The Ninth Crusade saw several impressive victories for Edward but foreshadowed the imminent collapse of the last remaining crusader strongholds along the Mediterranean coast.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

GEORGIAN

1008 TO 1412 CE

HISTORICAL NOTES

The first united Georgian monarchy was formed at the end of the 10th century CE when Curopalate David invaded the Earldom of Kartli-Iberia. Between 1008 and 1010, Bagrat III created a united Georgia in both the east and west. In 1071, the Seljuk army destroyed the united Byzantine-Armenian and Georgian forces in the Battle of Manzikert. Most of Georgia was conquered and devastated by the Seljuks. The struggle against the Seljuk invaders in Georgia was led by King David IV. David created the regular army and peasant militia to be able to resist Seljuk colonization of his country. By the end of 1099 David had stopped paying tribute to the Seljuks and had liberated most of the Georgian lands. Between 1110 and 1118 he forced many of the Turks to withdraw and invited Cuman (Kipchak) warriors to settle. The reign of Queen Tamar 1184 to 1213 represented the peak of Georgia's might. In the 1220s, the South Caucasus and Asia Minor faced the invasion of the Mongols. Despite fierce resistance by Georgian-Armenian forces and their allies, the whole area including most of Georgia, all Armenian lands and Central Anatolia eventually fell to the Mongols. After 1245, the country broke up into competing kingdoms.

TROOP NOTES

At the start of the period, the Georgians relied on the lance rather than the bow. Later they are depicted emphasising the bow rather than the lance. This may well have been under Seljuk influence. Georgian foot were armed with spear or bow. They carried round shields, and many wore lamellar armour.

LATER FATIMID EGYPTIAN

1074 TO 1171 CE

HISTORICAL NOTES

During the late eleventh and twelfth centuries CE the Fatimid caliphate declined rapidly, and in 1171 Saladin seized its territory. He founded the Ayyubid dynasty and incorporated the Fatimid state into the Abbasid Caliphate.

TROOP NOTES

The Turkish Mamluks were a huge cost on the Fatimid treasury. In 1074 CE Nasir al-Dawla, a major leader, was assassinated. Control of the Turkish Mamluks was lost from this point on. At this time the Dailami were also disbanded. The Fatimids came to rely on significant numbers of Armenians. The 'abid infantry remained the core of the Fatimid army. Some were armed with a heavy lutat mace. The Sariraya were armed with 11 or 12 foot spears.

EARLY ARMENIAN CILICIA

1080 TO 1150 CE

HISTORICAL NOTES

The Armenians in Cilicia gained their independence following the battle of Manzikert. The principality was founded c. 1080 CE by the Rubenid dynasty, an alleged offshoot of the larger Bagratid family, which at various times had held the thrones of Armenia and Georgia.

TROOP NOTES

The Armenians relied on bands of paid retainers. Equipment was influenced by the Crusaders. Foot were equipped with spears or bows. Circular shields were carried but some kite-shaped shields seemed to have been adopted from the Crusaders.

SYRIAN STATES

1092 TO 1177 CE

HISTORICAL NOTES

The revived Abbasid Caliphate of Baghdad enabled the rulers of various Syrian cities to achieve semi-independence. The most powerful were Damascus and Aleppo. Minor cities included Hama, Homs, Tripoli, and Shaizar. Antioch and Jerusalem were captured during the First Crusade. The smaller cities were captured by Zengi and then ruled by him and his son Nur ed-din from 1128 to 1174 CE. Armies of the Atabegs of Mosul prior to 1128 are covered in the Later Seljuk Empire list. Zengi, took Edessa in 1145 and Nur ed-din took Damascus in 1154. In 1169 Nur ed-Din's Kurdish general Shirkuh took Egypt. Shirkuh was succeeded by his nephew Saladin (Salah ed-Din Yusuf), who ruled Egypt theoretically on Nur ed-Din's behalf until the latter's death in 1174, then took over the whole Zengid territory to create the Ayyubid Sultanate. Muslim-Frankish alliances include: In 1108, Ridwan of Aleppo with Tancred of Antioch against Jawali Saqawa and Baldwin of Edessa; in 1115, Toghtekin of Damascus, with Roger of Antioch, Pons of Tripoli and Baldwin of Jerusalem against the Seljuq Sultan Mohammed; in 1139, Unur of Damascus with Fulk of Jerusalem against Zengi.

TROOP NOTES

The core of the state forces were slave-soldiers (ghulams or mamluks). These were supported by Syrian, Armenian, or Kurdish cavalry. Ahdath were city militia. Ghazis were volunteers fighting for religion, mutatawwi for loot.

EASTERN SELJUK TURK

1092 TO 1181 CE

HISTORICAL NOTES

After the death of Malik Shah I in 1092 CE the control of the Seljuk Sultanate over their Eastern territories was limited. The most powerful ruler in the East was Ahmad Sanjar who ruled from 1097 to 1157. Sanjar's power, marked by conflict with the Kara-Khitai and Khwarazmians, ended in 1153 when Turkish Ghuzz nomads from beyond the Amu Darya pillaged the city of Merv.

TROOP NOTES

The Seljuk army in the east tended to use more horse archers following the Khurasanian tradition.

LATER SELJUK EMPIRE

1092 TO 1194 CE

HISTORICAL NOTES

The Later Seljuk Empire disintegrated into a series of competing dynasts and emirs. From 1105 to 1118 CE it was nominally ruled by Muhammad I and 1118 to 1131 by Mahmud II. Mahmud II was eventually succeeded by Masud who reigned until 1152. During this period the capital was moved to Hamadan. These Sultans controlled much of modern Iran, Iraq and parts of Syria. After the death of Ahmed Sanjar, the governors known as Atabegs were effectively independent in Kerman (southern Iran), Fars (southern Iran), Hamadan (Iraq and Azerbaijan), Damascus (Syria), Mosul (Iraq) and Eastern Anatolia. Georgia expanded from the north. The Armenian kingdom of Cilicia expanded. The Abbasid caliphs reasserted their authority. For a brief period from 1191, Toghrul III was the Sultan of all Seljuk except for Anatolia. In 1194, however, Toghrul was defeated by the Khwarazmid Empire and the Seljuk Empire finally collapsed.

TROOP NOTES

The Seljuk army did not change significantly during this period. The crossbow was introduced during the 12th century.

PEOPLES CRUSADE

1096 CE

HISTORICAL NOTES

The People's Crusade was the prelude to the First Crusade and lasted roughly six months from April to October 1096 CE. It is also known as the Peasants' Crusade, Paupers' Crusade or the Popular Crusade as it was not part of the official Catholic Church-organised expeditions that came later. Led primarily by Peter the Hermit with forces of Walter Sans Avoir, the army was destroyed by the Seljuk forces of Kilij Arslan at Civetot, northwestern Anatolia.

TROOP NOTES

The majority of Peter's army was a band of illiterate peasants. The long tradition for pilgrimages to Jerusalem ensured that the location and distance of the city were known to many. While the majority were unskilled in fighting, there were some well-trained minor knights leading them, such as Walter Sans-Avoir, who were experienced in warfare.

FIRST CRUSADE

1096 TO 1099 CE

HISTORICAL NOTES

The First Crusade (1095 to 1099 CE) was the first attempt to capture the Holy Land, called on by Pope Urban II in 1095. The response to the call was much greater than even the Pope expected. The crusade was led by some of the most powerful nobles of France. The four main crusader armies left Europe around the appointed time in August 1096. They gathered outside the city walls of Constantinople between November 1096 and April 1097; Hugh of Vermandois arrived first, followed by Godfrey of Bouillon, Raymond IV, Count of Toulouse, and Bohemond of Taranto.

The Crusader armies crossed over into Asia Minor during the first half of 1097. They were joined by the remnants of the People's Crusade led by Peter the Hermit. The first objective of their campaign was Nicaea, the capital of the Sultanate of Rum. Kilij Arslan was away campaigning against the Danishmends and rushed back to attack the Crusaders but was driven back by the unexpectedly large crusader force. The city surrendered on 18 June 1097 and was handed over to the Byzantines as previously agreed. At the end of June, the crusaders marched on through Anatolia. They marched in two groups, the Normans in the lead and ahead of the French. Kilij Arslan surrounded the Normans at Dorylaeum but the French arrived sooner than expected and the Turks fled. The crusaders' march through Anatolia was thereafter unopposed but due to the heat and inadequate supplies, discipline broke down, looting was widespread, and many Crusaders and horses died of thirst.

The Crusader army marched on to Antioch, which lay about halfway between Constantinople and Jerusalem. The siege of Antioch was to last 8 months between October 1097 and June 1098. The crusaders were reinforced with supplies and armies in March 1098 and the city fell to bribery. A few days later the Crusaders were themselves besieged by the Turkish army of Kerbogha of Mosul. On 28 June 1098 the Crusaders defeated the Muslims after the Fatimid section deserted the Turkish contingent. The leaders argued amongst themselves, so the Crusade was delayed for the rest of the year. Finally, at the beginning of 1099, the march restarted, leaving Bohemond behind as the first Prince of Antioch. Proceeding down the Mediterranean coast, the crusaders encountered little resistance, as local rulers preferred to make peace with them and furnish them with supplies rather than fight. Jerusalem, which had been recaptured from the Seljuqs by the Fatimids only the year before, was reached on 7 June 1099. They resolved to take the city by assault as they could not blockade the city and had little in the way of supplies. An initial assault on 13 June failed but may have been intended to test the defences. The final assault began on 13 July and was completed on 15 July when the defenders abandoned the city. A massacre of many Muslims and Jews followed. A Fatimid army approached the city but was surprised by an army led by Godfrey of Bouillon.

The Kingdom of Jerusalem was formed and when Godfrey died in July 1100, he was succeeded by his brother, Baldwin of Edessa who was the first King of Jerusalem.

TROOP NOTES

The First Crusade was most likely one of the largest gathering of lords and knights of any army from the west. Despite attempts to forbid certain groups to crusade (including women, monks and the sick), most who took up the call were not knights, but peasants who were not wealthy and had little in the way of fighting skills.

COUNTY OF EDESSA

1097 TO 1144 CE

HISTORICAL NOTES

In 1098 CE, Baldwin of Boulogne left the main Crusading army. He went to Edessa, where he convinced its lord, Thoros, to adopt him as son and heir. Thoros may have been assassinated or abdicated but in March 1098 Baldwin succeeded Thoros as ruler, taking the title of Count. In 1100 Baldwin became King of Jerusalem and the title passed to his cousin, Baldwin of Bourcq. The Frankish lords formed a good rapport with their Armenian subjects, and there were frequent intermarriages. In 1104 Baldwin was taken prisoner at the Battle of Harran. Tancred (Bohemond's cousin) became regent until Baldwin was ransomed in 1108. In 1110 all the lands east of the Euphrates were lost to Mawdud of Mosul. Baldwin II became King of Jerusalem in 1118 and Edessa was given to Joscelin of Courtenay. In 1121 Joscelin was taken prisoner and in 1122 Baldwin was captured when he tried to rescue him. Both were released in 1123. In 1131 Joscelin was succeeded by his son Joscelin II. The growing power of Zengi who had united Aleppo and Mosul threatened the County the fall of Edessa in 1144 was the first major setback for Outremer and provoked the Second Crusade. Edessa was briefly taken in 1146 but lost again in the same year. The second Crusade focused on the capture of Antioch.

TROOP NOTES

The core of the army was still Frankish but the County relied more on its Armenian subjects than neighbouring states.

EARLY OUTREMER STATES

1100 TO 1129 CE

HISTORICAL NOTES

This list covers the Kingdom of Jerusalem, the Principality of Antioch and the County of Tripoli.

Jerusalem was captured by the First Crusade. The number of Latin inhabitants increased as the minor crusade of 1101 brought reinforcements. Acre was captured in 1104 CE, Beirut in 1110 and Sidon in 1111. Baldwin successfully defended the kingdom against the Fatimids from the south and from Damascus and Mosul to the north. Baldwin died without heir in 1118 and after the kingdom was rejected by his brother Eustace, passed to his cousin, Baldwin who had previously succeeded him in Edessa. Baldwin II's reign saw the establishment of the military orders. Tyre was captured in 1124 with support from the Venetians. He died in 1131.

Antioch was captured during the First Crusade and held by Bohemond and his Italian Normans. Following Bohemond's capture in 1100 his nephew Tancred became regent. Tancred succeeded Bohemond in 1111 but died in 1112. Although Bohemond had sworn to return Antioch to the Byzantines upon his death Tancred refused. Bohemond II succeeded under the regency of Tancred's nephew, Roger of Salerno, but he was killed in 1119 and Antioch became a vassal state of Jerusalem. Bohemond II ruled for four years from 1126 until succeeded by his four-year old daughter Constance.

The County of Tripoli was created after the region was captured by Crusaders in 1109. Bertrand of Toulouse was created the first Count of Tripoli as a vassal of King Baldwin of Jerusalem.

TROOP NOTES

The army was mainly Frankish but started incorporating native Syrian elements. The Pope granted protection to the Templars in 1128 CE.

OUTREMER STATES

1130 TO 1187 CE

HISTORICAL NOTES

In 1131 CE Baldwin II died. He was succeeded by his eldest daughter Melisende and her husband Fulk V of Anjou. He was not popular and in 1132 Antioch, Tripoli and Edessa all asserted their independence. He defeated Tripoli and married Melisende's niece to his relative Raymond of Poitiers. The Kingdom now faced the growing threat of the atabeg Zengi of Mosul who took control of Aleppo and had his sights set on Damascus. Fulk died in 1143 and Zengi invaded and conquered Edessa in 1144. The fall of Edessa shocked Europe and led to the Second Crusade arriving in 1148. The crusading kings Louis VII of France and Conrad III of Germany agreed to attack Damascus. The subsequent siege was a failure and the French and German armies returned home.

Melisende ruled as regent long after Baldwin III came of age. Baldwin III was crowned as sole ruler in 1153 but had to seize the south of the Kingdom from his mother and her supporters. The threat from Egypt was removed due to weak caliphs and the capture of the fortress at Ascalon and a tribute imposed.

Baldwin III had died in 1162 and the kingdom passed to his brother Amalric. Zengi's successor Nur ad-Din was now the major threat to the Kingdom. An alliance was agreed with the Byzantine Empire. This prevented Nur ad-Din seizing Antioch, but Nur-ad-Din's general Shirkuh was able to seize Egypt. He died in 1169 to be succeeded by Saladin. Amalric and Nur ad-Din both died in 1174. Baldwin IV reached his majority in 1176 but as a leper could not have children. Succession issues dominated the kingdom. Baldwin however proved a good military leader and defeated Saladin in 1177. In 1183 Saladin was finally able to gain control of Aleppo. The Kingdom had to introduce a general tax to recruit enough troops to meet the new threat.

On July 4 1187, Saladin destroyed the army of the kingdom at the Battle of Hattin. The entire kingdom was overrun in a few months. The fall of Jerusalem led to the Third Crusade launched in 1189.

TROOP NOTES

The kingdom of Jerusalem relied on the military orders and the mercenaries they hired to supplement the kingdom's own resources. During the 12th century the armour used by knights increased but armies were largely unchanged.

SULTANATE OF RUM

1140 TO 1276 CE

HISTORICAL NOTES

The Sultanate of Rum started to secede from the Great Seljuk Empire as early as 1077 CE. Rum reflects the Arabic name of Anatolia. The Seljuk sultans bore the brunt of the Crusades, and eventually succumbed to the Mongol invasion in 1243. From this point they became vassals of the Ilkhanid Mongols.

TROOP NOTES

The Sultanate of Rum was influenced by the Byzantine territories they conquered and from fighting the Crusaders. The allied Syrian State was ruled by al-Ashraf, an Ayyubid who ruled Damascus, the Jazira and Khilat.

ARMENIAN KINGDOM OF CILICIA

1151 TO 1375 CE

HISTORICAL NOTES

The Armenian Kingdom of Cilicia proved a strong ally of the European Crusaders. In 1198 CE Levon the Magnificent of the Rubenid dynasty became the first king. In 1226 the crown was passed to the Hethumids. As the Mongols approached Syria, Hethun sought to create an alliance against common foes, most notably the Mamluks. Despite paying tributes to the Mamluks, the city of Tarsus was taken in 1275. In 1281 a truce was forced on Armenia. A further truce with harsher terms was imposed in 1285. Despite these, the Mamluks again invaded in 1292 and Hrmokia was sacked. The Mamluks continued to attack the kingdom. In 1342, Guy de Lusignan was anointed as King Constantine II. The new rulers tried to impose their Catholicism which was resisted by many Armenians. Amidst failed Armenian pleas for help from Europe, the fall of Sis to the Mamluks in 1374 and the fortress of Gaban in 1375, where King Levon V, his daughter Marie, and her husband Shahan had taken refuge, put an end to the kingdom.

TROOP NOTES

Some Armenians adopted Frankish armour. Many Armenian fortresses were manned by Crusaders including the Military Orders.

Salah ad-Din (Saladin) was the founder of the Ayyubid dynasty after abolishing the Fatimid Caliphate. In the following years, he led forays against the Crusaders in Palestine, commissioned the successful conquest of Yemen, and staved off pro-Fatimid rebellions in Upper Egypt. After the death of Nar ad-Din in 1174 CE he conquered Syria, capturing Aleppo in 1182. Ultimately, he failed to take the Zengid stronghold of Mosul. In 1187 he defeated the Crusaders at the Battle of Hattin and captured Palestine. He died in 1193. After the death of Saladin in 1193, his sons contested control of the sultanate, but Saladin's brother al-Adil became the paramount Ayyubid sultan in 1200, and all the later Ayyubid sultans of Egypt were his descendants. In the 1230s, the emirs of Syria attempted to assert their independence from Egypt and the Ayyubid realm remained divided until Sultan as-Salih Ayyub restored its unity by conquering most of Syria, except Aleppo, by 1247. In 1250 the Mamluk generals who had defeated a Crusader invasion of the Nile Delta ended Ayyubid power in Egypt.

Sultan's Mamluks could include Saladins Salabiyya or elite Tawashi. Toassin were elite white mamluks. Halqa were non-mamluk elite cavalry. Some cavalry are described as "mudajja" - referring possibly to heavy armour.

The penultimate Ayyubid sultan of Egypt, al-Salih Ayyub significantly expanded the number of mamluks in the army.

Qaraghulams were probably Berbers and negroes armed with lance, progressively replaced by Kurds. Infantry were now used only in a supporting role. The Sudanese archers were new regiments raised by Saladin to replace those he had massacred in 1169 CE.

LATER CRUSADER

1188 TO 1291 CE

HISTORICAL NOTES

This list covers the 3rd Crusade (1189 to 1192 CE) and 5th Crusade (1213 to 1221), but not the 4th Crusade. It covers the 7th Crusade when based in Acre. The 6th Crusade (1228) involved very little fighting but enabled the Kingdom of Jerusalem to gain some control over areas of the Holy Land. It also covers the Kingdom of Acre (sometimes called the Second Kingdom of Jerusalem) that was re-established after the Third Crusade and lasted until the city was destroyed in 1291, the Principality of Antioch until 1268 and the County of Tripoli until 1289.

The Third Crusade was largely successful in capturing the important cities of Acre and Jaffa, and reversing most of Saladin's conquests, but it failed to capture Jerusalem, the emotional and spiritual motivation of the Crusade. The Fifth Crusade was an attempt to reacquire Jerusalem by conquering the Ayyubid state in Egypt. It occupied the port of Damietta but failed to take Cairo due to dwindling supplies. A night-time attack by Sultan Al-Kamil resulted in a great number of crusader losses, and eventually in the surrender of the army. After Louis surrendered Damietta to Egypt in May 1250, he made an alliance with the Mamluks and established a new base at Acre. He returned to France in 1254, but a French garrison remained until the fall of Acre in 1291.

TROOP NOTES

Richard the Lionheart introduced the idea of mixing crossbowmen and spearmen. It may have been copied by later commanders.

The tent pegs used by Richard at Jaffa in 1192 CE could be represented by a special rough going terrain selection that is treated as good going for close order infantry.

SEVENTH CRUSADE

1249 TO 1250 CE

HISTORICAL NOTES

The Seventh Crusade was a crusade led by Louis IX of France from 1248 to 1254. This list covers the operations in Egypt. Damietta, a port on the Nile, was taken in June 1249 with little resistance. Louis however did not consider the Nile flooding and the fleet and army was grounded for six months. In November Louis marched towards Cairo. A force led by Robert of Artois alongside the Templars and an English contingent were defeated at the Battle of Al Mansurah. Louis was defeated by the Mamluk Baibars but attempted to besiege Mansourah. In the end it was the Crusaders who starved rather than the Egyptians. Louis tried to return to Damietta but was captured at the Battle of Fariskur where his army was annihilated. Louis fell ill with dysentery but was cured. He was ransomed and agreed to surrender Damietta. Louis made an alliance with the Mamluks, rivals of the Sultan of Damascus, and left for Acre.

TROOP NOTES

Louis raised 3,000 knights and 5,000 crossbowmen in a 15,000 strong army. This included English, Achaian, Syrian Frankish, Hospitaller and Templar knights.

MAMLUK EGYPTIAN

1250 TO 1500 CE

HISTORICAL NOTES

Mamluk control of Egypt arose in 1250 CE when a group of Mamluks assassinated the lazy Ayyubid sultan Turanshah. This led to factional power struggles amongst the Mamluks. Meanwhile in 1258 the Mongols sacked Baghdad and proceeded westwards capturing Aleppo and Damascus. A threatened invasion of Egypt was averted when the Mongol leader Hulagu left to claim the Mongol throne. The Mamluks under Qutuz advanced into Palestine and defeated the Mongols at the Battle of Ain Jalut in September 1260. On his return to Cairo Qutuz was assassinated and the Bahri Mamluk Sultanate was established by Baybars.

Baybars initiated an aggressive policy of attacking and destroying Crusader fortresses. He also extended Mamluk control south into the Nubian kingdom of Makuria. He died in 1277. In 1280 the Mamluks defeated an Ilkhanid army at Homs which confirmed the Mamluk dominance of Syria. In 1291 the Mamluks captured Acre, the last Crusader fortress in Palestine, allowing the Mamluks to rule all of Syria. A further Ilkhanid invasion was defeated in 1303. Another invasion was defeated in 1313 and then a peace treaty agreed in 1322. After 1341 the Mamluks entered a period of political instability. A planned invasion of Armenia, the main Christian state, was abandoned after an invasion of Alexandria by Peter I of Cyprus.

The 15th century saw the Mamluks compete with the rising Ottoman Empire for influence in Anatolia. In 1501 conflict broke out between Egypt and the Safavid dynasty in Persia. In 1516 the Ottomans invaded, the Egyptian cavalry proving no match for the Ottoman artillery and janissaries. In 1517 Ottoman Selim I captured Cairo and Egypt became a vassal of the Ottomans.

TROOP NOTES

The failure of the Ilkhanids to defeat the Mamluks may have been in part due to dry conditions in Syria and Palestine. A Mongol warrior on campaign needed six or seven ponies to meet his logistical needs. A Mamluk warrior had one horse. Each horse requires a lot of water each day. It is clear however that the Mamluks were capable of meeting and defeating Mongol armies. Infantry were second rate troops and largely used for sieges and usually took a defensive stance in battles.

At the end of Mamluk rule there is an account of 600 sets of horse armour issued to the sultan's elite made of steel and coloured velvet.

MAMLUK SYRIAN GARRISON

1260 TO 1500 CE

HISTORICAL NOTES

Following the Battle of Ayn Jalut in 1260 CE the Mamluks quickly took over much of Syria as the Mongols retreated. To secure their new empire the Mamluks established garrisons at the major cities such as Damascus and Aleppo. Unlike the Ayyubid garrisons these could be quite large; for example, at one time the garrison of Damascus numbered 3000 mamluks and 12000 halqua and other free troops. The garrisons contained a much higher proportion of halqua than did the main army in Egypt as large numbers of Mongol deserters and Turcomen were enrolled in the halqua and posted outside Egypt rather than becoming part of the Egyptian army. In 1280 CE a rebel alliance of the armies of Damascus, Hama and Aleppo briefly challenged the sultan, until the armies of Hama and Aleppo deserted that of Damascus in battle.

TROOP NOTES

The halqua were recruited from those of non-slave background and included the sons of mamluks as these were not allowed to become mamluks themselves. On multiple occasions large numbers of Oirat Mongols deserted the Ilkhanate to the Mamluk sultanate and were enrolled in the army. Whilst a few were made mamluks most were posted to the halqua outside Egypt and formed a major part of the garrisons. There is no indication that there were in anyway different from other members of the halqua and quickly lost their Mongol identity.
