CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristic. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

Frankokratia was the Greek term for “rule of the Franks”.

Following the Battle of Manzikert, the Byzantine Empire lost most of its territory in Asia Minor, and was in immediate danger of complete annihilation. Alexios I Komnenos restored relations with the Papacy and requested aid against the Turks from Pope Urban II at the Council of Piacenza in 1095 CE. Later that same year, the Pope preached the First Crusade at the Council of Clermont.

In the wake of the success of the First Crusade, the three competent Komnenian emperors, Alexios I (1081 to 1118), John II (1118 to 1143) and Manuel I (1143 to 1180) oversaw a resurgence of the Byzantine Empire’s military and economic power and enjoyed a cultural revival. In the Balkans the emperors defeated the Pechenegs, Hungarians and Serbs. They also led numerous campaigns against the Turks in Asia Minor. Manuel I led an unsuccessful invasion of the Norman Kingdom of Sicily. He established common cause with the Kingdom of Jerusalem against the Muslims and participated in a combined invasion of Fatimid Egypt. Towards the end of his reign he suffered a serious defeat at Myriokephalon when attacking a well defended Seljuk Turk army.

During the short reign of Alexios II, the Byzantine Empire suffered defeats at the hands of the Hungarians, Venetians and Seljuk Turks. Alexios II was only 10 when he inherited the Empire. He was killed by Andronikos I, a grandson of Alexios I. His rule descended into a reign of terror as he tried to exterminate the Byzantine aristocracy. He was overthrown by Isaac II Angelos, captured and brutally murdered. The oppressiveness of his taxes resulted in a Vlach-Bulgarian uprising late in 1185. The rebellion led to the establishment of the Second Bulgarian Empire under the Asen dynasty.

The loss of Jerusalem to Saladin led to the Third Crusade. Isaac II made a secret alliance with Saladin to impede the progress of the Holy Roman Emperor Frederick I Barbarossa. In retaliation Barbarossa's army occupied the city of Philippopolis and defeated a Byzantine army of 3,000 men that attempted to recapture the city. The next five years were disturbed by continued warfare with Bulgaria.

Isaac II was overthrown by his older brother Alexios III Angelos. He was captured, blinded and imprisoned. Alexios III mismanaged the defence of Constantinople when it was attacked by the Fourth Crusade. These Crusaders, whose original objective was Egypt, had been invited by the son of Isaac, Alexios IV.

The sack of Constantinople turned it in 1204 into a Crusader state, known as the Latin Empire. Much of the former Byzantine territory remained in the hands of rival successor states led by Byzantine Greek aristocrats. These included the Despotate of Epirus, the Empire of Nicaea, and the Empire of Trebizond, each bent on reconquest from the Latins. The Latin Empire initially achieved success, capturing Bithynia and Mysia by defeating the Nicaean forces.

In Europe however, the Latin Empire forces were defeated by the Bulgarians and their Cuman allies at the Battle of Adrianople in 1205. The Bulgarian threat was defeated in 1208 and peace concluded with the marriage of Henry of Flanders, the Latin Emperor, to Maria of Bulgaria. The Emperor faced rebellion in Thessaly. The rebels were aided by the Despotate of Epirus. The Latin Empire was unable to prevent the final fall of Thessalonica to Epirus in 1224.

The Epirote threat was removed by their disastrous defeat by the Bulgarians at the Battle of Klokotnitsa in 1230. But this threat was replaced by the Nicaeans who started acquiring territories in Greece. By 1247 the Nicaeans had effectively surrounded Constantinople. In 1259 they invaded Epirus and defeated a Frankish Greek force at the Battle of Pelagonia, which had arrived to aid the Epirotes. The Epirote leader went on to capture the Principality of Achaea, leaving the Duchy of Athens as the main Frankish territory in Greece. In July 1261 the Nicaeans took Constantinople. The remaining Latin states continued to rule territory in Greece.

The Despotate of the Morea was created out of territory seized from the Frankish Principality of Achaea. A later Byzantine emperor, John VI Kantakouzenos, reorganized the territory during the mid-14th century to establish it as an appanage for his son, the Despot Manuel Kantakouzenos. The rival Palaiologos dynasty seized Morea after Manuel's death in 1380, with Theodore I Palaiologos becoming despot in 1383. Theodore ruled until 1407, consolidating Byzantine rule and coming to terms with his more powerful neighbours, particularly the expansionist Ottoman Empire, whose suzerainty he recognised. He also sought to reinvigorate the local economy by inviting Albanians to settle in the territory. As Latin power in the Peloponnese waned during the 15th century, the Despotate of the Morea expanded to incorporate the entire peninsula.

When the Ottomans captured the Byzantine capital in 1453 the Moreans had been unable to send aid. After years of incompetent rule by the despots, they were unable to pay their annual tribute to the Sultan and a rebellion led to the destruction of the state by 1460.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

KOMNENAN BYZANTINE

1071 TO 1204 CE

HISTORICAL NOTES

This list covers the Byzantine army following the disaster of Manzikert until the sack of Constantinople. After Manzikert, central power was reasserted by Nicephorus III and particularly by Alexios I Komnenos, emperor from 1081 to 1118 CE. Manuel I 1143-80 continued the expansionist strategy of his father and grandfather.

TROOP NOTES

The defeat at Manzikert in 1071 destroyed many of the professional tagmata, the core of the Byzantine army. The subsequent loss of Asia Minor deprived the Empire of its main recruiting ground. Whilst there were many mercenaries, traditional Byzantine regulars were also available, and a regular army reformed. The army was successful against a variety of foes, Normans in Sicily, Pechenegs and the Seljuks.

The Varangians were recruited increasingly from Anglo-Saxons after the Norman Conquest and were famous for wielding two-handed axes.

The Athanatoi (Immortals) were revived after the disaster at Manzikert, probably by combining surviving Eastern troops. They may have been cavalry, but this is not certain.

The Archontopouloi were a cavalry unit drawn from the orphans of Byzantine officers who had died in battle. They may have been hastily raised, hence the unusual classification.

Vardariototai (Vardariots) seem to have been originally Magyars, resettled in Macedonia, but are also described as Turks. They appear as a palace guard unit in a police role, probably created by Manuel I.

Native tagmata (regiments) no longer served only as local garrisons. Manuel I introduced Frankish influenced reform, training the Byzantine cavalry to charge with the couched lance.

Military settlers were often derived from defeated foes, including Pechenegs and Serbs.

In addition to guard units and native regiments, foreign soldiers were recruited into several tagmata. Latinikon were Western Europeans or families from the west who had been in Byzantine employ for generations. Turkopouloi ("sons of Turks") were recruited from Turks. Skythikon were recruited from Pechenegs and Cumans.

The Tagma of the Manichaeans were recruited from Paulicians, a Christian sect based in Thrace, distinct from genuine Manichaeans. Other highland troops were recruited from the Balkans, Thrace, and Anatolia.

The semi-feudal forces raised by provincial magnates supplemented the field army.

Cavalry used lances and maces. Lighter cavalry used bows. Horse armour is not shown in pictorial sources but might have had limited use. Shields were mostly kite-shaped although round shields are also shown on pictorial sources.

Infantry were either spear or bow armed. Slings and staff slings are mentioned on occasion.

KINGDOM OF SERBIA

1166 TO 1300 CE

HISTORICAL NOTES

In 1163 CE the Byzantine Emperor appointed Tihomir as the supreme Grand Prince of the Serb lands. This disappointed Nemanja who rebelled against his older brother. He went on to defeat the mercenary army sent by the Byzantine emperor Manuel I at the Battle of Pantina. He assumed the title of Grand Prince and took the first name Stefan meaning crowned. In 1171 he joined an anti-Byzantine coalition with Venice and Hungary but when this coalition collapsed the following year he was forced to submit to the emperor. With the Emperor's death in 1180 he took advantage of the Empire's weakened state to establish his independence. In 1191 he was forced to retreat before a superior Byzantine army but obtained a treaty recognising him as Grand Prince and in 1193, he defeated a Hungarian invasion. In 1196 he abdicated in favour of his younger son Stefan II. This led to conflict over succession and for a time Stefan II was expelled from Serbia. Stefan sought a royal crown from the papacy. In 1217 it was granted, and he was crowned King of Serbia by a papal legate. In the following years Serbia maintained a precarious existence, dependent to some extent on Byzantium, Bulgaria, or Hungary.

TROOP NOTES

Vlastela were nobles who fought with lance. Though the cavalry were equipped with bow as well as lance, the lance was regarded as the primary weapon. Voynuks were wealthier peasants serving as infantry. Most of the infantry were unarmoured archers provided by the vlastela's servants. The zamanitchka voyska "All Together" was the levy of all able-bodied freemen called up only in times of emergency.

SECOND BULGARIAN EMPIRE

1186 TO 1395 CE

HISTORICAL NOTES

The Second Bulgarian Empire existed between 1185 and 1396 CE. The First Bulgarian Empire was conquered in 1018. The Bulgarian aristocracy was transferred to the Asian territories. After discontent from rising taxes and Pecheneg invasions, uprisings began which were quelled with great difficulty. The disastrous rule of the last Komnenian emperor worsened the situation and increased taxes from his successor Isaac II led to another rebellion led by two aristocratic brothers Theodore and Asen. The rebellion was joined by the Cumans. From Moesia, the rebels launched attacks into northern Thrace. Theodore was crowned as Peter IV. Two Byzantine invasions were defeated, and a further Byzantine army turned to Constantinople to overthrow the emperor.

Having failed to conquer the Bulgarians in 1187 an armistice was agreed which recognised Bulgarian independence. In 1190, 1194 and 1196 further Byzantine invasions were defeated. Asen was recognised as Emperor but murdered in a plot inspired by Constantinople. Peter IV retained his title.

Kaloyan, the youngest brother of Asen and Peter IV inherited the title when Peter died a year after Asen. His kingdom was recognised by Pope Innocent III in 1204. Despite Papal recognition, the newly created Latin Empire claimed Bulgarian lands. Kaloyan was joined by Byzantine aristocrats and defeated the Latins at Adrianople in 1205. The unexpected Bulgarian successes caused the Byzantine nobility to ally themselves with the Latins.

The Bulgarians allied themselves with the Despotate of Epirus. With a secure northern border, the Epirotes were able to conquer much of the Latin Empire. The Latins offered the Bulgarian Emperor a marriage alliance. Alarmed by this turn of events, the Epirotes invaded Bulgaria but were defeated in 1230. Most Epirote territories recognised Bulgarian suzerainty. The Bulgarians then formed an alliance with the Nicaean Empire against the Latin Empire.

The following Bulgarian Emperors were weak and the Nicaean Empire turned on them.

An alliance with the Mongols was arranged after a major Byzantine invasion in 1263. Mongol raids however led to an uprising in 1277. A period of instability continued until 1300. Theodore Svetoslav rebuilt the Empire. Between 1303 and 1304 the Bulgarians invaded north-eastern Thrace and defeated the Byzantines at the Battle of Skafida. The growing power of Serbia in 1320s led to a Byzantine-Bulgarian alliance which took five years to arrange. The Bulgarians were defeated by the Serbs at the Battle of Velbazhd. The Byzantines saw an opportunity and invaded Bulgaria but were defeated at the Battle of Rusokastro.

The late 1340s and 1350s saw the arrival of the Ottomans who inflicted two defeats on the Bulgarians. In 1371 the Ottomans defeated the Serbians and immediately turned on the Bulgarians. Major invasions followed in 1388 and 1393. When the Christian army was defeated at the Battle of Nicopolis in 1396, the Ottomans immediately marched on Vidin and seized it, bringing an end to the medieval Bulgarian state.

TROOP NOTES

The Bulgars were primarily horse archers. Nobles fought with lances.

LUSIGNAN CYPRIOT

1192 TO 1474 CE

HISTORICAL NOTES

This list covers Frankish Cyprus from Guy de Lusignan's purchase of the island from Richard Coeur de Lion until Venice established its protectorate. Genoese armies in Cyprus are covered by the Genoese in Cyprus list.

After the fall of Acre in 1291 Cyprus became the centre of trade with Africa and Asia. A Mamluk invasion in 1426 made Cyprus tributary to Egypt. A Mamluk force assisted the King against rebels from 1460 to 1464. Venice was proclaimed the protector of Cyprus in 1473.

TROOP NOTES

A classic feudal system was set up on the island. At its height over 1,000 knights were supported. Archers were provided by both Armenians and Syrian Maronites. The Knights Hospitaller of St John moved their headquarters to Cyprus after the fall of Acre in 1291. They retained a presence on the island even after moving to Rhodes in 1310.

Catalans mentioned in 1426 and the 1460's were supplied from Athens.

NICAEAN BYZANTINE

1204 TO 1261 CE

HISTORICAL NOTES

This list covers the Nicaean army from the conquest of Constantinople by the Fourth Crusade until its recapture. Originally based only on the Anatolian provinces, it regained Thrace in 1235, Macedonia and Thessaloniki in 1246 CE.

TROOP NOTES

The Nicaean state inherited the bulk of the former Byzantine army. Despite reduced resources, it is an army that retained its effectiveness. Native cavalry were now mostly reservists called stratiotai holding individual pronoiiai, grants not of land but of its rents. Infantry were now predominantly archers from the Anatolian themes.

EPIROT BYZANTINE

1204 TO 1359 CE

HISTORICAL NOTES

This list covers the "Despotate of Epirus", a successor state of the Byzantine Empire. It was established in 1204 CE by a branch of the Angelos dynasty. It was centred on the region of Epirus, but it briefly incorporated Macedonia and parts of Thrace until defeated in 1230 by the Bulgarian Empire. It held onto its core territory of Epirus and Thessaly but often as a vassal of other powers. It was conquered by the Palaiologan Byzantine empire in around 1337.

TROOP NOTES

In the early period, the army relied on Frankish mercenaries recruited from the west. Vlachs and Albanians also formed an important part of the army.

EMPIRE OF TREBIZOND

1204 TO 1461 CE

HISTORICAL NOTES

The Empire of Trebizond or the Trapezuntine Empire was a monarchy that flourished during the 13th through 15th centuries CE, consisting of the far northeastern corner of Anatolia and the southern Crimea. For most of the 13th century Trebizond was in continual conflict with the Seljuk Sultanate of Rûm. The destruction of Baghdad by Hulagu Khan in 1258 diverted the western terminus of the Silk Road north to the Black Sea, and due to its link with their local capital at Tabriz, Trebizond accumulated tremendous wealth under the suzerainty of the Mongols. It was an empire more in title than in fact, surviving by playing its rivals, the Genoese, other Italian Republics, the Ottoman Turks, and the Byzantine Empire against each other. The Empire of Trebizond continued until 1461 when the Ottoman Sultan Mehmed II conquered it. The Crimean Principality of Theodoro, an offshoot of Trebizond, lasted another 14 years, falling to the Ottomans in 1475.

TROOP NOTES

Substantial armies could only be fielded with allies; hence the maxima are quite small. Much of the army consisted of ethnically Georgian native Lazoi and Tzanoi. Although most were unarmoured and equipped only with bow, sabre and sometimes mace, Trapezuntine troops had a fearsome reputation. Lancers had probably disappeared by the end of the 14th century.

FRANKISH GREECE

1205 TO 1458 CE

HISTORICAL NOTES

This list covers the Principality of Achaea from its foundation in 1205 CE. Under Prince William II Villehardouin the Principality reached its zenith. In 1267 it became a dependency of the Kingdom of Sicily (later reduced to the Kingdom of Naples). In 1430 the Despots of the Morea conquered the heartland of the Principality in Achaea. The last castle was seized in 1432.

The list also covers the Duchy of Athens from the capture of Thessalonica in 1224. The Duchy occupied the Attic peninsula as well as Boeotia and extended partially into Thessaly. The Duchy was taken over by the Catalan Company in 1311 (see Catalan Company in Greece list). The Florentine Acciaioli governed the Duchy from their removal of the Catalan Company, with the assistance of the Navarrese. It was under Venetian control from 1395 to 1402 but returned to the Florentines until the Turkish conquest in 1458.

TROOP NOTES

The Principality of Achaea was originally divided into 12 baronies, mostly centred around a newly constructed castle, in a classic feudal structure. The feudal knighthood of Achaea was considered by early 14th century contemporaries to be the best anywhere.

LATE IMPERIAL BYZANTINE

1261 TO 1384 CE

HISTORICAL NOTES

This list covers the Byzantine army of the Palaiologoi dynasty from the recapture of Constantinople in 1261 CE. The loss of land in the east to the Turks and in the west to the Bulgarians was complemented by two disastrous civil wars. By 1380, the Byzantine Empire consisted of the capital Constantinople and a few other isolated exclaves. From this point until the fall of the city in 1453 it survived by diplomacy and was unable to raise a field army.

TROOP NOTES

The Byzantine army continued to use the same military terms with regards to numbers of troops and officers. There were fewer territories to raise troops from. Byzantine troops continued to consist of cavalry, infantry, and archers. Cumans and Turks were used for cavalry and missile units. Varangians may have last taken the field at Makriplagi in 1264 CE. The Vardariotai still fought at least as late as 1272. Tzakones were from the Morea.

In 1302 the centre of military expenditure shifted back again towards mercenaries, notably the Catalan Company. This proved disastrous for the Empire. Mercenaries continued to be used but by 1350 the state was effectively bankrupt. The Byzantines then came to rely on foreign troops supplied by their allies.

DESPOTATE OF THE MOREA

1262 TO 1460 CE

HISTORICAL NOTES

This list covers Byzantine armies in southern Greece from regaining a foothold in the Morea (Peloponnese) in 1262 CE. After 1349 it represents the semi-independent Despotate of the Morea. This reached its greatest extent in 1432.

TROOP NOTES

The army had only a few full-time troops, mostly garrisoning fortresses; the bulk of the army being provided by pronioia cavalry and peasant infantry. A few minor Frankish nobles served in the army. Melingoi and Tzakones were hill dwellers given to banditry. Albanian allies represent Albanian immigrants who arrived in 1347 CE.

EARLY OTTOMAN TURKISH

1281 TO 1362 CE

HISTORICAL NOTES

This list covers Ottoman Turkish armies from the accession of Osman I (Othman - hence Ottoman) until the foundation of the Janissary corps. With the decline of the Seljuk Sultanate of Rum and the Byzantine empire in the later 13th century CE, Anatolia came to be divided into several Beyliks, kingdoms governed by Beys. From small beginnings, the Ottomans expanded rapidly.

TROOP NOTES

Early Ottoman armies depended mainly on ghazis, serving for religion and loot. Many may have arrived in Anatolia after fleeing the Mongols. Orhan, the second Sultan, described himself in 1337 as "Sultan, son of the Sultan of the Gazis, Gazi son of Gazi...".
Timarli sipahi (timariots) were holders of a fief of land, entitled to all the income from that land in return for military service. The main weapon was the bow, backed up with spear and sidearm.

ORDER OF ST JOHN

1292 TO 1522 CE

HISTORICAL NOTES

This list covers the land forces of the Knights of St John, also known as the Knights Hospitaller or the Knights of Rhodes from the fall of Acre, through Cyprus, their move to Rhodes in 1310 CE until the fall of Rhodes in 1522 CE, after which they moved to Malta. Until 1381 they also had possessions in Greece. The order maintained a powerful fleet which kept up a campaign of piracy against their Turkish opponents.

TROOP NOTES

The land forces of the Order were always relatively small. At the Siege of Rhodes, they raised approximately 500 Brethren, 1000 men-at-arms, 800 crossbowmen and several thousand militia.

CATALAN COMPANY IN ANATOLIA

1303 TO 1305 CE

HISTORICAL NOTES

This list covers the Catalan Company led by Roger de Flor during its campaigns in Anatolia. It was formed by veterans of the War of Sicily. In September 1303 they killed up to 3,000 Genoese who had seen their arrival as an intrusion of the House of Aragon into the Genoese sphere of influence. They were then ordered to the front against the Turks who they defeated at the battle of the River Cizico. In 1304, continuous disputes between almughavars and Alans assigned to support them by the Byzantine Emperor caused over 300 deaths. The Catalans went on the offensive and caught a Turkish rear-guard and massacred them at the battle of Germe. A further victory over the Turks in the battle of Aulax led to the capture of Philadelphia. The Catalans then occupied Magnesia ad Sipylum. The remnants of the defeated Turkish armies united and were again defeated at Tira and once more at Ania. In July 1304 the Company had begun to march through the regions of Caria and Lycaonia. Once again, the Turks reformed and offered battle at Kibistra. This was a hard-fought contest but once again the Turks were beaten.

Roger de Flor during this time had started acting as governor of Anatolia. After two years of victorious campaigns against the Turks, the indiscipline and the character of foreign army in the heart of the Empire were seen as a growing danger, and on April 30, 1305, the emperor's son, Michael IX Palaiologos, ordered the murder of Roger de Flor and the extermination of the Company at a banquet. After these events only 206 horsemen and 1256 infantry survived, but although leaderless they were able to defeat the emperor's forces at the Apros. Despite the death of its leader and of a large part of its troops, the Company managed to survive and became strong in Thrace and Macedonia, devastating for two years the Byzantine territory in what was called the Almughavar Revenge.

TROOP NOTES

Cavall armat were equipped as other knights. Cavall alforrat were either lightly armoured lancers or skirmishers with spear and javelins like jinetes. Almughavars are described as lightly armoured and equipped with a couple of iron darts, short sword or dagger and a spear.

CATALAN COMPANY IN GREECE

1306 TO 1388 CE

HISTORICAL NOTES

This list covers the Catalan Company from the Almughavar Revenge until the defeat by the Navarrese Company in 1388 CE. In 1310, the new leader of the Company Roger Deslaur offered his services to Walter V of Brienne, Duke of Athens, cleaning up in less than a year the duchy of all his enemies. The duke, however, did not agree to pay the amount agreed upon by his services. The Company decided to declare war on the duke and killed him at the Battle of Halmyros on March 15, 1311. In a short space of time, the Company assumed not only the control of the Duchy of Athens but extended its dominions to the city of Thebes and Thessaly in the name of the Crown of Aragon. They were excommunicated by the Pope in 1318 for refusing to return the territory to their legitimate heir.

TROOP NOTES

Cavall armat were equipped as other knights. Cavall alforrat were either lightly armoured lancers or skirmishers with spear and javelins like jinetes. Almughavars are described as lightly armoured and equipped with a couple of iron darts, short sword or dagger and a spear. They appear to have become somewhat less aggressive after leaving Anatolia. It is assumed they may have acquired more protection but this is a bit speculative.

GENOESE IN CYPRUS

1373 TO 1464 CE

HISTORICAL NOTES

This list covers the Genoese in Cyprus until their expulsion by the Venetians. When Peter I was murdered, his wife Eleanor of Aragon invited the Genoese to invade Cyprus. Since the Genoese had commercial and financial interests in Cyprus, they invaded and took the city of Famagusta. The wealth of Cyprus enabled the Genoese to hold off the Cypriots and their Venetian allies.

TROOP NOTES

The Genoese army was largely mercenary. Bulgars were recruited by the Genoese but then were used against them.

HISTORICAL ENEMIES

Mamluk Egyptian 5120; Lusignan Cypriot 5204; Ottoman Turkish 5310.
