CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

During the 13th century CE the power of the Sultanate of Rum declined. Anatolia became divided into a patchwork of independent Turkish principalities known as Beyliks. A Beylik in the region of Bithynia was led by Osman, an obscure figure who founded the Ottoman dynasty. Osman collected together Turkish tribal groups and former Byzantine subjects. Osman extended his control by conquering Byzantine towns along the Sakarya River. How the Ottomans were able to expand from a small principality on the frontier of the Byzantine Empire into a centralised empire spanning both Asia and Europe is unclear. The idea that Ottoman expansion was primarily fuelled by holy war is now largely rejected. The Ottomans were not strictly orthodox Muslims and willingly recruited Byzantines into their ranks. Osman died around 1323 and was succeeded by Orhan.

Orhan married Theodora, the daughter of Byzantine prince John VI Cantacuzenus. By 1346 the Ottomans controlled all the crossing points to Europe from Anatolia. Orhan openly supported John VI in the overthrowing of the emperor John V. This allowed Orhan to gain a foothold at Gallipoli. Within a decade the Ottomans controlled most of eastern Thrace. This allowed them to control all the overland routes from the Balkans into Constantinople. This gave the Ottomans a significant advantage over the other Turkish principalities. Soon after Orhan's death in 1362, Murad I became the Sultan.

Murad captured the Byzantine city of Adrianople in 1362, renaming it Edirne and making it his capital. This signalled that the Ottomans intended to retain a presence in Europe. Byzantium's territory was fragmented and the Balkan states of Byzantium, Bulgaria, and Serbia vulnerable. The sea routes were under the control of the Venetians and Genoese. The survival of Constantinople itself depended on its extensive defensive walls and the lack of an Ottoman navy.

Bulgaria under Tsar Ivan Aleksandar was a successful and prosperous state but during his rule it was divided amongst his three sons. In 1365 Hungary seized the province of Vidin. Although the Hungarians were repulsed this increased the divisions.

Serbia was also divided following the death of Stefan Dušan in 1355. In September 1371 the Ottomans defeated the Serbs at the Battle of Maritsa. In the aftermath of the battle Ottoman raids into Serbia and Bulgaria intensified. The Bulgarians and Serbs enjoyed a brief respite when matters in Anatolia and Byzantine meddling kept Murad occupied, but Murad's attention soon focused again on the Balkans. In 1389 the Serbs and Ottomans again met each other at the Battle of Kosovo. The high casualties particularly affected the Serbs and Serbia became a vassal of the Ottomans. Murad was killed at the battle and succeeded by Bayezid I.

In 1393, Bayezid heard of a plot by Tsar Ivan Shishman to overthrow the vassalage of the Bulgarians. His response was a devastating campaign that incorporated Shishman's lands into the Ottoman empire.

The Battle of Kosovo had drawn the Ottomans to the attention of the Hungarians. In 1396 Hungarian King Sigismund finally pulled together a crusade against the Ottomans. Though nominally led by Sigismund, it lacked command cohesion. The army met the Turks at Nicopolis. French knights refused to follow Sigismund's plan and the Crusaders were heavily defeated. In retaliation, Bayezid seized the Bulgarian province of Vidin, effectively destroying the Second Bulgarian Empire.

Around 1400, Bayezid was drawn back to Anatolia by the invasion of Timur. Their armies met outside of Ankara, at the Battle of Ankara, in 1402. The Ottomans were routed and Bayezid was taken prisoner. He died in captivity and the Ottoman Empire became disputed by his sons. Only in 1413 did Mehmed I emerge as the sole ruler of a reunited Ottoman state. Even though Timur had died in 1405, the state he created remained a threat. Mehmed had to rely on diplomacy to secure his empire. He died in 1421 and Murad II became sultan.

War in the Balkans began again when the Ottoman army moved to recapture Wallachia. This had become a vassal of Hungary after the Battle of Ankara. As the Ottomans attacked Wallachia, the Serbs attacked the Ottomans. Anatolia was also attacked. Murad had to split his forces. The Serbs were defeated but the invading Ottomans in Wallachia were also defeated. By 1441, the war had reached stalemate. An alliance of the the Holy Roman Empire, Poland, Albania, and the Emirates of Jandarid and Karamanid forced Murad on the defensive and the empire was defeated at the Battle of Jalowaz in 1444.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

ISLAMIC PERSIAN

TURCOMAN BEYLIKS

1278 TO 1515 CE

HISTORICAL NOTES

This list covers the Turcoman Beyliks (emirates) of Asia Minor which emerged when the Mongols weakened the Seljuq Sultanate of Rum. During the 14th century CE, they were dominated by the Ottomans. They regained their independence after the Ottomans were defeated by Timur at the battle of Ankara. Most were reconquered by the Ottomans between 1426 and 1428. Candar (also known by the name of the dynasty Isfendiyarid) was annexed in 1461 and Dulgadir in 1515.

TROOP NOTES

Many Turcoman cavalry wore leather lamellar armour, richer men wearing iron mail or lamellar armour with arm and leg defences.

SERBIAN EMPIRE

1301 TO 1489 CE

HISTORICAL NOTES

This list covers the later period of the medieval kingdom of Serbia. Taking advantage of the Byzantine civil war that started in 1341 CE, Stefan Dusan doubled the size of the Serbian kingdom. In April 1346 he was crowned Emperor of the Serbs and Greeks. He established a new legal code based upon Byzantine law. In 1355 he was succeeded by his son Stefan Uros V. The Empire slid into feudal anarchy as he was unable to consolidate the conquests achieved by his father. Much of the Serbian nobility was killed by the Ottoman Turks at the Battle of Maritsa in 1371. The Turks captured Serbian controlled Greece and Macedonia and Stefan died childless. Prince Marko inherited the royal title. Lazar Hrebeljanović held real power. John Uroš held power in Thessaly until 1371. In 1377 King Tvrtko I of Bosnia became titular King of Serbia. A further battle at Kosovo in 1389 led to Serbia becoming an Ottoman vassal by 1394. In 1402 the Serbs renounced Ottoman rule and became allied to Hungary. Serbia was then ruled by the Lazarević and Branković families. The next fifty years saw a power struggle between the Ottomans and Hungarians until Serbia was annexed by the Turks in 1459.

TROOP NOTES

The Serbian army was feudal in nature consisting of lance-armed cavalry and infantry equipped with bows, crossbows, spears, and axes. Cannons, made in Ragusa (Dubrovnik) first appeared in the 1380s.

LATER HUNGARIAN

1308 TO 1462 CE

HISTORICAL NOTES

This list covers Hungarian armies from the reign of Charles I, the first Angevin king of Hungary, until John Hunyadi assumed responsibility for the defence of the frontiers in 1441 so runs in parallel with the Black Army list. It represents the Northern Nobles who supported, post Varna, Frederick III or the Cilli Estates and their allies. The Later Hungarian list is also the better version for a representation of the Varna army.

Charles I restored royal power, based in part upon the production of gold from mines in the east and north. Charles sealed an alliance with the Polish king Casimir the great. He was succeeded by Louis the Great who extended the rule of Hungary to the Adriatic Sea and occupied the Kingdom of Naples several times. He also became King of Poland. He led successful campaigns against the Ottomans but died without a male heir in 1382. After years of anarchy, Sigismund succeeded to the throne by marrying Mary, the daughter of Louis. He had to pay for the support of the barons, and it was to take decades to restore royal authority. After the death of Sigismund in 1437, his son-in-law Albert II of Germany assumed the throne. He however died in 1439, leaving the country in chaos.

TROOP NOTES

Charles I introduced a new feudal aristocracy to Hungary. Each lord was required to maintain a banderium, a group of armoured horsemen recruited from the lesser nobility or foreign mercenaries. The other means of raising an army was the generalis exercitus, involving the obligatory service of the entire lesser nobility. After the army's poor showing at the Battle of Nicopolis in 1397 CE, attempts were made to reorganise by exempting the poorest and by requiring land-owners to supply troops to the "militia portalis".

A fortified camp represents battle wagons.

WALLACHIAN

1330 TO 1476 CE

HISTORICAL NOTES

Wallachia is a geographical region of modern Romania, north of the lower Danube and south of the Carpathian Mountains. This list covers the Wallachians from their independence from Hungary in 1330 CE until they became vassals of the Ottomans in 1476 after the death of Vlad III Dracula or "Vlad the Impaler". Wallachia was founded as a principality by Basarab I. He defeated Charles at the Battle of Posada in 1330. As early as 1368 Wallachia came into conflict with the Ottoman Empire.

TROOP NOTES

Boyers were the nobility. Viteji were land owning peasants. Curteni were the standing army.

JALAYIRID SULTANATE

1336 TO 1432 CE

HISTORICAL NOTES

The Jalayirids were a Mongol dynasty which ruled over Iraq and western Persia after the breakup of the Ilkhanates in the 1330s CE. The first Jalairid ruler was Shaykh Hasan, an Ilkhanid commander. He captured the Ilkhanid capital of Tabriz and initially ruled through a puppet Ilkhan. From 1341 he ruled on his own behalf. Tabriz was lost to rivals and then recaptured, but the capital was moved to Baghdad. From 1386 central authority declined and Timur captured Baghdad in 1392 causing the Sultan Ahmad Jalayir to flee to Syria. The Sultan returned with the help of the Qara Qoyunlu but was driven out again in 1399. Timur sacked Baghdad in 1401. The infighting after the death of Timur allowed the Jalayirid Sultanate to survive in southern Iraq and Khuzistan until eliminated by the Qara Qoyunlu in 1432.

TROOP NOTES

Jalayirid troops would be like Ilkhanate troops. They also used Bedouin tribesmen.

ALBANIAN PRINCIPALITIES

1355 TO 1479 CE

HISTORICAL NOTES

This list covers the Albanian principalities that started to establish their independence from Angevin rule and the Serbian Empire. The main states include the Principality of Valona (1332-1417); Lordship of Berat (1335-1417); Despotate of Angelokastron and Lepanto (1358-1374); Despotate of Arta (1358-1416), Principality of Albania (1368-1392); Principality of Gjirokaster (1386-1418) and Principality of Kastrioti (1389-1444). When Ottoman forces entered Albania, they were faced with small principalities that were engaged in vicious fights among themselves. Between 1385 and 1430 they established their rule over most of the country. in 1444 a military alliance of Albanian feudal lords was forged in Lezhë. Their leader was a member of the Kastrioti family, George Castriot known as Skanderbeg. A series of victories was obtained against the Ottomans. Despite the League fragmenting soon after its founding, the core of the alliance under Skanderbeg continued. It repeatedly defeated the Ottomans until Skanderbeg's death in 1468. Albanian resistance weakened but continued until the Venetians conceded Shkodra to the Ottomans in 1479.

TROOP NOTES

Albanian cavalry went on to form the stradiots in Venetian service. They were mostly unarmoured and fought with a double-end light lance and light shield.

MOLDAVIAN

1359 TO 1517 CE

HISTORICAL NOTES

Moldavia included part of modern Romania, the Republic of Moldova, and territories in Ukraine. The Hungarians under Charles I conquered much of the region from the Mongols. In 1359 CE, Bogdan of Cuhea took control of Moldavia. The country had a mix of Roman Catholic and Orthodox communities. It kept connections with the Byzantine Empire, but growing Polish influence was contested by the Hungarians. The first confrontation with the Ottoman Turks was in 1420. Under Stephen the Great in 1457 the country reached its greatest power. In 1498 it had to accept Ottoman suzerainty.

TROOP NOTES

Moldavian forces were like Wallachian forces.

TIMURID

1360 TO 1506 CE

HISTORICAL NOTES

This list covers Transoxanian armies from the revolt of Timur and Mir Hussain until the death of Husayn Bayqara. Timur gained control of the western Chagatai Khanate by 1370 CE. From this base he led military campaigns across western and central Asia, India, the Caucasus, and southern Russia. He defeated both the Mamluks of Egypt and Syria, the Ottoman Turks, and the Delhi Sultanate. He envisioned the restoration of the Mongol Empire but relied on Islamic religion and institutions. He struggled to hold on to his conquests, often having to re-conquer the same area again. His military campaigns have been estimated to have killed 17 million people. An arrow shot in the right leg crippled him, so he became known as Timur the Lame or Tamerlane. After the death of Timur in 1405, his empire split into several hostile principalities.

TROOP NOTES

Timurid armies retained Mongol organisation but emphasised fighting at close quarters instead of traditional nomad tactics.

HISTORICAL NOTES

This list covers Ottoman Turkish armies from the accession of Murad I until the accession of Suleiman the Magnificent.

TROOP NOTES

The Janissaries were elite infantry units that formed the Ottoman Sultan's household troops. The corps was most likely established during the reign of Murad I. Equivalent household cavalry regiments, the Qapu Khalqi were also raised. These were backed up by the feudal levies, the timariots. These were recruited from both Anatolia and Rumelia, the European portion of the Ottoman empire. Christians could also provide feudal service. Contingents of troops were also provided by tributary Balkan princes, particularly from Serbia, Bulgaria and Wallachia. The term voynuk was derived from the Serbian, voynici. These troops came from throughout the Balkan territories. Irregular troops azabs, akinjis and other nomads also served in Ottoman armies.

QARA QOYUNLU

1378 TO 1469 CE

HISTORICAL NOTES

The Qara Qoyunlu is also known as the Black Sheep Turcomans. They were an Oghuz tribal federation that ruled over present-day eastern Turkey, Azerbaijan, Armenia, north-western Iran, and north-eastern Iraq. They rebelled against the Jalairid Sultanate in Baghdad and captured Tabriz. In 1400 ACE they were defeated by Timur but had regained Tabriz by 1406. They reached their greatest extent under Jahan Shah, but he was defeated and killed at the Battle of Chapakchur in 1467. The state quickly collapsed under his incompetent son, Hasan Ali.

TROOP NOTES

The armies were influenced by Mongol practice. Pushan-push "armoured men" were the best equipped. Tirkash-band "quiver-bearers" were horse archers and provided the bulk of the army. Qullughchi "servants" were retainers.

HISTORICAL NOTES

The Aq Qoyunlu is also known as the White Sheep Turcomans. They were an Oghuz tribal confederation that held land south of the Pontic mountains. They were granted land by Timur after he defeated the Ottomans at the Battle of Ankara in 1402 CE. Under Uzun Hasan in 1467 they defeated the Qara Qoyunlu and took over their territory. In 1470 they were defeated by the Ottomans who seized their western territories. Civil war from 1490 onwards led to their conquest by the Safavids in 1508.

TROOP NOTES

They are described as having 2000 cavalry "covered in certain armure of yron".
Ottoman guns were captured in 1472 and handgunners are recorded in 1478.

CRUSADE OF NICOPOLIS

1396 CE

HISTORICAL NOTES

The Crusade of Nicopolis formally started when a delegation of Hungarian knights arrived in Paris in August 1395. A peace in the Hundred Years' War provided the opportunity and the French enthusiastically responded. Many unemployed companies from a wide range of nations including French, English, Spanish, German, and Swiss took part. The Crusaders were joined by a Venetian fleet sailing up the Danube carrying Knights Hospitallers.

From Buda, the Crusaders marched down the left flank of the Danube. They were joined by contingents led by Sigismund King of Hungary and the Wallachian leader, Mircea the Elder. The Crusaders laid siege to Nicopolis on the lower Danube. The Crusader discipline was poor, and the command disagreed on both strategy and tactics. The Constable D'Eu was nominally in charge but advised by Enguerrand VII, Lord of Coucy, a veteran warrior. The French underestimated the Turks and ignored the advice of Sigismund and Mircea who had much more experience of fighting their opponents.

Bayezid, the Turkish Sultan, had been joined by his Serbian allies. In the battle the French advanced recklessly, defeated the Turkish infantry vanguard and then pursued into the bulk of the Turkish army where they were enveloped. The remainder of the Crusader army fought to prevent the envelopment, but the charge of the Serbian knights proved crucial.

Sigismund and the Master of the Hospitallers escaped to the Venetian fleet but the Crusader army was overwhelmed.

No crusader army from Europe would be launched against the Turks until the 1440's. The defeat signified the end of the Second Bulgarian Empire.

TROOP NOTES

The army comprised of four components, French, Hungarian, Wallachian and Hospitallers along with the Venetian navy. The troops themselves consisted of many nationalities including Englishmen serving in Free Companies as well as Spanish, German, Swiss and Croatians.

NOTES				

This army must always be the invader (unless fighting another that must invade!). Roll the dice to choose invader/defender as normal as a strategic intercept is still possible. French knights must be commanded by a French C-in-C. Hungarians must be commanded by a Hungarian sub-general. Wallachians must be commanded by a Wallachian sub-general. Other troops may be placed in the command of any general. The restricted quality of the generals represents the lack of unity in command.

TATAR KHANATES

1430 TO 1520 CE

HISTORICAL NOTES

This list covers the Crimean Khanate, the Khanate of Kazan, and the Khanate of Astrakhan. The Golden Horde had governed the Crimean Peninsula since 1239 CE. In the early 15th century various Golden Horde clans had ceased their nomadic lifestyle and settled on the steppes of Ukraine and southern Russia. Led by Hacı Giray, they achieved independence from the Horde by 1441 and Hacı Giray ascended the throne of the khanate in 1449. In 1475 Ottoman troops conquered Greek and Genoese colonies in the Crimea and established a protectorate over the Crimean Khanate. In 1502, Meñli I Giray defeated the last khan of the Great Horde. The Khanate of Kazan occupied the territory of former Volga Bulgaria from 1438. The local feudal nobility consisted of ethnic Volga Bulgars, but the court and bodyguard of the Kazan khans were composed of steppe Tatar. The Khanate of Astrakhan was established in the 1460s by Mäxmüd of Astrakhan in an area around the mouth of the Volga River.

TROOP NOTES

The armies of the Khanates remained largely comprised of horse archers.

BLACK ARMY HUNGARIAN

1442 TO 1494 CE

HISTORICAL NOTES

This list covers the Hungarian army from the reforms initiated by John Hunyadi until the death of Matthias Corvinus. When Albert of Habsburg died in 1439, he bequeathed his realms to his posthumous son Ladislaus. Only the Austrians accepted this. The Hungarians offered the throne to Vladislaus of Poland. As a result, a civil war broke out. Vladislaus died at the Battle of Varna in 1444. In 1446 the Diet of Hungary elected John Hunyadi as regent for Ladislaus. John Hyundai had won a string of victories against the Ottomans in the early 1440s. He ruled Hungary until his death in 1456. The King, Ladislaus died unexpectedly in the following year and the Hungarians proclaimed 14-year old Matthias Hunyadi (or Matthias Corvinus) as king. Matthias established the Black Army as one of the earliest professional standing armies of medieval Europe. To fund this required a high level of taxation. After the king's death, Vladislaus Jagiellon won the fight for the crown by promising to abolish the taxes. Unable to pay the Black Army, they resorted to plundering the countryside before being defeated at the river Száva in 1492.

TROOP NOTES

The core of the Black Army was a professional mercenary force, first established by John Hunyadi but later expanded by Matthias Corvinus. This was paid for by high taxes. Matthias also recognised the value of firearms so that up to 1 in 4 infantryman were equipped with them. Cavalry and war wagons were used on the wings with infantry holding the centre. Lighter cavalry would initiate hit and run attacks.
