CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

ENGLAND

The Norman conquest had a profound effect on England. Within twenty years of the conquest the English ruling class had been almost entirely dispossessed and replaced by Norman landholders, who also monopolised all senior positions in the government and the Church. The use of the Anglo-Norman language, a dialect of Old Norman French, by the aristocracy endured until the 15th century. Throughout this period many nobles held lands in France as well as England.

Henry I, the fourth son of William I the Conqueror, succeeded his elder brother William II as King of England in 1100. The loss of his son in 1120 led to a succession problem. Henry had required the leading barons, ecclesiastics and officials in Normandy and England, to take an oath to accept Matilda as his heir. Upon Henry's death in 1135, the Norman and English barons ignored Matilda's claim to the throne and Stephen, Henry's favourite nephew, was anointed king. In the autumn of 1139, Matilda invaded England. Civil war was to last until 1153 while her husband, Geoffrey V of Anjou, conquered Normandy.

Stephen was captured in 1141 after the Battle of Lincoln. He was eventually released in exchange for Robert of Gloucester. A coronation of both Stephen and Matilda was held at Christmas 1141. This did not stop the warfare. In 1153, Stephen's son Eustace died. Stephen agreed the Treaty of Winchester where Matilda's son, the future Henry II, was recognised as Stephen's heir. Stephen's remaining son, William, would do homage to Henry and was confirmed as the Earl of Surrey and Count of Boulogne.

The reign of Henry II represents a reversion in power back from the barony to the monarchy. Henry's successor, Richard I "the Lion Heart", was preoccupied with foreign wars, taking part in the Third Crusade, being captured while returning and pledging fealty to the Holy Roman Empire as part of his ransom, and defending his French territories against Philip II of France. His successor, his younger brother John, lost much of those territories including Normandy following the disastrous Battle of Bouvines in 1214.

Over the course of his reign a combination of higher taxes, unsuccessful wars and conflict with the Pope had made King John unpopular with his barons, and in 1215 some of the most important decided to rebel against him. He met their leaders along with their French and Scot allies at Runnymede, near London on 15 June 1215 to seal the Great Charter (Magna Carta), which imposed legal limits on the king's personal powers. Because he had sealed under duress, however, John received approval from the Pope to break his word as soon as hostilities had ceased, provoking the First Barons' War.

John's son, Henry III, was only 9 years old when he became king. He reigned from 1216 to 1272. He spent much of his reign fighting the barons over the Magna Carta and the royal rights and was eventually forced to call the first "parliament" in 1264. He was also unsuccessful on the Continent, where he endeavoured to re-establish English control over Normandy, Anjou, and Aquitaine.

The Second Barons' War, 1264 to 1267, was a civil war in England between the forces of a group of barons led by Simon de Montfort against Royalist forces led by Prince Edward (later Edward I of England), in the name of Henry III. Simon de Montfort was killed at the Battle of Evesham in 1265.

The reign of Edward I, 1272–1307, was rather more successful. He conquered Wales and attempted to use a succession dispute to gain control of the Kingdom of Scotland, though this developed into a costly and drawn-out military campaign. His son, Edward II, proved a disaster. Meanwhile, the Scottish leader Robert Bruce began retaking all the territory conquered by Edward I. In 1314, the English army was disastrously defeated by the Scots at the Battle of Bannockburn. Edward's downfall came in 1326 when his wife, Queen Isabella, invaded England with her lover, Roger Mortimer. Edward was captured, deposed, and his 14-year-old son crowned. At age seventeen, Edward killed Mortimer and began his personal reign. After defeating the Scots in battle, he declared himself rightful heir to the French throne. This started what would become known as the Hundred Years' War.

In 1381, a Peasants' Revolt led by Wat Tyler spread across large parts of England. It was suppressed by Richard II. His autocratic and arrogant methods served to alienate the nobility and his forceful dispossession in 1399 by Henry IV increased the turmoil. Henry spent much of his reign defending himself against plots, rebellions, and assassination attempts. In 1400, Owain Glyndŵr, declared himself Prince of Wales. The king's success in putting down this rebellion was due partly to the military ability of his eldest son, Henry of Monmouth, who later became Henry V. The final defeat of the uprising represents the last major armed attempt by the Welsh to throw off English rule.

Henry V's son, Henry VI, became king in 1422 as an infant. When England lost the Hundred Years' War in August 1453, Henry fell into a period of mental breakdown that lasted until Christmas 1454. With his inability to control the feuding nobles, civil war began in 1455. The conflicts are known as the Wars of the Roses, and although the fighting was very sporadic there was a breakdown in the authority and power of the crown. Henry's cousin, who deposed Henry in 1461 and became Edward IV, went a little way to restoring the power of the Crown. Edward defeated the Lancastrians at the Battle of Mortimer's Cross. He was briefly expelled from the throne in 1470–1471 when Richard Neville, Earl of Warwick, brought Henry back to power. Six months later, Edward defeated and killed Warwick in battle and reclaimed the throne.

Edward died in 1483, only 40 years old. The king's brother Richard, Duke of Gloucester usurped the throne. The two sons of Edward were imprisoned in the Tower of London and never seen again. In the summer of 1485, Henry Tudor, the last Lancastrian male, landed in England from his exile in France. He defeated and killed Richard in battle at Bosworth Field on 22 August of that year and became king as Henry VII. Henry's hold on power was tenuous for most of his reign. He had to defeat several risings led by Yorkist pretenders, the first in 1487 at the Battle of Stoke. In 1497 he

defeated Cornish rebels and the rest of his reign was relatively peaceful. When the king himself died in 1509, the position of the Tudors was secure at last, and his son succeeded him unopposed.

WALES

At the time of the Norman conquest of England in 1066, the dominant ruler in Wales was Bleddyn ap Cynfyn, who was king of Gwynedd and Powys. The initial Norman successes were in the south, where William Fitz Osbern overran Gwent before 1070. In the south William the Conqueror advanced into Dyfed founding castles and mints at St David's and Cardiff. In 1094 there was a general Welsh revolt against Norman rule. Gruffudd ap Cynan was eventually able to build a strong kingdom in Gwynedd. His son, Owain Gwynedd, allied with Gruffydd ap Rhys of Deheubarth won a crushing victory over the Normans at the Battle of Crug Mawr in 1136 and annexed Ceredigion. Powys also had a strong ruler at this time in Madog ap Maredudd, but soon after his death in 1160 Powys was split into two parts and never subsequently reunited.

In the south Rhys ap Gruffydd ruled from 1155 to 1197. In 1171 Rhys met King Henry II and came to an agreement with him whereby Rhys had to pay a tribute but was confirmed in all his conquests and was later named Justiciar of South Wales. The death of Owain Gwynedd led to a power struggle. Llywelyn Fawr (the Great) emerged. He was sole ruler of Gwynedd by 1200 and, by his death in 1240, effective ruler of much of Wales. After a period of internal conflict Llywelyn ap Gruffydd emerged and his control of a large part of Wales was confirmed by the Treaty of Montgomery in 1267. However, Llywelyn's claims in Wales conflicted with Edward I of England, and war followed in 1277. By 1283 the English effectively ruled all of Wales. The Statute of Rhuddlan restricted Welsh laws and King Edward I's ring of impressive stone castles assisted in the domination of Wales, and he crowned his conquest by giving the title Prince of Wales to his son and heir in 1301.

There were several rebellions. In 1400, a Welsh nobleman, Owain Glyndŵr revolted against King Henry IV of England. Owain inflicted several defeats on the English forces and for a few years controlled most of Wales. Eventually the king's forces could regain control of Wales and the rebellion died out.

In the Wars of the Roses both sides made considerable use of Welsh troops. In 1485 Henry Tudor landed in Wales with a small force to launch his bid for the throne of England. Henry was of Welsh descent, counting princes such as Rhys ap Gruffydd among his ancestors, and his cause gained much support in Wales. Henry defeated King Richard III of England at the Battle of Bosworth with an army containing many Welsh soldiers and gained the throne as King Henry VII of England.

SCOTLAND

The kingdom of Alba emerged in the 10th century CE. The term Scotia was increasingly used to describe the kingdom north of the Forth and Clyde and eventually the entire area controlled by its kings was referred to as Scotland. In 1040 MacBeth was overthrown by Máel Coluim who became

Malcolm III. His dynasty ruled Scotland for the following two centuries. His second marriage was to the Anglo-Hungarian princess Margaret. This marriage, and raids on northern England, prompted William the Conqueror to invade. Malcolm III submitted to his authority, opening up Scotland to later claims of sovereignty by English kings. Shortly after 1097, Malcolm's son Edgar concluded a treaty with the King of Norway, Magnus Bare Legs recognizing Norwegian authority over the Western Isles. In practice Norse control of the Isles was loose, with local chiefs enjoying a high degree of independence.

When David I came to the throne in 1124 he had spent most of his life as an English baron. Many native institutions and personnel were replaced by English and French ones, underpinning the development of later Medieval Scotland. Members of the Anglo-Norman nobility took up places in the Scottish aristocracy and he introduced a system of feudal land tenure. The reforms gave greater authority to the Scottish throne and Alexander III was able to annex the remainder of the western seaboard by 1266.

The death of king Alexander III in 1286 and his heir, Margaret, in 1290 left 14 rivals for succession. To prevent civil war the Scottish magnates asked Edward I of England to arbitrate, for which he extracted legal recognition that the realm of Scotland was held as a feudal dependency to the throne of England. He chose John Balliol, the man with the strongest claim, who became king in 1292. Over the next few years Edward I used the concessions he had gained to systematically undermine both the authority of King John and the independence of Scotland. In 1295 the Scots entered an alliance with France.

In 1296 Edward invaded Scotland, deposing King John. The following year William Wallace and Andrew de Moray raised forces to resist the occupation and under their joint leadership an English army was defeated at the Battle of Stirling Bridge. For a short time, Wallace ruled Scotland in the name of John Balliol as Guardian of the realm. Edward came north in person and defeated Wallace at the Battle of Falkirk in 1298.

In 1306, Robert the Bruce, grandson of Robert Bruce who had been John Balliol's main rival was crowned as King. However, Edward's forces overran the country after defeating Bruce's small army at the Battle of Methven. Slowly his support strengthened, and English control of the country was reduced to the castles at Bothwell and Stirling. Edward II sent an army to break the siege of Stirling Castle and reassert control. Robert defeated that army at the Battle of Bannockburn in 1314. It wasn't until 1328 that Edward III signed the Treaty of Edinburgh–Northampton acknowledging Scottish independence under the rule of Robert the Bruce. Even then the English attempted to restore Edward Balliol, son of John, to the throne. Despite defeats at Dupplin Moor and Halidon Hill the Scottish resisted attempts to place Balliol on the throne. Edward III lost interest after the outbreak of the Hundred Years' War.

Robert II, the first of the Stewart kings, came to the throne in 1371. In 1406 Robert III sent his younger son and heir, the future James I, to France but he was captured en-route by the English and spent the next 18 years as a prisoner held for ransom. Scotland was ruled by regents after the death of Robert III until 1424. James I was assassinated in 1437 leaving his infant son as King. In 1468 the last significant acquisition of Scottish territory occurred when James III was engaged to Margaret of Denmark, receiving the Orkney Islands and the Shetland Islands in payment of her dowry. With

the death of James III in 1488 at the Battle of Sauchieburn, his successor James IV successfully ended the quasi-independent rule of the Lord of the Isles, bringing the Western Isles under effective Royal control for the first time.

In 1503, James IV married Margaret Tudor, daughter of Henry VII of England, thus laying the foundation for the 17th century Union of the Crowns. In 1512 the Auld Alliance was renewed and under its terms, when the French were attacked by the English under Henry VIII, James IV invaded England in support. The invasion was stopped decisively at the Battle of Flodden Field during which the King, many of his nobles, and many ordinary troops were killed.

IRELAND

Viking power in Ireland declined after the Battle of Clontarf in 1014 but the towns which Vikings had founded continued to flourish, and trade became an important part of the Irish economy. By the 12th century, Ireland was divided politically into a shifting hierarchy of petty kingdoms and over-kingdoms.

When King Diarmait Mac Murchada of Leinster was forcibly exiled he fled to Aquitaine and obtained permission from Henry II to recruit Norman knights to regain his kingdom. Several counties were restored to the control of Diarmait, who named his son-in-law, the Norman Richard de Clare, known as Strongbow, heir to his kingdom. This troubled King Henry who with papal authority landed in Waterford in 1171. He awarded his Irish territories to his younger son John. When John succeeded to the English throne, the “Lordship of Ireland” fell directly under the English crown.

The Normans initially controlled the entire east coast, from Waterford to eastern Ulster, and penetrated a considerable distance inland as well. King John, who visited Ireland in 1185 and 1210, helped consolidate the Norman-controlled areas, while ensuring that the many Irish kings swore fealty to him. However, the English kings from John onwards wanted to ensure the Norman lords did not become too powerful. By 1261 the weakening of the Normans had become manifest when Fineen MacCarthy defeated a Norman army at the Battle of Callann. Warfare continued between the different lords and earls for about 100 years, causing much destruction, especially around Dublin.

The Black Death in 1348 hit the English inhabitants of Ireland harder than it did the native Irish who lived in dispersed settlements. After it had passed, Gaelic Irish language and customs came to dominate the country again. The English-controlled territory shrank to a fortified area around Dublin. By the end of the 15th century, central English authority in Ireland had almost disappeared. England’s attentions were diverted by the Wars of the Roses.

The Fitzgerald dynasty of Kildare, who had become the effective rulers of Ireland in the 15th century were unreliable allies of the Tudor monarchs. They had invited Burgundian troops into Dublin to crown the Yorkist pretender, Lambert Simnel, as King of England in 1487. The power of the

Dublin government was seriously curtailed by the introduction of Poynings' Law in 1494 which essentially put the Irish Parliament under the control of the Westminster Parliament.

From 1536, Henry VIII decided to conquer Ireland and bring it under crown control.

JARLS OF ORKNEY

A Norse jarl ruling Norðreyjar (Orkney, Shetland, Caithness and Sutherland) originated following Norse invasions in the 9th century. The status of Norðreyjar as a Norwegian vassal was formalised in 1195. The position of Jarl of Orkney was the most senior rank in mediaeval Norway except for the king himself. Orkney and Shetland only became part of Scotland in 1472.

KINGDOM OF THE ISLES AND THE ISLE OF MAN

The Kingdom of the Isles comprised the Hebrides, the islands of the Firth of Clyde, the Isle of Man and some coastal areas of the Scottish mainland. In the 9th century the references to the Gallgáedil (i.e. "foreign Gaels") first appear. These were individuals of Scandinavian-Celtic descent.

According to the Orkneyinga Saga, in about 872 Harald Fairhair became King of a united Norway and many of his opponents fled to the islands of Scotland including the Hebrides of the west coast, and the Northern Isles. Harald pursued his enemies and incorporated the Northern Isles into his kingdom in 875 and then, perhaps a little over a decade later, the Hebrides as well. When local Viking chieftains of the Hebrides rebelled Harald sent Ketill Flatnose to subdue them, which he did quickly, but then he declared himself an independent "King of the Isles", a title he retained for the rest of his life.

In 990 Sigurd the Stout, Earl of Orkney took control of the Hebrides. Control was lost around 1079 to Crovan (see below) but Magnus Barelegs re-established direct Norwegian overlordship by 1098. Control was lost again to the Kingdom of Mann and the Isles from around 1113. After the collapse of rule from Mann, the "Lords of the Isles" ruled the islands subject to Norway and mainland subject to Scotland. The Hebrides passed to Scotland in 1266. The final "Lord" was executed in 1493.

The Norse may have taken the Isle of Man in 877 and they certainly held it by 900. From around 990 to 1079 the Isle of Man was subject either to the Earls of Orkney or the Kings of Dublin. Godred Crovan subdued Dublin and a great part of Leinster and in around 1079 created the Kingdom of Mann and the Isles. It included the south-western isles of Scotland. The islands under his rule were called the south isles (as opposed to the north isles i.e. Orkney and Shetland). The kingdom survived until 1164.

In 1290 King Edward I of England sent Walter de Huntercombe to seize possession of Mann, and it remained in English hands until 1313. After 1346 King David II agreed to hand over the island to Edward III. This followed a confused period of English and Scottish rule until the island came into the possession of Henry IV. In 1406 he granted it on a feudatory basis to the Stanley family who controlled the island until the 18th century.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

JARLS OF ORKNEY

1014 TO 1472 CE

HISTORICAL NOTES

This list covers the armies of the Jarls (Earls) of Orkney from the death of Sigurd the Stout at the Battle of Clontarf until the incorporation of Orkney and Shetland into Scotland. The inhabitants of Orkney and Shetland were Norse colonists who either expelled or absorbed the previous Pictish inhabitants. The Jarls were vassals to the King of Norway. At times they controlled or had nominal control over parts of Caithness, Moray and Ross as well as the Scottish isles down to the Isle of Man. Some of their mainland territories they held as vassals of the King of Scotland. Often every son considered themselves as equal contenders for the earldom.

TROOP NOTES

It is assumed that the Orkney and Shetland islands provided the core of the Jarl's forces and were essentially Viking in fighting style. Contingents could also be drawn from the Isles and mainland.

HISTORICAL ENEMIES

Viking 3209; Early Scots 3210; Norse-Irish 3211; Feudal Scottish 5405.

RULERS

The Jarls were Norse until 1231. From 1236 the Jarls are regarded as Scottish under the Norwegian crown.

KINGDOM OF THE ISLES

1079 TO 1493 CE

HISTORICAL NOTES

This list covers armies from the Kingdom of the Isles from when control was lost by the Earls of Orkney until the final "Lord of the Isles" was executed in 1493.

TROOP NOTES

Islesmen tactics and fighting techniques were originally Viking. The appearance of the best islesmen would be like Vikings with mail shirts, kite shields, carrying large swords and axes. The Lewis Chessmen may give a clue to the appearance of the majority of Islesmen warriors, equipped with the axe but lacking body armour. The Islemen were known as Gallgáedil (i.e. "foreign Gaels") in Ireland. The Islesmen also ruled areas of the highland coastline whose inhabitants were originally Pictish. The nobles appear to have used axes. The highlanders also appear to have made extensive use of the bow. 2,000 longbows were acquired by Highlanders in 1298 CE. Highland archers serving as part of a Scots national army in pitched battles against the English were outshot and swept away by English longbowmen.

HISTORICAL NOTES

This list covers Anglo-Norman armies until the death of King Stephen.

TROOP NOTES

After achieving the conquest with a largely mercenary army, William parcelled England out to his barons on a feudal basis. The total number of knights enfeoffed appears to have been between 4,000 and 7,000. In this period household knights remained an important element of the army. Feudal service is thought to have been required for 60 days at first, but this was subsequently reduced to 40 days. Other troops were raised by granting money-fiefs and contingents from the crown's continental possessions. In addition to knights were tenants of less than knightly status who by the 12th century are referred to as sergeants. They serve as infantry with spear, axe, or bow. They were usually used to deal with local emergencies and continued to serve for a 60-day period. Although the term "fyrd" disappears, there remained an obligation on all freemen to serve for 40 days. Town militias are also mentioned in the sources. Mercenaries continued to be used. These included Flemish, French and Burgundians but also Welshmen. Mercenaries were often paid from Danegeld, a tax which continued throughout this period. Muntatores were specialist English feudal light cavalry of the Welsh marches in mail haubergeon and helmet, armed with lance and sword but no shield.

SCENARIO RULE - NOT FOR TOURNAMENT PLAY

The standard used at the Battle of the Standard in 1138 CE may be represented by a mobile superior camp in addition to the normal camp. The Standard may be 1BW by 2BW and the normal rules for a mobile camp apply for movement and fighting. If sacked, treat as for a sacked camp but roll one dice higher than normal for the KaB tests. During the End of Turn phase, a single UG may recover a wound, without requiring a card, if the standard is within 10 BW and hasn't been sacked. The usual restrictions for camp deployment do not apply to the carroccio but it must be deployed in the player's deployment area.
A Flemish contingent or French allies may not be used with the Standard.

HISTORICAL NOTES

This list covers Welsh armies from the general revolt in 1094 until the defeat of Owain Glyndŵr.

TROOP NOTES

Military service was expected of all able-bodied Welshmen and was deemed a privilege rather than an obligation. The spear is described as long but was thrown on occasion. The nucleus of a Prince's army was his teulu, a band of mounted retainers drawn from the nobility. In 1136 the Welsh fielded 2,000 horse and 6,000 foot under Gruffydd ap Rhys. Irish mercenaries were used on occasion. Welsh archers start to appear at the end of 11th century, possibly in response to the Normans. Even in the 12th century they are described as inflicting deep and savage wounds.

HISTORICAL NOTES

This list covers Scottish armies from the reforms of David until the coronation of Robert the Bruce.

TROOP NOTES

Knights remained a small component of the army. The largest part of any Scottish force during this period was provided by the "Common Army". This consisted of poorly equipped farmers equipped with a 12-foot spear and a small shield. They were good at resisting cavalry but vulnerable to bow fire. Bows and axes were also used.

FEUDAL ENGLISH

1154 TO 1320 CE

HISTORICAL NOTES

This list covers English armies from Henry II to Edward I. It excludes English armies comprised of Feudal contingents fighting in France.

TROOP NOTES

During this period the number of knights in household contingents declines and the number of knights supplied through subinfeudation, where a portion of an estate was granted by a feudal tenant to a subtenant, increases. There was also a rise in scutage, paying money in lieu of service. Gradually the armour of knights increased, and horses start to become barded. The date for switching knights to fully armoured rather than protected is arbitrary. Plantagenet armies continued to rely on mercenaries as well as Feudal troops. English kings quickly saw the military potential of Welsh archers and the use of the longbow increased over this period.

LATER NORSE-IRISH

1168 TO 1300 CE

HISTORICAL NOTES

This list covers Norse-Irish armies from the invasion of the Normans.

TROOP NOTES

The main weapon of the Irish was the axe. The axe may have been wielded one or two handed. Other weapons included short spears, javelins, and slings. Following the Norman invasion, the use of the bow increased. The longbow wasn't adopted, instead a short bow was preferred. A separate military element much used by the kings of Leinster and Munster were ostmen who were originally descendants of Scandinavian settlers. There are also references to gall-gaedhil ("foreign gael"), mercenaries from Man, Hebrides, and Orkneys. These were subsequently replaced by galloglaich.

HISTORICAL ENEMIES

Feudal Scottish 5405; Later Norse-Irish 5407; Early Anglo-Irish 5408.

RULERS

There were numerous kingdoms in Ireland. Only two kings were recognised with the title "High King of Ireland".

Ruaidrí mac Tairrdelbach Ua Conchobair. King of Connacht, High King of Ireland from 1166	1156 – 1186 CE
Brian Ua Néill, King of Tyrone, High King of Ireland from 1258	1238 – 1260

Kingdoms included: Desmond, Thomond (Limerick), Leinster, Tyrconnell and West Breifne.

EARLY ANGLO-IRISH

1169 TO 1349 CE

HISTORICAL NOTES

This list covers Anglo-Irish armies from the landing by Henry II until the decline of the Anglo-Irish in the mid-14th century. The Lordship of Ireland was created by Henry II and controlled by loyal Anglo-Norman lords. The kings of England claimed the right to rule from a papal bull issued in 1155 by Pope Adrian IV. The rule never extended to all parts of Ireland. The rest of the island was under the control of various Gaelic Irish kingdoms of chieftoms who were often at war with themselves or the Anglo-Normans. The lordship reached its greatest extent in the early 14th century but went into decline due to the invasion by Scotland and the Great Famine of 1315 and the Black Death in the 1340s.

TROOP NOTES

Anglo-Irish armies were based upon a core of English or Norman Welsh troops. Colonists were required to defend the lands taken from the Irish.

HISTORICAL ENEMIES

Kingdom of the Isles 5402; Later Norse-Irish 5407; Early Anglo-Irish 5408; Medieval Irish 5409.

RULERS

Henry II assigned the Lordship of Ireland to Prince (later King) John in 1177 when he was 10 years old. On the death of John, it came under the direct rule of the Crown of England.

MEDIEVAL IRISH

1300 TO 1500 CE

HISTORICAL NOTES

This list covers Irish armies from the 14th century onwards. It also covers the invasion of Ireland by Edward Bruce from Scotland. During this invasion both the Scottish and Anglo-Irish were supported by Gaelic allies.

Distracted by the Hundred Years' War and the Wars of the Roses, forces that could have protected the Lordship were no longer available. Autonomous Gaelic and Norman lands took advantage. Outside the Pale, the area around Dublin, the Norman lords began to adopt Irish language and customs. The government in Dublin had little authority.

TROOP NOTES

During this period the Irish started to fight from horseback but were reluctant to stand against Anglo-Irish horsemen. "Spears" were cavalry who fought with a short spear or lance. The galloglaich also became a more significant element in Irish armies with several clans settling permanently in Ireland.

HISTORICAL ENEMIES

Early Anglo-Irish 5408; Medieval Irish 5409; Anglo-Irish 5412.

RULERS

There were numerous kingdoms and chiefdoms in Ireland at this time.

1306 TO 1473 CE

HISTORICAL NOTES

This list covers Scottish armies from the coronation of Robert the Bruce. The first half of the 14th century saw the fight for Scottish independence. During the next 100 years Scotland was often ruled by regents. When ruling personally, the kings were often short of funds and tried to weaken the strength of the noble families. In 1468, the Orkney and Shetland Islands were received as dowry payment after the engagement of James III to Margaret of Denmark.

TROOP NOTES

The Yeomen continued to form the backbone of Scottish armies. Knights sometimes dismounted to fight in the front rank of the schiltrons. Scottish armies in the 100 Years' War adopted English tactics.

HISTORICAL NOTES

This list covers English armies in Britain from 1320 until the start of the Wars of the Roses.

TROOP NOTES

English armies in Britain were naturally like the armies used on the continent but their opponents, the Welsh and Scottish were different foes. The futility of cavalry charging steady spearmen and the usefulness of the longbow however meant that tactics were similar.

ANGLO-IRISH

1350 TO 1500 CE

HISTORICAL NOTES

This list covers Anglo-Irish armies from 1350 onwards. Distracted by the Hundred Years’ War and the Wars of the Roses, forces that could have protected the Lordship were no longer available. Autonomous Gaelic and Norman lands took advantage. The government in Dublin had little authority.

TROOP NOTES

Professional generals represent Royal officials known successively as Justiciar, Lieutenant or Lord Deputy.
"Spears" were cavalry equipped with a lance or short spear. As time progressed less and less of the Anglo-Irish cavalry fought with lances and more fought with javelins.

HISTORICAL ENEMIES

Medieval Irish 5409; Anglo-Irish 5412.

RULERS

Throughout the 15th century successive kings of England delegated their constitutional authority over the Lordship to the powerful Fitzgerald earls of Kildare, who held the balance of power by means of military force and widespread alliances with lords and clans.

LANCASTRIAN ENGLISH

1455 TO 1471 CE

HISTORICAL NOTES

This list covers the Lancastrian armies of the Wars of the Roses. The campaigns were intermittent, with long periods of uneasy peace in between.

TROOP NOTES

The Lancastrians tended to have more support in the west country, Wales, and the north of England.
Armies tended to be either small, consisting of nobles and their retinues, or much larger including large numbers of levies and militia.

HISTORICAL ENEMIES

YORKIST ENGLISH

1455 TO 1483 CE

HISTORICAL NOTES

This list covers the Yorkist armies of the Wars of the Roses excluding the armies of Edward IV in France and Scotland.

TROOP NOTES

As both sides were equipped almost identically, battles tended to be hard fought affairs unless one side had an early advantage. Vanguard's tended to be enlarged with longbowmen and shooting contests tended to open most battles.

HISTORICAL ENEMIES

Lancastrian English 5413; Yorkist English 5414; Richard III English 5416.

RULERS

Edward IV	1461-1470, 1471-1483 CE
Edward V	1483

BATTLES AND CAMPAIGNS

First Battle of St Albans (Yorkist victory over the Lancastrians)	1455 CE
Battle of Blore Heath (Yorkist victory over the Lancastrians)	1459
Battle of Ludford Bridge (Lancastrians under Henry rout the Yorkists)	1459
Battle of Sandwich (Yorkists defeat the Lancastrians)	1460
Battle of Northampton (Yorkists defeat and capture King Henry)	1460
Battle of Wakefield (Lancastrians defeat and kill the Duke of York)	1460
Battle of Mortimer's Cross (Yorkist victory over the Lancastrians)	1461
Second Battle of St Albans (Lancastrians chase Yorkists out of St Albans)	1461
Battle of Ferrybridge (Lancastrians ambush Yorkists)	1461
Battle of Towton (Edward IV defeats Lancastrians)	1461
Battle of Hedgeley Moor (Lancastrian victory over the Yorkists)	1464
Battle of Hexham (Yorkists inflict severe losses after surprise attack on the Lancastrians)	1464
Battle of Edgecote Moor (Earl of Warwick defeats Edward IV)	1469
Battle of Losecote (Yorkists under Edward IV defeat Lancastrians led by Baron Willoughby)	1470
Battle of Barnet (Victory for Edward IV over Lancastrians led by Earl of Warwick)	1471
Battle of Tewkesbury (Edward IV defeats Lancastrians)	1471

EARLY TUDOR ENGLISH

1485 TO 1487 CE

HISTORICAL NOTES

This list covers the armies of Henry Tudor including the Bosworth campaign and against the pretender Lambert Simnel.

TROOP NOTES

For the Bosworth campaign, Henry relied on mercenary troops from France and on rallying Welsh lords to his cause. He was then joined by Stafford. Once King he had the resources of England but had to be mindful of Yorkist sympathies. The Yeoman of the Guard were created in 1486 CE.

YORKIST PRETENDER

1486 TO 1487 CE

HISTORICAL NOTES

This list covers the armies accompanying the Yorkist pretender, Lambert Simnel. The subsequent pretender, Perkin Warbeck, accompanied a Scottish army that invaded England but retired on the approach of an English army. He then supported a rebellion in Cornwall but fled when the English approached and was later captured. The leaders of the Cornish rebels were executed whilst the rest were fined.

TROOP NOTES

The Yorkist Pretender army had to rely on mercenaries from the continent and Ireland to support the generally small English forces that rallied to their cause.
