CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

On 1st February 1328 King Charles IV of France died. He left no heir but his wife was pregnant. On his deathbed, he said that if the queen bore him a son he would be king, but if she bore him a daughter then the crown would belong to Philip of Valois. Philip, Count of Valois, Anjou and Maine was Charles's first cousin and was swiftly acknowledged as king. It was unsurprising that they overlooked another possible claimant for the throne, the 16-year old King Edward III of England. He was at that time a puppet monarch, controlled by his mother Isabel and her lover Roger Mortimer, Earl of March. Isabel was Charles's sister and there was no rule forbidding inheritance through the female line. Nationality did not exist at that time. Anglo-Norman French was the first language of Edward III. Edward was also Duke of Guyenne and Count of Ponthieu and one of the twelve Peers of France.

In 1330 Edward killed Roger Mortimer and assumed full powers as King of England. In 1333, he crushed the Scots at Halidon Hill avenging the defeat of his father at Bannockburn seventeen years earlier. Scotland was a natural ally of the French. Edward had an ally in Flanders and his wife Philippa of Hainault provided some useful relations.

Between 1330 and 1337 relations deteriorated between Philip VI of France and Edward III of England. In May 1337 Philip declared Guyenne had been forfeited by Edward and engaged in a three-year campaign to seize the Duchy. In October Edward responded by claiming the throne of France. The French raided the south coast of England and the English navy retaliated by raiding France. In 1339 Edward launched the first raid by land. Devastating the French countryside in what became known as a *chevauchée*, he set a pattern that was to continue for the next one hundred and fourteen years.

In 1340 Edward won a significant naval victory at Sluys. This removed the threat of a French invasion of England, although the south coast continued to be raided by the French. In 1341 the Duke of Brittany died. The ducal succession was contested and one of the contestants, John of Montfort recognised Edward as his king, so Edward obtained an ally. Edward could now attack the French from Flanders, Brittany and Guyenne. In 1346 Edward landed in Normandy and raided the Duchy ruthlessly. He marched towards Paris looking to cross the Seine. This he achieved and then secured a crossing over the Somme. He could now retreat to Flanders if necessary, so sought a battle at Crecy. At Crecy Edward won the first of the great English victories over the French. Until Crecy the English were thought little of as soldiers. The French were considered the best knights in Europe. In one battle, the longbow became a feared weapon for the next 150 years. In 1347 a truce was agreed, but a far worse disaster was spreading across Europe. The Black Death ravaged both France and England killing about one third of the population of both countries. In 1350 Philip VI died.

Philip was succeeded by John II. The period between 1350 and 1355 was relatively peaceful but with some English successes in Brittany. Edward also acquired an ally in Charles, King of Navarre. Charles held estates in Normandy and near Paris. He had been deprived of the counties of Champagne and Angoulême. In 1355, Edward Prince of Wales - the Black Prince, led a *chevauchée* against Languedoc. In 1356 John II captured Charles. The Black

Prince led another chevauchée from Guyenne, this time north-east through Limousin and Berry. John outflanked the Black Prince and trapped his army seven miles from Poitiers. A day of negotiations failed as John II wanted the unconditional surrender of the English. This enabled the English army to prepare their position. The following day the English prepared to march away but the French attacked so the English were forced to fight. The French were drawn up in three battles. The first battle faltered in its attack and the second battle led by the Duke of Orleans (King John's brother) withdrew. The third battle led by King John fought ferociously but routed when a small detachment of English troops appeared in their rear. King John II was captured. The captive king was taken to London. Meanwhile in France central government collapsed and many bands of free companies, English, Gascon and even French deserters seized castles and terrorised the countryside. Charles, King of Navarre, was released and increased his popularity by destroying an army of jacquerie, peasants who had armed themselves in the chaos.

In 1359 Edward led a chevauchée with the intention of being crowned King of France at Rheims. The city however resisted a long siege so in 1360 after raiding Burgundy the English army headed for Paris. The French refused to fight but Edward did not feel his army was strong enough to take the city. A treaty was negotiated in which Edward renounced his claim to the French throne, released the French king in return for a huge ransom and was granted Aquitaine, about one third of France. The Black Prince was made Duke of Aquitaine. John II died in 1364 and was succeeded by his son, Charles V.

Charles proved a clever ruler. In 1364 the King of Navarre rebelled and was defeated. In the same year he outsmarted an attempt by the Count of Flanders to marry his daughter to an English prince and instead arranged a marriage to the Duke of Burgundy (his brother). In the long term the union of Flanders and Burgundy was to prove troublesome, but it prevented the English establishing another province around France.

The Black Prince was a better warrior than ruler. In 1369 Charles declared war and in November announced he had confiscated Aquitaine. The English responded by launching chevauchées in both 1369 and 1370. The French responded by refusing battle but picking off foraging parties and wearing down the English with constant surprise attacks. Ill health forced the Black Prince to leave for England in 1371 and in 1372 Aquitaine was handed over to John of Gaunt, King of Castile and Duke of Lancaster. In 1373 John led a chevauchée from Calais which reached Bordeaux after 6 months and 600 miles. It had however failed to capture a single town and only just over half the troops that left Calais arrived in Bordeaux. By the end of 1373 Aquitaine no longer existed and even Guyenne was reduced. A truce was negotiated in 1374.

In 1377 Edward III died to be succeeded by his 10-year-old son. The French raided the south coast attempting to cut the English off from Brittany and Guyenne. Conflict however continued in both Brittany and Guyenne. In 1380 Charles V died, having reconquered much of what had been lost to Edward III.

In 1380 both Richard II of England and Charles VI were minors. Warfare was not just restricted to France, there were conflicts in France, Spain, Ireland, Aquitaine and Brittany. In 1381 a war tax in England sparked a peasants' revolt. Taxation in France sparked similar unrest. In France Philip, Duke of Burgundy, was the real ruler and he quickly closed his grip on Flanders. In 1382 he won a victory at Roosebeke against the Flemish and

became Count of Flanders in 1383. The English failed to support Ghent when requested and by 1385 the Duke controlled most of the Low Countries. In 1386 the Duke prepared for an invasion of England but due to his ill-health it was eventually called off. In 1388 the Scots inflicted a defeat on the Percys at Otterburn. In 1389 a peace treaty was negotiated. In 1398 a further truce was agreed for twenty-eight years.

Events in France conspired against a lasting peace. In 1392 Charles VI suffered from madness (possibly porphyria). The Duke of Burgundy as ruler during the periods of madness diverted at least one eighth of French revenues to his own treasury. When Charles was sane, Louis, the Duke of Orleans ruled. He aimed to capture Milan to which he had a claim and wanted to use the resources of France to achieve this. The result was to lead to civil war although it took nearly two decades for fighting to break out.

In 1399 Richard II was deposed by Henry Bolingbroke, the son and heir of John of Gaunt, who established himself as Henry IV. Henry was desperately short of money as English revenues had fallen dramatically during the reign of Richard II. In 1404 the French, led by the Duke of Orleans, broke the truce and attacked Guyenne. By 1406 the French reached Bordeaux but were beaten back. In 1407 the Duke called off the attempt to capture Guyenne. In 1404 the French also agreed an alliance with Owain Glyndwr in Wales, but a French expedition was beaten back by bad weather and the small number of troops that landed in Milford Haven were of little use. Owain's uprising was doomed.

Philip, Duke of Burgundy, died in 1404, to be succeeded by his son, John the Fearless. While John supported the Pope in Rome, Louis of Orleans upheld the Pope in Avignon. France, and especially Paris, divided into two armed camps. The latter party took the name Armagnacs from their leader Bernard, Count of Armagnac. By 1411 the Burgundians controlled Paris and the Armagnacs set about blockading the capital. John sought an alliance with England, and a joint Burgundian and English force broke the blockade. In 1412 the Armagnacs employed English troops in return for ceding all of Aquitaine as it had been in 1369. The effect was to interest the English nobility in the riches to be obtained in France.

In 1413 Henry IV died and was succeeded by his son, Henry V. The young King had already put down a revolt in Wales and led the Council during his father's illness. By 1413 the Armagnacs had seized control of France. Henry set his ambition on the throne of France itself. In 1415 he set sail for France. His first target was the port of Harfleur in Normandy. It was captured after a difficult siege. The king then decided on a chevauchée. His army was already weakened, and he planned to avoid any conflict and reach Calais. The French led by the Dauphin, had decided to intercept the English. The two armies were to meet at Agincourt. The English numbered approximately 800 men-at-arms and 5,000 archers, many of them suffering from dysentery. The French may have had over 40,000 men-at-arms. The French were lured into attacking the English through a thick field of mud. The French used their standard tactics of dismounting whilst keeping small bodies of mounted troops on each wing to attack where the archers were weakest. In less than four hours the French lost some 10,000 men. The English lost perhaps 300 men, the most notable casualty was the king's cousin, the Duke of York.

Strategically the battle of Agincourt decided nothing. Diplomacy brought the Duke of Burgundy as an ally to the English. The Duke acknowledge Henry as King of France. In 1417, he sailed back to France with the objective of conquest. There was nobody to oppose him. The civil war in France

was raging worse than ever. By Spring 1418 the English had captured Lower Normandy. In January 1419 Rouen was taken. Normandy became a new English province.

John, Duke of Burgundy, was horrified by the English success. In 1419, he was murdered whilst attempting to negotiate with the Armagnacs. The new Duke, Philip the Good, allied himself with Henry. His aim was to allow the English to conquer northern France with the hope that they would leave him to rule his possessions in Burgundy and the Low Countries. A treaty was agreed with Charles VI whereby Henry V would become heir to the French Throne and Regent of France. Henry was to marry Charles's daughter.

Henry and Philip continued the conquest of northern France from the Armagnacs. In 1420 Henry entered Paris and began an English occupation that was to last for fifteen years. In 1421 the Duke of Clarence, heir to the throne, was defeated and killed by a combined French and Scottish force. It demonstrated that the English were not invincible. In 1422 the king fell ill and died.

Before he died, an heir, Henry VI was born. The King had appointed his brother, the Duke of Bedford, as provisional Regent in France, while the Duke of Gloucester was to be Regent in England. Charles VI died only six weeks after Henry, so Henry VI also became Henri II of France. The next seven years were some of the most successful for the English. This was mainly due to the Duke of Bedford and the Earl of Salisbury. The Anglo-French realm was kept entirely separate from England and largely governed by Frenchmen. Normandy was administered as a separate state by the Regent. The government of Paris was quite distinct.

From the start the realm only worked because of Burgundian support and the English and Burgundians cooperated militarily. In 1423 a victory was obtained over the Scots and Dauphinists at Cravant (Dauphinists were supporters of Charles VI's son, who was also named Charles). In 1424 Bedford completed the conquest of Anjou and Maine. Another victory against the Scots and Dauphinists was achieved at Verneuil, but not without loss. Whilst in England in 1426, the Dauphinists signed a treaty with the Duke of Brittany, but on returning to France in 1427, Bedford restored the alliance with Brittany. In 1428 English progress was slowed by a revolt in Maine. They then settled down to besiege Orleans.

Although the Dauphinist morale was very low, Dauphinist France was much richer than Plantagenet France. Morale was to be boosted by a peasant girl who claimed to have been sent by God, Joan of Arc. She convinced the Dauphin to let her lead a relief force to Orleans. The English were overstretched, and she entered Orleans at the end of April 1429. The effect on French morale was instantaneous. During 1429 the French won a series of minor victories. The maid led the army in person. She was wounded in September. She led a French army with the Dauphin to Rheims where he was crowned Charles VII. Charles's army then marched on Paris. Paris stayed loyal but Bedford was so alarmed that he temporarily gave the regency of France (except Normandy) to the Duke of Burgundy.

In May 1430, the Maid of Orleans was captured by a Burgundian soldier in a skirmish. She was handed over to the English who tried and burned her for heresy. Her execution made little difference at the time. The effect she had was to open northern France to the supporters of Charles. Champagne was lost. Maine was nearly lost and there were revolts in Normandy in both 1429 and 1431. Slowly the Regent restored the situation. In 1432 his

wife Anne of Burgundy died. Bedford married the daughter of the Count of Luxembourg, a vassal of the Duke of Burgundy the following year. This angered the Duke as the marriage had taken place without his consent.

The English were running out of money and severe taxation was leading to more unrest. In 1435 the Regent was told he had to return to Paris or the city would be lost. At the city, he fell ill and died on 20 September 1435. Less than a week later Charles VII and Philip of Burgundy signed the Treaty of Arras. England was shattered by this betrayal. The years from 1435 to 1453 became a protracted rear-guard action. England saw the King controlled by the Beaufort family and powerful barons raising their own private armies to settle disputes. In 1436 the French took Paris. In 1438 the French invaded Guyenne for the first time in twenty years.

In 1444 the Treaty of Tours was negotiated. Henry VI was married to Margaret of Anjou in return for a two-year truce. At the end of 1445 Henry agreed to give up Maine for an extension of a further two years. The truce was eventually extended until April 1450. During this time Charles VII set about reorganising the French army. French finances had been placed in good order. On 31 July 1449, the truce which had already been broken by the English collapsed when the French invaded Normandy. The invasion and the loss of Rouen caused an outcry in England, but little was done to reinforce the Norman garrisons. The English were defeated at the battle of Formigny in April 1450 and when Cherbourg surrendered in August the French had reconquered all Normandy save the Channel Islands.

Talbot's expedition of 1452 to 1453 was the final attempt by an exhausted England. On 17 July 1453, the defeat at Castillon was the last major battle of the Hundred Years' War. On 19 October 1453 Bordeaux surrendered and the war was over. At first the English regarded the loss of Normandy and Guyenne as temporary. Henry VIII still held ambitions of restoring the dual monarchy in 1523 and even after the loss of Calais in 1558 English monarchs still called themselves Kings and Queens of France until the Treaty of Amiens in 1802.

The ultimate losers were not only the Kings of England, but the Dukes of Burgundy. Charles VII regarded Philip the Good (who died in 1467) and his successor Charles the Bold as his enemies. In 1463, Philip gave up some of his territory to King Louis XI of France. That year he also created an Estates-General for the Netherlands based on the French model. The first meeting of the Estates-General was to obtain a loan for a war against France and to ensure support for the succession of his son Charles the Bold to his dominions. In 1465 Philip relinquished the government of Burgundy to Charles and Philip died in Bruges in 1467. Charles defeated two revolts by Liège in 1465 and 1467.

In 1471 the French king accused Charles of treason and seized some of the towns on the Somme. The Duke retaliated by invading France with a large army; he took possession of Nesle and massacred its inhabitants. He failed in an attack on Beauvais and had to content himself with laying waste to the countryside as far as Rouen. He eventually withdrew without attaining any useful result.

In 1474, he quarrelled with the Swiss, who supported the free towns in the Upper Rhine in their revolt against the tyranny of the ducal governor. He also antagonized René II, Duke of Lorraine, with whom he disputed the succession in the Duchy of Lorraine, which bordered many of his territories. These enemies readily joined forces against their common adversary Charles. Charles seized Nancy in November 1475 and then marched against the

Swiss. At Grandson he was attacked by the Swiss confederate army and defeated. Charles succeeded in raising a fresh army of 30,000 men that he used to fight the Morat on 22 June 1476. He was again defeated by the Swiss army, which was assisted by the cavalry of the Duke of Lorraine. On 6 October, Charles lost Nancy, which the Duke of Lorraine recovered. Charles formed a new army and arrived before the walls of Nancy. He met the joint forces of the Lorrainers and the Swiss, who had come to the relief of the town, at the Battle of Nancy on 5 January 1477. He perished in the fight. Charles left his unmarried nineteen-year-old daughter, Mary, as his heir. The French king Louis focused on seizing the Duchy of Burgundy (a French fief) whilst the Holy Roman Emperor secured the hand of Mary for his son Maximilian. As a result, much of the Burgundian territories passed to the Holy Roman Empire. This led to the border of France and Germany becoming a matter of dispute that was only resolved in 1945.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

FEUDAL FRENCH

1046 TO 1149 CE

HISTORICAL NOTES

France during the 11th and 12th centuries CE was a series of semi-independent states under the nominal rule of the king. The kings in the 11th century were weak. Louis VI who reigned from 1108 to 1137 was more a soldier and his authority became more accepted. To wage war French kings were obliged to raise money from their vassals which made them unpopular. Louis VII reigned with his father from 1131 and continued to rule to 1180. His marriage to Eleanor of Aquitaine made him Duke of Aquitaine and strengthened his power, but also brought him into conflict with the Count of Champagne, ruler of Navarre. His marriage to Eleanor was not successful and was eventually annulled, allowing Eleanor to marry Henry FitzEmpress, the future king of England.

TROOP NOTES

This period saw the rise of the knight who would become the main force in Medieval armies. Infantry were often of poor quality and with the huge investment in castles, armies were to become more mobile and rely less on infantry.

NORTHERN MEDIEVAL FRENCH

1150 TO 1337 CE

HISTORICAL NOTES

This list represents the armies of the King of France or armies commanded on his behalf by royal princes. It also represents armies of peers from northern France and Gascony. In 1154 the coronation of Henry II of England resulted in him controlling Normandy (an English possession), Anjou (inherited from his father), Aquitaine (through his marriage to Eleanor) and Brittany (as his vassal). The English king could as a result hold as much or greater power than his nominal overlord. The reign of Philip II Augustus from 1179 to 1223 saw the French royal domain and influence expand. He spent much of his reign fighting the Angevins. Philip used Henry II's son, Richard, against him. When Richard replaced his father as King, he and Philip went on the Third Crusade. During the Crusade they fell out. Richard was on the verge of defeating Philip when he was killed. The balance of power only shifted after the defeat of the Imperialist allies of King John at Bouvines in 1214. The defeat of a French invasion of England in 1217, still left Gascony in the south-west as the only English territory in France.

The Albigensian or Cathar Crusade. was primarily fought by the French crown to destroy the Cathar faith. From 1209 to 1215 it was successful, but a series of revolts over the next 10 years caused many lands to be lost. A renewed crusade resulted in the Treaty of Paris in 1229 which realigned the County of Toulouse into France and the capture of the Cathar fortress in 1244 drove the religion underground.

King Louis IX reigned from 1226 to 1270. Under his reign France became more centralised. His successor Philip III saw an opportunity to capture the entire Spanish March, but his Aragonese Crusade ended in disaster, and he died shortly afterwards. Philip IV focused his efforts against the English and in Northern France. He won a spectacular victory at Courtrai in 1302 against the Flemish. This period also saw the creation of the Auld Alliance with Scotland. The death of Charles IV in 1328 was to trigger the Hundred Years' War.

TROOP NOTES

Northern French knights had a reputation for their ferocious charge.

Ribauds were originally a militia raised in Paris in 1138 by Philip II. They were disbanded by Philip V as being too undisciplined. The term was used for peasants who would follow the knights, slitting the throats of the wounded who were considered not worth a ransom. This doesn't seem to justify treating them as a separate UG.

EARLY SWISS

1291 TO 1405 CE

HISTORICAL NOTES

Some point at or after 1291, the cantons of Uri, Schwyz, and Unterwalden united to defend their interests after the death of Emperor Rudolf I of Habsburg, forming the nucleus of the Old Swiss Confederacy. By 1353, the three original cantons had been joined by the cantons of Glarus and Zug and the city states of Lucerne, Zürich, and Bern, forming the "Old Federation" of eight states that persisted during much of the 15th century. At the battle of Sempach 1386, the Swiss defeated the Habsburgs, gaining increased autonomy within the Holy Roman Empire.

TROOP NOTES

Swiss armies of this period fought in a single deep block. Most successes were in difficult terrain and used field defences or surprise flank attacks. Troops were armed with axes, two-handed swords, and spears but the most common weapon was the halberd. Command was run by committee, hence no option for a legendary general.

EARLY MEDIEVAL LOW COUNTRIES

1297 TO 1409 CE

HISTORICAL NOTES

This list covers the urbanised provinces of the Low Countries - Flanders, Brabant, Hainault, Holland, and the Bishopric of Liege. Flanders was incorporated into Burgundy in 1405. It also covers the communal armies of the Low Countries cities.

TROOP NOTES

The main armament of the Low Countries states was a pike. At this time the Guildsmen were not so well trained, so it is treated as a long spear. Armies preferred defensive positions.

EARLY 100 YEARS WAR ENGLISH

1337 TO 1414 CE

HISTORICAL NOTES

This list covers the overseas English armies of the Hundred Years war including the battles of Moflaix, Crecy and Poitiers.

TROOP NOTES

The main power of the army was the longbowmen throughout this period, where most levied troops were competent and strong with the weapon. In the later battles there were numerous long-standing veterans in the army. During this period the armies were used defensively with the bowmen often deployed behind ditches (Crecy) or hedges (Poitiers) - so we allow the Barricades option to reflect this more static way of fighting. English knights were not as highly regarded as their European equivalents. Foot men-at-arms were mainly armed for general melee rather than keeping mounted at bay, so we classify them as 2HC&C for the right overall effect in general melee. Hobilars were general cavalry armed with a short spear of varying standards but appeared in large numbers at the beginning of the campaigns.

HISTORICAL ENEMIES

100 YEARS WAR FRENCH

1337 TO 1444 CE

HISTORICAL NOTES

This list covers the French armies of the 100 Years War.

TROOP NOTES

The main power of the army was a powerful knight charge with infantry playing a supporting role. Genoese crossbowmen carried large light shields strapped to their backs. When reloading to shoot they turned their backs on the enemy. This is treated as shield cover but provides for the special rule of being able to shoot. Ribauds represent a range of peasantry and followers mainly useful for capturing or killing enemy wounded. Brigans were types more capable of hand-to-hand combat.

After the Treaty of Arras in 1435 the French were more united in wishing to expel the English, hence the change to Professional generals.

FREE COMPANY

1357 TO 1444 CE

HISTORICAL NOTES

This list represents the Grand Free Company of the early 1360s which is the only time they field a full battle sized army. It also can form the 40,000 strong "Armagnac" mercenary army of 1444 hired by Charles VII to the Hapsburg Emperor for an invasion of Switzerland. The list can be used form any Free Company force from 1357CE to 1444CE which gathered in various sizes in the employ of medieval leaders in France, Spain, and Italy. They tended to form during periods of peace and were comprised of otherwise unemployed soldiery from various nations who clustered together to find paid mercenary work or just loot the locality.

TROOP NOTES

Free Company armies were a mix of soldiers from a range of nationalities.

MEDIEVAL BURGUNDIAN

1363 TO 1471 CE

HISTORICAL NOTES

The Duchy of Burgundy was annexed by the French throne in 1004. During the Hundred Years' War, King John II of France gave the duchy to his youngest son, Philip the Bold, rather than leaving it for his successor on the French throne. The duchy soon became a major rival to the throne, because the Dukes of Burgundy succeeded in assembling an empire stretching from Switzerland to the North Sea, in large part by marriage. The Burgundian territories consisted of several fiefdoms on both sides of the (then largely symbolic) border between the Kingdom of France and the Holy Roman Empire. Its economic heartland was in the Low Countries, particularly Flanders and Brabant. The court was based in Dijon. From 1407 to 1435 the civil war between the House of Orleans (Armagnac faction) and the House of Burgundy helped the English to seize almost half of France.

TROOP NOTES

Generals remain Instinctive later than English or French generals. This represents the poorer leadership of Burgundian forces.

MIDDLE SWISS

1405 to 1473 CE

HISTORICAL NOTES

The Swiss were able to take advantage of the weakness of the Hapsburgs with the Tyrolean line controlling Further Austria from their court at Innsbruck. This allowed the confederacy to grow. Zürich was expelled from the Confederation from 1440 to 1450 due to a conflict over the territory of Toggenburg (the Old Zürich War). The Swiss also extended their influence at the expense of the Duchy of Milan.

TROOP NOTES

After 1400 the Swiss used increasing numbers of pikemen in response to the Austrian tactic of dismounting their men-at-arms. However, in 1422 an army still contained less than 1/3 pikemen. The halberdiers both protected the flanks of the pikemen and to join in the melee if the pike column lost momentum. Command was still run by committee, hence no option for a legendary general.

FRENCH ORDONNANCE

1445 TO 1480 CE

HISTORICAL NOTES

This list covers the French armies from the Ordonnance reforms instigated in 1445. In 1446 twenty companies had been raised. By 1445 the English, having been abandoned by the Burgundians, were fighting a rear-guard action in France. By 1450 the French under their capable king Charles VII had reconquered Normandy. By 1453 Bordeaux had been captured and Guyenne was incorporated into France. Charles VII died in 1461 and was succeeded by Louis XI. Louis was able to isolate Burgundy from Edward IV of England and signed the Treaty of Picquigny in 1475 which officially ended the Hundred Years' War. After the death of Charles the Bold he seized numerous Burgundian territories including Burgundy proper.

TROOP NOTES

The Ordonnance of 1445 raised 15 companies of 100 lances. A lance comprised 1 man-at-arms, 1 coustillier and either 3 archers or 2 archers and a valet-de-guerre. They were paid both in war and peace and a real attempt made to enforce discipline and avoid living off the land. Coustilliers were more lightly equipped as were valet-de-guerre. The archers rode to battle but fought on foot. Crossbowmen and handgunners were used to protect the flanks of the army or skirmish in front of the army.

8,000 francs-archers were first raised by an edict in 1448. Every parish had to contribute either a longbowman or a crossbowman. They were paid only in wartime but exempt from taxes during peace. Advances in gunpowder followed the invention of the powder mill in 1429. The French developed the largest artillery train in Europe.

BURGUNDIAN ORDONNANCE

1471 TO 1477 CE

HISTORICAL NOTES

This list covers Burgundian armies after the reforms of Charles the Bold until his death at Nancy in 1477.

TROOP NOTES

The deterioration in the quality of Feudal troops and the unreliability of contingents from the Low Countries led Charles to institute a new regular army using the best troops and ideas from all over Europe. The Ordonnance specified that each gendarme was supported by a coustillier, a valet (unarmed) and three mounted longbowmen. The mounted archers were ordered on occasion to combine with pikes in a mixed formation. Each lance also included a pikeman, a crossbowman and a handgunner. Campaign records suggest that there was difficulty in obtaining enough missile men and this was made up with extra pikemen.

EDWARD IV ENGLISH

1475 TO 1482 CE

HISTORICAL NOTES

This list covers the English army that invaded France in 1475 and the army that invaded Scotland in 1482. The 1475 campaign had been planned in some detail. Edward had arranged alliances with the dukes of Burgundy, Brittany and the Count of St. Pol. Edward collected a large army, which included contingents provided by his brothers Clarence and Gloucester. This was probably the largest English army to invade France during the Middle Ages. The campaign achieved very little. The Duke of Burgundy was distracted by the siege of Neuss and eventually turned up without his army. The Count of St. Pol refused to give Edward access to St. Quentin as promised. Edward found himself fighting alone. In these circumstances he agreed the Treaty of Picquigny with Louis XI. The terms included a seven year long truce, an annual payment of 50,000 crowns to Edward and a marriage between the Dauphin and Edward's daughter Elizabeth. Edward was happy with this outcome, but some of his supporters are said to have grumbled about the peaceful end of the campaign.

TROOP NOTES

The armies raised for foreign expeditions did not draw on local levies but were recruited using a similar approach to that taken in the Hundred Years War.

HISTORICAL ENEMIES

Late Medieval Scottish 5415; French Ordonnance 5514.

Note: SPECIAL RULE: A TUG of 2 Royal household knights is exempted from the requirement to be 2 elements wide. Alternatively royal household knights may be combined with knights in a TuG of 4 or 6. Knights dismount as Formed Close, Average, Fully Armoured, 2-H Cut & Crush (Poor if downgraded to Poor). Royal household knights, if taken, must be in the army commander's command, whether separate or mixed. The army commander may still be a floating general, directly commanding only the TuG with the royal household knights. If so, the army commander must remain with the knights (unless the knights are broken or the army commander killed).
