ARMY LISTS

SOUTH AMERICA

Edited by Richard Jeffrey-Cook. Contributions from Simon Hall and Simon Clarke. Front image by Simon Clarke.

CONTENTS

Columbian Civilizations

6101	Muzo or Panche	800 to 1580 CE
6102	Columbian Indian	1000 to 1539 CE
6103	Muisca Confederation	1400 to 1541 CE
6104	Cauca Valley Tribes	1400 to 1542 CE
6105	Paez	1400 to 1542 CE

Brazilian Tribes

6106	Aruak and Carib Indian	1200 to 1539 CE
6107	Gé Brazilian Indian	1200 to 1539 CE
6108	Tupi	1200 to 1539 CE

Andean Civilizations

6109	Moche	100 to 750 CE
6110	Canari	500 to 1533 CE
6111	Chimu	900 to 1470 CE
6112	Chanka	1000 to 1440 CE
6113	Kingdom of Cusco	1200 to 1437 CE
6114	Inca Empire	1438 to 1545 CE
6115	Hatun-Colla	1440 to 1462 CE
6116	Northern Mapuche	1450 to 1552 CE

CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 4-12 cavalry (UG size 4,6) and 18-32 spearmen (UG size 6,8,9) as compulsory troops with 2 internal allies. The core army must take 4 cavalry and at least 18 spearmen. The first ally must take 4 cavalry and at least 9 spearmen. The second ally must take 4 cavalry but cannot take the 9 spearmen as this would exceed the 32 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry and characteristics. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

HISTORICAL INTRODUCTION

The first inhabitants settled in South America at least 11,200 years ago. The earliest permanent settlements date to 3500 BCE. Llamas and alpacas were domesticated in the highlands of the Andes at roughly the same time. The Norte Chico civilization emerged on the north-central coast of Peru at around 2700 BCE.

In Columbia the Chibcha speaking communities were the most numerous. The Muisca, known as “The Salt People”, were the most advanced. They inhabited the Eastern Ranges of the Columbian Andes. At the time of the Spanish conquest, they controlled an area of 25,000 square kilometres (9,700 square miles) and a total population of between 300,000 and 2,000,000. They traded with other Chibcha, Arawak and Cariban speaking groups. They were skilled workers in gold (creating the legend of El Dorado) and used coins.

For a long time, scholars believed the Amazon forests were only occupied by hunter-gatherers. It appears that the forests have been shaped by human activity for 11,000 years. Francisco de Orellana travelled the Amazon River in 1542 and described an advanced civilization flourishing at that time. Evidence of large settlements has been discovered. On the coastline of Brazil, Europeans encountered the Tupi tribes. These had pushed back earlier Ge tribes.

Along the Andes many different civilizations thrived. The earliest were the Chavin, a pre-literate society that existed between 900 and 200 BCE. The Moche thrived on the north coast of Peru between the first and the ninth century CE. After the collapse of the Moche the Chimu emerged. Chimor was the largest kingdom occupying 1000 km (620 ml) of coastline. The Cañari were the indigenous natives of Equador. The Inca civilization dominated the Andes region from 1438 to 1533. Inca rule extended to nearly a hundred linguistic or ethnic communities, some 9 to 14 million people connected by a 25,000 km (16,000 ml) road system. The Chankas were conquered in 1438. The Kingdom of Chimor (Chimu) around 1470. The Cañari repulsed the Incan invasion with fierce resistance for many years until they fell to Tupac Yupanqui. Tupac Yupanqui also conquered the Collas and the Anti. In the south the Inca advance was stopped by the Mapuche.

The shortage of bronze, tin and iron meant that the South American peoples relied on hardwoods and stone for many of their weapons. Poisons were widely used in blowpipes and on arrows.

The arrival of the Europeans had a disastrous effect on all the indigenous peoples of South America. With no resistance to smallpox, measles, and other diseases many populations were reduced by 95%.

MAXIMUS ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - MAXIMUS

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	1600	1400	n/a	n/a	800	700
Talented	1100	900	850	700	650	600
Competent	700	550	600	450	300	250
Mediocre	250	0	400	250	100	50

CAMPS

Type of camp	Poor	Average	Superior
Unfortified	108	180	252
Fortified	216	360	504
Flexible	180	300	420
Mobile	126	210	294
No camp	378	N/A	N/A

A flexible camp is deployed as a fortified camp when defending and a mobile camp when invading.
No camp deploys a poor mobile camp when defending and no camp at all when invading.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Magna and Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

MUZO OR PANCHE

800 TO 1539 CE

HISTORICAL NOTES

This list covers tribes of the Magdalena valley. The Panche appear to have pre-dated the invasions of Columbia that took place around 1000 CE. The Spanish allied with the Muisca zipa Sagipa to fight the Panche with only 50 Spanish soldiers and 12,000 to 20,000 guecha warriors in the Battle of Tocarema on August 20, 1538. The Panche then seem to have been quickly suppressed.

The Muzo seem to have arrived with other invaders around 1000 CE. A first attempt to suppress the Muzo by the Luis Lanchero, in 1539 failed. When Pedro de Ursúa founded the city of Tudela close to the Muzo territories in 1552, the Muzo people attacked and razed the newly founded settlement. Another expedition by Luis Lanchero, in 1559 or 1560 succeeded in subjugating the Muzo and Santísima Trinidad de los Muzos was founded on the remains of the earlier settlement.

TROOP NOTES

Warriors were armed with bows, often using poisoned arrows. Clubs were also carried.

COLUMBIAN INDIAN

1000 TO 1539 CE

HISTORICAL NOTES

This list covers tribes including the Pijao, Andaquí, Guayupe and Sae that occupied the Colombian highlands and savanna. They fought wars against the Muisca.

TROOP NOTES

The main weapon used by the Colombian tribes were spears up to 14 feet long. Other weapons included clubs, darts, arrows and slingshots. The Guayupe and Sae used round shields of tapir or manatee hide. The Achagua used shields woven from cane.

HISTORICAL ENEMIES

MUISCA CONFEDERATION

1400 TO 1541 CE

HISTORICAL NOTES

The Muisca, a Chibcha speaking people occupied the central part of present-day Columbia, the Eastern Ranges of the Columbian Andes. They were organized in a confederation that was a loose union of states. The central authorities of the south and north were called the zipa and zaque respectively. In 1470 zipa Saguamanchica conquered the Sutagao at the battle of Pasca. He apparently led an army of 30,000 warriors. In 1490 he led another army against the zaque Michuá who reportedly had an army of 60,000 warriors. His army won the battle, but both leaders were killed. The Spanish conquistadors entered Muisca territory in 1537. In 1538 a new settlement Santafé de Bogotá was founded as the capital of the New Kingdom of Granada. The Spanish allied with zipa Sagipa and fought the Panche with only 50 Spanish soldiers and 12,000 to 20,000 guecha warriors in the Battle of Tocarema on August 20, 1538.

TROOP NOTES

The guecha warriors enjoyed special privileges and were considered a higher class of the society than the general people. They went through years of training in combat. Weapons included clubs, darts, spears, arrows, and slingshots. Slaves taken from the Panche and Colimas were taken into war. Slaves were used to produce bows and arrows. Cotton mantles and shields were taken as protection against poisoned arrows and darts. Muisca spears sometimes had flint blades. They also used Inca-style fluted maces.

HISTORICAL ENEMIES

Muzo or Panche 6101; Muisca Confederation 6103; Paez 6105.

BATTLES AND CAMPAIGNS

CAUCA VALLEY TRIBES

1400 TO 1539 CE

HISTORICAL NOTES

This list represents the various tribes living in the Cauca valley including the Pubén (Popayan).

TROOP NOTES

The tribes made considerable use of spear-throwers which were used to hurl cane darts up to 7 feet long. Spears had fire-hardened points.

HISTORICAL ENEMIES

PAEZ

1500 TO 1539 CE

HISTORICAL NOTES

The Paez were a tribe who were enemies of the Muisca confederation and fought the Spanish.

TROOP NOTES

According to the Spanish, the Paez were armed with spears up to 28 feet in length made from the wood of the Chonta palm. Shields were of jaguar, puma, and bear skins.

ARUAK AND CARIB INDIAN

1200 TO 1539 CE

HISTORICAL NOTES

The Aruak and Carib speaking nations were inhabitants of the Amazon basin and part of a language group that spreads through central American as far as Florida. Jesuits in the 16th century reported large cities in the Amazon basin. Until recently these accounts had been dismissed. Archaeological surveys have however discovered huge sites now covered in jungle.

TROOP NOTES

The bow was widely used by Aruak and Carib tribes.

GÉ BRAZILIAN INDIAN

1200 TO 1539 CE

HISTORICAL NOTES

Gé-speaking nations included the Waitacá, Aimoré, Coroado, Puri and Cariri (or Tacaniju). They probably inhabited the Atlantic coast before being evicted by the Tupi. The Gé-speaking people then occupied the open plateau and scrublands of central and eastern Brazil and tended to avoid forested areas. The Waitacá were based at the swampy mouth of the (southern) Paraíba river (between the São Tomé and Espírito Santo captaincies) and near the Lagos Feia ('Ugly Lagoon') on the Campos dos Guaitacazes ('Plain of the Waitac') but may have occupied a larger area. Waitacá is a modern phonetic spelling of the tribe's name; colonists called them Goya-taka, Waitacazes or Ouetacazes. Although continually at war, they survived the Tupi invasions, and survived the Portuguese invasion for 100 years.

TROOP NOTES

The Waitacá were great hunters: both men and women were fine archers.

Upgrade warriors represent raiders from tribes such as the Gueren-Gueren and Cariri.

TUPI

1200 TO 1539 CE

HISTORICAL NOTES

Tupi tribes included the Tupinambá, Tupinikin, Tobayara, Potiguar and Tupina. The primary motive for Tupi aggression was not to capture territory but to capture prisoners for ritual slaughter and eating. This in turn led to bloody cycles of vendettas. They originated to the south, probably in the Paraguay basin. As they moved north, they displaced the Gé-speaking nations and fragmented into a score of tribes.

TROOP NOTES

The Tupi fought in a solid mass with bows, shields and two-handed wooden swords and clubs. Some were reported charging like bulls. The weapons, like their bodies, were decorated with brightly coloured feathers.

MOCHE

100 TO 750 CE

HISTORICAL NOTES

Moche, also called Mochica, was an Andean civilization that flourished from the 1st to the 8th century CE on the northern coast of what is now Peru. The name is taken from the great site of Moche, in the river valley of the same name, which appears to have been the leading city of the Moche peoples. Their settlements extended along the hot, arid coast of northern Peru from the Lambayeque River valley south to the Nepeña River valley. The Moche influenced the Chimu Empire.

TROOP NOTES

Moche armies were composed of elite warriors from the upper classes and were led by royal officers. They were well equipped for hand-to-hand combat. They wore conical helmets with decorative projections on top and skirt tunic-like garments that differed for each warrior, and they carried rectangular or circular shields. The mace was the principal weapon. Two types were used; one had a conical end; the other was star shaped. Warriors depicted on Moche pottery are shown holding the mace in both hands, with the shield not being used. Other weapons included spears, atlatls and slings.

HISTORICAL ENEMIES

Moche 6109.

CANARI

500 TO 1533 CE

HISTORICAL NOTES

The Cañari are an indigenous ethnic group traditionally inhabiting the territory of the modern provinces of Azuay and Cañar in Ecuador. They are descended from the independent pre-Columbian tribal confederation of the same name. The historic people are particularly noted for their resistance against the Inca Empire. Eventually conquered by the Inca in the early 16th century shortly before the arrival of the Spanish, the Cañari later allied with the Spanish against the Inca.

During the Inca Civil War between the sons of Huayna Capac, the Cañari chose to support Huáscar, despite being positioned in the northern area inherited by the son and heir Atahualpa. Initially, Huáscar's generals Atoc and Hango were successful, defeating Atahualpa's army, capturing many of his soldiers, and seizing the large cities Cajamarca and Tumebamba. Aided by his father's loyal generals, Atahualpa managed to rout the Huáscaran army in the battles of Mullihambato and Chimborazo. This forced the interlopers back to the south. He captured and executed Huascar's generals and executed the Cañari supporters once he reached Tumebamba.

TROOP NOTES

The Cañari weapon was a long spear between 3 and 4 metres (10 and 13 feet) in length. Some troops wore wicker armour.

HISTORICAL ENEMIES

CHIMÚ

900 TO 1470 CE

HISTORICAL NOTES

This list starts with their first possible contact with the Chanka. The Chimú grew out of the remnants of the Moche culture. The Chimú Empire was one of the largest pre-Hispanic New World states, dominating much of the north coast of Peru between 900 and 1470 CE when they were conquered by the rival Inca Empire. The Chimú capital, Chan Chan, was established in the 10th century on a flat plain near the Pacific Ocean, some seven kilometres north of the Moche River. By the fifteenth century Chan Chan had developed into one of the largest urban settlements in the pre-Hispanic Americas.

TROOP NOTES

Textile armour and helmets were worn by at least some and the main close quarter weapon appears to have been a hardwood club used with a small round shield. The atlatl dart-thrower also seems to have been in use.

HISTORICAL ENEMIES

CHANKA

1000 TO 1440 CE

HISTORICAL NOTES

The Chanka (Chanca) people or Chinchaysuyu were a loose confederation of tribes. Enemies of the Incas, they were centred primarily in Andahuaylas, located in the modern-day region of Apurímac. The Chankas were divided into three groups: the Hanan Chankas, or the Upper Chankas, the Urin Chankas, or the Lower Chankas, and the Villca or Hancohuallos. The height of the Chanka's expansion occurred between the years 1200 and 1438.

According to some Incan traditions, the Urin Chankas had been conquered around the year 1230. The Incan Garcilaso de la Vega gives Cápac Yupanqui a similar feat one hundred years later. However, the most solidly researched version establishes their defeat and subsequent submission at the hands of the army commanded by the Incan Pachacuti. In 1438, the Chanka nation attacked the Inca Empire at Cusco. Prince Yupanqui defeated the Chanka and adopted the name Pachacuti.

TROOP NOTES

Some Chanka warriors wore quilted cotton armour and carried a small square shield. The primary weapon was the long spear 3 to 4 metres (10 to 13 feet) in length. At the Battle of Cusco, the Chanka appear to have suffered from the Inca slingers, suggesting they had few skirmishers of their own.

KINGDOM OF CUSCO

1200 TO 1437 CE

HISTORICAL NOTES

Under the leadership of Manco Cápac, the Inca formed the small city-state Kingdom of Cusco.

TROOP NOTES

Inca aucaruna (or auqua) were armed with a champi (war club) a short thrusting spear. Troops could have a canipu (breastplate) or cotton padded armour and a polcana (small square shield with a long fabric apron).

Slings were widely carried. Skirmishers used not only the sling but bows and dart throwers and bolas.

INCA EMPIRE

1438 TO 1545 CE

HISTORICAL NOTES

The Inca civilization arose from the highlands of Peru sometime in the early 13th century. Under the leadership of Manco Cápac, the Inca formed the small city-state Kingdom of Cusco. In 1438, they began a far-reaching expansion under the command of Sapa Inca (paramount leader) Pachacuti-Cusi Yupanqui. He conquered the Chankas. Traditionally the son of the Inca ruler led the army. Pachacuti's son Túpac Inca Yupanqui began conquests to the north in 1463 and continued them as Inca ruler after Pachacuti's death in 1471. Túpac Inca's most important conquest was the Canari Kingdom of Chimor, the Inca's only serious rival for the Peruvian coast. Túpac Inca's empire stretched north into modern-day Ecuador and Colombia but to the south was stopped by the Mapuche.

Spanish conquistadors led by Francisco Pizarro reached Inca territory by 1526. After another expedition in 1529 Pizarro travelled to Spain and received royal approval to conquer the region and be its viceroy. When they returned to Peru in 1532, a war of brothers between the sons of Huayna Capac, Huáscar and Atahualpa, the spread of smallpox and unrest among newly conquered territories weakened the empire. Through bluff and deception, the Spanish captured Atahualpa, and the Inca Empire. Atahualpa's brother Manco Inca Yupanqui was installed by the Spanish while they suppressed resistance in the north. Manco Inca then retreated to the mountains of Vilcabamba and established the small Neo-Inca State, where he and his successors ruled for another 36 years until Túpac Amaru, Manco's son, was captured and executed in 1572.

TROOP NOTES

Huaminca (hearthguard) were troops raised in the capital Cuzco. They received formal military training from adolescence.

Inca aucaruna (or auqua) were armed with a champi (war club) a short thrusting spear. Troops could have a canipu (breastplate) or cotton padded armour and a polcana (small square shield with a long fabric apron).

Most troops were conscripted militia with equipment supplied by the state. Military discipline was fierce. Weaponry varied according to tribal custom, and each nationality was required to wear distinct tribal insignia.

Some Inca guardsmen were armed with a yauri, a halberd. Canari spearmen were recruited by Tupac Inca as royal guardsmen. From the 1490's full time garrison troops were maintained, mostly recruited from Canari spearmen.

Slings were widely carried. Skirmishers used not only the sling but bows and dart throwers and bolas.

Chanka and Canari were armed with longer spears. Chimu carried heavier maces and clubs. Charca used two-handed chonta-wood swords.

HATUN-COLLA

1440 TO 1462 CE

HISTORICAL NOTES

The Colla lived on the western edge of Lake Titicaca, on the border between modern Peru and Bolivia. During the first half of the 15th century CE the Hatun-Colla ("the great kingdom of the Colla") was expanding. In 1450 Ruquicapana inherited the throne. In the early 1450s he attacked the Canas kingdom of Barcuvilca. The ensuing war lasted several years but Ruquipana emerged victorious. He then formed an alliance with the La Paz kingdom on the eastern side of the lake, cemented by marriage. In around 1457 the king then attacked the kingdom of Chiribaya to the south. This small desert kingdom succumbed. Ruquipana now turned his attention to the Luparca kingdom to the south-west of the lake. The Luparcan king appears to have been prepared, having formed an alliance with other states that had at one time formed the heart of the Tiwanaku Empire and with the Incan king Pachacuti.

The Cana allies of Ruquipana ambushed an Incan army marching to attack the Colla army. It initially defeated the Incan vanguard but was routed when the main Incan army under Pachacuti arrived. The Luparcan army then forced march and surprised the Collan forces near Lake Mayo. Ruquipana was killed and the Colla kingdom was subjugated by the Incas. The Collas would however rebel against the Incas several times over the next seventy years.

TROOP NOTES

Colla warriors used spears and swords made from the wood of the Chonta trees or small hand maces. They also carried round shields. Nobles wore armour, common troops were unarmoured. Canas allies used mace and bolas and had quilted armour. Chiribaya troops used short spears and wicker shields.

NORTHERN MAPUCHE

1450 TO 1552 CE

HISTORICAL NOTES

The Mapuche occupied what is today central Chile. The northern Mapuche were known as the Picunche. As the Incas expanded southwards, they encountered the Picunche people, the northern branch of the Mapuche people. In a six-year campaign with an army that eventually rose to 50,000 men, the Inca general Sinchiruca had subdued the regions to the north. The Picunche resisted the Incas and were joined by allies to the south, the Antalli, Pincu and Cauqui in opposing the invaders. This alliance was called Purumaucaes, the Incan term for "savage enemy" which the Spanish later changed into Promaucaes.

A three-day battle was fought at the Maule River without either side gaining an advantage. Three further days were spent by both sides in their fortified camps before the Purumaucaes retired on the seventh day and returned home claiming victory.

The Spanish entered Chile from Peru and in 1541 Pedro de Valdivia founded Santiago. The northern Mapuche tribes fought against Spanish conquest, but little is known about their resistance.

TROOP NOTES

Northern Mapuche warriors appear to have been armed with short spears. They may also have had archers who also carried long 2-handed wooden clubs called longquilquil.
