PRE-BATTLE SYSTEM

Deciding Invader and Defender		
Roll a dice each: RED / YELLOW / GREEN / WHITE for <i>legendary/talented/competent/mediocre army commander</i> .		
Winner chooses to be <i>invader</i> or <i>defender</i> , winner with a Skull can choose a <i>strategic intercept</i> . Reroll ties.		
Draw the number of <i>cards</i> shown for <i>PBS</i> from your <i>army builder</i> .		
Each play first <i>PBS card</i> . If <i>invader</i> wins, they pick a <i>territory type</i> from <i>defenders</i> list options, otherwise <i>defender</i> chooses.		
If a <i>strategic intercept</i> , the <i>attacker</i> places the <i>army counter</i> , otherwise <i>defender</i> .		
The <i>army counter</i> must <u>always</u> remain in a map square with the <i>territory type</i> that has been chosen.		
Setting the location of the battle The five day build up		
Simultaneously play a <i>card</i> each, move the <i>army counter</i> according to the difference - always <u>stay in</u> the <i>territory type</i> .		
Repeat 4 more times to find the final <i>location</i> of battle after 5 days.		
If you do not have enough <i>cards</i> , you must <i>pass</i> on some days (you choose which), this counting as if a BLACK <i>card</i> .		
You may keep any remaining unplayed <i>cards</i> for <i>outscouting</i> - do NOT mix used <i>cards</i> back into the pack.		
Setting up the Terrain		
Secure Flanks (vertical axis of the <i>PBS Map</i>) - items <u>cannot</u> be moved by opponent.		
Any <i>deep water</i> flank covers the full table width, and is placed by the <i>defender</i> $\leq$ 6HBW* into the table (therefore entirely secure).		
Otherwise place <i>compulsory-sized</i> terrain from those noted on the side of the <i>PBS Map</i> for the battle location (must be allowed in <i>territory type</i>).		
Terrain Density (horizontal axis of the <i>PBS Map</i>) - items <u>can</u> be moved by opponent		
Further terrain items must be of types allowed for the <i>Territory Type</i> previously chosen.		
Terrain type	Compulsory items in total (shared)	Optional items each (per player)
Very Dense	2 <i>Rough/Good</i> <u>and</u> 2 <i>Difficult</i>	Up to 3 any
Dense	1 <i>Rough/Good</i> and 2 <i>Difficult</i>	Up to 2 any
Normal	2 <i>Rough/Good</i> or <i>Difficult</i>	Up to 2 any
Open	1 <i>Rough/Good</i> or <i>Difficult</i>	Up to 1 (no <i>Impassable</i>)
Featureless	Nothing	Up to 1 (no <i>Impassable</i>)
The <i>defender</i> chooses a <i>compulsory item</i> , then the <i>invader</i> until all are chosen.		
<i>Compulsory items</i> must cover at least 6HBW x 6HBW* minimum and fit within 10HBW x 10HBW*.		
Place <i>compulsory items</i> alternatively starting with the <i>defender</i> .		
AFTER <i>compulsory items</i> are down, repeat the process for <i>optional items</i> .		
<i>Optional items</i> must cover at least 4HBW x 4HBW* and fit within 8HBW x 8HBW*.		
Other Terrain Placement (i.e. not Secure Flank items)		
The table has two flank sectors of 10HBW* - the remainder is the centre.		
The <i>placement dice</i> is a D6 and results are always taken from <i>your own</i> perspective.		
1/2 = left flank sector, 3/4 centre sector, 5/6 right flank sector; <u>odd</u> numbers must touch a table edge.		
At initial placement, all items must be at least 2HBW from any terrain other than <i>deep water</i> (may touch these).		
Then d6 for opposing player who can: a) <u>move</u> item up to 6HBW on 4+, b) <u>pivot</u> item on 5+, c) <u>remove</u> item on a 6.		
Scouting		
AFTER all terrain is down check for <i>outscouting</i> .		
Deal <i>cards</i> so you have the total number for scouting from your <i>army builder</i> (i.e. including any you saved).		
<i>Cards</i> are worth a % of an army: RED 40% of an army, YELLOW 20%, GREEN 10%, others 0.		
Compare best 5 cards or less, if one side has more army % then the lower is <i>outscouted</i> by the % difference.		
Deployment Zones		
<i>Deployment zone</i> is $\geq$ 6HBW from the table centre line (i.e. can be at 6HBW).		
Unless on a <i>secure flank</i> or in <i>ambush</i> , only <i>SuGs</i> may be deployed within 5HBW of table side edges.		
Deployment Process		
If one army is <i>outscouted</i> , the <i>outscouted</i> player places <i>UGs</i> until the % by which he was <i>outscouted</i> is on table. If the player has any 1) <i>UGs</i> with barricades/obstacles 2) artillery or 3) expendable these must be placed before other <i>UGs</i> .		
If neither army was <i>outscouted</i> , the <i>defender</i> places 1/3 of his <i>UGs</i> as above.		
Whatever the scouting result, both players place <i>ambushes</i> and <i>flank marches</i> - and may place <i>flank marching generals</i> as a bluff.		
The army with nothing deployed yet then deploys the same % of his army as his opponent has deployed.		
Thereafter, in all cases, players alternate placing in 1/3's until all on-table <i>UGs</i> are deployed.		
<i>Defender</i> places <i>generals</i> , declaring which <i>UGs</i> (including <i>ambush cards</i>) are in their command, then <i>invader</i> .		
A <i>flank march general</i> remains off table with a R/L flank march card under him until arrival
