CREATING AN ARMY WITH THE MORTEM ET GLORIAM ARMY LISTS

Use the army lists to create your own customised armies using the Mortem et Gloriam Army Builder.

There are few **general rules** to follow:

1. An army must have at least 2 generals and can have no more than 4.
2. You must take at least the minimum of any troops noted and may not go beyond the maximum of any.
3. No army may have more than two generals who are Talented or better.
4. Unless specified otherwise, all elements in a UG must be classified identically. Unless specified otherwise, if an optional characteristic is taken, it must be taken by all the elements in the UG for which that optional characteristic is available.
5. Any UGs can be downgraded by one quality grade and/or by one shooting skill (Skilled to Experienced or Experienced to Unskilled) representing less strong, tired, or understrength troops. If any bases are downgraded all in the UG must be downgraded. So Average-Experienced skirmishers can always be downgraded to Poor-Unskilled.
6. Points are shown for troops with all mandatory characteristics applied. Points have been rounded to the nearest whole number. If quality or shooting skill is downgraded, then the points (including the points for any optional characteristics) will need to be adjusted.
7. An army entirely of Cavalry, Chariots, Camelry or Infantry with the Dismountable characteristic may choose the No Camp option.

Where **allies** are allowed, they must conform to the following rules:

1. An ally must be a minimum of 2 and a maximum of 4 UGs.
2. They must take enough UGs to get them to at least 50% of the minimums in the list being used.
3. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.
4. Unless specified in the notes, the general must be the same type as the army commander in their own army's list but cannot be legendary.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

Where an **internal ally** is allowed, and no contingent is specified they must conform to the following rules:

1. Each internal ally must be a minimum of 2 and a maximum of 4 UGs.
2. The total number of troops taken of each type in the entire army must not exceed the maxima for that troop type.
3. They must take enough UGs to get them to at least 50% of the minimums in the list if there is enough allowance for a UG after the core army itself has taken the minimum. For example: An army has 1-4 cavalry (UG size 1,2) and 6-10 spearmen (UG size 2,3) as compulsory troops with 2 internal allies. The core army must take 2 cavalry and at least 6 spearmen. The first ally must take 1 cavalry and at least 3 spearmen. The second ally must take 1 cavalry but cannot take the spearmen as this would exceed the 10 spearmen limit for the army.

4. If a list requires a proportion of a troop type to be upgraded or regraded, then the army as a whole must comply with this requirement. Internal allies do not have to comply these requirements. For example: $\frac{1}{4}$ to $\frac{3}{4}$ of Turcomans must be upgraded from Experienced to Skilled shooting. An internal ally might have all Experienced as long as the army as a whole has $\frac{1}{4}$ to $\frac{3}{4}$ Skilled.
5. They can thereafter take any troops up to the maximum to create the rest of the allied contingent.

Usually this results in 1-3 UGs being compulsory and you having full flexibility on the rest.

As a courtesy to your opponent when you deploy your troops, you should describe each UG fully; type, training, quality, protection, melee weaponry, shooting skill and weaponry, characteristics, and which ally if appropriate. You should also explain how any unusual troop types in your army function and any special rules including Stakes, Caltrops, Barricades and Obstacles and troop types such as Battle Wagons.

The easiest way to calculate points is to use the downloadable on-line army builder at www.mortem-et-gloriam.co.uk. Use this and all you do is use drop downs for the troop classifications and it does all the work for you. For those who prefer pen and paper, or who want to doodle some approximate designs before loading an army up, we have provided the points values with the lists. If a discrepancy exists in the points values between these lists and the army builder, then the army builder has the correct value.

FRIENDLY AND SCENARIO GAMES

Feel free to vary the troop classifications for friendly and scenario games. An interesting aspect of scenario games can be to see what the effect is from representing troops in a different manner.

PACTO ARMY LISTS

CALCULATING POINTS

Army points are calculated as follows:

GENERALS - PACTO

Type of general	Army Commander		Sub-general		Ally general	
	Professional	Instinctive	Professional	Instinctive	Professional	Instinctive
Legendary	640	560	n/a	n/a	320	280
Talented	440	360	340	280	260	240
Competent	280	220	240	180	120	100
Mediocre	100	0	160	100	40	20

CAMPS

Camps are not included in Pacto games.

UGs

For each UG multiply the cost shown in the list (adjusting for any optional characteristics) by the number of bases.

NOTES

1. Points values for skirmishers in Pacto are greater than in Maximus as SuGs shoot at full effect with only two ranks.
2. For further details on how points are calculated visit the Mortem et Gloriam website.

Note: OPTIONAL SPECIAL RULE: Applies to Qin close fighters with the Devastating Chargers characteristic, either all or none. When they declare a charge they become Unprotected but gain the Fleet of Foot and Melee Expert characteristics (and can declare the charge at skirmish movement distance). They remain this way for the rest of the game. If using this rule, it must be notified to your opponent when the UGs are deployed. It is recommended to use a marker (perhaps some discarded armour) to indicate which TuGs have charged. In a multi-round tournament if this option is used it must apply to all games.

In the army builder, insert "Experienced-Light Artillery" shooting in the firing section of one shooting base of the TuG, and use a light gun base for this. Note that this base is still an infantry base not an artillery base. The TuG moves at BWg speeds (but may double move) and with any move the TuG may abandon the light guns, in which case replace the artillery base with a normal infantry base that matches the rest of the TuG, and revert to infantry speeds for movement thereafter. Note that a file may only shoot once and the file with the artillery must choose whether to shoot the artillery or to shoot as bow, crossbow or handgun in which case the base with Guns shoots as the rest of the TUG. The rule for charging guns (KaB test) will apply if the base with light guns is charged – so it must be in the front rank to get this benefit. This special rule should be explained to opponents as soon as the first TuG of this type is deployed.

Note: SPECIAL RULE - LIGHT GUNS. Instead of being deployed separately, light guns may be attached to any infantry TuG except Gansidui, provincial or tribal troops. In the army builder, insert "Experienced-Light Artillery" shooting in the firing section of one shooting base of the TuG, and use a light gun base for this. Note that this base is still an infantry base not an artillery base. The TuG moves at BWg speeds (but may double move) and with any move the TuG may abandon the light guns, in which case replace the artillery base with a normal infantry base that matches the rest of the TuG, and revert to infantry speeds for movement thereafter. Note that a file may only shoot once and the file with the artillery must choose whether to shoot the artillery or to shoot as bow, crossbow or handgun in which case the base with Guns shoots as the rest of the TUG. The rule for charging guns (KaB test) will apply if the base with light guns is charged – so it must be in the front rank to get this benefit. This special rule should be explained to opponents as soon as the first TuG of this type is deployed.
